IT hiring dips 26% in November

Second straight month of decline from Sept's all-time high: Naukri Index

OUR BUREAU

Mumbai, December 9

Hiring by Information Technology companies seems to be tapering off. According to the Naukri JobSpeak index, which tracks job postings on the Naukri platform for different industry sectors, November has been the second straight month of decline in job postings from IT services companies.

As per the index, hiring activity in the sector is down 26 per cent from the all-time high activity seen in September, and is the lowest in seven months.

"Historically, IT attrition activity has had a high correlation with the JobSpeak index (73 per cent over the last five years); hence, any moderation

in the index level is an important lead indicator of employee movement within the IT Services industry," according to a report on the technology sector by Motilal Oswal Financial Services.

"While we have data on hiring moderation for only two months, and that after a massive 140 per cent y-o-y increase in September 2021, the sharp deterioration indicates either the peaking or easing of the decade-high attrition in the IT Services industry," it added.

Any easing of attrition pressure in the sector could materially impact the profitability of IT services companies under our coverage—as an increase in attrition has resulted in a

The top four IT companies added over 50,000 employees in Q2

sharp jump in both hiring activity as well as cost per employee across the industry, it said.

Increase in attrition

The top four Indian IT companies added over 50,000 employees in the second quarter of FY22, taking their total recruitment to over one lakh in the first six months of the fiscal year. The increased hiring is

also because IT companies are seeing an increase in attrition levels.

Both Infosys and Wipro reported the highest attrition rates this quarter on LTM (last twelve months) basis at 20.1 per cent and 20.5 per cent, respectively. Infosys' attrition rate was 7.8 per cent in the same quarter last year while it stood at 13.9 per cent in the first quarter this fiscal.

Paytm Payments Bank gets scheduled bank status

KR SRIVATS

New Delhi, December 9

Paytm Payments Bank Limited (PPBL), an associate entity of Paytm, has received scheduled bank status from Reserve Bank of India and has been included in the Second Schedule to the Reserve Bank of India Act, 1934.

More opportunities

Being a scheduled payments bank, it can now explore new business opportunities. It can participate in government and other large corporations-issued request for proposals (RFP), primary auctions, fixed-rate and variable rate repos, and reverse repos, along with participation in marginal standing facility.

Satish Kumar Gupta,
MD & CEO, PPBL

It is also now eligible to partner in government-run financial inclusion schemes.

New era

Satish Kumar Gupta, MD & CEO of Paytm Payments Bank, said, "We have witnessed a fast adoption of di-

gital banking services, with users appreciating the new era of banking in India. The inclusion of Paytm Payments Bank in the second schedule to the Reserve Bank of India Act, 1934, will help us innovate further and bring more financial services and products to the underserved and unserved population in India."

As per RBI Act 1934, banks satisfying the central bank that its affairs are not being conducted in a manner detrimental to the interests of its depositors are included in the second schedule.

Paytm Payments Bank powers 33.3 crore Paytm Wallets and enables consumers to make payments at over 87,000 online merchants and 2.11 crore in-store merchants. Over 15.5 crore Paytm UPI handles have been created and are used to make and receive payments. The bank is the largest beneficiary bank and one of the top remitter banks for UPI transactions in the country.

cream sold by a parlour or any similar outlet would attract GST at the rate of 18 per cent.

Retrospective effect?

In a representation, ice cream manufacturers have requested that, "Board (Central Board of Indirect Taxes & Customs) may kindly take steps either to clarify that the GST rate of 18 per cent on supply of ice cream by ice cream parlours would have only prospective effect, and if necessary, to suitably amend relevant notification to apply the rate of 5 per cent GST for the period from July 1, 2017 till the date of the present clarification i.e., October 6, 2021."

A Finance Ministry official said that normally taxation on consumption is not levied with retrospective effect.

"Still, if there is some confusion, that needs to be removed," he said.

Unclear clarification

People associated with ice cream industry said that GST at the rate of 5 per cent on retail sale was being collected till October 5 and afterwards according to clarification. However, they said that the clarification is giving an impression of applicability of 18 per cent GST from July 1, 2017.

CMS Info Systems expects rise in number of ATMs

Foresees more banks opting for services managed by third parties

SURABHI

Mumbai, December 9

CMS Info Systems expects the number of ATMs in the country to expand and also foresees more banks choosing to go for managed services by third parties to operate them.

"There is tremendous headroom for the market to grow. CMS is a large player in the segment and we are very positive about the market," said Manjunath Rao, President - Managed Services Business, CMS Info Systems.

