# Commercial cultivation of GM mustard in 3 years: Scientists

SANDIP DAS  
New Delhi, October 31

## MUSTARD SEED PRODUCTION

conducted this season. According to NAAS, the trials conducted over three years at eight locations under the supervision of ICAR-Directorate of Rapeseed and Mustard Research (DRMR), Bharatpur, Rajasthan showed DMH-11 to have, on average, a yield advantage of 28% over the widely cultivated mustard variety Varuna. The average yield of mus-

tard, which has a share of around 40% in the country's edible oil production, has been around 1.5 tonne per hectare.

Scientists say there are regional variations in yield pattern as mostly mustard is grown in rainfed condition while yield has been largely stagnated in the country.

The DMH-11 variety could boost mustard yield to close to 2.5/tonne per hectare from current level of 1.5 tonne/hectare, according to KC Bansal, secretary, NAAS.

The GM mustard variety DMH-11 is expected to help fight orobanche weed which hits yield of crop in 2.5 million hectare (mh) out of around 7 mh cultivated area and herbicides tolerant trait of variety could be inserted into existing varieties for increasing their yield.

GEAC last week had recommended an 'environmental' release of a transgenic mustard hybrid, making it the first GM crop to get such regulatory approval in two decades.

In a communication to Deepak Pental, former professor, Centre for Genetic Manipulation of Crop Plants, University of Delhi, who holds the patent for the DMH-11, GEAC

has stated these events can be used for developing new parental lines and hybrids under supervision of ICAR, "The environmental release of mustard hybrid DMH-11 for undertaking its seed production and testing as per existing ICAR guidelines and other extent rules or regulations prior to commercial release," according to GEAC communication.

India started commercial cultivation of BT cotton in 2002, which resulted in an impressive threefold increase in cotton yield within a decade.

While the then Genetic Engineering Approval Committee had approved the first transgenic food crop Bt Brinjal in 2009 for wider environmental release, the decision was later stayed by the then environment minister Jairam Ramesh on grounds of 'insufficient scientific evidence about safety'. The issue has since been hanging fire.

India meets around 56% of its annual edible oil consumption via imports. The country's edible oil production is in the range of 10-3 mt - 11.6 mt during 2017-18 - 2021-22 while demand has been in the range of 24-25 mt resulting in rise in imports.

# State-run banks asked to improve outreach to GenNext customers

BANIKINKAR PATTANAYAK  
New Delhi, October 31

THE FINANCE MINISTRY has asked state-run banks to conduct open-house interactions with GenNext customers across centres, seeking to improve loan flow to start-ups, budding entrepreneurs by better understanding their requirements, official and banking sources told FE.

The move follows the ministry's directive to public-sector banks (PSBs) to conduct a third-party survey "for a reality check" on benefits accrued to customers due to various reforms measures undertaken by them over the past four years. FE had earlier reported that finance minister Nirmala Sitharaman had also asked PSBs to develop business models, factoring in the requirements of the GenNext customers.

"The government's idea is to nudge the PSBs to adopt a more customer-centric approach and identify potential areas of growth. The customer base has risen substantially, so have their requirements," said one of the sources. "For instance, start-ups and first-generation entrepreneurs may have business ideas that are vastly different from those of traditional businesses. So, it's important that PSBs are able to aggressively

■ Finance minister Nirmala Sitharaman had also asked PSBs to develop business models, factoring in requirements of the GenNext customers

■ The idea is to nudge PSBs to adopt a more customer-centric approach and identify potential areas of growth

department for the promotion of industry and internal trade, who can be tapped as for credit requirement.

Non-food bank credit grew 16.9% in September, against 6.8% a year before, according to the latest Reserve Bank of India (RBI) data. Loans to industry, however, grew at a slower pace of 12.6% in September, still impressive by its standard, against 1.7% a year earlier.

In recent months, the ministry has renewed focus on the "good old 'customer-first'" approach, as it feels state-run banks' understanding of the changing needs of customers will help them withstand fierce competition from their private peers, who have been steadily wooing customers away from the PSBs due to what many perceive as their "better customer services".

The share of state-run banks in total loans and advances dropped from almost 71% in FY16 to about 59% in FY21.

Consequently, the latest version of the EASE (Enhanced Access and Service Excellence) reform programme for PSBs lays great stress on the need for state-run banks to continue to invest in new-age capabilities and deepen the on-going reforms to respond to evolving customer needs.

tap different types of customers," he added.

The move will help start-ups that are hit hard by the pandemic and are now going to be impacted further by the rising interest rate scenario when liquidity is unlikely to be easily available to new entrepreneurs. Already, the funds raised by Indian start-ups between January and September dropped 19% on year to \$2.2 billion, according to Inc42's Indian Startup Funding Report Q3 2022. Over 75,000 start-ups are currently recognised by the

# Sebi disposes of matter against two persons in WhatsApp case

PRESS TRUST OF INDIA  
New Delhi, October 31

CAPITAL MARKETS REGULATOR Sebi on Monday dismissed insider trading charges against two persons who circulated alleged unpublished price-sensitive information about the financial results of ITC through WhatsApp messages.

