Avg price from conventional power plants rises to ₹3.85 a unit in FY21

FE BUREAU New Delhi, April 1

THE AVERAGE COST at which states purchased electricity from non-renewable energy sources in FY21 has been calculated to be ₹3.85/unit by the Central Electricity **Regulatory Commis**sion (CERC). The figure is about 7% higher than the av-

ble in FY20. As per the CERC's calculations, the states consumed 1,118.6 billion units of non-renewable electricity in the fiscal. Power from conventional sources comprise more than 90% of electricity supplied in the country.

erage price applica-

The national-level average power purchase cost (APPC) is derived by computing average prices paid by all states/UTs,

weighted by volume of conventional power purchased by them. The major states which pays the highest power prices are Assam (₹5.14/unit), Uttar Pradesh (₹4.45/unit), Karnataka (₹4.38/unit), Bihar (₹4.256/unit) and Maha-

> rashtra (₹4/unit). The national APPC for FY17, FY18, FY19 and FY20 were ₹3.40/unit, ₹3.48, ₹3.53 and ₹3.60, respectively.

Electricity tariffs from thermal generating stations are determined either by the costplus system (based on actual expenses and expected returns), or through competitive bidding. APPC helps in the calculation of penalties payable by open access and captive wind and solar generators for deviating from their respective scheduled electricity supply volumes.

'Industry-friendly steps led to record highway build'

SURYA SARATHI RAY New Delhi, April 1 THE RECORD-BREAKING

PACE of highway construction in FY21—it touched an all-time high of 36.4 km/day in the year — is the result of a slew of industry-friendly measures that the government has taken during the pandemic year to ensure better cash flow to the contractors, analysts say. All executing agencies, including NHAI, together constructed a record of 13,298 km in 2020-21, up from 10,237 km in 2019-20.

Jagannarayan Padmanabdence to the market participants, which led to an accelerated development."

Over the years, the ministry has evolved a robust project monitoring system to track progress of construction and pro-actively engage in solving issues. Availability of land and lesser movement of public also helped in speeding up of construction, Padmanabhan said.

Icra's Rajeshwar Burla said that relief measures like shift

(typically ranging between 45-75 days) to monthly billing and release of retention money or performance security in proportion to the work already executed among others had immensely supported the road contractors by reducing the cash conversion cycle.

"Due to improved cash conversion cycle from MoRTH/ NHAI projects, many road contractors made special arrangements to facilitate return of labour notwithstanding the high cost of re-mobilising labour. As a result, the execution witnessed sharp increase, ably supported by the liquidity boosting measures," Burla said.

Kushal Singh, partner, Deloitte India, said, "MoRTH and its agencies have brought out a comprehensive Covid relief package, including policy measures to resolve cash flow problems and contractual relief to

contractors. The roads sector has also emerged as a preferred investment destination for investors looking for low risk, long-term returns."

Others said if the liquidity boosting steps are continued, this along with eadsing in qualifications for bidders could result in steep rise in execution over 40 km/day. At the end of March 2021, projects worth ₹9,22,404 crore are ongoing on a length of 64,010 km.

Over the last seven years, country's national highway length has increased by 50% from 91,287 km, as of April 2014 to 1,37,625 km, as on March 20, 2021, the road ministry said. Average annual project award during FY15-21 has increased by 85% compared to FY10-14. During 2020-21, 10,467 km highway project has been awarded, up from 8,948 km a year earlier.

India power demand falls for first time in 35 years

SUDARSHAN VARADHAN Chennai, April 1

INDIA'S ANNUAL ELECTRIC-**ITY** demand fell for the first time in at least 35 years in the fiscal year to March, government data reviewed by *Reuters* showed, mainly due to strict coronavirus lockdowns across the country.

Power demand fell 1% during the year ending March 2021, the data showed, mainly due to the imposition of lockdowns that resulted in a decline in electricity consumption for six straight months ending in August. Demand for electricity has

picked up since, and generation grew 23.3% in March from a year earlier, a *Reuters* analysis of daily load despatch data from federal grid operator POSOCO showed, making it the seventh consecutive monthly increase and the fastest since March 2010.

Power generation fell 0.2% during the year 2020/21, compared with the previous year, the POSOCO data showed. Power generation in March grew much faster than the average increase of 6% in the last six

months, mainly as India had imposed an intense nationwide lockdown in the last week of March 2020, resulting in a dramatic fall in power usage.

Electricity demand has been steadily increasing this year due to a pickup in economic activity and amid higher temperatures being recorded in March in northern India, which could have led to higher use of air conditioning.

Power demand growth data New Delhi, April 1 has only been publicly available from 1985/1986. It had grown every year since then.
