On the product front, we introduced ICICI Pru Guaranteed Pension Plan Flexi with Benefit Enhancer, the industry’s first annuity product which provides customers the option to receive a 100% refund of premiums paid. The interplay of technology and process has enabled us to simplify the buying journey. Notably, we issued approximately 40% of policies on the same day, in Q3-FY2024, to customers purchasing long-term savings products.

Our approach of delivering the right product to the right customer has yielded the desired results, which is reflected in our 13th and 49th month persistency of 87.4% and 67.1% respectively at December 31, 2023. A multi-channel distribution network is crucial, it provides the last mile connectivity to customers. Besides, we are deep mining our distribution networks’ customer base to better understand their needs and offer relevant products, leading to increased efficiencies and capacity building for our distribution network. We believe this can position us as the most preferred life insurer to partner with.”

Definitions, abbreviations and explanatory notes

- **Annual Premium Equivalent (APE):** APE is a measure of new business written by a life insurance company. It is computed as the sum of annualised first year premiums on regular premium policies, and ten percent of single premiums, written by the Company during any period from new retail and group customers.
- **Value of New Business (VNB) and VNB margin:** VNB is used to measure profitability of the new business written in a period. It is present value of all future profits to shareholders measured at the time of writing of the new business contract. Future profits are computed on the basis of long-term assumptions which are reviewed annually. VNB is also referred to as NBP (new business profit). VNB margin is computed as VNB for the period/APE for the period. It is similar to profit margin for any other business.
- **Retail Weighted Received Premium (RWRP):** RWRP is a new business measure very similar to APE for the retail (also referred to as individual) business with the only difference being that the regular premiums considered here are first year premiums actually received by the life insurer and not annualised. Secondly, since it is a new business measure for retail business, it includes only Premium received from retail customers. It is the sum of all retail first year premiums and ten percent of retail single premiums received in a period.

On the product front, we introduced ICICI Pru Guaranteed Pension Plan Flexi with Benefit Enhancer, the industry’s first annuity product which provides customers the option to receive a 100% refund of premiums paid. The interplay of technology and process has enabled us to simplify the buying journey. Notably, we issued approximately 40% of policies on the same day, in Q3-FY2024, to customers purchasing long-term savings products.

Our approach of delivering the right product to the right customer has yielded the desired results, which is reflected in our 13th and 49th month persistency of 87.4% and 67.1% respectively at December 31, 2023. Besides, we are deep mining our distribution networks’ customer base to better understand their needs and offer relevant products, leading to increased efficiencies and capacity building for our distribution network. We believe this can position us as the most preferred life insurer to partner with.”

Definitions, abbreviations and explanatory notes

- **Annual Premium Equivalent (APE):** APE is a measure of new business written by a life insurance company. It is computed as the sum of annualised first year premiums on regular premium policies, and ten percent of single premiums, written by the Company during any period from new retail and group customers.
- **Value of New Business (VNB) and VNB margin:** VNB is used to measure profitability of the new business written in a period. It is present value of all future profits to shareholders measured at the time of writing of the new business contract. Future profits are computed on the basis of long-term assumptions which are reviewed annually. VNB is also referred to as NBP (new business profit). VNB margin is computed as VNB for the period/APE for the period. It is similar to profit margin for any other business.
- **Retail Weighted Received Premium (RWRP):** RWRP is a new business measure very similar to APE for the retail (also referred to as individual) business with the only difference being that the regular premiums considered here are first year premiums actually received by the life insurer and not annualised. Secondly, since it is a new business measure for retail business, it includes only Premium received from retail customers. It is the sum of all retail first year premiums and ten percent of retail single premiums received in a period.
