PRINCIPLE 2 Businesses should provide goods and services in a manner that is sustainable and safe

Essential Indicators

- 1 Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

	FY 2023	FY 2022	Details of improvements in environmental and social impacts
R&D	0%	0%	1. The Company has successfully converted its furnace oil fired boiler to an LDO (Light Diesel Oil) fired boiler, resulting in a shift in fuel usage from furnace oil to LDO. 2. To enhance energy efficiency and reduce reliance on fossil fuels, a heat pump recovery chiller has been implemented. This system allows for heating water to 50 degrees Celsius for HVAC (Heating, Ventilation, and Air Conditioning) purposes without relying heavily on the boiler. As a result, the consumption of fossil fuels has been significantly reduced, leading to lower greenhouse gas emissions. 3. In an effort to promote water conservation, the Company has implemented a water recycling system for the effluent treatment plant. This involves utilising a tertiary reverse osmosis system to treat the reject water from the main primary water treatment process. 4. Moreover, in the previous year, the Company invested in a solar plant, which has effectively decarbonised the electrical units' requirements. Approximately 65-70% of the plant's electrical energy demand is met through solar power obtained through open access, thereby reducing reliance on conventional sources and contributing to a greener energy mix.
Capex	0.32%	10.92%	

- 2 a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

The Company is committed to quality, safety and reliable supply of products for patients and consumers. From the sourcing of materials to the manufacturing and marketing of the products, the Company make sure that effective quality management practices are strictly followed during all stages of the supply chain. The Company's primary focus is on engaging local suppliers, fostering cost efficiencies, and minimising environmental impacts such as air and noise pollution (as well as reducing the consumption of natural resources like petrol and diesel). The Company prioritises the safety of its patients and consumers, placing it at the forefront of their operations. As a responsible entity, the Company has implemented comprehensive controls to detect, assess, and communicate the benefits, risks, and potential safety issues

associated with their products. To ensure the availability of current and relevant information, the Company ensures that up-to-date details are provided on the product packaging. In line with their commitment to product quality, the Company adheres to Good Manufacturing Practice (GMP) regulations and other established procedures. These procedures are documented in the BGPL Quality Management System. Compliance with GMP standards allows the company to consistently produce and maintain control over their medicinal products, ensuring the highest quality standards are upheld. The Company endeavours to implement responsible procurement practices across its supply chain. As a measure of enhancing its impact on the environment and society, the Company encourages local sourcing enabling the reduction in costs, currency risks and environmental footprint of the transportation services. Moreover, the Company has implemented a comprehensive quality and Environmental, Health, and Safety (EHS) policy.

- 4 Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.

The Company had a Effluent Treatment Plant (ETP) that encompasses a comprehensive three-stage system: primary, secondary, and tertiary treatment. This advanced facility ensures the effective purification of wastewater generated by the company's operations. To further enhance the treatment process, the Company employs ozone as an additional treatment method, which aids in the removal of organic compounds and contaminants.

Following the ozone treatment, a sophisticated two-stage Reverse Osmosis (RO) process is employed. This process utilises a semi-permeable membrane to effectively remove dissolved salts, heavy metals, and other impurities from the treated water. The RO process plays a crucial role in achieving a high degree of water purity and ensuring compliance with stringent water quality standards. Additionally, the Company incorporates a Multiple Effect Evaporator (MEE) plant.

7 Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details

Yes, the Company has successfully transitioned from using furnace oil to adopting an LDO (Light Diesel Oil) fired boiler, thereby altering its primary fuel source. This strategic shift has effectively optimized the company's energy efficiency while reducing its reliance on fossil fuels. Additionally, the implementation of a heat pump recovery chiller system has further bolstered energy efficiency by enabling the heating of water up to 50 degrees Celsius for HVAC (Heating, Ventilation, and Air Conditioning) purposes, reducing the Company's dependence on the boiler. Consequently, the Company has achieved significant reductions in fossil fuel consumption, leading to a noteworthy decrease in greenhouse gas emissions.
