Wholesale Inflation Hits 3-Yr Low in Oct

THE FACTORS Inflation for manufactured items at -0.84% while that for fuel & power stood at -0.27%

Our Bureau

New Delhi: India's wholesale inflation eased to 0.1% in October, its lowest since late 2013, as the price of a fall in prices of fuel and manufactured goods. Inflation for manufactured items stood at -0.44% in October, down from 0.42% in September and a 2.7% last month against -0.5% in September. Data revealed the consumer and industry ministry on Thursday showed WPI was up 0.82% in September. High food inflation, however, kept the Wholesale Price Index (WPI) from falling into negative zone. Food inflation grew to 8% in October from 7.4% in the previous month. Oil prices, however, fell 12.1% in October in September. This trend of food inflation going up and that of manufactured products falling will continue for some more time, said Manoj Sahasrabudhe, chief economist at CARE Ratings. This will lead to lower wholesale price inflation and higher consumer price inflation, he said. Sahasrabudhe predicted a change in the trend to

Food Remains Costly

Key Point Inflation for manufactured items was negative, while that for fuel & power stood at -0.27%. Total WPI was up 0.82% in October.

on but a reversal is likely January onwards. Retail inflation had seen a 16-month high in October, but the Reserve Bank of India's next move on July 2016 due to rising food prices data released by the statistics office on Wednesday showed. The WPI inflation for primary articles was 5.1% in October, against 5.34% in September while WPI for core inflation for October was 1.4% versus 1.1% in September, reflecting a further decline in consumer prices. The fall in the WPI inflation in October was a surprise as it was expected to rise to 0.7% in October. The number of items in the basket of core WPI index is also

improved. The government is not doing anything to the core inflation, which is the main driver of the inflation. The number of items in the basket of core WPI index is also
