Dear Shareholder,

As the world realigns itself to better deal with global health challenges, it has become increasingly important to create a strong, efficient global health architecture that paves the way for a unified response in case of future crises. In the complex and evolving healthcare landscape, India is in a unique position to lead the way as President of the G20, and it has recognised its role in building a consensus on global health resilience.¹

Though the global environment is tackling significant challenges, India is one of the fastest-growing economies. As the World Bank pointed out, in its 2023 India Development Update, the overall growth remains robust and is estimated to be 6.9 percent for the full year, with real GDP growing 7.7 percent year-on-year during the first three quarters of the fiscal year 2022-23.²

India also has one of the youngest populations worldwide that could offer both a workforce and a market as the country powers on towards its ambitious target of becoming a US\$ 5 trillion economy. "As the country with the largest youth cohort, its 254 million youth (15-24 years) can be a source of innovation, new thinking and lasting solutions," said Andrea Wojnar, United Nations Population Fund (UNFPA) India representative and the country director for Bhutan, in April 2023.³ Provided the healthcare and education of this population are taken care of, it can propel economic growth for decades.⁴

India also has an edge in offering global healthcare solutions. As one study points out, "India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost-competitive compared to its peers in Asia and western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe."⁵ No wonder then that medical tourism – which the Indian Government is actively encouraging – is doing so well; the Indian medical tourism market is expected to generate US\$ 35.12 billion (about ₹3.5 lakh crore)⁶ in 2027 from US\$ 5.63 billion (about ₹41,000 crore)⁷ in 2021.⁸

Experts have also pointed out that the "vision for India as a healthcare hub for the world can be realised through some simple public-private partnerships."⁹ Various Government initiatives, such as Ayushman Bharat Pradhan Mantri Jan Arogya Yojana (PMJAY) and Ayushman Bharat Digital Mission (ABDM) have seen great traction too.

Novartis India Limited has been an enthusiastic participant in the growing Indian healthcare story. We also remain committed to the UN Sustainable Development Goals (SDGs), particularly Goal 3, which is designed to "Ensure healthy lives and promote well-being for all at all ages". Among the goals is achieving universal health coverage, and at Novartis India Limited, we believe that access to medicine, is a key aim.

As we continue to work towards our goal of reimagining medicine and extending lives, we have taken innovative steps to further improve reach and access to Novartis India Limited medicines.

On behalf of the Board of Directors, I, am pleased to continue with our steady dividend policy and propose a dividend of ₹ 10 per equity share of ₹ 5 face value per equity share; and on the occasion of the 75th Anniversary of the Company, we are pleased to additionally propose a special dividend of ₹ 37.5 per equity share of ₹ 5 face value per equity share at the forthcoming Annual General Meeting, subject to the approval of the shareholders of the Company.

Thank you for your continued confidence in our Company. I look forward to the same in the years ahead.

Sincerely,
Christopher Snook

Dear Shareholder,

India's healthcare industry has been seeing rapid advances, and with the pandemic acting as a catalyst, it has become even more of a priority for the Indian Government. The Union Budget 2023-24 allocated ₹89,155 crore to the sector, an increase of around 13 percent over the ₹79,145 crore in 2022-23.¹ Comes as no surprise that the industry has seen an annual growth rate of 23 percent, making it India's largest service sector.²

As many of you would agree, a healthcare system rests on the foundation of healthcare financing and healthcare delivery. Both need to work in tandem to deliver high-quality healthcare. In India, healthcare is changing rapidly, with a rising middle class demanding better healthcare. The government launching the Pradhan Mantri Jan Arogya Yojana (PM-JAY), aka Ayushman Bharat, is a big step toward universal health coverage.

Launched in 2018, Ayushman Bharat is the world's largest health insurance scheme fully financed by the government,

providing a health cover of ₹5 lakh per family per year for secondary and tertiary care hospitalisation to over 120 million poor and vulnerable families.³ As on January 4, 2023, as many as 21.9 crore beneficiaries had been verified under the Scheme, including three crore beneficiaries verified using State IT systems.⁴ This is a strong platform and needs to be extended to many more middle-income citizens of our country.

However, the real challenge in India continues to be healthcare delivery and we need to continue our quest to find innovative ways to ensure that we reach the remotest village and person needing diagnosis and treatment of their maladies. We have done so in mobile technology. Can we do so with healthcare?

Needless to say that technology has a huge potential to transform the healthcare delivery, testimony to which is telemedicine taking medical care to remote regions in the country. This smooth interaction between patients and doctors, that was adopted with great agility owing to the pandemic, is now prioritised by many healthcare delivery partners and pharmaceutical companies to be able to save lives. We saw multiple new-age solutions creating an online ecosystem for diagnosis, treatment and wellness of patients. "Patient First" being the motto of healthcare providers, we need to chart out a plan to feed the future of all the new capabilities that emerged during the lockdown and enhance the point of care with sustainable solutions.

Artificial Intelligence, Machine Learning, mobile apps, robotic surgery, health wearables and 3D printing, among

other things, are revolutionising the industry, and though MedTech in India is still at a nascent stage, it is growing exponentially. Indian MedTech was worth US\$10.36 billion (about ₹750 crore)⁵ in 2020 and is expected to increase at a CAGR of 37 percent in 2020-2025 to reach US\$50 billion (about ₹4,000 crore),⁶ with government support, growth in medical tourism, a growing population, and an increase in public and private spending, among other things.⁷

The pandemic also brought to light that collaboration is imperative, not only between the Government and the private sector organisation, but also amongst companies within the industry. Pharmaceutical companies have the wherewithal to augment a solution-led approach to improve access to medicines to tackle both communicable and non-communicable diseases.

