Jaishankar slams China for terror stand at UNSC

'Pak-based terror groups LeT, JeM operate with impunity, encouragement'

PRESS TRUST OF INDIA
New Delhi, 19 July

In a swipe at China, India told the UN Security Council on Thursday that countries should not place "blocks and holds" without any reason on requests to designate terrorists, warning that any double standards and distinctions between terrorists would be made only at "our own peril".

"The international community holds a collective view that terrorism in all its forms and manifestations must be condemned. There cannot be any exception or justification for any act of terrorism, regardless of motivations behind such acts," External Affairs Minister S Jaishankar told the UN Security Council.

Jaishankar, President of the UN Security Council, chaired the UNSC Briefing on Threats to International Peace and Security Caused by Terrorist Acts.

Speaking in his national

LET US ALWAYS REMEMBER THAT WHAT IS TRUE OF COVID IS EVEN MORE TRUE OF TERRORISM: NONE OF US ARE SAFE UNTIL ALL OF US ARE SAFE"

S JAISHANKAR
External Affairs Minister

capacity, Jaishankar alluded to his remarks to the Council made in January this year when he had proposed an eight-point action plan aimed at collectively eliminating the scourge of terrorism.

"Summon the political will: don't justify terrorism, don't glorify terrorists; No double standards. Terrorists are terrorists; distinctions are made only at our own peril; Don't place blocks and holds on listing requests without any reason," he said. This was in reference to China, a per-

manently member of the UNSC, repeatedly placing technical holds on bids by India and other nations to designate head of Pakistan-based militant group Jaish-e-Mohammed Masood Azhar.

"Let us always remember that what is true of Covid is even more true of terrorism: none of us are safe until all of us are safe," Jaishankar added.

On Pakistan

Jaishankar also said terror groups like the LeT and JeM continue to operate with both

impunity and encouragement.

"In our own immediate neighbourhood, ISIL-Khorasan (ISIL-K) has become more energetic and is constantly seeking to expand its footprint. Events unfolding in Afghanistan have naturally enhanced global concerns about their implications for both regional and international security," he said.

"Whether it is in Afghanistan or against India, groups like Lashkar-e-Taiba (LeT) and Jaish-e-Mohammed (JeM) continue to operate with both impunity and encouragement," Jaishankar said.

"We, in India, have of course had more than our fair share of challenges and casualties. The 2008 Mumbai terror attack is imprinted in our memories. The 2016 Pathankot air base attack and the 2019 suicide bombing of our policemen at Pulwama are even more recent," he said.

FROM PAGE 1

RIL...

Those supporting the Tatas argued that although the rule change seemed to be an attempt to impose curbs on e-commerce players with significant FDI, it could hurt the Indian players in the process. Large diversified Indian groups like the Tatas, Birla and Bajaj, which have built a customer eco system by foraying into diverse sectors through group companies, would need to alter the model, a top executive of a domestic retail chain said.

The e-commerce draft has also put in other restrictions. For instance, it does not permit usage of the name or brand associated with that of the marketplac e-commerce entity to offer for sale of products or services on its platform.

Also, the definition of an e-commerce entity has been expanded in such a way that it will impact diversified Indian groups. Under the new draft guidelines, the definition of an e-commerce entity has been extended to include all related parties. A debate is already on in the country as to whether super apps work. Bharti Airtel is one company which has decided not to pursue super apps. A senior executive of Airtel said the concept had worked only in China, where companies like Tencent have a huge subscriber base. That's also because competition from foreign companies is limited in China and customers have limited choice.

India Inc...

Metal and energy prices are off their highs while banks' earnings may come under pressure from a rise in interest rates.

The combined net profit of the companies excluding banks and financials, oil and gas, and metals and cement in

Q1FY22 was the lowest in four quarters and up only 12.2 per cent over Q1FY20 quarter. This translated into 4 per cent compound annual growth (CAGR) in earnings in the last three years - not very different from earnings growth in the pre-pandemic period.

The moderation in revenue growth has been more dramatic. The combined net sales of all listed companies in Q1FY22 at ₹21.4 trillion are only 3.3 per cent higher than in the April-June FY20 quarter. In comparison, the combined net sales of all listed companies except BFSI, oil and metals in Q1FY22 are up just 0.5 per cent over the April-June FY20 level (see the adjoining charts).

"Nearly 90 per cent of the post-pandemic surge in corporate profits in the last few quarters came from price effect rather than volume effect. This includes metals and banks which have seen the biggest jump in earnings in the last four quarters," said Dhananjay Sinha, managing director and chief strategist, JM Financial Institutional Equity.

According to him, the demand recovery after the first wave of Covid-19 in India has been faltering after the pent-up demand was over by the end of December last year. This, in turn, has affected revenue and earnings growth for companies in consumer demand-related sectors such as FMCG, automobiles, auto ancillaries, consumer durables and retail lenders.

