Dear Sir,

Sub.: Announcement under Regulation 30 of SEBI (Listing Obligations And Disclosure Requirement) Regulations, 2015- Newspaper Publication- Audited Financial Results

In continuation to our letter dated 2nd May, 2022, newspaper publication of lokmitra was wrongly attached. Therefore attaching corrected copy of newspaper advertisement of Audited Financial Results of the Company for the quarter and year ended 31st March, 2022 published Lokmitra on 2nd June, 2022. The same is also available on company's website.

We request you to please take the same on record.

Thanking you,
Yours faithfully,

For RAJ RAYON INDUSTRIES LIMITED

RAJKUMAR SATYANARAYAN AGARWAL
MANAGING DIRECTOR
DIN: 00395370

The world according to Geetanjali Shree

I begin with a confession and an apology to the non-Hindi readers of Ret Samadhi by Geetanjali Shree, translated by Daisy Rockwell into English as Tomb of Sand. I have resisted reading the translated version, the winner of the International Booker Prize, because even though it must be very good, it may not replicate for me the resonance of the original. Writers in languages other than English face tough choices today. But the sheer brilliance of Geetanjali's art leaps over a digital world that is forever pushing us to settle for a uniform, universally-understood voice: Loud, full of hyperbole and easy comparables. Her protagonist defies all efforts to generalise — language, gender, mother-daughter relationships and the partition of nations. Throughout, she speaks in one voice to her rambling, widowed mother Chandra Prabha, in another to her bureaucrat brother, yet another to his wife and, of course, the working classes who visit the home.

Then, suddenly, the novel playfully decides to defy linear time. It leaps back some eight decades to when the Subcontinent was partitioned. At this point, she casually informs readers that her mother was married to a man from another community, before she married the one who was their father and whose death plunged her deep into depression. In comes Rosie, a transwoman, who coaxes Ma out of her bed and reintroduces her to her daughter's world. As she moves out of her son's house to her daughter's, Ma crosses a boundary and begins to speak. Together, through rambling conversation, the mother and daughter travel back and forth in time, occasionally even stepping onto the Silk Route, where tribes from all over Asia met and traded goods, and tales, and smoked their hookah in companionable silence.

What this brilliant piece of time travel is reminding us of is that if a writer wishes to find his or her own voice, she/he must refuse to stay put. A creative mind must remain nomadic, so that art remains polyphonic, unpredictable and porous, just like the human race. Life, the little tales and sub-tales in Ret Samadhi tell us, is not a linear, predictable progression of events. Time implicates both the oppressor and the oppressed, and the brutalising men and the nations they build through violent acts. Life poses harsh questions here about the monuments that history will create and erase mercilessly. But racial memories don't die easily. Ret Samadhi leaps over the current dominance of a hard political Hindutva when the Mother's memories transport her and her daughter to a dusty no man's land. The ret samadhi or the burial mound blends with ancient lore about Indra (in Aitareya Brahmana): "Behold, I am The Truth. Study me closely for your own good. I have killed Tvashtra, the creator of the Vajra. I fed the band of Anomaga monks to Salavrik (dogs of wolves). I have broken up countless treaties made on earth, in the sky and further up in the heavens. But not a hair on my head was disturbed. If after

Making India a digital power

In 2014, a country tired of six decades of the Congress's politics of a dynasty, motley coalitions and corrupt governments, voted Narendra Modi to office as Prime Minister of India. He promised change and a new direction in governance. The last eight years have seen him steadily progressing towards building this New India.

Before 2014, the India narrative was just about the country being a big market opportunity. This opportunity came with accepted caveats — governance dysfunction, corruption, nepotism, policy inconsistency, red tape and crony capitalism. This state of affairs was accepted as normal as far back as the 1980s. In the then PM Rajiv Gandhi said that for every one rupee that leaves Delhi, only 15 paise reaches the citizens.

In pre-Modi India, a few politically connected families and groups cornered all the opportunities and capital. For instance, a Credit Suisse report, 'House of Debt', divulged that 98 per cent of the net worth of India's entire banking system was cornered by 10 influential families. Entrepreneurship and successful startups were rare exceptions. India was colloquially referred to as an elephant — big, slow-moving and unwieldy. Our revenues from tax collection remained low and our tax-GDP ratio was abysmal compared to other major developing economies.