We, at Novartis India Limited, believe that the healthcare industry can only fulfil its mission if medicines are available to as many people as possible. We also believe in collaborating with stakeholders in the healthcare ecosystem that resonate with our purpose of improving and extending people's lives.

As an organisation that believes in positive social change and works towards it as a core business objective, we also take great care to follow Environmental, Social and Governance (ESG) norms. As McKinsey has pointed out, ESG links to cash flow in five important ways – it facilitates top-line growth, reduces costs, minimises regulatory and legal interventions, increases employee

productivity, and optimises investment and capital expenditures.⁸

As a pharmaceutical company, Novartis India Limited aligns with Novartis' Global Sustainability commitments for 2025. To promote sustainable and environmentally compliant partnerships, Novartis India Limited is spearheading the implementation of ESG practices for third-party partners. All new contracts and amendments will mandatorily include the Environment Sustainability criteria as an annexure.

A comprehensive Standard Operating Procedure (SOP) has been developed outlining procedures for the retrieval and safe disposal of expired/defective products as per approved government protocol.

We are also cognizant of our carbon footprint and have taken initiatives to reduce energy consumption at our offices with designs that maximise natural light.

The Year Under Review

At 4.1 percent, the growth of the pharmaceutical sector in 2022-23 was modest as compared to the 10.3 percent recorded the previous year. This was largely due to cost-push pressures, supply chain disruptions, and the China lockdown impacting the availability of essential inputs and slowing the global economy.⁹

With normalcy returning to the nation after the pandemic-induced disruptions, activity picked up in the broad economy as well as in the healthcare sector. Surgeries which had to be postponed during the pandemic were once again being conducted, giving an uplift in demand for several of the Company's products, particularly in Transplant segments.

Revenue from operations for the year ended March 31, 2023, was ₹3,787.4 million, illustrating a decrease of 5.3 percent over the previous year. The Profit / (Loss) before tax for the year stood at ₹1,153.8 million, versus ₹(38.2) million in the previous year which is net of exceptional item.

The Pharmaceuticals business registered Net Revenue from Operations of ₹3,787.4 million, representing a decrease of 5.3 percent over the previous year. Though we would like to explain that underlying growth of our medicines in the market was 15 percent.

As you are aware, in February 2022, the Company entered into an exclusive sales and distribution agreement with Dr. Reddy's Laboratories (Dr. Reddy's) for a few of its established medicines, which include the Voveran® range, the Calcium range and Methergine. The objective of this arrangement was to further broaden access to these medicines beyond the current geographies to benefit many more patients more efficiently by significantly extending healthcare professionals' reach through an expanded field force. This new commercial model that we adopted last year has helped the Company reach more healthcare professionals and patients, thereby yielding positive results.

It gives me immense pleasure to share that the Voveran range has gained 2.9 percent market share in February 2023 versus October 2022 as reported by Healthplix in February 2023. In a cluttered marketplace, our flagship brand, Voveran range, has managed to improve its rank by two points from April 2022 to February 2023 as per IQVIA MAT February 2023 dataset. The

share of voice for these medicines has increased as indicated in the Strategic Marketing Solutions & Research Centre Evolution Index which reflects a positive trend across major doctor specialties for Voveran portfolio. These metrics are testimony to the success of our partnership with Dr. Reddy's intended to increase access to these medicines in India.

The combined approach of our focus on collaboration and different business models on ensuring wider access to our medicines has allowed your Company to improve volume growth and operating margins. Volume growth of our portfolio distributed by Dr. Reddy's was double digit. The Transplant business too had a handsome growth of 23 percent. The operating margins of your Company improved from 4.4 percent in FY 2021-2022 to 15.6 percent in FY 2022-2023.

Barring unforeseen circumstances, our endeavour over the next year is to continue on this strategic path of focusing on Bone & Pain, Transplants, Mature Neurology and Oncology portfolios and exploring innovative business models to improve business performance.

Through all the challenges, at Novartis India Limited, we are constantly working to build a stronger Company at every step of the way. I am optimistic that with our best efforts, we will continue to serve more patients.

We extend our gratitude to you for your faith in us and continued loyalty and support.

Sincerely,
Sanjay Murdeshwar
Vice Chairman & Managing Director

Reimagine access

to improve and extend people's lives

Healthcare is about Life and outcomes. It is about people living longer with reduced days of illness. Clearly, this has a huge impact on productivity of a nation. India has taken long strides towards improving health indicators and we at Novartis India Limited have been a partner in this journey for the last 75 years. A medicine is only as good as the system that delivers it. Improving access to healthcare requires long-term investments in healthcare infrastructure. We work with governments and partners to strengthen healthcare systems and lower barriers to healthcare delivery. In 2022, we continued to reimagine medicine, its access and deliver on our purpose to improve and extend people's lives.

REACHING MORE PATIENTS WITH INNOVATIVE MEDICINES

Our medications reach millions of people every year, but many more people still lack access to medicines and healthcare. We are committed to helping ensure that our medicines are accessible to as many patients as possible, irrespective of where they come from. We have therefore

embarked on a journey to fundamentally shift the way we do business and reimagine how to expand access to critical healthcare innovations.

We are committed to systematically integrating access strategies into how we deliver our medicines based on the Novartis Access Principles. These strategies include adopting innovative access models, supporting approaches to strengthen healthcare systems.

We share society's goal of better and more affordable healthcare for all. To achieve this, healthcare systems need to become more sustainable by focusing on delivering the most value to patients and society. Value-based healthcare is one of the solutions to delivering sustainable healthcare.

In value-based healthcare, all stakeholders are incentivised to deliver the best possible outcomes for patients, healthcare systems and society. The reallocation of resources to those interventions that add the most value has the potential to improve the efficiency of health systems. We work to empower patients to take ownership of their health and to better understand and manage their disease.

