SHARE CAPITAL DETAILS OF THE COMPANIES

FMNL

As at 30 September 2017, the paid up equity share capital of FMNL was c. INR 561.71 million consisting of 56,171,156 equity shares of INR 10/- each fully paid up, which we have considered for the purpose of the valuation analysis. The promoter and promoter group hold c. 73.16% of the paid up outstanding equity shares and balance is held by public shareholders.

SSCPL

The paid up equity share capital of SSCPL as at 30 September 2017 was c. INR 0.25 million consisting of 25,000 equity shares of face value of INR 10/- each fully paid up, which we have considered for the purpose of the valuation analysis. FMNL holds 60% of the aforesaid equity share capital and 40% is held by others.

APPROACH - BASIS OF AMALGAMATION

The Scheme contemplates the Proposed Merger under Sections 230 to 232 of the Companies Act, 2013 and other relevant provisions of the Companies Act, 2013 and rules issued thereunder to the extent applicable.

Arriving at the Fair Equity Share Exchange Ratio for the purposes of a merger such as the Proposed Merger would require determining the relative values of each company involved

and of their shares. These values are to be determined independently but on a relative basis, and without considering the effect of the merger.

There are several commonly used and internationally accepted methods for determining the value of shares, under the asset, market and income approaches, which can be considered in the present case, to the extent relevant and applicable, to arrive at the Fair Equity Share Exchange Ratio for the purpose of the Proposed Merger, including:

1. Asset Approach - Net Asset Value method
2. Market Approach
 - a) Value based on market quotes as available from recognized stock exchanges (Market Price method)
 - b) Comparable Companies' Multiples method
3. Income Approach
 - a) Discounted Cash Flows (DCF) method
 - b) Earnings Capitalization Value method

In the present case, the Companies have not provided us with detailed projections for a reasonably sufficient period of time and hence we have not applied the DCF method.

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies / businesses, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Net Asset Value (NAV) Method

The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. The Net Asset Value ignores the future return the assets can produce and is calculated using historical accounting data that does not reflect how much the business is worth to someone who may buy or invest in the business as a going concern. This valuation approach is mainly used in case where the firm is to be liquidated i.e. it does not meet the "going concern" criteria or in case where the assets base dominate earnings capability. A Scheme of Amalgamation would normally be proceeded with, on the assumption that the companies amalgamate as going concerns and an actual realization of the operating assets is not contemplated. The operating assets have therefore been considered at their book value. In such a going concern scenario, the relative earning power is of importance to the basis of amalgamation, with the values arrived at on the net asset basis being of limited relevance.

Under the Asset Approach, we have computed the Net Asset Value of equity shares of FMNL and SSCPL. We have considered the balance sheets as at the Valuation Date and made suitable adjustments for, inter-alia, investments, surplus assets as deemed appropriate for the purpose of our valuation analysis. In the present case, keeping in mind that our evaluation is on a going concern basis, we have not considered it appropriate to use the value arrived at under this method in the present case for arriving at the relative value of the equity shares of FMNL and SSCPL.

Market Price Method:

The market price of an equity share as quoted on a stock exchange is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share, especially where the market values are fluctuating in a volatile capital market. Further, in the case of a merger, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard.

While the equity shares of SSCPL are not listed on stock exchanges, the equity shares of FMNL are listed and adequately traded on the stock exchanges. Accordingly, under the

Market Approach, we have computed the market price of the equity shares of FMNL over an appropriate period. For this purpose, we have taken into consideration the relevant provisions of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009 relating to Preferential Issue and the SEBI circulars CFD/DIL3/CIR/2017/21 dated 10 March 2017 and CFD/DIL3/CIR/2017/26 dated 23 March 2017 in this regard, which inter-alia lay down the minimum price at which the equity shares of FMNL are to be issued pursuant to the Proposed Merger.

Comparable Companies' Multiples Method

Under this method, value of the equity shares of a company is arrived at by using multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

We have performed a search for suitable comparable companies for valuing the shares of FMNL and SSCPL under this method. Our research did not indicate listed companies in India operating primarily in the similar businesses as that of FMNL and SSCPL which could be considered comparable to them. Hence, we have not considered it appropriate to apply this method in the present case for arriving at the value of FMNL and SSCPL.