This shows in the sectoral break-up of corporate profits in the first quarter. Metals and mining and banks were the two most profitable sectors in Q1FY22. The two together accounted for 38 per cent of all corporate profits in the quarter, up from 30 per cent in Q4FY21 and much higher than their five-year average contribution of 15 per cent.

Metals and mining companies such as Tata Steel, JSW

Steel, Coal India, Hindalco, Hindustan Zinc and NMDC, put together, were the single biggest contributor to corporate profits in the April-June FY22 quarter. With a combined net profit of ₹39,000 crore, these companies accounted for a fifth of India Inc's earnings in Q1FY22, up from 18 per cent in Q4FY20 and their five-year average contribution of 7.3 per cent.

Nearly two-thirds of the corporate profits in Q1FY22 were accounted for by companies in four sectors - metals and mining, banks, oil and gas, and IT services. Historically, these four sectors have accounted for 55 per cent of corporate earnings.

In contrast, pure-play manufacturers in sectors such as automobiles, consumer durables, capital goods, and FMCG saw a Q-o-Q decline in operating profit margins, revenues, and profits in Q1 FY22. The combined net profit of 1,305 manufacturing and domestic-market-oriented service sector companies was down 21 per cent Q-o-Q to the lowest level in eight quarters with the exception of the lockdown quarters of Q4FY20 and Q1FY21. In comparison, their net sales were down 15.6 per cent Q-o-Q. These companies reported combined net profits of ₹45,640 crore in Q1FY22, down from ₹57,654 crore in Q4FY21. Net sales in the period declined from ₹8.35 trillion to ₹7.05 trillion. The analysis excludes banks, insurance, NBFCs, IT companies, oil and gas, and commodity producers such as metals, mining, cement, sugar, and paper.

Given this, many analysts see a further downgrade in corporate earnings in the second half of FY22.

India-US trade deal...

Finalising a trade deal between India and the EU may not be a smooth ride, considering there are 27 nations in the trade bloc and talks have restarted after a gap of eight years. "We will work very hard to speed it up," Goyal said.

Considering the past experiences, India has revamped its strategy towards inking trade deals and will not allow the "same mistakes" of the past.

"We are engaging with industry to ensure that FTAs are fairly and equitably crafted. At the same time, FTAs cannot be one-way traffic. We also need to open our markets if we want a larger share in foreign markets. So, we need to identify areas where we can withstand competition. We can sort out FTAs fairly quickly if areas where we have the ability to compete internationally can be identified as part of a collective effort," Goyal said.

"Our effort is to ensure focus on countries where we have significant potential, where we can compete better, and where market size is significant," Goyal said. Had it not been for the outbreak of the pandemic and elections in Canada, a trade agreement with the country would have been at a more advanced stage, the minister said.

His remarks assume significance, with India walking

away from the China-backed Asian trade bloc Regional Comprehensive Economic Partnership (RCEP), which signed an agreement last year to create the world's biggest free trade bloc.

Last week, the commerce secretary had said that signing FTAs was crucial as India was not part of any local or regional arrangement.

"If an FTA with the UAE happens, FTAs with (other) GCC countries too will get expedited," the minister said, urging export promotion councils to study FTAs and see if there were hidden opportunities in them.

On the new export boosting scheme - Remission of Duties and Taxes on Exported Products (RoDTEP) - Goyal said sectors such as steel, pharma, and chemicals were not brought under its ambit due to lack of adequate budget. "But we have an open mind to consider concerns and rectify mistakes that might have crept in, if anyone feels it is detrimental to their industry," he said. He also informed exporters that the ministry was setting up two separate divisions that would focus entirely on the services sector.

EEPC India Chairman Mahesh Desai said that the government should relook refund rates under RoDTEP and ensure full rebate on the taxes in the export production chain, failing which Indian engineering goods exporters could lose some of the markets. "In addition to this, dues on account of the MEIS scheme should be cleared. The working capital limits should be increased by banks as steel prices have increased by double and freight rates by 3 to 4 times. These supports are needed to meet the \$107 billion exports target for the sector in FY22," he said.

Govt to back setting up chip industry

Commerce and Industry Minister Piyush Goyal on Thursday said the government will support the setting up of the semiconductor industry in India, which will also help reduce foreign exchange outflows. "There are two sectors that we as a nation need to focus on. One is how can we make Indian shipping expand its scope and the business potential of Indian ships, vessels and increase engagement with the shipping industry. Second is the semiconductor industry, as there is a worldwide shortage. The government is committed to supporting both these sectors," Goyal said. The statement comes days after Tata Group announced its intention to enter the semiconductor business, at a time when there is a significant global shortage of the product. The minister also hoped that large companies will take interest in the shipping industry, which will give the right impetus to the crucial sector for the country's foreign trade.