We implement programmes to raise awareness on diseases, promote health-seeking behaviour and educate on disease management. Our 'Zindagi Se Milao Kadam' campaign has enabled patients at more than 4,000 doctors to move beyond pain and stiffness through a simple and handy exercise education tool. We have also organised 49 Life Corporate Awareness talks across India to raise awareness for joint pain at the workplace owing to data stating 72 percent office workers experience joint pain at the workplace.

With the Novartis Commitment to Patients and Caregivers, our ambition is to embrace the perspective of patients and caregivers more firmly and embed it deeply in our daily work. We commit to intensify our dialogue with the patient community, whom we regard as valued partners. We are convinced that only by working together can we improve outcomes for patients and become a trusted partner in changing the practice of medicine.

In line with Novartis' commitment to go the last mile to eliminate leprosy, Novartis India Limited, through Corporate Social Responsibility, is working towards rehabilitating those afflicted with leprosy back

At Novartis India Limited, our workplace is diverse, equitable and inclusive (DEI), allowing everyone to be at ease with each other and true to themselves so that they can bring their best into the professional arena.

into society. The project aims to provide vocational training through government-accredited National Council for Vocational Education and Training courses to 90 students affected by leprosy. These students then undergo career coaching, soft-skills training, and job immersion to prepare them to enter the workforce. Potential employers and their teams are sensitised about leprosy to break the stigma and approximately 95 percent of the students are hired in jobs related to their trades within four months. They see an average increase of 20 percent in their incomes. Many of them are the first to break the cycle of generational poverty in their communities.

REIMAGINING A CULTURE THAT FOSTERS INNOVATIVE ACCESS MODELS

At Novartis India Limited, our workplace is diverse, equitable and inclusive (DEI), allowing everyone to be at ease with each other and true to themselves so that they can bring their best into the professional arena. In this positive environment, creativity can be unleashed to make our therapies

accessible to communities that are most in need. We foster an environment where purpose and focus take centre stage and where our people always take care to do the right thing.

Through its multifarious DEI practices, at Novartis India Limited we strive to create value by leveraging different perspectives, leading to greater innovation and creativity. Our business-led initiatives, policies and infrastructure are designed for inclusive workspaces to encourage diverse perspectives to create a culture of innovation – authentic spaces where everyone feels valued and heard. It encompasses programmes for LGBTQI, GENFLEX for different generations of our workforce to learn from each other and Women in Leadership with future-ready capabilities in mind.

By also looking after associates' personal needs – such as parental leave for women and men and being sensitive to disability – the Company ensures that our people are in the right frame of mind to give their best.

While the term 'organisational culture' may be perceived as nothing more

than a corporate buzzword, the fact is that it can deeply impact business success. As an organisation which strongly believes in a people-first culture to meet the shared goal of reimagining access, at Novartis India Limited, we translate this into action every step of the way. Our culture is reflected in the way we do things – showing up, interacting, and working towards our goals. It defines our daily work experience, creates impact and is our catalyst for innovation. It is the means by which personal goals are connected to our larger purpose in society – the foundation of our business performance that equips us to meet challenges head-on and keep going through every storm.

As Larry Senn, a pioneer in the field of corporate culture, once said: "Culture is not an initiative. Culture is the enabler of all initiatives."¹ When a company gets its culture right, it leads to faster ideas and decisions, paving the way for future change. At Novartis India Limited, we believe in this implicitly.

We are consistent with our parent organisation and are building a culture of being Inspired, Curious and

Unbossed with Integrity. This is a way of life, enabling associates to come together as #OneNovartis, where we are both team players and leaders, taking ownership and responsibility for everything we do.

Spark, an unbossed global recognition programme, empowers associates to recognise and reward behaviours that spark success. Associates also have access to an array of digital resources, on platforms such as Coursera, to help them and their loved ones to flourish in a challenging world. These resources enable people to be self-aware, own their development and manage their impact, not only on themselves but others.

INSPIRED

At Novartis India Limited, the priority is always our patients and customers; it is their concerns that keep us inspired as we continually seek bold new solutions

to meet their needs. In working for the patients, we not only live our purpose but also encourage those around us, never losing sight of the fact that our personal purpose must always be linked to reimagining medicine for the greater good.

CURIOUS

The inspiration to reach new goals, by its very nature, involves being self-aware, being open and always learning. As our teams meet new challenges, they constantly seek opportunities to experiment and grow their knowledge, building on diverse ideas and embracing feedback to grow personally and professionally. The goal is to contribute to collective success, which only comes from individual action.

UNBOSSSED

At Novartis India Limited, we believe that every associate is accountable – entirely in control of their own

effectiveness at the workplace and a role model to others. In our 'Unbossed' culture, we bring clarity to everything we do and own our actions; in doing this, we also serve others because that's what leaders do. Removing barriers for ourselves and others around us, empowering colleagues with compassion, and holding ourselves and others accountable are essential to successful working.

As part of its unbossed culture, Novartis India Limited has several initiatives in place to create opportunities for associates to take ownership of their growth. The Company democratises learning and development, offering tools to personalise career and learning opportunities, allowing associates to drive their development actively. As leadership development coach Jennifer Garvey Berger points out, "If people have a map of their own potential, it changes the way they see themselves,

and it changes their relationship from 'who I am now' to 'who I can become'.

Novartis India Limited also actively engages in comprehensive succession planning and development programmes across different levels of the organisation; in its constant endeavour to reimagine medicine, the Company proactively identifies and builds the right capabilities. Mentoring and coaching the next generation of leaders is a key activity to future-proof the Company's leadership and direction and continue to inspire innovation and healthcare transformation.

As a responsible organisation, we listen to our associates through engagement surveys, such as 'Our Voice' and 'Team Perspectives', provide real-time insights to optimise how we work together, leading to better business results.