Earnings Capitalization Value Method

Earnings Capitalization Value Method involves determination of the maintainable earnings level of the company from its operations, based on past and / or projected working results. These earnings are then capitalized at a rate, which in the opinion of the valuer's combines an adequate expectation of reward from the enterprise risk, to arrive at the value of the company.

Under the Income Approach, applying the Earnings Capitalization Value Method, we have capitalized the maintainable earnings of FMNL and SSCPL and suitably adjusted the resultant enterprise value, inter alia, for debt, cash and cash equivalents, value of investments and value of surplus assets, if any, as deemed appropriate, for the purpose of arriving at the equity value. The total value for equity shareholders has then being divided by the total number of equity shares of the respective companies in order to work out the relative value per equity share of FMNL and SSCPL.

BASIS OF FAIR EQUITY SHARE EXCHANGE RATIO

The fair basis of the Proposed Merger would have to be determined after taking into consideration all the factors, approaches and methods mentioned hereinabove. Though different values can be arrived at under each of the above approaches / methods, for the purposes of recommending a Fair Equity Share Exchange Ratio it is necessary to arrive at a single value for the shares of the companies involved in a merger such as the Proposed Merger. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of the companies but at their relative values to facilitate the determination of a Fair Equity Share Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach / method. For arriving at the value of the equity shares of FMNL and SSCPL, for the purpose of arriving at the Fair Equity Share Exchange Ratio for the Proposed Merger, we have given weights to the values arrived at under different approaches / methods, based on our evaluation and judgement of the businesses of the companies, in order to arrive at the relative values of the equity shares of FMNL and SSCPL.

In the ultimate analysis, valuation will have to be arrived at by the exercise of judicious discretion by the valuer and judgments taking into account all the relevant factors. There will always be several factors, e.g. quality of the management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share. This concept is also recognized in judicial decisions.

The Fair Equity Share Exchange Ratio has been arrived at on the basis of a relative valuation of the equity shares of FMNL and SSCPL based on the various approaches / methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of these companies, having regard to information base, key underlying assumptions and limitations.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Fair Equity Share Exchange Ratio for the Proposed Merger whose computation is as under:

Computation of Fair Equity Share Exchange Ratio:

Valuation Approach	Future Market Networks Limited		Star Shopping Centres Private Limited	
	Value per share (INR)	Weight	Value per share (INR)	Weight
Asset Approach – Net Asset Value Method	60	0%	210	0%
Income Approach – Earnings Capitalization Value Method	150	100%	18,825	100%
Market Approach – Market Price Method	134	0%	N/A*	0%
Relative Value per equity share	150		18,825	
Fair Equity Share Exchange ratio (rounded off)			125.31	

*N/A = Not Applicable

Ratio:

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Fair Equity Share Exchange Ratio for the Proposed Merger:

12,531 (Twelve Thousand Five Hundred Thirty One Only) equity shares of Future Market Networks Limited of INR 10/- each fully paid up for every 100 (One Hundred Only) equity shares of Star Shopping Centres Private Limited of INR 10/- each fully paid up.

We have audited the internal financial controls over financial reporting of FUTURE MARKET NETWORKS LIMITED ("the Company") as of March 31, 2018 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing issued by the ICAI and deemed to be prescribed under Section 143(10) of the Act,, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. - (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note issued by Institute of Chartered Accountants of India.

Notes to financial statements for the year ended March 31, 2018

1. BACKGROUND

Future Market Networks Limited (The Company) is a public limited company incorporated in India under the provisions of Companies Act, 1956 and validly existing under Companies Act, 2013. Equity shares of the Company are listed with BSE Limited and National Stock Exchange of India Limited. The company is engaged in the business of building capacity and enabling the infrastructure for future markets in a more efficient and cost effective manner. It aims to create a network of new markets by integrating and better organizing the modern wholesale trade, retail and logistics infrastructure in India. The Company is currently managing approximately 1 million sq ft of retail space and owns various real estate properties across India.

