**Press Release**  
**KANPUR PLASTIPACK LIMITED**  
**June 06, 2023**  
**Rating Downgraded**

Product	Quantum (Rs. Cr)	Long Term Rating	Short Term Rating
Bank Loan Ratings	306.49	ACUITE BBB+   Stable   Downgraded	-
Bank Loan Ratings	60.07	-	ACUITE A2   Downgraded
<b>Total Outstanding Quantum (Rs. Cr)</b>	<b>366.56</b>	-	-

**Rating Rationale**

Acuite has downgraded its long-term rating to **Acuite BBB+** (read as **Acuite triple B plus**) from **Acuite A-** (read as **Acuite A minus**) and its short-term rating to **Acuite A2** (read as **Acuite A two**) from **Acuite A2+** (read as **Acuite A two plus**) on the Rs. 366.56 crore bank facilities of Kanpur Plastipack Limited (KPL). The outlook remains 'stable'.

**Rationale for rating downgrade**

The rating downgrade reflects the sharp decline in the operating performance of the company in FY23, which stood at Rs. 476.85 crore against Rs. 626.77 crore in FY22. Further, the downgrade in rating factors in the significant decline in operating margins of the company, which have declined to 5.51% in FY 2023 as against 9.71% in FY 2022. The rating also factors in the stretched liquidity profile as net cash accruals generated in FY 2023 are not sufficient to repay the debt obligations during the same period. However, the rating continues to positively factor in the established track record of operating and moderate financial risk profiles of the company, marked by low gearing and moderate net worth.

**About the Company**

Kanpur-based Kanpur Plastipack Limited was incorporated in July 1971 as a private limited company by Mr. Mahesh Swarup Agarwal. The company is engaged in the manufacturing and exporting of flexible intermediate bulk containers (FIBCs), PP woven fabrics, and multifilament yarn (MFY). The company has an installed capacity of 30,300 MT, with an additional 5000 MT added in FY2022. KPL is listed on the BSE and NSE.

**Analytical Approach**

Acuite has considered the standalone financial and business risk profiles of KPL to arrive at the rating.

**Key Rating Drivers**

**Strengths**

**Experienced management and an established track record of operations**

Incorporated in 1971, the company commenced its operations under the leadership of Mr. Mahesh Swarup Agarwal, and thus, the company boasts a long track record of operations spanning five decades in the packaging industry. KPPL started manufacturing high-density

polyethylene woven fabric, sacks, and plastic. Currently, the company is engaged in the manufacturing and exporting of flexible intermediate bulk containers (FIBCs), PP woven

fabrics, and multifilament yarn (MFY). The established presence of the company, along with experienced management, has helped KPPL maintain a long relationship with its customers, which has aided the company in maintaining healthy revenue. The key customers of the company include names like Pema Verpackung GmbH, King Bag, and Manufacturing, among others, with no major concentration in revenues. Acuité believes KPL will continue to benefit from its long track record of operations, its strong presence in the export market, and the rich experience of its management over the medium term.

### **Moderate financial risk profile**

The financial risk profile of the company is moderate, with moderate net worth, low gearing, and average debt protection metrics. The net worth of the company stood at Rs. 180.51 crore as of March 31, 2023, compared to Rs. 179.04 crore as of March 31, 2022. The total debt of the company stood at Rs. 165.63 crore as of March 31, 2023, compared to Rs. 182.70 crore as of March 31, 2022. There is an increase in the long-term debt, which stood at Rs. 72.96 crore in FY23 against Rs. 68.59 crore in FY22, on account of debt-funded capital expenditure related to the CPP project, which will commence in June 2023. The gearing of the company is low, which stood at 0.92 times as of March 31, 2023, compared to 1.02 times as of March 31, 2022. The TOL/TNW ratio stood at 1.26 times as of March 31, 2023, against 1.35 times on March 31, 2022. The interest coverage ratio and debt service coverage ratio of the company stood at 2.14 times and 0.91 times for FY23, respectively, against 4.37 times and 1.92 times for FY22, respectively. The ROCE of the company stood at 4% in FY23 against 14.39% in FY22.

Acuite believes that the financial risk profile of the company may improve in the medium term as the company is not planning any other debt-financed capex plans in the near future.

### **Weaknesses**

#### **Slowdown in the operating performance of the company**

The company achieved a turnover of Rs. 474.68 crore in FY23, compared to Rs. 626.77 crore in FY22. The company has shown a sharp decline in the top-line and bottom-line of business due to the absence of fabric sales in Brazil and a recession in the EU countries. In results, a lack of demand and a highly competitive market environment led to lower realisations. The EBITDA margins of the company stood at 5.51% in FY23 against 9.71% in FY22. Also, capacity utilisation is on the lower side in Q3FY23 compared to Q3FY22.

