- Interest-Rate Risk: REITs & InvITs carry interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- Market Risk: REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures.
- Risk of lower than expected distributions: The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/INVIT receives as dividends or the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate based on, among other things: . success and economic viability of tenants and off-takers
- economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
- debt service requirements and other liabilities of the portfolio assets and fluctuations in the working capital needs
- · ability of portfolio assets to borrow funds and access capital markets
- amount and timing of capital expenditures on portfolio assets
- Liquidity Risk: This refers to the ease with which REIT/InvIT units can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists.
- Reinvestment Risk: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- Price-Risk: The valuation of the REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. real estate) in which the REIT/InvIT operates. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian law in the event of insolvency or liquidation of any of the portfolio assets.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.