2. Significant Accounting Policies:

a) Basis of preparation

i. Compliance with Ind AS

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

The accounting policies are applied consistently to all the periods presented in the financial statements.

ii. Historical cost convention

The financial statements have been prepared on a historical cost basis, except for the following:

- certain financial assets and liabilities that is measured at fair value;
- assets held for sale measured at lower of carrying amount or fair value less cost to sell; and
- share-based payments

iii. Current non-current classification

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle (twelve months) and other criteria set out in the Schedule III to the Act.

b) Property, plant and equipment

All items of property, plant and equipment are stated at historical cost less depreciation and impairment, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as separate assets, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Depreciation methods, estimated useful lives and residual value

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives or, in the case of certain leased furniture, fittings and equipment, the shorter lease term. Leasehold improvements are amortised over the period of lease or estimated useful life, whichever is lower.

Useful life considered for calculation of depreciation for various assets class are as follows-

- | | |
|-------------------------------------|----------|
| • Leasehold Improvements | 16 years |
| • Machinery | 10 years |
| • Furniture, fittings and equipment | 10 years |
| • Office and other equipments | 5 Years |
| • Computers | 3 Years |

The useful lives have been determined based on technical evaluation done by the management's expert which are higher than those specified by Schedule II to the Companies Act; 2013, in order to reflect the actual usage of the assets. The residual values are not more than 5% of the original cost of the asset. The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within other gains/ (losses).

c) Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the

Notes to financial statements for the year ended March 31, 2018

item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Freehold land is carried at cost. Investment properties are depreciated using the straight-line method over their estimated useful lives.

Useful life considered for calculation of depreciation for Freehold Building is as follows-

- Freehold buildings 60 years

d) Investments and other financial assets:

i. Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The Classification depends on the entity's business model for managing the financial assets and the contractual term of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

ii. Measurement of financial assets

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Debt instruments:

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. The Company classifies its debt instruments into following categories:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in other income using the effective interest rate method.

Equity instruments

The Company subsequently measures all equity investments other than in subsidiaries, joint ventures and associates at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification, on sale or otherwise, of fair value gains and losses to Statement of Profit and Loss. Dividends from such investments are recognised in profit or loss as other income when the right to receive of the Company established.

iii. Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk. Note 24 details how the company determines whether there has been a significant increase in credit risk.

For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

iv. Derecognition of financial assets

A financial asset is derecognised only when

- The company has transferred the rights to receive cash flows from the financial asset or
- retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset, the company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.

Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the company has not retained control of the financial asset. Where the company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

A financial liability is recognised when the obligation specified in the contract is discharged, completed or expired.

Notes to financial statements for the year ended March 31, 2018

e) Interest income

Interest income from debt instruments is recognised using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

f) Dividends

Dividends are recognised in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company, and the amount of the dividend can be measured reliably.

g) Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

h) Cash and Cash Equivalents

Cash and cash equivalents includes cash in hand, deposits with banks and short term highly liquid investments, which are readily convertible into cash and have original maturities of three months or less from the Balance Sheet date.

i) Revenue Recognition:

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue net of returns, trade allowances, rebates, value added taxes and amounts collected on behalf of third parties.

The Company recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the Company's activities as described below. The Company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Recognising revenue from major business activities

Sale of Goods

Sales are recognized when significant risk and rewards of ownership of goods have passed to the buyer which coincides with the delivery and they are recorded net of trade discount, VAT and sales tax, Goods and service tax (GST).

Income from Services

Revenue from services rendered is recognized as the service is performed based on agreements/ arrangement with concerned parties and revenue from end of the last billing to the balance sheet date is recognized as unbilled revenue.

Lease rentals income is recognized in the Statement of Profit and Loss as per the terms of agreement which is representative of the time pattern of the user's benefit.

j) Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt from this requirement. Non-current assets are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal Company classified as held for sale continue to be recognised.

k) Employee Benefits:

Short term employee benefits

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees's service up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

Other long-term employee benefit obligations

The liabilities for earned leave and sick leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

Notes to financial statements for the year ended March 31, 2018

Post-employment obligations

The Company operates the following post-employment schemes:

- (a) defined benefit plans such as gratuity; and
- (b) Defined contribution plans such as provident fund.

