Gautam Adani plans three giga factories

SPROUTS | NEWS NETWORK

autam Adani on Wednesday said his conglomerate will build three giga factories to make solar modules, wind turbines and hydrogen electrolysers as part of a \$70 billion investment in clean energy by 2030.

"The Adani Group has already committed \$70 billion (for climate change and green en-

ergy). This will see us building three giga factories in India leading to one of the world's most integrated green-energy value chains," he said after receiving the USIBC Global Leadership Award here.

The giga factories will "extend from polysilicon to solar modules, complete manufacturing of wind turbines, and the manufacturing of hydrogen electrolysers", he said. This, he said, will generate an additional 45GW of renewable energy to add to Adani group's existing

20GW capacity, as well as 3 million tonnes of hydrogen by 2030. The Adani group is stepping up investments

across the green in additional energy value to ries and chain as it aims to make it to become the modules.

world's top renewable energy producer by 2030.

The announcement comes weeks after rival billionaire Mukesh Ambani announced a fifth giga factory as part of an investment in low carbon energy. The new giga factory for power electronics will be in addition to four giga factories announced last year to make integrated solar PV modules
