Dear Sir,

Sub: **Newspaper advertisement for transfer of equity shares to Investor Education and Protection Fund (IEPF)**

We enclose herewith copies of the newspaper advertisement in connection with Notice to the shareholders for transfer of equity shares of the Company to IEPF, published in today's English and in a Regional newspaper.

The advertisement copies will also be made available on the company's website at www.orientpaperindia.com.

This is for your information and records.

Thanking you,

Yours faithfully,
For ORIENT PAPER & INDUSTRIES LTD.

(R.P. Dutta)
Company Secretary

Encl: as above

48 cases of Delta plus in India; Maharashtra tops

ICMR chief says the second wave of Covid-19 pandemic is not yet over

RUCHIKA CHITRAVANSHI
New Delhi, 25 June

India has detected forty-eight cases of Delta plus variant across 11 states, with Maharashtra reporting 20 such cases followed by seven infections in Madhya Pradesh on Friday.

The government has said the Delta plus variant is localised with a limited number of cases in the world, and laboratory studies are on to study the efficacy of vaccines against this variant.

"This virus has been isolated and we should have the results of the effect of the vaccine on the Delta plus variant in about a week. We will be the first country to do so," said Balram Bhargava, director-general, Indian Council of Medical Research.

Bhargava said Covaxin's efficacy against Alpha, Beta, Delta is "very much there" and public health response strategy does not change with variants. "If required, vaccine composition can be changed according to variants," he said.

The INSACOG with its network of 28 labs is collecting samples from 300 sites across the country. The INSACOG is also sequencing samples of reinfection, severe cases, and breakthrough infections after the vaccination from hospitals.

"We are sharing information on this variant regularly with the states. They are advised to keep strict surveil-

People wait in queues to register for Covid-19 vaccine dose, in Prayagraj on Friday

lance in the districts reporting new Variants of Concern and take up stringent public health measures," said Sujet Singh, director, National Centre for Disease Control.

The Delta Plus, or Delta-A.Y.1 variant, a sub-lineage of Delta variant, is a mutated version of the B.1.617.2 variant or strain. This strain is characterised by the K417N mutation in the spike protein of the SARS-CoV2 virus that causes the Covid-19 disease. The K417N mutation has been associated with "immune escape", which means that the virus is less sus-

ceptible to — or less responsive to — any drug therapy.

The NCDC chief said there was no scientific evidence yet to say that the Delta plus variant is leading to an increase in the number of cases. "The number of cases we have seen so far over the last three months. It is not showing an increasing trend in any state," Singh said.

NCDC also said the information on genome sequencing was shared this year twice with states in February, four times in March and April, and six times in May. Four reports have been shared this month so far.

While Delta plus is being reported in 12 countries, the Delta variant accounts for 25 per cent of the cases in 16 countries. From one district in December 2020, Delta variant had spread to 52 districts till March 2021 and 174 districts across 35 states by June, becoming one of the driving factors behind the second wave of the epidemic.

PREGNANT WOMEN CAN TAKE COVID VACCINE: GOVT

Indian Council of Medical Research (ICMR) Director-General Dr Balram Bhargava said, "The health ministry has given guidelines that the vaccine can be given to the pregnant woman."

He said vaccines are very useful for pregnant women. As for vaccinating children, ICMR has started a study on kids between 2 years to 18 years. The results of this study are expected by September. Bhargava, however, said there is only one country currently vaccinating children and whether very small children will ever need vaccines, is still a question. "Till such time, we have more data on vaccination of children, we would not be in a position to vaccinate children at large," Bhargava said.

Bhargava said that the second wave of Covid-19 is not yet over. "We have still got 75 districts which have more than 10 per cent prevalence. We have 92 districts which have between five-10 per cent prevalence and 565 districts are less than five per cent prevalence so in large part of India second wave is over," he said.

AAP, BJP spar over SC panel's report on 'inflated' O2 need

Delhi's oxygen needs were "exaggerated" by four times during the second Covid wave, a Supreme Court-appointed panel report said, prompting the BJP to charge the Arvind Kejriwal dispensation of "criminal negligence", while the AAP dispensation accused the saffron party of "cooking up" such a report.

Responding to the accusations, Kejriwal on Friday said his only "crime" was that he "fought for the breath of two crore people" of Delhi. His deputy Manish Sisodia claimed that no such

report has been approved by the committee members.

He alleged that the "bogus" and "misleading" report has been "cooked up" at BJP's office and submitted by the Centre in the apex court. "The real truth about this report is that it does not exist. This alleged report which is being used by BJP leaders to senselessly slam CM Arvind Kejriwal does not exist. It is bogus and misleading. The Bhartiya Janata Party is lying and shirking accountability," Sisodia alleged.

Several Union ministers, including Prakash Javadekar, Piyush Goyal and Nirmala Sitharaman, took to Twitter to hit out at the Delhi government over the report. BJP spokesperson Sambit Patra also slammed the Delhi government, terming it to be a "heinous crime".

The Delhi units of both the BJP and the Congress demanded the resignation of Kejriwal, saying that due to "exaggerated demand of oxygen" by his government, supply of the life-saving gas to 12 other states was affected.

PMC Bank...