In 2014, citizens of India voted for change and gave a resounding mandate to Modi, who had worked his way up from a poor family to becoming the CM of Gujarat. In Gujarat, he had already demonstrated the contrast in his political and governance model with a focus on medium to long-term transformations rather than short-term populism with projects like the Sabarmati Riverfront development. He received another strong mandate in 2019 as well in many state elections.

PM Modi spent the first 3-4 years in office addressing the deep damage to the economy and institutions of governance and rebuilding the lost trust of citizens in the government. He inherited a shattered economy. He steadily rebuilt the financial sector, investor confidence and trust in the government.

He has transformed the work culture within the government, making public service a relentless crusade for change and prosperity.

There are several reforms and governance initiatives that have successfully steered India to its current strength. But his commitment to technology from very early on is a testament to PM Modi's vision and instincts about opportunities for India and Indians. The Digital India programme is one such example. Digital India was launched with three clear objectives: To transform citizens' lives, governance and democracy; expand the digital economy, create jobs and attract investments; and make India the leader in the realm of technology — a provider rather than a consumer of technology.

A report carding of Digital India's performance shows impressive progress. Every rupee released from Delhi reaches the bank accounts of beneficiaries without any delay or corruption. Thus far, the government has transferred more than Rs 17 lakh crore

through DBT while saving Rs 2.2 lakh crore. Today, India has the world's fastest-growing and most vibrant startup ecosystem with close to 70,000 registered startups and around 100 unicorns, with a unicorn coming up every week. The growth trajectory of these startups was determined by their hard work, passion, ability to innovate and availability of capital — not by family connections or political background. Thanks to the most significant reform in indirect taxation through the GST and tax compliance, India has registered its highest ever collections. Revenue increased from Rs 22 lakh crore in FY 21 to Rs 27 lakh crore in FY 22 — a whopping 22 per cent growth. This year alone, the Centre is investing over Rs 7.5 lakh crore in infrastructure building.

The Covid-19 pandemic was a litmus test for leaders across the globe. The global superpowers continue to grapple with third and fourth waves but India, under PM Modi, emerged as a resilient nation.

Unacademy produces 178 Rankers for UPSC CSE 2021

Ahmedabad, Unacademy, India's largest learning platform*, today announced that 178 out of 685 rank holders of UPSC CSE 2021 are Unacademy Learners. Among the top rankers from the last 12th Interview, Last Mile Programme is an interview guidance program for the last stage of the UPSC CSE exam that helps Learners who have qualified the Mains exam to crack the Personal Interview stage. The questions are asked by retired bureaucrats, former UPSC members and Top Educators in a mock set-up. In last year's Unacademy's Interview Guidance Program 170+ Rankers qualified the Interview stage by securing AIR 2. Unacademy is the leading online learning platform for UPSC Civil Services Exam preparation. The platform effectively prepares its Learners for the coveted exam through various learning modules such as structured batch courses for GS and Optional subjects, interactive live sessions, 1:1 mentorship and guidance, dedicated doubt solving sessions, test series, essay and answer writing with evaluation and much more. (19-10)

From the 178 Rankers, 45 Learners were Unacademy's Plus/ Iconic subscribers guided by India's Top Educators. The other rankers were guided by Unacademy's Last Mile Programme for UPSC CSE 2021 Interview. Last Mile Programme is an interview guidance program for the last stage of the UPSC CSE exam that helps Learners who have qualified the Mains exam to crack the Personal Interview stage. The questions are asked by retired bureaucrats, former UPSC members and Top Educators in a mock set-up. Slack announces mission to help Indian companies embrace

Ahmedabad, Today, Slack officially launched India, announcing its mission to help Indian companies navigate the transition to a hybrid workplace by establishing a digital headquarters ('Digital HQ'). Having long championed a digital-first approach to work, Slack's leadership in the workplace collaboration space was further cemented by the rapid shift to remote work in early 2020 brought about by the pandemic. Today — as the impact of the pandemic eases and Indian companies increasingly shift to a hybrid work model — Slack is calling for leaders to be as thoughtful in designing their digital workplaces as they did in designing their physical offices before the pandemic hit. Adopting Slack as a Digital HQ allows Indian companies to connect their teams, tools, customers, and partners in a digital place that's fast, flexible and inclusive for a work-from-anywhere world. A Digital HQ allows work to flow, breaking down communication and collaboration silos, internally and externally; automates tasks that take away time from deep, meaningful work; and enables new, flexible ways of working, both synchronous and asynchronous.
