**Bitcoin Hits \$50,000 Level First Time In Over 2 Years**  
 Bitcoin hit the \$50,000-level for the first time in more than two years as the world's largest cryptocurrency was buoyed by expectations of interest rate cuts later this year. Last month's regulatory nod for US exchange-traded funds also supported the rally. The cryptocurrency has risen about 16.3% so far in 2024. On Monday, it touched \$50,280—its highest since Dec 27, 2021.