INTEGRITY IS NON-NEGOTIABLE

While integrity at the organisational level is a given, it is the individuals who keep it that way, and it takes courage to be honest and do what's right, especially when ethical dilemmas loom large. At Novartis India Limited, we encourage associates to think about the rights and wrongs of every situation and speak up if there is a problem. Help is always available for those who need it.

Setting guardrails helps associates navigate through challenges with ease. Our Ethics, Risk and Compliance works to encourage associates to be compliant, effectively navigate risks, and do what's right for patients and society. It strengthens governance and establishes assurance across the organisation.

The inspiration to reach new goals, by its very nature, involves being self-aware, being open and always learning. As our teams meet new challenges, they constantly seek opportunities to experiment and grow their knowledge, building on diverse ideas and embracing feedback to grow personally and professionally.

Novartis AG has a slew of carefully considered policies for the welfare and well-being of associates. These policies are consistent at Novartis India Limited as well. For example, the right to paternity leave is becoming more widespread worldwide, with countries such as Denmark, Norway and Sweden encouraging progressive policies that allow both partners to share leave in those precious early days of parenthood. In India, however, while maternity leave is recognised, paternity leave has only recently begun to gain ground.

Our Parental Leave Policy Design applies to both the birthing mother and non-birthing parent being eligible for parental leave of up to 26 weeks, to be availed of within one year. This is applicable even in cases of surrogacy or adoption of a child. If an eligible associate's child is born prematurely, the leave will be extended to cover that prematurity period, provided that this difference is over one week. This extension applies equally to birthing and non-birthing parents.

Similarly, the Novartis Employee Assistance Programme (EAP) is designed to help people with personal difficulties before the problems negatively impact their work

environment. Available at no cost 24 hours a day, seven days a week to all associates and family members, EAP is designed to offer immediate access to support. Up to six telephonic, video or face-to-face counselling sessions are available to those who need them.

Apart from this emotional support referral, associates may also avail of work-life services, including legal, financial services and referrals. Support is available in the requested language, and confidentiality is a cornerstone. Managers, who are responsible for maintaining a productive environment, may also guide their team members to EAP if they notice a significant change in an associate's behaviour or performance. Referrals can be both informal or formal, and the aim is to ensure that associates are functioning at their best so that they can stay on top of the game at work.

We also empower our associates to contribute on their own terms to have an impact on society's biggest challenges and unmet needs – via employee giving, community initiatives and skills-based volunteering. Our aim is to transform the relationship between the organisation and local communities and to be a partner of choice for society.

Environmental, social and governance (ESG) topics are critical for delivering on our purpose of reimagining medicine and creating long-term value for our stakeholders and society

Consistent with its parent company, at Novartis India Limited we are aligned to the Global Sustainability commitments for 2025. To promote sustainable and environmentally compliant partnerships, we are spearheading the implementation of ESG practices for third-party partners. All new contracts and amendments will mandatorily include the Environment Sustainability criteria as an annexure. A comprehensive Standard Operating Procedure (SOP) has been developed that outlines procedures for the retrieval and safe disposal of expired/defective products as per approved government protocol.

Management Discussion and Analysis

For the financial year under review, the business operations of the Company comprise Pharmaceuticals.

a. Economy, Industry and Development

The COVID-19 pandemic has been the most impactful global public health crisis in decades, and yet it has illustrated the resilience of global health systems as they have readily adapted to peaks in demand.

The outlook is uncertain again amid financial sector turmoil, high inflation, ongoing effects of Russia's invasion of Ukraine, and three years of COVID¹. However, the Indian Economy continues to show resilience amid global uncertainties, it is expected to be 6.7 percent in FY 2022-23².

Structural changes in policy, centered around financial inclusion, has created a solid foundation for long term growth in India.

Trends in medicine use and spending have been impacted by the immediate effects of COVID-19, with a seven-year cumulative reduction in spending of USD 175 billion through 2026 compared to the pre-pandemic outlook. Spending on COVID-19 vaccines and novel therapeutics are expected to generate more than USD 300 billion in spending over the same period, and the outlook is a cumulative USD 133 billion higher than projected prior to the pandemic³.

The global medicine market is expected to grow at 3 - 6 percent CAGR through 2026, reaching about USD 1.8 trillion in total market size in 2026, including spending on COVID-19 vaccines⁴. This will be supported by strong growth in pharmerging markets and new brands in developed markets will contribute to global spending through 2026³.

The Indian Pharmaceutical Industry is currently valued at USD 42 billion and is expected to reach USD 65 billion by 2024 and ~USD 120 - 130 billion by 2030. Indian pharma exports witnessed a growth of 103 percent since 2013 to 2022. Exports achieved in 2021-22 is the Pharma Sector's best export performance ever. It is a remarkable growth with exports growing by almost USD 10 billion in 8 years⁵. Indian drugs are exported to more than 200 countries in the world, with the US being the key market⁶.

The Prime Minister of India announced the pilot project of the National Digital Health Mission ('NDHM') on August 15, 2021, and launched the project on September 27, 2021⁷. It will also aim to digitally reconcile the gap among different stakeholders in India's healthcare sector. NDHM comprises of five key components such as Health ID, Patient Health Record, Electronic Medical Record, Digi Doctor Platform, and Health Facility Registry. At a later stage, NDHM will also include e-pharmacy and telemedicine services⁸.

According to NDHM, individuals will get a health card (ABHA: Ayushman Bharat Health Account) containing personal details and current health record of the cardholder. This mission will connect medical practitioners and patients digitally. Additionally, it will promote stable and well-structured healthcare across the nation. The ABHA number will be used for the purposes of uniquely identifying persons, authenticate and threading their health records across multiple healthcare systems and stakeholders with a consent from patient⁸.