The individuals are Parthiv Dalal and Shruti Vora, the Securities and Exchange Board of India (Sebi) said in its order.

Sebi, last month, had disposed of the adjudication proceedings against four individuals, including Vora, in the case pertaining to alleged circulation of unpublished price-sensitive information (UPSI) about the financial results of half a dozen companies, including TCS and Ultra-Tech Cement.

The orders came after the Securities Appellate Tribunal (SAT) had set aside Sebi's insider trading charges against certain individuals in the WhatsApp leak case in March 2021 and the same was upheld by the Supreme Court on September 26 this year.

The case pertains to the circulation of UPSI in various private WhatsApp groups about certain companies ahead of their official result announcements to the stock exchanges.

It was alleged that Dalal and Vora communicated the UPSI related to ITC - revenue, profit after tax, depreciations, finance cost, other income, among others - for the quarter ended September 2016 to other persons through WhatsApp messages and violated the provisions of insider trading rules.

In its order passed on Monday, Sebi has disposed of insider trading charges against the two individuals.

Dismissing the charges against these two persons, the regulator said the instant case is a replica of the case that was decided by SAT in March 2021 and upheld by the Supreme Court its order passed on September 26, 2022, with the only difference being that the circulation of WhatsApp messages pertain to different scrips.

SAT had noted the definitions of unpublished price sensitive information and insider information and had said that generally, available information would not be a UPSI.

It further said information can be branded as UPSI only when the person getting the information had knowledge that it was UPSI.

In 2017, some news reports referred to the circulation of UPSI in various private WhatsApp groups about certain companies ahead of their official result announcements.

Against that backdrop, Sebi had initiated a preliminary examination in the matter during which search and seizure operations against 26 entities of a WhatsApp group were conducted, and about 190 devices and records, among others, were seized.

WhatsApp chats extracted from the seized devices were examined and it was found that earnings data and other financial information of around 12 companies were leaked through the messages.

# UP to be data centre hub, ₹20k-cr investment target met, says CM

PRESS TRUST OF INDIA  
Noida, October 31

UTTAR PRADESH CHIEF minister Yogi Adityanath on Monday said the state has achieved an investment target of ₹20,000 crore in the first year of implementing its data centre policy and assured investors that their investment will remain safe in the state.

Speaking at the launch function of Hiranandani Group's data centre facility, Adityanath said Uttar Pradesh is going to become a hub of data centres.

He said corporates like Adani, WebWorx, Sify, STT and NTT have also submitted their investment proposals which are under consideration.

"UP is going to become a hub of data centres. State government's data centre policy has achieved a total targeted investment of Rs 20,000 crore in its first year of commencement. We have received investment proposals from Indian and global data centre investors of over 600 megawatt data centres," the chief minister said.

Data centre capacity is measured in terms of power it consumes.

Adityanath further said when Uttar Pradesh came up with its policy, the total data centre capacity in the entire country was 400 MW.

UP is going to become a hub of data centres. State government's data centre policy has achieved a total targeted investment of ₹20,000 crore in its first year of commencement.

YOGI ADITYANATH  
CHIEF MINISTER, UP

He said Gautam Buddha Nagar has emerged as a centre for the IT industry and both domestic as well as foreign investors continue to invest in the district.

"Gautam Buddha Nagar was cursed for UP chief ministers. It was believed that no UP chief minister should visit Gautam Buddha Nagar. When I started visiting this place five years ago, there were several questions raised. My friends in opposition also said that your chair is in danger. I told them the chair doesn't go with anyone. If it has to go tomorrow, it should go today but I cannot betray people," Adityanath said.

He said people again elected a 'double engine' government (same political party in Centre and state) and Uttar Pradesh has emerged as one of the leading investment destinations. At present, it is the top state for mobile phone and

components manufacturing. The pledge taken by Prime Minister Narendra Modi to make India a \$5 trillion economy is possible, he added.

Adityanath said his government is committed to a zero tolerance policy against crime and corruption to make investments made by all investors safe in the state.

"At some point of time there used to be numerous mafia groups. Investors used to run away. Now there are no mafia groups and there can be no crime syndicate in the state."

"I want to assure all investor partners that investment done by them in the state will be completely secure and the state government will help them in growing it further," the chief minister said.

Minister of State for Electronics and IT Rajeev Chandrasekhar said the Uttar Pradesh government is taking the lead in the field of manufacturing, IT and digitisation.

He said 92% of mobile phones used in the country in 2014 were imported, but now in 2022, 97% of the handsets used domestically are made in India. The country is also exporting phones worth ₹70,000 crore.
