(₹ Mn)

REVENUE

737

⬆️ 27% YoY

EBITDA

6

⬆️ 88% YoY

PAT

12

⬆️ 47% YoY

Commenting on the results, Mr. Rameshbhai Talavia, Chairman and Managing Director, said:

FY23 ended as a good year for the Company despite multiple macro challenges within the agrochemical industry. Amidst all the headwinds within the industry, the Company managed to deliver a robust 35% annual sales growth, coupled with 15% net profit growth during the year. H2 ended-up being a challenging period, where several industry-level challenges such as destocking of supply chains, steep fall in prices of inputs & agrochemical products led to a standstill within the industry. On the Company level, we witnessed an average 25% reduction in price realisations in the last 5 months, which has led to degrowth in H2FY23 compared to the corresponding period in previous year, despite registering slightly higher sales volumes.

The new season for the domestic business, which typically starts around mid-March for DCGL, seems to be delayed by a month as we witnessed slower offtake in April. We are hopeful of better offtake with the onset of the new monsoon as the buying for the upcoming season kicks in. Further, we are excited about our Branded business for the upcoming year, as the Company has tapped six new states last year where we will be operating for the first full season in H1FY24. These states will be a major driver for the Branded vertical in the coming year. On the institutional side, the Company has started initial business with some larger accounts as well, and we expect these relationships to scale up as we expand across active ingredients. We are also anticipating higher business on the exports front this year, on the back of product registrations and entry into new markets.

The work at the Sayakha Unit is going on at a brisk pace. After the completion of civil works, the team at the site has almost finished reactor installation in the intermediates block and will take up the Technicals block next. We are on track to commercialise this facility in Q3FY23. The R&D laboratory at the Sayakha unit is expected to start in June 2023. We have already appointed the head of the R&D function at Sayakha and are in the process of building the rest of the team. This team will be working on process research for our initial product basket, helping the Company optimise yields, achieve better process efficiency, and overall productivity.

As we enter the new financial year, we look forward to growth on all fronts i.e., our existing branded & institutional formulations business, while commencing our upcoming active ingredients business.

Profit & Loss Summary

About Dharmaj Crop Guard Limited

Dharmaj Crop Guard Limited ("Dharmaj", "the Company") is a dynamic and fast-growing agrochemicals company engaged in manufacturing & marketing agrochemical formulations like insecticides, fungicides, herbicides, plant growth regulators, and micro fertilisers. The Company markets and distributes generic & licensed formulations to B2C customers (farmers) under its brands and to B2B customers (institutional). Dharmaj is also engaged in the business of general insect and pest control chemicals for public and animal health protection. The Company has initiated actions to enter the active ingredients segment and become an integrated player across the agro-chemical value chain, with its upcoming 8,000 TPA intermediates & technicals unit at Sayakha, which is expected to commercialise in Q3FY24.

Dharmaj has been redefining the crop protection segment with top-quality formulation, product performance, ability to continually expand its portfolio, making it a trusted player to more than 730+ customers in India and across 26+ countries in Latin America, East African Countries, the Middle East and Far East Asia.