The health-tech start-up space in India is witnessing an exponential growth since COVID-19 pandemic. Pandemic has opened many opportunities for start-ups in the areas of online video consultations, ordering medicines online, managing chronic conditions using technology. The start-up ecosystem is well supported by start-up India, is an initiative of the Government of India.

b. Performance

Revenue from operations for the financial year ended March 31, 2023 was ₹ 3,787.4 million illustrating a decrease of 5.3 percent over the previous year.

The Profit/ (Loss) before tax for the year stood at ₹ 1,153.8 million versus ₹ (38.2) million in the previous year which is net of exceptional item.

Year 2022-23 witnessed the third wave of COVID-19 pandemic along with sporadic increase in cases across geographies. However, having learnt from the previous two waves, business was equipped to navigate this and ensure business continuity keeping in mind employee safety.

Novartis continues to engage Physicians for high brand recall and for dissemination of key scientific messages. This is done through differentiated campaigns channelized through RTEs (Rep Triggered Emails) and CMEs (Continuing Medical Education). We continue to create high differentiation for Novartis brands in a cluttered market for Transplant maintenance portfolio. Physicians have adapted well to digital engagements and we continue to implement them.

The Ministry of Health and Family Welfare, Government of India, has released the revised National List of Essential Medicines (NLEM), 2022. The revised list of NLEM has impacted 9 (Nine) brands marketed by the Company. These brands are majorly in the areas of Oncology and Neurology.

The Indian population currently has a very high burden of vascular risk factors, such as diabetes, hypertension and obesity, which can adversely impact the onset and progression of dementia¹. Offering great convenience and safety, our Neurosciences' innovative medicine for Alzheimer's disease dementia, Exelon Patch has seen greater patient acceptance and usability which is reflecting in the growth numbers.

c. Operational performance

The Pharmaceuticals business registered Net Revenue from Operations of ₹ 3,787.4 million representing a decrease of 5.3 percent over the previous year.

Transplant business observed gradual recovery in the number of transplants done throughout the year post COVID-19. Transplant business growth was driven by the gain in induction therapy patient share where Simulect became a preferred choice of induction therapy especially in low to moderate risk patients. This was achieved by continuing to drive innovative medico-marketing initiatives focusing on 'Prevention of Infection'. The innovative 'TRIO' campaign aimed at driving a portfolio-based approach, has led to the revival of the maintenance portfolio.

It has been a year of the exclusive sales and distribution arrangement entered into with Dr. Reddy's Laboratories (Dr. Reddy's) for the Established Medicines Brand which include the Voveran range, the Calcium range and Methergine. The arrangement aimed to broaden access of these medicines to larger geographies to benefit many more patients, more efficiently through an expanded field force.

Pain portfolio with its flagship brand Voveran range rank improved by 2 points from April, 2022 to February 2023¹ and a 2.9 percent market share gain for Voveran range in February, 2023 vs October, 2022². There is an increase in share of voice and Voveran gaining prescription share among doctor specialties across India. This was an outcome of strong differentiation for Voveran Emulgel in a cluttered counter-irritant market with the 'The Cool Movement' demonstration campaign.

A high-pitched campaign contributing to better management of joint pain and stiffness by driving patient awareness programs, 'Zindagi Se Milao Kadam' further extended to enable patients to move beyond pain and stiffness through simple and handy exercise education tool. 'Awareness for Life' Corporate Awareness talks were conducted across India to raise awareness for joint pain at workplace. The premise is that 72 percent office workers experience joint pain at workplace³.

The following brands hold key positions in major therapeutic areas such as:

Therapeutic Area	Therapeutic Area Product
Bone and Pain	Voveran®
Transplantation Immunology	Simulect®, Certican®, Sandimmun®, Neoral®, Myfortic®
Neurosciences	Tegrital®, Exelon®

d. Key Financial Indicators

Particulars	2022-23	2021-22
Operating profit margin (%)	15.6	4.4
Net profit margin (%)	27.3	-0.9
Debtors' turnover ratio	9.4	9.6
Current ratio	4.2	3.3
Return on Equity (%)	14.1	-0.5
Inventory turnover ratio	6.6	7.1
Debt service coverage ratio	19.4	1.0
Debt equity ratio	0.03	0.03
Return on capital employed (%)	7.9	-2.8
Return on Investment	5.2	3.2

Reasons for change compared to the previous financial year in key financial ratios are as follows:

Operating profit margin

Operating profit margin is a profitability or performance ratio used to calculate the percentage of profit of a company produces from its operations. It is calculated by dividing the operating earnings before interest and tax by turnover. Margins have improved because of operational efficiencies.

Net profit margin

The net profit margin is equal to how much net income or profit is generated as a percentage of revenue. It is calculated by dividing profit for the year by turnover. Net profit margin in the financial year 2022-23 has improved due to operational efficiencies, interest on income tax refund and an exceptional item relating to business transactions towards its erstwhile associates of Established Medicines Brand ('EMB') under employee separation scheme in previous year 2021-22.

Debtors' turnover ratio

It is calculated by dividing turnover by average trade receivables, to quantify a company's effectiveness in collecting its receivables. No major movement compared to previous year.

Current ratio

The current ratio is a liquidity ratio that measures a company's ability to pay short-term obligations or those due within one year. It is calculated by dividing the current assets by current liabilities. Current ratio has improved due to decrease in current liabilities due to inclusion of liability pertaining to exceptional item relating to business transaction towards its erstwhile associates of EMB under employee separation scheme in previous year.

Return on Equity

Return on equity is a measure of profitability of a company expressed in percentage. It is calculated by dividing profit for the year by average shareholder's equity. Return on equity has improved due to operational efficiencies, interest on income tax refund in year 2022-23 and an exceptional item relating to business transactions towards its erstwhile associates of EMB under employee separation scheme in previous year.

