Zoho revenue hit \$1 bn in 2021, India biz grew 77%

At current growth rate, India could be company's biggest market in 10 yrs: CEO

SOURABH IYER

New Delhi, 8 November

Cloud-based technology company Zoho Corporation on Tuesday said that it had crossed \$1 billion in revenue in 2021 with its India business growing by 77 per cent year-on-year (YoY). Buoyed by this, the tech firm is planning to open 100 points of presence (PoPs) around the world in five years to provide users a faster network.

The company, which has a workforce of 11,000, has slowed hiring amid fears of an economic downturn. "We have crossed \$1 billion in revenue during 2021. Our fastest-growing market is India and close to it is the West Asia. Across the board, the growth rate has come down. The US is number 1, European Union number 2 and India is approaching number 3 for us. India can be number 2 in 4-5 years and number 1 in 10 years based on the rate at which it is growing," said Sritharan Vembu, chief executive officer (CEO) and co-founder, Zoho Corp.

"After all, we cannot complete new entry. Unfortunately, recent deteriorating global economic outlook, are a rude reminder of our own limits as technologists," Vembu added. Zoho offers web-based business tools, including operating system software for

UNFORTUNATELY, RECENT DEVELOPMENTS IN OUR INDUSTRY, AMIDST A BACKDROP OF RAPIDLY DETERIORATING GLOBAL ECONOMIC OUTLOOK ARE A RUDE REMINDER OF OUR OWN LIMITS AS TECHNOLOGISTS

deteriorating global economic outlook, are a rude reminder of our own limits as technologists," Vembu added. Zoho offers web-based business tools, including operating system software for

businesses, software for customer relationship management, human resources management, enterprise collaboration platform, and GST-compliant accounting software.

Vembu said, "While growth has slowed down quite a bit in 2022, our diversified product portfolio and the fact that we save money for customers have helped us. We hope to continue to serve our customers by bringing the highest quality offerings at very affordable prices."

The company has businesses in over 150 countries and built a user base of over 80 million in the last 25 years.

"Fundamentals matter now more than ever, and our industry has to learn to lower the friction of technology so that technology becomes far more affordable," Vembu added.

The company also plans to double investments for technologies such as blockchain and artificial intelligence (AI). Vembu said: "We will add 100 more network PoPs around the world in the next five years to enhance network access. We are also working on adding Indian language support for our AI and blockchain technology for universal validation."

Central African Republic wants Indian firms like Vedanta to mine gold, uranium

The Central African Republic is seeking Indian investors to mine its abundant natural resources. The African nation's Minister for Economy Lea Doumou said her country is "mightily impressed" with India's growth and development model and is keen to emulate it.

"We see India as a role model and are keen to partner with its government and companies in our economic progress," she told PFI. "India needs natural resources to feed its vast expanding economy and we need their technical know-how. It's a win-win partnership for both." The country

also has deposits of lithium — the critical component used in batteries for electric vehicles (EVs). India is short on lithium and needs to import it for its fast-expanding EV fleet. Indian companies such as mining conglomerate Vedanta can come and look at resources

in the country, she said. "We have all the resources but not enough technological and financial resources to mine them," she said. "We want the Indian government and its companies to help us build infrastructure like roads as well as in sustainable exploitation of our mineral wealth," she said.

Turboprop aircraft plans progressing well, says Embraer

Embraer has said its discussions with India and other global companies for building a new generation turboprop aircraft are progressing well. The Brazilian plane maker has been scouting for partners for its proposed aircraft programme, which could include the manufacture of planes. "The next-generation turboprop aircraft is in the development phase and a decision to launch the project has not been made," Embraer has said.