Rising interest

The managed services or brown label ATM market was about ₹6,800 crore in 2020-21 and is expected to reach a size of ₹17,090 crore by 2026-27, he said.

The company has won contracts worth ₹1,300 crore for brown label ATMs and managed services with key customers including State Bank of India, ICICI Bank and HDFC Bank.

According to Rao, about 86,000 ATMs were outsourced by banks in 2020-21 with private banks being early adopters of brown label ATMs.

However, public sector banks are also now looking at this seriously and lenders including SBI, Bank of Baroda and Bank of India have issued requests for proposal for about 20,000 brown label ATMs in the last 18 months.

Remote monitoring

In terms of remote monitoring also, CMS Info Systems is upbeat about the potential given the priority to security at ATMs.

GST Council may clear air on ice cream parlour levies

Companies seek clarity on date of imposition

SHISHIR SINHA

New Delhi, December 9

The GST Council, expected to meet later this month, is likely to take up the issue of levy on ice cream parlours.

Ice cream companies have urged for clarification on the applicability of GST at the rate of 18 per cent.

"The matter is expected to be placed before the GST Council. Based on its recommendation, we will issue clarification," a senior Finance Ministry official told *BusinessLine*. The GST Council, in its meeting on September 17, made it clear that ice cream parlours sell already manufactured ice-cream which would attract GST at the rate of 18 per cent.

Paytm Payments Bank powers 33.3 crore Paytm Wallets and enables consumers to make payments at over 87,000 online merchants and 2.11 crore in-store merchants.

Over 15.5 crore Paytm UPI handles have been created and are used to make and receive payments.

The bank is the largest beneficiary bank and one of the top remitter banks for UPI transactions in the country.

Ice cream as a 'good'

Following this, on October 6, the Finance Ministry issued a clarification saying where ice-cream parlours sell already manufactured ice-cream and do not cook or prepare ice-cream for consumption like a restaurant, ice cream is supplied as goods and not as a service even if the supply has certain ingredients of service. Accordingly, it clarified that ice

Unclear clarification

People associated with ice cream industry said that GST at the rate of 5 per cent on retail sale was being collected till October 5 and afterwards according to clarification. However, they said that the clarification is giving an impression of applicability of 18 per cent GST from July 1, 2017.

Software market likely to cross \$8.2 b

IDC report notes that it registered growth of 15.9 per cent y-o-y in H1 CY21

OUR BUREAU

Bengaluru, December 9

Research and forecast firm International Data Corporation (IDC) has estimated that the India software market will surpass \$8.2 billion by the end of calendar year 2021. The market was pegged at \$4.0 billion in H1 CY21, registering a growth of 15.9 per cent year-on-year compared to H1 CY20.

India accounted for 18.3 per cent of the overall Asia-Pacific, excluding Japan and China (APeJ) region software market during H1 CY21. Microsoft, Oracle and SAP maintained their leadership position in the India market.

IDC classifies the software market into three primary categories—applications, application development and deployment (AD&D), and systems infrastructure (SI) software. Applications contributed 60.9 per cent to the overall market revenues, followed by AD&D and SI software with shares of 21.0 per cent and 18.1 per cent, respectively, in H1 CY21.

The collaborative applications market witnessed the highest growth of 40.1 per cent.

Accelerated growth

Hemanth Gudiwada, Associate Market Analyst at IDC India, said, "Indian enterprises are continuing their digital transformation initiatives with a

Market is estimated to grow at a CAGR of 14 per cent

clear focus on scalable, secure and agile frameworks. They ramped up investments on cloud for scalability, AI to leverage data accurately and serve clients more efficiently, and security to protect their network and systems with greater emphasis on SASE (secure access service edge) and zero-trust frameworks, identity management solutions among others."

As a result, the corresponding software markets are experiencing accelerated growth, and the growth in these markets is expected to continue for the next couple of quarters.

India market forecast

IDC estimates India's overall software market to grow at a compound annual growth rate (CAGR) of 14.0 per cent between 2020 and 2025. Cloud has become a critical element of enterprises' digital strategy, with cloud migration becoming a priority. IDC estimates the contribution of platform-as-a-service (PaaS) and software-as-a-service (SaaS) markets to the overall software market to increase from 37.1 per cent in 2020 to 59.0 per cent in 2025, growing with a CAGR of 25.1 per cent with more emphasis on PaaS solutions.