Inventory turnover ratio

Inventory turnover is the number of times a company sells and replaces its inventory during a period. It is calculated by dividing turnover by average inventory. No major movement compared to previous year.

Debt service coverage ratio

The debt service coverage ratio measures how many times a company can cover its current interest payment with its available earnings. It is calculated by dividing earning available for debt service by lease payments. The ratio has been impacted positively due to exceptional item relating to business transactions towards its erstwhile associates of EMB under employee separation scheme in previous year.

Debt equity ratio

The ratio is used to evaluate a company's financial leverage. It is a measure of the degree to which a company is financing its operations through debt versus wholly owned funds. It is calculated by dividing lease liabilities by shareholders equity. No major movement compared to previous year.

Return on Capital employed

Return on equity is a measure of profitability of a company expressed in percentage. It is calculated by dividing profit before interest and tax for the year by capital employed. Return on capital employed has improved due to operational efficiencies, interest on income tax refund in year 2022-23 and an exceptional item relating to business transactions towards its erstwhile associates of EMB under employee separation scheme in previous year.

Return on Investment

Return on investment is defined as return earned on the investment done. It is calculated by dividing weighted average interest income on bank deposit by weighted average bank deposits. Return on investment has improved due to operational efficiencies.

e. Risks, Threats, and Concerns

Supply continuity, quality of drugs, increasing cost pressure, inflation, high price elasticity (especially in Transplant products), control of prices of certain drugs under the Drug Price Control Order ('DPCO') continues to affect the profitability of the Pharmaceutical Industry. Revision of NLEM in September, 2022 has resulted in revision of ceiling prices, which would put further downward pressure on drug prices. Building investments in non-traditional opportunities, coupled with heightened competition and a rising cost of talent, will result in margin pressures.

The Indian Pharmaceutical Market ('IPM') is dominated by generic formulations and these drugs account for nearly 75 percent of the pharma industry. Prescription by generic names could also have an impact on pharma companies and it could necessitate a change in the Company's promotional strategies.

Regulations to cap trade margins on non-scheduled products, could impact the business model for trade generics.

f. Outlook

Medicine spending in India is projected to grow 9-12 percent over the next five years, leading India to become one of the top 10 countries in terms of medicine spending¹.

The last two years have been difficult for the world economy on account of the COVID-19 pandemic. Repeated waves of infection, supply-chain disruptions and more recently, global inflation have created particularly challenging times for policy making. While government spending on healthcare has accelerated, the upward trend has been gradual rather than transformative, and medium-term targets – which envisage that public health expenditure will reach 2.5 percent of GDP by 2025² – are unlikely to be met. However, macroeconomic stability indicators suggest that the Indian economy is well placed to take on the challenges of the financial year 2023-24.

We are witnessing, Tier 2 and 3 towns are playing a pivotal role in India's flourishing economy. As per the National Council of Applied Economic Research's (NCAER) estimation by 2025, the contribution of Tier 2 and 3 cities will escalate to 45 percent by 2025, proving that even the underdogs can triumph against all odds³.

We have the optimism that with increased focus and harnessing the potential of the ecosystem, coupled with innovative lifecycle management, leveraging technology, capability building in the space of Health Technology Assessment and meaningful partnerships, we are poised to benefit and expand access for many more patients in India.

g. Internal control systems and their adequacy

The Company maintains appropriate systems of internal control, including monitoring procedures, to ensure that all assets are safeguarded against loss from unauthorised use or disposal. Company policies, guidelines and procedures provide for adequate checks and balances and are meant to ensure that all transactions are authorised, recorded and reported correctly.

The Internal Auditor reviews the effectiveness and efficiency of these systems and procedures to ensure that all assets are protected against loss and that the financial and operational information is accurate and complete in all respects. The Audit Committee approves and reviews audit plans for the year based on internal risk assessment. Audits are conducted on an ongoing basis and significant deviations are brought to the notice of the Audit Committee of the Board of Directors following which corrective action is recommended for implementation. All these measures facilitate timely detection of any irregularities and early remedial steps.

During the year, the Company conducted a detailed review of its internal control systems, evaluated the internal financial control systems with the Audit Committee and discussed relevant issues with internal and statutory auditors. Based on the recommendations of the Audit Committee, the Board has stated in its responsibility statement that the Company followed proper internal financial controls and that such internal financial controls are adequate and were operating effectively.

h. Personnel

The Company regards its employees as a great asset and accords high priority to training and development of employees.

Number of permanent employees in the Company as on March 31, 2023 was 67.

New product development, productivity and quality improvements, enhanced safety and environmental protection measures.

- **Technology Imported:**

Novartis AG, Switzerland has provided technical know-how and technology as and when required, relating to products, quality, marketing and so on. This on-going process involves visits by employees of both companies to each other's office sites for discussions and training.

- **Expenditure on R&D: Nil**

C. Foreign Exchange Earnings and Outgo

During the financial year under review, the foreign exchange earned in terms of actual inflows during the year was ₹ 80.3 million and the foreign exchange outgo was ₹ 945.9 million in terms of actual outflows.

Report on Corporate Governance

1. Company's philosophy on Code of Corporate Governance

Novartis India Limited (hereinafter referred to as **'the Company'**) strives to follow the best corporate governance practices, develop the best policies/guidelines, communicate and train all its employees in order to foster a culture of compliance and obligation at every level of the organisation. We have established processes to ensure our Board of Directors (or hereinafter referred to as **'the Board'**) functions effectively, promoting efficient and balanced decision-making, to effectively fulfill its duties in the best interest of our shareholders, employees and all other stakeholders.

