24. Overview of the entity's material responsible business conduct issues

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/ opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Energy Management	Opportunity	Planned and executed renewable energy systems and energy-efficient appliances can drive the organisation to reach maximum efficiency of energy produced and procured.	Obtain renewable energy through solar power units, supply of renewable energy, and migrate to energy-efficient machinery and appliances to minimise power consumption.	Investing in renewable energy systems, energy-efficient appliances, and machinery has the potential to provide positive benefits and decrease operating expenses over the long run.

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/ opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
2	Carbon Emissions	Risk	Rising product demand will need higher manufacturing capacity, resulting in a rise in emissions.	Implementation of energy efficient technologies in the processes such as efficient machinery, environment friendly resources and transitioning to low-emission fuels.	Increasing operating costs will be brought on by investments in more environmentally friendly technology and techniques for reducing emissions.
3	Water Management	Risk	With water being a scarce resource on the planet and an essential component of food production industry, the scarcity and mismanagement of water poses a risk to the future operations	Establish strategies and audits to guarantee optimal ZLD efficiency in all plants, as well as additional measures to conserve water resources through programmes such as rainwater harvesting and groundwater recharging.	There is no estimated immediate financial effect, and measures are being undertaken to promote efficient water management to avoid this issue from becoming unmanageable.
4	Packaging Material	Risk	Due to the different geographical locations of the customers, it is not always feasible to monitor treatment and disposal or offer a collection of food packaging waste handled by individual customers.	Initiatives are being developed to embrace more environmentally friendly packaging technologies and materials in order to provide a safe environment. Present packaging material has increased shelf life of the products leading to an increase in the waste due to expiry of products.	An increase in output will result in an increase in packaging trash, increasing the company's responsibility for the waste and the increased quantity to acquire and execute viable treatment technologies.
5	Waste Management	Opportunity	The waste produced may be seen as a resource that could be used in the future as well as a way to lessen the negative effects the business has on the environment. Food residue from production can be used for fodder and similar purposes.	Collaboration with External agencies to ensure efficient waste recycling processes are being developed in order to reduce waste disposal. ZLD process is available in Nasik and further steps are taken to ensure that waste is processed and disposed of in accordance with CPCB/SPCB-approved limits.	Waste is recycled and reused both internally and externally, resulting in lower operating costs and a contribution to minimising environmental waste.
6	CSR	Opportunity	Involvement in the development of the community serves to improve the standard of community life, therefore producing future employees and consumers. It also helps the company generate goodwill by becoming a community benefactor.	Development and implementation of community engagement activities with the provision of funds to the community as well as through initiatives of the CSR dept. of the company.	The benefits to the community via engagement activities of the company develop goodwill and boost the company's brand, which has long-term benefits.

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/ opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
7	Diversity, Equity and Inclusion	Opportunity	It provides the company an avenue to contribute to the betterment of the society as a whole and access to a larger pool of talent for its workforce	Focus on encouraging people from all walks of life to enter the workforce by providing a safer workplace via the implementation of legislation that safeguard equal rights, fair pay and workplace safety. Creating robust systems in the form of policies, as well as efficient monitoring mechanisms, to ensure that initiatives are carried out in accordance with the company's values.	The benefits that DEI activities bring to the workforce develop loyalty among employees and enhance the company's workforce, which has long-term financial benefits.
8	Human Rights	Risk	Regular changing regulations pose a challenge to the business in terms of being ethical and fair employer.	All operations are rigorously monitored to ensure that no human rights violations occur in the course of doing business. We are committed to conducting regular human rights training for our employees and workers.	A violation in any of the business activities can lead to severe reputational and financial risk for the organisation
9	Workforce Welfare	Opportunity	As staff is an important component of the business growth plan, failing to satisfy workforce expectations may have a negative impact on the company's retention rate and business continuity.	Measures to guarantee that a specific emphasis is placed on providing benefits other than wages/salaries to all workers, such as medical and accidental insurance and other social security benefits.	Expenses for benefits are vital for worker welfare and producing a motivated staff, which leads to greater quality of operations and, consequently, increased revenues.
10	Human capital Development.	Opportunity	Highly skilled workers and employees carry out their duties more effectively and efficiently, resulting in a more effective workforce that supports the company's internal growth, which in turn helps to improve product quality and, eventually, revenue.	Ensure the holistic development of all company personnel via advanced technology training in manufacturing processes and logistics. Furthermore, relevant individuals receive skill enhancement training to ensure that the workforce is equipped with the most efficient skills.	Efforts in ensuring the skill development of the workforce will lead to a more efficient workforce and improved productivity of the company.

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/ opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
11	Employee Health and Safety	Risk	Employee health and safety issues can cause operations to be disrupted, productivity levels to fall, and the brand's image in the market to suffer.	Workplace safety policies are being adopted in order to safeguard the workforce's safety and boost productivity. Workers are provided with the necessary personal protective equipment, and stringent safety measures are implemented. To raise safety awareness among all employees, promotional initiatives and training are implemented.	Financial resources dedicated to employee health and safety will yield positive results in the long term
12	Sustainable Sourcing	Opportunity	Sourcing raw materials from local suppliers helps the company procure fresh materials for its food products thereby enhancing the product quality and economic development of the local communities.	ADF obtains majority of agro-based raw material from local mandis. The promotion of local vendors provides them with an enhanced source of revenue.	The reasonable cost of raw materials due to purchasing from local vendors enhanced ADF's commitment to the environment by lowering emissions from reduced transportation, improving product quality attributable to freshly sourced raw material, and upliftment of the local community.
13	Product Design & Lifecycle Management	Opportunity	Improved package quality in terms of environmental friendliness would significantly minimize ADF's carbon footprint and demonstrate ADF's commitment to the sustainable environment.	Efforts are being developed to transition all viable items to more environmentally friendly packaging.	Environmentally friendly packaging will ultimately lower indirect waste management costs and move the company towards a more sustainable model.
14	Product quality and safety	Risk	With the packaged food industry's high sensitivity to product quality and safety concerns, controlling risks associated with product responsibility is critical for a successful business model.	Comprehensive monitoring systems of all business operations to assure product quality and strict guidelines for guaranteeing product safety in accordance with industry standards and applicable statutory norms.	Any deviation from product quality and safety standards could result in fines and loss of business and therefore revenue. It can also potentially cause a reputational loss for the company.
15	Business Conduct and Ethics	Risk	Any transgression of the organization's ethical standards may result in the loss of goodwill of the business and may have financial and legal repercussions.	Mechanisms for rigorous monitoring and compliance are put in place to ensure that all business operations adhere to the company's principles and rules.	A violation in any of the business activities can lead to severe reputational, financial, and legal risk for the organisation.
