---	--

Respected Sirs/Madam,

**Sub: Intimation under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015**

The following is an update on the business operations of BETA Wind Farm Private Limited (“BETA”), one of the material subsidiaries of Orient Green Power Company Limited (the “Company”):

BETA has an installed capacity of 241.68 MW and has business operations in Tamil Nadu, Andhra Pradesh, Gujarat and Karnataka.

During FY 22-23, BETA had proposed to implement some improvements through upgradation of components in 15 identified wind energy generators (“WEGs”) in a phased manner that would result in increased generation of wind power and would thereby result in improved capacity utilization.

Out of the 15 WEGs, upgradation for five machines has been completed and the operations of the same have resumed. The upgradation of the remaining 10 windmills is in ongoing.

Er. V. V. Narayanan, Government Approved Valuer and Chartered Engineer, in his assessment report dated July 24, 2023 has issued the following opinion in relation to the proposed upgradation:

**“Opinion**

*From the assessment of upgradation works carried on the 5 wind energy generators, I’m of the opinion that on completion the upgradation in all 15 machines, these machines are likely to generate additional ~4.16 crore units per annum contributing to additional revenue of ~Rs.19 crores per annum approx. in a normal wind year in the years to come.”*

**ORIENT GREEN POWER COMPANY LIMITED**

As there is no direct cost for generation of wind power, this upgradation is likely to improve the **PBT by Rs. 19 crores approx.** per year.

The above intimation is being issued in compliance with Regulation 30 of the SEBI LODR Regulations.

Kindly take the same on record and acknowledge.

**Thanking you,  
Yours faithfully  
For Orient Green Power Company Limited**

**M. Kirithika  
Company Secretary & Compliance Officer**