The Company is in compliance with the provisions of Corporate Governance specified under the Companies Act, 2013 (hereinafter referred to as **'the Act'**) and Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (hereinafter referred to as **'SEBI Listing Regulations'**).

The Company is committed to meeting the expectations of stakeholders as a responsible corporate citizen. The Novartis Code of Conduct contains the fundamental principles and rules concerning ethical business conduct.

2. Board of Directors

a. Composition of the Board of Directors

The Board of Directors of the Company has an optimum combination of Executive, Non-Executive and Independent Directors, including Women Directors. The strength of the Board as on the financial year ended March 31, 2023 comprises of 6 (six) Directors. Fifty percent of the Board comprises Independent Directors. The Company is fully compliant with the Corporate Governance norms in terms of constitution of the Board of Directors.

The Board of the Company is composed of eminent individuals from diverse fields. The Board acts with autonomy and independence in exercising its strategic supervision, discharging its fiduciary responsibilities and ensuring that the management observes the highest standards of ethics, transparency and disclosure. Every member of the Board, including Non-Executive Directors, has full access to any information related to the Company.

Ms. Monaz Noble, Non-Executive and Non-Independent Director of the Company resigned from the said position from close of business hours of November 21, 2022.

The Nomination and Remuneration Committee ('NRC') at its meeting held on July 25, 2014, approved the Nomination and Remuneration Policy ('NRC Policy') and the methodology for conducting the performance appraisal of the Board, the Board Committees and the Directors. The NRC Policy was further amended on May 19, 2022 and April 18, 2023 respectively based in the recommendation and approval received from NRC and Board of Directors respectively. Based on the recommendations of the NRC, the Board of Directors vide resolution passed by way of circulation dated April 18, 2023 amended the maximum age limit of Directors (75 years) by adding an exception that any appointment(s) approved by the shareholders prior to March 31, 2023 shall continue to hold their respective office(s) till the completion of their last day of respective appointment(s) irrespective of age. The details of NRC Policy and methodology for conducting the performance appraisal of the Board, the Board Committees and the Directors are given below.

Nomination and Remuneration Policy

Pursuant to Section 178 of the Act and SEBI Listing Regulations, the Nomination and Remuneration Committee has adopted a Nomination and Remuneration Policy which provides guidance on:

a) Selection Criteria for Directors

The Company shall consider the following aspects while appointing a person as a Director on the Board of the Company:

Skills and Experience: The candidate shall have appropriate skills and experience in one or more fields of finance, law, management, sales, marketing, administration, public administrative services, research, corporate governance, technical operations or any other discipline related to the Company's business.

Age Limit: The candidate should have completed the age of twenty-one (21) years and should not have attained the age of seventy-five (75) years with an exception that any appointment(s) approved by the shareholders prior to March 31, 2023 shall continue to hold their respective office(s) till the completion of their last day of respective appointment(s) irrespective of age.

Conflict of Interest: The candidate should not hold Directorship in any competitor company and should not have any conflict of interest with the Company.

Directorship: The number of companies in which the candidate holds Directorship should not exceed the number prescribed under the Act or under the SEBI Listing Regulations.

Independence: The candidate proposed to be appointed as Independent Director, should not have any direct or indirect material pecuniary relationship with the Company and must satisfy the requirements imposed under the Act or under the SEBI Listing Regulations.

For every appointment of an Independent Director, the NRC shall evaluate the balance of skills, knowledge and experience on the Board and on the basis of such evaluation, prepare a description of the role and capabilities required of an Independent Director. The person recommended to the Board for appointment as an Independent Director shall have the capabilities, to the extent possible, identified in such description. For the purpose of identifying suitable candidates, the NRC may:

- a. use the services of an external agencies, if required
- b. consider candidates from a wide range of backgrounds, having due regard to diversity; and
- c. consider the time commitments of the candidates

The policy provides that while appointing a Director to the Board, due consideration will be given to:

- i. approvals of the Board and/or shareholders of the Company in accordance with the Act; and
- ii. the Articles of Association of the Company which mandate that so long as Novartis AG, Basel, holds twenty-six percent or more of the paid-up share capital of the Company, it is entitled to designate two Directors (Chairman and Vice Chairman) and also to withdraw any such nominations made and to designate any others in place of a Director whose nomination is withdrawn or who resigns or otherwise vacates his/her office.

b) Selection Criteria for Senior Management

As per the Nomination and Remuneration Policy, 'Senior Management' shall mean the officers and personnel who are members of its core management team, excluding the Board of Directors, and shall also comprise all the members of the management one level below the Managing Director or Whole Time Director and shall specifically include the functional heads, by whatever name called and the Company Secretary and the Chief Financial Officer.

The Policy also provides that the candidate should have appropriate qualification, skills and experience for discharging the role. The qualification, skills and experience of each such position shall be defined in the job description, which will be maintained by the HR function.

Remuneration for Directors, KMPs and other Employees

The Policy provides that the remuneration of Directors, KMPs and other employees shall be based on the following key principles:

- **Pay for performance:** Remuneration of Executive Directors, KMPs and other employees is a balance between fixed pay reflecting Company's Policy and variable pay reflecting short and long-term performance objectives appropriate to the working of the Company and its goal. The remuneration of Non-Executive Directors shall be decided by the Board based on the industry benchmarks
- **Balanced rewards to create sustainable value:** The level and composition of remuneration is reasonable and sufficient to attract, retain and motivate Directors and employees of the Company and encourage behavior that is aligned to sustainable value creation
- **Competitive compensation:** Total target compensation and benefits are comparable to peer companies in the healthcare industry and commensurate to the qualifications and experience of the concerned individual
- **Business Ethics:** Strong governance processes and stringent risk management policies are adhered to, in order to safeguard the Company's stakeholders' interest

