Company Secretary

Zensar announces Global Partnership with NetApp and Cisco to deliver FlexPod® Managed Private Cloud Services launching at Cisco Live San Diego 2019

New offering will accelerate application delivery and transition to hybrid cloud through a secure and innovative platform

San Jose, CA, June 10, 2019— [Zensar](#), a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital transformation journey, announced that it has joined with NetApp and Cisco to deliver the FlexPod® converged infrastructure managed private cloud offering which integrates NetApp storage, Cisco UCS compute/networking resources, and Zensar's The Vinci™ Smart Autonomics Platform to deliver a feature rich private cloud for our customers. As part of the FlexPod Managed Private Cloud (MPC) program, Zensar can now provide a fully managed, Zero Touch dedicated private cloud infrastructure to customers globally that will allow the enterprise to maintain ownership of the infrastructure and data, while Zensar manages and monitors the service. Zensar is showcasing its Managed Private Cloud Services at Cisco Live on June 9-13, 2019 at the San Diego Convention Center in San Diego, CA.

Commenting on this partnership, Sandeep Kishore, Chief Executive Officer and Managing Director, Zensar said, "As our alliance partnerships continue to expand we are able to offer our clients exponential value with next generation digital transformation solutions that embrace market trends. Enabling our clients to seamlessly and effectively transition to a managed cloud solution that leverage the combined portfolio of industry leaders NetApp and Cisco is a great achievement that aligns with our Return on Digital® NeXT (New and Exponential Technologies) strategy."

"Zensar offers the flexibility to enable a full cloud adoption model or hybrid model, and their expertise in managing and monitoring cloud platforms aligns with our optimized solution offerings. With this partnership, we look forward to joining with Zensar's leading cloud and infrastructure digital next generation solutions to bring our services to new heights." **said Ranjeet Sudan, Vice President of NetApp's Converged Infrastructure Group.**

"Zensar's Cloud and Infrastructure Services (CIS) is focused on delivering solutions that drive visible business value to our customers. In this era of digital disruption, the FlexPod Managed Private Cloud by Zensar, brings together the best in class technology that NetApp and Cisco have to offer along with Zero Touch, catalog based private cloud powered by our Smart Autonomics Platform – The Vinci™." **said Harjott Atrij, Executive Vice President and Global Head, Cloud & Infrastructure Services, Zensar.**

Visit Zensar at booth #3721 at Cisco Live to learn how we will bring a fully managed, dedicated private cloud infrastructure to customers anywhere in the world leveraging FlexPod. Cloud to the edge exploits the cloud style for centralized control, management and back-end processing; while distributing appropriate levels of processing, data and autonomy to the edge. Zensar will allow enterprise customers to maintain ownership of the infrastructure data while at the same time reducing organizations management burden.

This approach is much more than a remotely managed FlexPod. This is a robust managed private cloud offering with the look and feel of a public cloud service. Zensar has integrated The Vinci™ its autonomics led agile smart platform, to provide rapid self-service provisioning, auto monitoring of infrastructure and application workloads, self-heal, and provide customer portals and real-time dashboards. Zensar's FlexPod Managed Private Cloud addresses all of these needs and enables enterprise IT staff to focus on higher strategic value areas for their business.
