Currently, 11.07 lakh population of Navi Mumbai is estimated to be eligible for the vaccination, of which 1.76 lakh is estimated to be above the age group of 60 years have got their first jab, which is 53% of the total estimated population of this age group. "Even when there was low supply of vaccination, we have aiways had at least one slot for the first dose of 60 years-plus. So, this age group was never neglected and was aiways given priority. There is no reason why anyone from 60 years and above would be left out. There was never any reluctance from this age group and they were always eager to get the vaccination done. Accessibility, too, is not the reason as the drive for them was aiways available. In fact the queue for the first dose is declining slowly and even after we reach 100% target, the first dose in three will continue for those with no proof of being a resident

and simultaneously will have call centres verifying the exact number of 60 years and above existing in the city. Through various drives and initiatives, we have collected the data of the families in Navi Mumbai and their family members. The call centre staff will be asked to call up the families and check if the senior citizens at their residences have been vaccinated. Besides, we also have around 3,500 housing societies registered with us who are also connected via WhatsApp. The housing societies, too, would be asked to provide the information."
