Please find enclosed Press Release Titled “**Route Mobile Limited launches OCEAN – Omnichannel CX Suite; and expands Digital Identity Suite under TruSense**”.

The same is also uploaded on the Company’s website at www.rotemobile.com.

Thanking you,
Yours truly,
For Route Mobile Limited

Rathindra Das
Group Head- Legal, Company Secretary & Compliance Officer
M. No F12663

Encl: as above

Route Mobile Limited launches OCEAN – Omnichannel CX Suite; and expands Digital Identity Suite under TruSense.

Showcases the power of its personalized customer experience (CX) suite and Digital Identity solutions for a more intuitive and secure customer engagement across multiple touchpoints.

Mumbai, August 10, 2023: Route Mobile Limited (“Route Mobile”), one of the leading CPaaS (Communication Platform as a Service) provider to enterprises, over-the-top (“OTT”) players, and mobile network operators, has announced the launch of its **Omnichannel Experience Automation Network (OCEAN)**, a personalized omnichannel CX Suite. It has also expanded its digital identity security suite – **TruSense** with launch of three new products – TruScore, TruAuth, TruFa.

On the launch of OCEAN and TruSense offerings at its flagship event, Route Amplify, **Rajdipkumar Gupta, Managing Director & Group CEO, Route Mobile said**, “I am proud of how far we have come on this journey of providing the best customer experience possible. OCEAN and TruSense are a result of this continuous quest to perfect customer engagement and experience across multiple touchpoints while providing robust security without inconveniencing the end user.”

OCEAN - is a Personalized Omnichannel CX Suite that lets enterprises engage with end-users through a unified experience to deliver personalized messages across all customer touchpoints including mobile, web and social channels. This platform can be leveraged by various industries including BFSI, Retail, E-commerce, Hospitality, Travel, Media and Logistics to transform their user engagement journey. OCEAN brings all customer conversations on a single platform, allowing brands to understand preferences through advanced analytics and leverage conversational UX to provide more responsive customer support.

The OCEAN platform is one of the first products to come out of Route Mobile’s R&D center – RouteLab, which was established in Bengaluru, in 2022.

“OCEAN plugs the gaps in the customer journey, right from engagement and acquisition to conversion. The suite is designed to provide a personalized experience, allowing customers to engage with their favorite brands across channels. With its ICE (Insights – Conversations – Engagement) framework, this suite provides valuable insights about their customers who may be at various points of the journey and also improves response times for a positive experience”, said **Milind Pathak, Group Chief Business Officer, Route Mobile**.

TruSense (“Trusense Identity Limited”), a wholly owned subsidiary of Route Mobile, introduced three new products, namely TruScore, TruAuth and TruFa. TruScore gives businesses actionable insights into phone number trustworthiness. TruAuth enables secure phone number verification with an improved customer experience and TruFA provides a single interface for phone number verification, combining our number intelligence with both new and traditional authentication channels. These offerings will strengthen BFSI, Gaming, Retail and E-commerce companies — that require a powerful authentication and risk management solution that protect their customers from digital frauds, social engineering scams and SIM swap frauds while ensuring a hassle-free user experience.

“We envision a world free of digital fraud where no consumer faces risks related to identity theft, forgery, SIM swap, phishing, SMishing, social engineering, account takeover and online fraud. The new set of offerings are our first in the line-up of more solutions to come as we expand our digital identity suite. We have seen a lot of success with these products in Columbia and we plan to roll them out to more countries in coming months”, shared **David Vigar, Executive Vice President (Digital Identity)**.

Registered & Corporate Office:

Route Mobile Limited
4th Dimension, 3rd floor, Mind Space, Malad (West),
Mumbai - 400 064, India

These solutions further strengthen the offerings of Route Mobile and will enable enterprises to go beyond traditional CPaaS to create a robust, secure and omnichannel customer communication strategy.

About TruSense Identity Limited

TruSense Identity Limited is a wholly owned subsidiary of Route Mobile Limited, one of the leading CPaaS (Communication Platform as a Service) providers to enterprises, over-the-top players (OTT), and mobile operators. TruSense Identity Limited is focused on providing technology-based solutions to a digitally connected world vulnerable to identity theft and social engineering threats.

With 20-years of experience in the Mobile Communication industry, Route Mobile Limited is dedicated to providing the best fraud detection system available. TruSense is a realization of that commitment towards customer satisfaction and has been created to help organizations achieve their goals.

TruSense marks its initial presence in India, Colombia, and Peru with plans for further expansion in global markets.

About Route Mobile Limited (www.routemobile.com) (BSE: 543228; NSE: ROUTE)

Established in 2004, Route Mobile Limited (“RML”) is a cloud communications platform service provider catering to enterprises, over-the-top (OTT) players, and mobile network operators (MNOs). RML’s portfolio comprises solutions in messaging, voice, email, SMS filtering, analytics, and monetisation solutions. RML has a diverse enterprise client base across various industries, including social media companies, banks and financial institutions, e-commerce entities, and travel aggregators. RML is headquartered in Mumbai, India, with a global presence in Asia Pacific, the Middle East, Africa, Europe, and the Americas.

SIM - swap fraud: Man gets missed calls, loses ₹50 lakh

A South Delhi-based businessman was duped of more than Rs 50 lakh by some unknown persons through a series of missed calls, the police said on Tuesday adding that the victim had not shared any OTP or personal details with the scoundrel.

The man, in his complaint, said he had received several missed calls and when he picked up one of the calls, there was no response from the caller's side. Later, he found out that multiple transactions went made from his bank account and he lost nearly Rs 50 lakh.

A case has been registered at the DDA Police cyber crime unit. According to a senior police officer, the hacker targeted the victim via

disguise. Once the duplicate SIM starts functioning, the original SIM gets blocked, the officers said.

With the help of the duplicate SIM, they can get a one-time password (OTP) and other alerts required to carry out financial transactions through the victim's bank account.

While banks say that SIM swap is possible because of a weak two-factor authentication that enables scammers to access details from adware providers. According to the police, one should alert them and the mobile service provider if there is no service or digital, bank notifications that look suspicious, or one is unable to access personal accounts.

The Officer added that one shouldn't share OTPs