The RBI had put the restrictions for the first time on September 23, 2019, when it was found about two-thirds of the bank's loan book of ₹8,000 crore had turned into bad debt due to a fraud perpetrated by the bank's management and real estate firm HDIL. Coupled with other bad loans, the non-performing assets of the bank stood at nearly ₹6,500 crore.

RIL...

While Tata Power is targeting 25 GW by 2030, Adani Green wants to reach that number by next year since it already has projects in hand. NTPC, which is currently playing a crucial role in the bundling of coal and green power, would expand its existing installed capacity of 1 GW to reach 30 GW by 2030.

All the three competitors are major thermal power generators in the country though Tata Power and NTPC have already announced that they will not put up fresh coal-based generation capacity.

Ambani on Thursday laid out global ambitions for RIL's new energy business. It would include building an integrated solar PV module factory, advanced energy storage battery factory, electrolyser factory, and fuel cell factory with an investment of ₹60,000 crore over the next three years. In addition, the company intends to spend another ₹15,000 crore to support ancillary infrastructure for these factories. RIL could benefit from the production-linked incentive scheme that the government has rolled out for PV manufacturing and advanced energy storage plants. According to a report of HSBC Global Research, the move in the near term is likely to reduce the overhang of oil-related products on ESG rat-

ings on the company as investors see it firmly moving towards green energy. The report, however, said given the rapid development in technology and sharply falling costs, it foresees tight margins for the company.

Twitter...

Prasad said the action was in "gross violation" of Rule 4(8) of the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules 2021. He said "Twitter failed to provide me any prior notice before denying me access to my own account".

A Twitter spokesperson said: "We can confirm the Honourable Minister's account access was temporarily restricted due to a DMCA notice only, and the referenced Tweet has been withheld. Per our copyright policy, we respond to valid copyright complaints sent to us by a copyright owner or their authorised representatives." Meanwhile, the Parliamentary Committee on IT will look at the issue and question Twitter India, said Shashi Tharoor, Chairman of the Parliamentary Standing Committee on Information Technology. Prasad added his interviews on Twitter's non-compliance with the new IT Rules have not gone down well with the platform. It is apparent that my statements calling out the high-handedness and arbitrary actions of Twitter, particularly sharing the clips of my interviews to TV channels and its powerful impact, have clearly ruffled feathers," he said. The DMCA is a copyright law, under US regulations, used in case an image, service, or property copyrighted by someone is misused. It is, however, an accepted standard followed by website owners and internet service providers.

Maharashtra...

The presence of the Delta Plus

variant of Covid-19, which is characterised by increased transmissibility and potential reduction in monoclonal antibody responses, has caused concern.

In his order, Kunte said a state-level trigger, mandating all cities and districts to remain at level 3 or above, will be in place till the next revision in view of the mutations of the virus in various areas.

Weekly positivity rates will be determined only on the basis of RT-PCR tests. District administrations have also been instructed to take various steps including increased testing, vaccination, and enforcement to check the spread of the pandemic. This includes compelling organisations to enforce safe work spaces with proper air ventilation norms by using hepa filters or proper exhaust fans due to the airborne droplet nature of the virus. "We have still not come out of the second wave and we have to avoid the third wave. This can be achieved if we follow proper precautions and increase the pace of vaccination," said Rahul Pandit, a member of the state's Covid-19 task force.

Tax relief...

The most important extension involves linking of PAN and Aadhaar, the deadline for which is now September 30.

Besides, the time to invest in residential property for tax deduction has been extended by more than three months, while the due date for Vivad se Vishwas payment (without interest) has been extended by two months to August 31. Furnishing of the statement of equalisation levy has also been extended by a month until July 31. Time limit for both passing the assessment order and issuing the penalty order has been extended until September 30. Objections to the Dispute Resolution Panel can be done by August 31, while the Statement of Deduction of Tax for the last quarter of FY21 may

be furnished on or before July 15. Compliances by taxpayers, such as investment, deposit, payment, acquisition, purchase, construction, or such other action can now be done on or before September 30.

Quarterly statements with respect to remittances made for the quarter ending June 30 may now be furnished on or before July 31.

PharmEasy...

In a statement, Velumani, 62, said, "I am excited about this relationship, unique of its kind in Indian healthcare industry. The unique reach and strength of Thyrocare in diagnostics blended with the young and dynamic team of PharmEasy will bring in better healthcare solutions for the common man nationwide." Nomura was the sole advisor to Velumani for the deal. The acquisition fits well with PharmEasy, which aspires to be an all-round digital health player and not just an e-pharmacy. "With Thyrocare, we will strengthen our offline presence and get more partners on board. We would like to have Dr Velumani as an advisor on board and help us navigate this journey," said PharmEasy co-founder Dhaval Shah, a doctor with an MBA degree. Velumani could not be reached for a comment immediately. He will be separately acquiring a minority non-controlling stake of less than 5 per cent in API as part of a series of equity investments by existing and new investors of API. Thyrocare is the largest B2B player in the diagnostics space and has a network of over 3,300 collection centres across 2,000 towns in India. "The acquisition of Thyrocare will give PharmEasy a unique pan India collections and labs supply chain that can be leveraged for huge online/home service demand," said Rajat Ranjan, executive director, Kotak Investment Banking.