Gratuity obligations

The liability or asset recognised in the balance sheet in respect of defined benefit pension and gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation denominated in INR is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

Re measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service cost.

Defined contribution plans

The Company pays provident fund contributions to publicly administered provident funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Share-based payments

Estimating fair values for share based payment transaction requires the most appropriate valuation model, which depends on the terms and conditions of the grant. The estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them. For the measurement of the fair value of equity settled transactions with employees at the grant date, the Company uses Black – Scholes model. The assumptions used for estimating the fair value for share based transactions are disclosed in Note 29.

I) Income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company and its subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Minimum Alternate Tax credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

Notes to financial statements for the year ended March 31, 2018

m) Leases:

As a lessee

Leases of property, plant and equipment where the company, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Leases in which a significant portion of the risks and rewards of ownership are not transferred to the company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increase.

As a lessor

Lease income from operating leases where the Company is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

n) Foreign Currency transactions:

Functional and presentation currency

Items included in the financial statements of the company are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The financial statements are presented in Indian rupee (INR), which is Future Market Network's Limited's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in profit or loss.

o) Inventories:

Inventories which comprise of finished stock of completed projects are valued at lower of cost or net realizable value. Cost is determined by including cost of land (including development rights), internal development cost, external development charges, materials, services, related overheads and apportioned borrowing costs.

p) Investments in subsidiaries, joint ventures and associates

Investments in subsidiaries, joint ventures and associates are recognised at cost as per Ind AS 27. Except where investments accounted for at cost shall be accounted for in accordance with Ind AS 105, Non-current Assets Held for Sale and Discontinued Operations, when they are classified as held for sale.

q) Earnings per share

Basic earnings per share

Basic earnings per share is calculated by dividing:

- the profit attributable to owners of the Company
- by the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year and excluding treasury shares (note 26).

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

r) Segment Reporting:

The Company is primarily engaged in the activity of mall management business and considers it to be a single reportable business segment. The operations of the Company are within the geographical territory of India which is considered as a single geographical segment. Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The Managing Director, who has been identified as being the chief operating decision maker, assesses the financial performance and position of the company, and makes strategic decisions. Refer note 25 for segment information presented.

s) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method.

Notes to financial statements for the year ended March 31, 2018

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

t) Borrowing costs

Borrowing costs directly attributable to the acquisition and construction of an asset which takes a substantial period of time to get ready for its intended use are capitalized as a part of the cost of such assets, until such time the asset is substantially ready for its intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the period they occur. Borrowing costs consist of interest and other costs incurred in connection with borrowing of funds.

Other borrowing costs are expensed in the period in which they are incurred.

u) Provisions and contingent liabilities

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses. Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The increase in the provision due to the passage of time is recognised as interest expense. Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence will be confirmed by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

v) Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

w) Critical estimates and judgments

The preparation of financial statements requires the use of accounting estimates which, by definition, will seldom equal and actual results. Management also needs to exercise judgement in applying the company's accounting policies.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

The areas involving critical estimates or judgments are:

- Estimation of defined benefit obligation (Note no 14)
- Estimation of current tax expense and payable (Note no 6)
- Estimated Fair value of unlisted securities – (Note 23)

Estimates and judgments are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

x) Recent accounting pronouncements

Ind AS 115

In March 2018, the Ministry of Corporate Affairs as notified the Companies (Indian Accounting Standards) Amended Rules, 2018 ("amended rules"). As per the amended rules, Ind AS 115 "Revenue from contracts with customers" supersedes Ind AS 11, "Construction contracts" and Ind AS 18, "Revenue" and is applicable for all accounting periods commencing on or after April 1, 2018.

Ind AS 115 introduces a new framework of five step model for the analysis of revenue transactions.

The model specifies that revenue should be recognized when (or as) an entity transfer control of goods or services to a customer at the amount to which the entity expects to be entitled. Further the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers. The new revenue standard is applicable to the Company from April 1, 2018.

