Asia reviewing India investment, hints at exit

REUTERS
Qualia Impact/7-Nov-20

Malaysia's flagship budget carrier AirAsia Group Bhd has given its strongest indication to date that it could exit India, saying on Tuesday it was reviewing its investment in a joint venture airline there.

The group said in a statement that its operations in India, like those of its now-shuttered Japan business, have been draining cash and adding to the group's financial stress.

"Cost containment and reducing cash burn remain key priorities evident by the recent closure of AirAsia Japan and an ongoing review of our investment in AirAsia India," it said.

AirAsia shut its operations in Japan, the smallest of its foreign offshoots, last month. The airline owns 19 per cent of AirAsia India, a joint venture with Tata Sons.

The Times of India reported last month, citing sources, that Tata Sons parent is in discussions to buy AirAsia Groups stake.

Group Chief Executive Officer Tony Fernandes told Reuters in September that the group intends to consolidate and strengthen its Asian foothold, which

The airline owns 19 per cent of AirAsia India, a joint venture with Tata Sons

could mean one day exiting both Japan and India.

AirAsia Group said it remains confident of returning stronger, more robust and faster than many competitors, given strong signs of recovery in its key domestic markets due to pent-up demand and numerous Covid-19 vaccines in near final stages of testing.

"The general outlook is that air travel will be bouncing back soon; we expect to get back to pre-pandemic levels on many routes across the Group by mid-

2021, if not earlier," president for the group's airlines, Ro Jagan said.

AirAsia Group's share price touched its highest since June 29 on Tuesday in a second consecutive day of sharp gains, likely lobbied by news that US vaccine maker Moderna Inc's experimental vaccine is 94.5 per cent effective in preventing covid-19 based on interim data from a late-stage trial.

Shares in its long-haul arm AirAsia X Bhd rose as much as 14 per cent.

Task force on the anvil to revive leisure travel

Measures being planned to bring back consumers who have shied from tourism

SURAJEET DAS GUPTA
New Delhi, 17 November

With leisure and vacation travel virtually decimated both in the domestic and the international space because of the Covid-19 pandemic, a task force likely to come up with a plan to revive the sector.

The task force will comprise key stakeholders and representatives from the government. It will include representatives from airlines like Indigo, Vistara and Go Air, leading travel associations such as the Federation of Associations in Indian Tourism and Hospitality (FAITH), Travel Agents Association of India, Indian Association of Tour Operators (IATO), and airport operators like Delhi International Airport Limited (DIAL).

The stalwart led theory of the terrible impact of the pandemic on tourism and leisure travel. For example, at Delhi airport, which is the largest in the country, domestic leisure and vacation travel in pre-Covid times accounted for 11 per cent of passengers, travel for friends and family comprised 33 per cent, and the rest was mostly business travel. However, after the lockdown was lifted and airlines got permission to fly again, in May-June, business travel accounted for 50 per cent of passengers, distress travel accounted for 43 per cent, and the rest was from others.

With the onset of the festive season, the share of various segments shifted again. Since the Dussehra, family and friends travel has accounted for 65 per cent of all travel, and the bulk of the remaining share is coming from business travel. Domestic

TRAVEL DIARIES

At Delhi airport, domestic leisure and vacation travel in pre-Covid times accounted for 41 per cent of passengers, travel for friends and family comprised 33%, and the rest was business travel

When the airlines got permission to fly again, in May-June, business travel accounted for 50% of flyers, distress travel accounted for 43%, and

the rest was from others

Domestic leisure and vacation tourism, which constituted the biggest share of the market before the pandemic, is negligible and is mostly limited to Goa

Last year, Delhi airport alone witnessed 20.1 million domestic holiday travellers, who accounted for the largest share of its flyers

profile of travellers is older, well-to-do vacationers, mostly from Mumbai. With recurrent health risks, and the fact that they plan for travel three to six months in advance, it is unlikely that they will come to India. We will be optimistic if even 10 per cent of what we got last year is retrieved."

MICE (meetings, incentives, conferences, exhibitions) is the other big market, and usually constitutes 12 to 15 per cent of the travel business. But with most companies and their staff working from home, this too, has been knocked out.

The impact on the travel and tourism business is aggravated by the fact that even outbound international tourism has come to a virtual standstill. In 2019, over 26.9 million Indians travelled abroad for leisure and tourism, and nearly 85 per cent of inbound and outbound international traffic in Delhi airport came from leisure and vacation travellers. This has been pretty much wiped out during the pandemic.

The members of the task force will be looking at various proposals to try and kickstart leisure travel.

One start bubble-like flights in the domestic sector, where all passengers have to get a separate antigen test before they board a flight so that they are more confident about travelling for leisure. Two, have a joint advertising blitz by all stakeholders — airports, airlines, food operators and hotels — to showcase the safety procedures put in place. Three, push for common rules for passenger movement across states rather than the myriad rules and restrictions that are changed frequently.

"In many cases while inter-state on-road movement is allowed, movement by air is not. There are numerous anomalies which need to be smoothened," says a member of the committee.

Tea firms' bottom line swells on lower crop, higher at-home consumption

ISHITA ANAN DUTT
Kolkata, 17 November

A large part of the population is working at home and drinking more tea. A rise in at-home consumption of tea, coupled with lower crop because of the pandemic, is adding to the bottom line of companies.

McCleod Russel India, the largest producer, reported a net profit of ₹1,98.29 crore in the September quarter, an increase of 63 per cent on a year-on-year (YoY) basis. Jay Shree Tea & Industries posted a net profit of ₹26.77 crore, compared to ₹8.41 in the same period last year. Goswami Group clocked in a net profit of ₹22.85 crore, an increase of 23.55 per cent.

Revenues, too, were higher in YoY basis. McCleod Russel reported a 52 per cent increase in revenues. Goswami recorded 37.44 per cent, and Jay

PRICES OF TEA AT AUCTIONS

impacted by the pandemic in 2020. In the September quarter, the crop loss stood at 18-20 per cent, on account of disruptions during the lockdown and adverse weather conditions in June and July. The deficit cent tea prices soaring and consumers accepted it.

Goswami's own crop for the six months ended September was down 28 per cent, as compared to the previous year. However, the overall shortfall of tea in the market led to a substantial upside in tea prices leading to its overall realisations going up by 15 per cent over the same period of previous year.

Aut Ashman, managing director and chief executive officer, Goswami Group, said the company focused on good quality tea and took a cut in crop for it, which added to the bottom line.