Acuite believes that in the succeeding years, the company may improve its margins as compared to FY23 on account of a new project that is estimated to be completed by June 2023.

#### **Working capital-intensive nature**

The working capital of the company is intensive, as marked by gross current asset days, which stood at 114 days as of March 31, 2023, compared to 108 days as of March 31, 2022. The GCA days are high in FY23 as compared to FY22 on account of the increase in debtor days, which stood at 34 days for FY22 and 38 days for FY23. However, the average debtor days maintained by the company are in the range of 30–40 days. Further, the inventory days of the company stood at 66 days for FY23 against 76 days for FY22. However, the average inventory days maintained by the company are 60–70 days. On the other hand, the creditors of the company stood at 17 days for FY23 against 14 days for FY22.

Acuite believes that the working capital operations of KPL may continue to be intensive, considering the nature of the business.

#### **Susceptibility of profitability margins to fluctuations in raw material prices and foreign exchange fluctuations**

The basic raw materials required by KPL are plastic granules, which are crude oil derivatives. The prices of the commodities are subject to volatility in line with those of global crude oil prices. Furthermore, KPL exports 72% to Europe, the United States, and some Asian countries while importing only 5% of raw materials. Thus, it is exposed to adverse fluctuations in foreign currency exchange rates. However, KPL generally enters into forward contracts, which partially mitigate the forex risk.

### **Rating Sensitivities**

- Improvement in the operating performance along with improvement in profitability.
- Any deterioration in the working capital cycle leading to deterioration in financial risk profile and liquidity position

### **Material covenants**

None.

### **Liquidity Position**

#### **Stretched**

The liquidity profile of the company is stretched. The company generated net cash accruals of Rs. 15.14 crore in FY23 against a debt repayment obligation of Rs. 18.07 crore in the same period. However, the shortfall will be paid off through grants received from the government. In the coming years, the company is expected to generate enough net cash accruals to repay its debt obligations in the near term. The unencumbered cash and bank balance stood at Rs. 0.54 crore in FY23. Also, the current ratio of the company stood at 1.16 times in FY23 against 1.23 times in FY22.

### **Outlook: Stable**

Acuité believes that Kanpur Plastipack will maintain a 'stable' outlook over the medium term on the back of its established track record of operations and experienced management. The outlook may be revised to 'positive' in case the company registers higher-than-expected growth in its revenues and profitability while maintaining its capacity utilisation. Conversely, the outlook may be revised to 'negative' in case the company registers lower-than-expected growth in revenues and profitability or in case of deterioration in the company's financial risk profile or further elongation in the working capital cycle.

### **Other Factors affecting Rating**

None

## Key Financials

### Note on complexity levels of the rated instrument

In order to inform the investors about complexity of instruments, Acuite has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuite's categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk. For more details, please refer Rating Criteria "Complexity Level Of Financial Instruments" on [www.acuite.in](http://www.acuite.in)

### About Acuité Ratings & Research

Acuité is a full-service Credit Rating Agency registered with the Securities & Exchange Board of India (SEBI). The company received RBI Accreditation as an External Credit Assessment Institution (ECAI) for Bank Loan Ratings under BASEL-II norms in the year 2012. Acuité has assigned ratings to various securities, debt instruments and bank facilities of entities spread across the country and across a wide cross section of industries. It has its Registered and Head Office in Kanjurmarg, Mumbai.

**Disclaimer:** An Acuité rating does not constitute an audit of the rated entity and should not be treated as a recommendation or opinion that is intended to substitute for a financial adviser's or investor's independent assessment of whether to buy, sell or hold any security. Ratings assigned by Acuité are based on the data and information provided by the issuer and obtained from other reliable sources. Although reasonable care has been taken to ensure that the data and information is true, Acuité, in particular, makes no representation or warranty, expressed or implied with respect to the adequacy, accuracy or completeness of the information relied upon. Acuité is not responsible for any errors or omissions and especially states that it has no financial liability whatsoever for any direct, indirect or consequential loss of any kind, arising from the use of its ratings. Ratings assigned by Acuité are subject to a process of surveillance which may lead to a revision in ratings as and when the circumstances so warrant. Please visit our website ([www.acuite.in](http://www.acuite.in)) for the latest information on any instrument rated by Acuité.