The standard permits two possible methods of transition:

Retrospective approach - Under this approach the standard will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application (Cumulative catch - up approach)

The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 115 is expected to be insignificant"

Total financial liabilities	25,161.49	25,266.62	26,519.32	26,593.06

The following methods and assumptions were used to estimate the fair values:

1. Fair value of trade receivables, trade payables, cash and cash equivalent, Bank balances other than above, other financial assets and other financial liabilities approximate their carrying amounts largely due to short term maturities of these instruments.
2. The fair values for loans and security deposits were calculated based on cash flows discounted using a current lending rate. They are classified as level 2 in the fair value hierarchy due to the inclusion of observable inputs.
3. The fair values of non-current borrowings are based on discounted cash flows using a current borrowing rate. They are classified as level 3 fair values in the fair value hierarchy due to the use of unobservable inputs, including own credit risk.
4. For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.
5. The fair value of the long-term Borrowings with floating-rate of interest is not impacted due to interest rate changes and will not be significantly different from their carrying amounts as there is no significant change in the underlying credit risk of the Company borrowing (since the date of inception of the loans). Further, the Company has no long-term Borrowings with fixed rate of interest.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3: techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT REFERRED TO IN PARAGRAPH 2(f) UNDER THE HEADING "REPORT ON OTHER LEGAL & REGULATORY REQUIREMENTS" OF OUR REPORT OF EVEN DATE

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of the Company as of 31 March 2018 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls and, both issued by the ICAI.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of

Management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by The Institute of Chartered Accountants of India (ICAI).

2. SIGNIFICANT ACCOUNTING POLICIES:

(a) BASIS OF PREPARATION OF FINANCIAL STATEMENT

(i) Compliance with Ind AS

The financial statements comply in all material aspects with Indian accounting standards (Ind AS) notified under section 133 of the Companies Act, 2013 [Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016] and other relevant provisions of the Act.

The financial statements up to year ended 31 March 2016 were prepared in accordance with the accounting standards notified under Companies (Accounting Standard) Rules, 2006 (as amended) and other relevant provisions of the Act.

Accounting Policies have been consistently applied except where a new issued Accounting Standard is initially adopted or a revision to an existing Accounting Standards required a change in the accounting policy with here to in use.

(ii) Basis of Measurement

The financial statements have been prepared on the historical cost basis except for the following material items in the statement of financial position:

- defined benefit plans-plan assets are measured at fair value; and
- certain financial assets and liabilities and contingent consideration that is measured at fair value.

(iii) Use of Estimates

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of financial statement and reported amount of revenues and expenses during the period.

(iv) Functional and Presentation Currency

The financial statements are prepared in Indian Rupees, which is the Company's functional currency.

(b) Property, plant and equipment

Items of property, plant and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains or losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Depreciation and Amortisation methods, estimated useful lives and residual value
Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives.

The useful lives have been determined based on technical evaluation done by the management's expert which are equal to those specified in part C of Schedule II to the Companies Act, 2013, in order to reflect the actual usage of the assets. The residual values are not more than 5% of the original cost of the asset. The assets residual values has useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within other gains/(losses).

(c) Investment Properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognized.

Investment properties to be depreciated in accordance to the class of asset that it belongs and the life of the asset shall be as conceived for the same class of asset at the Company.

(d) Impairment of Assets

All assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The Recoverable amount is higher of an asset's Fair Value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period

(e) Intangible Assets

Intangible assets are recognized, when it is probable that the expected future economic benefits that are attributable to the asset will flow to the company and the cost of the asset can be measured reliably. An intangible asset shall be measured initially at cost. Intangible assets are subsequently measured at cost less accumulated amortization and any accumulated impairment losses. Intangible does not include any software which is integral part of the related hardware.

The Company should assess whether the useful life of an intangible asset is finite or indefinite. A useful life is indefinite, when based on all relevant factor analysis, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows. An intangible asset with a finite useful life is amortised and those with an indefinite useful life are not amortised.

The amortisation period and the amortisation method for intangible assets are reviewed at financial year end.

(f) Provisions, Contingent Liabilities and Contingent Assets

Provision is made when there is a present obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there should be made a reliable estimate of an obligation.

