**● INFLATIONARY PRESSURES****Marico profit drops 3% to ₹307 cr in Q2**FE BUREAU  
Mumbai, November 4**MARICO ON FRIDAY** posted a 3% year-on-year drop in its net profit at ₹307 crore for the quarter ended September, with demand impacted by inflationary pressures and a decline in operating margin.

Revenue from operations improved 3% year-on-year to ₹2,496 crore because of improved domestic volumes by 3% during the quarter and a constant currency growth of 11% in the international business.

The company's operating profit declined 1.7 basis points to 17.3% as total expenses increased 1.9% on year as advertisement cost and other expenses rose.

During the quarter, in the domestic market, Parachute oil volumes were down 3%, while value growth was also down 11%, mainly due to muted consumption trends and sluggishness in loose to branded conversions. While volumes were down, Marico said Parachute held its market share in volume terms.

The company took price cuts in Parachute oil, which still led to better traction compared with the previous quarter and is contemplating passing on more value to consumers.

The company expects volumes to stabilise in H2 as copra prices and consumer pricing harmonise over the course of the next couple of months.

Saffola Oil posted high single-digit volume growth aided by price cuts in the segment.

latter lines as the preceding quarter improved slightly only in the last month of the quarter owing to the upcoming festive season, the company said.

During the quarter, the FMCG sector witnessed a volume decline for the fourth quarter in a row, with growth led by pricing. Among the sales channels, general trade remained weak, while the divergence in rural and urban growth grew starker with the former reeling under persistent inflationary and liquidity pressures. Modern trade and e-commerce, on the other hand, grew in double digits, the company said.

The operating profit margins came in ahead of the pre-Covid levels, mainly led by sharp markdown reductions and better value realisations, the company said.

Revenues from the Madura Fashion &amp; Lifestyle segment were up 45.51% to ₹2,108.56 crore, while Pantaloons' revenue was up 64.41% at ₹1,093.74 crore. E-commerce grew 20% y-o-y on the back of robust festive sales on the app and the website. Robust like-to-like and consistent e-commerce performance have been key drivers of growth in the quarter. The period also saw an increase in marketing investments post a hiatus of more than two years since Covid, as the company reinvigorated its focus towards brand building and strengthening consumer connect, it said.

Marico also expects its gross margin improving from Q3 as copra remains in the soft zone, while the recent volatility in vegetable oils is cautionary. The company has maintained guidance of 18-19% operating margin in FY23.

Over the medium term, Marico expects to deliver 13-15% revenue growth on the back of 8-10% domestic volume growth in the domestic business and double-digit constant currency growth in the international business. "We will aim to maintain consolidated operating margin above the threshold of 19% over the medium term," it said.

The company closed the quarter with a net debt of ₹243 crore at a consolidated level against ₹504 crore at the end of March FY22.

**ABFRL Q2 profit jumps fivefold**FE BUREAU  
New Delhi, November 4**ADITYA BIRLA FASHION** and Retail (ABFRL) on Friday reported a fivefold jump in its consolidated net profit at ₹29.44 crore for Q2FY23 on the back of strong revenue growth. The company's revenue from operations went up by nearly 50% year-on-year to ₹3,074.61 crore, led by good festive sales.

The company's standalone revenue from operations during the period rose 21.7% to ₹8,730 crore from ₹7,170 crore reported in Q2FY22. Titan's jewellery business — its biggest revenue generator — registered an income (excluding bullion sale) of ₹73 crore in

**Titan Q2 profit jumps 34% to ₹857 cr**FE BUREAU  
Bengaluru, November 4**TITAN COMPANY** ON Friday reported a year-on-year growth of 33.7% in its standalone profit at ₹857 crore during the July-September quarter from ₹641 crore in the same period last year, helped by strong consumer sentiment during the festive season.

Further, the eyecare unit reported a quarterly income of ₹167 crore, growing 4% from Q2FY22. The company's other businesses comprising Indian dress wear, fragrances and fashion accessories earned ₹73 crore in

₹7,203 crore in Q2FY23, about 18% higher than ₹6,106 crore in Q2FY22. The watches and wearables business reported an income of ₹829 crore with a 21% growth in the three month period, against ₹687 crore in Q2FY22.

The company has continued its strong performance into Q2(FY23) across all business segments. Despite an uncertain macro environment, the current festive season starting from end of September month and continuing till end of October has been quite positive and the consumer confidence remains upbeat," CK Venkataaraman, managing director, Titan Company, said.

Q2FY23 compared with ₹46 crore in Q2FY22, registering a growth of 59%.

The company's standalone revenue from operations during the period rose 22% to ₹8,730 crore

The company said it clocked a retail growth of 17-19% in its main business divisions over similar festive season timeline of the previous year.

The company added 105 shops during the year on a net basis. Titan's retail chain (including CaratLane) now has 2,408 stores across 382 towns with an area exceeding 3 million square feet as on September 2022.

"We remain relentlessly focussed in executing our growth plans in India and overseas and are optimistic about our performance in the remaining quarters of the current financial year."

**JK Tyre plans rerouting export shipments**SWARAJ BAGGONKAR  
Mumbai, November 4

The Delhi-based company is operating its plants at 100% utilisation levels and a planned capacity addition will come on stream only in the second half of next year

as per requirement"

The ₹530-crore expansion of the passenger car radial capacity, which generates 44%

of JK Tyre's total sales, will be

complete by the end of the sec-

ond quarter of next year with its

coming on stream in the ensu-

ing third quarter.

The company hopes that at

least for the next couple of quar-

ters, the demand will remain

within the supply range. About

59% of the company's revenue

at the standalone level came

from the replacement market, while 25% rose from supplies to the vehicle makers. Exports made up the balance 16%.

JK Tyre recorded a 34% decline in standalone net profit for the quarter ended September on account of increased raw material prices and loss on foreign exchange currency. While the company hiked prices during the year to mitigate the jump in costs, more such hikes will follow in the coming months.

"We have been increasing our prices steadily and demand right now is stable which should help us. We hiked our prices in July, August and September. In the first half, we took a weighted average increase of 8%, which is almost similar to the cost hike. We would be definitely looking for the opportunities to pass on the residual hike in cost to the consumer," Kathuria said.
