**▼ LAKSHYA 5 YEAR PLAN**

**26<sup>th</sup> August, 2021**

# LAKSHYA 5 YEAR PLAN

This year, JAI launches its first 5-year plan named “Lakshya 50XT” with 4 key targets for FY-26. The launch of this plan is an important milestone for JAI to bring together the entire organization and to focus on a common goal. The key objective of this plan is to achieve future growth and to de-risk business through market & product diversification.

# LAKSHYA 50XT

## 50% revenue from New Markets

JAI strategy is to serve diverse markets to achieve its growth objectives. In this direction we have taken several steps to increase our market share in Domestic After-Market and Exports. With these initiatives we have successfully created a structure of SCM and channel partners to supply varied products pan India. We would leverage this structure to sell various new products. We have achieved limited success in increasing our after-market sales and there is still good potential to increase our sales further. As we have already created a distribution network, we will reap the benefits going forward. We are further complementing our actions by doing direct retailing and digitizing the entire After Market operations. It is likely that the consolidation in market place will take place due to GST and demonetization, which will give tailwind effect to our efforts and increase our sales further.

In the after-market export also JAI has done a lot of ground work which has not reflected into topline numbers. We are hopeful that sales numbers would start improving in next 3 years. We are evaluating more product lines which have a good potential in export market. In this 5 year plan JAI will also be focusing on OE-Exports. JAI targets 50% revenue from new markets of which **10% would be from Exports.**

## 50% revenue from New Products

We have been launching a range of new products every few years which has increased our share of revenue from new products. Going forward we would be further increasing our existing product portfolio to increase content per vehicle. The plan is to introduce new products such as allied parts for suspension, machined parts, full range of trailer suspension and other products through distribution, sourcing or manufactured route. We plan to leverage our existing infrastructure which is favorably placed near customer's location.

JAI is also planning to add many new products in After Market to increase (COPC) Content of Other Products sales for Channel partners (distributor, dealer and mechanics) which will help in increase their revenues.

JAI has launched various high technology products like Parabolic Springs and Lift Axles in the past. Our R&D team has developed Extralite Springs using technology from Tinsley Bridge Ltd. - U.K. These Extralite Springs are currently under validation. We also plan to introduce cold processed U-Bolt using superior manufacturing and design technology. Going forward technology will be focus area for us. JAI targets 50% revenue from new products of which **10% would be from new technology products.**

## **50% Return On Capital Employed**

JAI would continue to remain ROCE focused company. Our current Lakshya Target is 33% ROCE. With the company's prudent financial policies, lower breakeven point and increased share of value added products & diversified markets, JAI targets 50% ROCE by FY-26.

## **50% Dividend Pay-out**

JAI current dividend policy is to pay 33% of PAT as dividend. In accordance with the Lakshya 50XT plan, by FY 26 JAI shall target distribution of 50% of PAT in a year as dividend (inclusive of tax, if any) or shares buy back or both.