Contingent Liabilities are disclosed if a present obligation arising from a past event when it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Contingent liabilities are not recognized but are disclosed in the notes. If the possibility of an outflow of resources is remote, disclosure is not required.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the entity. Contingent Assets are neither recognized nor disclosed in the Financial Statements. However, when the realization of income is virtually certain, then the related asset is recognized. A contingent asset is disclosed, when an inflow of economic benefits is probable.

(g) Cash Flow Statement

Cash flow are reported using the indirect method, whereby net profits before tax is adjusted for the effect of transaction of non-cash nature and any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from regular revenue generating, investing and financing activities are segregated.

(h) Current versus Non- Current Classification

The Company presents assets and liabilities in statements of financial position based on current/non-current classification. The Company classifies an asset as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
 - Held primarily for the purposes of trading
 - Expected to be realized within twelve months after the reporting period or
 - Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period
- All other assets are classified as non-current.

The company classifies a liability as current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purposes of trading
- It is due to be settled within twelve months after the reporting period or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non- current assets and liabilities.

(i) Borrowing Cost

It should capitalize borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised in the statement of profit and losses in the period in which they are incurred.

(j) Revenue

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue and associated costs incurred or to be incurred can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable.

Sale of Services

Revenue from Services derived is recognized in the accounting period in which the service rendered, for Fixed-price Contracts, revenue is recognized based on actual service provided to the end of the reporting period as a proportion of the total service to be provided (Percentage of Completion method).

Estimate of Revenues, cost or extent of progress toward completion are revised if circumstances changes. Any resulting increase or decrease in estimated revenues or costs are reflected in the profit or loss in the period in which circumstances that gives rise to the revision become known by management

(k) Interest Income

Interest income is recognised in the statement of profit and loss, using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the entity estimates the expected cash flows by considering all the contractual terms of the financial instrument.

(l) Other Income

Other income is recognized on an accrual basis, when there is certainty of collection.

(m) Employment Benefits**(i) Short Term Employee Benefits**

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' service up to the end of the year and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligation in the balance sheet.

(ii) Post-Employment Benefits

Defined Benefit Plan

The liability or asset recognised in the balance sheet in respect of defined gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

(n) Tax

The tax expense for the period comprises current and deferred income tax.

(i) Normal Income Tax Assets and Liabilities

Current income tax for current and prior periods is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rate and tax laws that have been enacted by the balance sheet date. Income tax expense is recognized in net profit in the statement of profit and loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in other comprehensive income.

(ii) Deferred Income Tax Asset and Liabilities

Deferred income tax is recognized on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

Accounting for the deferred tax effects of a transaction or other event is consistent with the accounting for the transaction or event itself.

Deferred tax shall be recognized as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

A transaction or event which is recognized outside profit or loss, either in other comprehensive income or directly in equity.

Deferred income tax assets is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary difference and tax losses can be utilized.

Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

(o) Trade and Other Payables

Trade and other payables such as security deposits are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within twelvemonths or less. If not, they are presented as non-current liabilities. These financial instruments are recognized initially at fair value and subsequently measured at amortised cost using the effective interest method.

(p) Trade and Other Receivables

Trade and other receivables such as security deposits are recognized initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

(q) Expense Recognition

Expenses are accrued for on accrual basis and provisions are made for all known losses and liabilities.

All direct costs attributable to a project are charged to that project as follows:

Payroll expenditure is proportionately allocated to various projects based on the man hours spent by the staff on that particular project.

Traveling, Printing, Professional fees, brokerage, maintenance charges etc. are allocated to a project on actual basis.

All indirect costs are treated as period cost and are charged to the profit & loss account in the year in which they are incurred

(r) Earning Per Share

Basic earning per share is calculated by dividing the net profit or loss attributable to the ordinary equity holders of the company by the weighted average number of ordinary shares outstanding during the period. Diluted earning per equity share is calculated by dividing the net profit attributable to the ordinary equity holders of the company by the weighted average number of ordinary shares outstanding are adjusted for the effects of all dilutive potential equity shares, if any.

(s) Investments

Long term (Non-current) investments are stated at the cost of acquisition. However, provision for diminution is made to recognize a decline, other than temporary, in the value of long term investments.

Current investments are stated at the lower of cost or fair market value.

(x) Financial Assets

The Company classifies its financial assets in the following measurement categories:

- those measured at amortised cost.
- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and

The Classification depends on the entity's business model for managing the financial assets and the contractual term of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income.

Sensitivity Analysis: Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate and expected salary increase rate. Effect of change in mortality rate is negligible. Please note that the sensitivity analysis presented below may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumption would occur in isolation of one another as some of the assumptions may be correlated. The results of sensitivity analysis are given below:

RISK FACTORS

The risks described below and any additional risks and uncertainties not presently known to the Company or that are currently deemed immaterial could adversely affect the Company's business, financial condition or results of operations.

i. Weak economic conditions may have an adverse impact on the Company.

The volatility in economic conditions has resulted in an industry-wide softening of demand for property due to a lack of consumer confidence and decreased affordability which has adversely affected the real estate industry and may adversely affect the Company and its business, financial condition and results of operations. Additionally, economic and market conditions can adversely affect the performance of the Company since the revenue generated from mall management is linked to the consumption abilities of the general public and disposable income available with them.

ii. The Company may be involved in disputes with tenants which could adversely affect the Company's business, financial condition and results of operations.

The Company may be involved in disputes with tenants of malls and other commercial properties that it operates. Any such dispute could result in litigation between the Company and such tenants. Whether or not any dispute actually proceeds to litigation, the Company may be required to devote significant management time and attention to its resolution (through litigation, settlement or otherwise), which may affect the management's ability to focus on the Company's business. Any such resolution could involve the payment of damages or expenses by the Company which may be significant or settlement on terms that may not be favourable to the Company. Any of the foregoing events could have an adverse impact on the Company's business, financial condition and results of operations.

iii. The Company is potentially liable for any uninsured loss which may result due to injuries to visitors at retail, commercial and office premises managed by the Company.

There exists a risk of accidents involving visitors in premises managed by the Company. In such instances, the Company's inability to put in place adequate public liability insurance cover may have an adverse impact on the Company's business, reputation, financial condition and results of operations.

iv. External events beyond the control of the Company may have a negative impact on the income

A decrease in consumer demand, retailer tenancy demand or the demand for offices could make it difficult for the Company to renew contracts for mall management, at rates equal to or above historical rates or then prevailing market rates. Any occurrence of the foregoing events could have an adverse impact on the Company and its business, reputation, financial condition and/or operating results.

v. The Company faces inherent risks relating to mall and project management activities and the occurrence of any or all could have an adverse impact on the Company's business, financial conditions and results of operations.

Revenue earned from the mall and project management activities of the Company and the operating expenses of the Company are subject to a number of inherent general risks, which include, among others:

- a) increases in business rates of various service providers;
- b) increases in payroll expenses and energy costs;
- c) a competitive rental market, which may affect rental levels or occupancy levels at the shopping malls and other commercial retail spaces;
- d) the amount of mall management fees being less favourable than existing rates;
- e) the periodic need to renovate, repair and the cost thereof;
- f) the Company's ability to collect service charge payments from tenants on a timely basis or at all;
- g) the Company's ability to manage increases in the cost of services provided by third party providers and/or increases in the cost of maintaining commercial properties, if any, including, but not limited to, unforeseen capital expenditure;

- h) the shopping malls and other commercial spaces which the Company is managing either as mall management or project management are not being perceived as convenient or safe;
- i) changes in laws and governmental regulations in relation to real estate, commercial markets, taxes and government charges (including those relating to health, safety and environmental compliance). Such changes may lead to an increase in management expenses or unforeseen capital expenditure to ensure compliance. Rights related to particular properties may also be restricted by legislative action, such as revisions to existing laws or the enactment of new laws; and
- j) the Company's ability to obtain adequate maintenance services on commercial terms or at all.
- k) the Company's ability to obtain adequate insurance at acceptable premium rates or at all

To the extent that these factors generate an increase in operating and other expenses that is not matched by an increase in revenues or are not recoverable from tenants of shopping malls or other commercial spaces operated by the Company, these factors may have an adverse impact on the Company's business, financial condition and results of operations.