Board Diversity

With regard to the diversity of Boards, that is, Boards where different attributes, characteristics and levels of experience are mixed, it is not difficult to accept the idea that greater diversity would provide better advice, thus allowing for better decision-making. In other words, by bringing together diverse individuals and resources of information, talent and ability can be accessed in greater volume. The Board takes diversity into account when assessing, on balance, which individual will best complement the Board of Management as representative body of the Company. Diversity in the context of the decision-making process is understood by the Board to encompass a variety of complementary profiles, professional and personal experiences and an appropriate level of representation of both genders. At Novartis India, diversity at the Board level has been ensured through an optimal mix of members with different backgrounds and gender. Company's Board Diversity policy can be accessed at: https://www.novartis.com/sites/novartis_in/files/Board%20Diversity%20Policy.pdf

Performance Evaluation

The process approved by the NRC requires the Chairperson to initiate the performance evaluation process in the month of April every year. Performance evaluation is conducted based on approved criteria.

Highlights of the process are as under:

- a) **Board:** Each Board member completes the self-evaluation form. Independent Directors discuss the self-evaluation forms in a separate meeting and share their feedback with the Chairman. The Chairman discusses the evaluation form analysis with the Managing Director and later with the entire Board at the Board meeting.
- b) **Committees:** Each Committee member completes the self-evaluation form and shares feedback with the Chairman. The Chairman discusses the evaluation form analysis with the Managing Director and later with the entire Board at the Board meeting.

- c) **Chairman and Executive Directors:** Each Board member completes the peer-evaluation form. Independent Directors discuss the peer-evaluation forms in a separate meeting and share their feedback with the Chairman. The Chairman conveys feedback individually to the concerned Directors.
- d) **Independent Directors:** Each Board member completes the peer-evaluation and shares feedback with the Chairman. The evaluation of Independent Directors is done by the entire Board of Directors in accordance with the SEBI Listing Regulations. The Chairman conveys feedback individually to the concerned Directors.

Business Responsibility and Sustainability Report

About this Report

Novartis India Limited (“Novartis India/Company”) is committed to improve and extend people’s lives. We are enabling a culture to find efficient ways of increasing access to our medicines, to help patients. We operate with the highest values, integrity and quality standards.

This Business Responsibility and Sustainability Report (BRSR) seeks to disclose our performance against the nine principles of the ‘National Guidelines on Responsible Business Conduct’ (NGBRCs). The BRSR targets investors and other stakeholders seeking responsible and sustainable businesses that prioritize the environment and society. Each principle of BRSR is further divided into Essential Indicators and Leadership Indicators. Essential Indicators must be reported on a mandatory basis, while the reporting of Leadership Indicators is voluntary. As this is our first year, we have opted to disclose only Essential Indicators, with a commitment to disclose Leadership Indicators in the future as may be applicable to the Company from time to time.

As Novartis India is a trading entity, many indicators do not apply to us. Therefore, we have appropriately labeled them as “Not Applicable or NA”

From ESG perspective, some of our initiatives at our offices include installation of Energy Efficient Lighting System consisting of LED Lighting reducing the energy consumption up to 90%, occupancy and motion-based sensor LEDs at all workstations and meeting rooms, for reduction of energy consumption when not in use and designing the office space such that it maximizes the use of natural light. Similarly, a comprehensive Standard Operating Procedure (SOP) has been developed outlining procedures for the retrieval and safe disposal of expired/defected products. As per government protocol and at government approved waste disposal management facilities products are disposed/ incinerated. All our people and culture centric initiatives are also in line with our global policies, tailored as per local laws that take precedence. We are also extending this to our external service providers and spearheading the implementation of ESG practices for third-party partners. All new contracts and amendments will mandatorily include the Environment Sustainability criteria as an annexure.

Independent Auditor's Report To the Members of Novartis India Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Novartis India Limited (the "Company") which comprise the balance sheet as at 31st March 2023, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2023, and its profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matter(s)

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Revenue Recognition

See Note 1(J) of significant accounting policies and Note 18 in financial statements.

The key audit matter	How the matter was addressed in our audit
<p>Revenue from the sale of products is recognized at a point in time when control over goods is transferred to a customer. The actual point in time when revenue is recognised varies depending on the specific terms and conditions of the sales contracts entered into with customers. The Company has a large number of customers operating across country and sales contracts with customers have distinct terms relating to the recognition of revenue and the right of return.</p> <p>Revenue is measured at the amount of consideration which the entity expects to be entitled, based on the expected level of returns. Estimation of accrual for sales returns involves significant judgement and estimates.</p> <p>Revenue is a key performance indicator for the Company and there could be pressure to meet the expectations/targets of investors and other stakeholders. We have considered there is a risk of fraud related to revenue being overstated by recognition in the wrong period or before control has passed.</p> <p>Accordingly, we identified recognition of revenue and accrual for sales returns as a key audit matter.</p>	<p>Our audit procedures included the following:</p> <ul style="list-style-type: none"> - Assessing the appropriateness of the policies in respect of revenue recognition by comparing with applicable accounting standards; - Testing the design, implementation and operating effectiveness of the Company's internal controls including general IT controls and key IT application controls over timely and accurate recognition of revenue in the correct period and accrual for sales return; - Performed testing of selected samples of revenue transactions recorded during the year including year- end cutoff testing. We used statistical sampling and verified contractual terms of sales invoices / contracts and acknowledged delivery receipts for those transactions; - Performed testing of accrual for sales returns by checking the completeness and accuracy of the data used by the Company and examining material sales returns subsequent to the year end; - Tested any unusual non-standard manual journal entries impacting revenue recognised during the year.

Contingencies and Litigations

See Note 1 (N) of significant accounting policies and Note 25 in financial statements.

The key audit matter	How the matter was addressed in our audit
<p>The Company has outstanding litigations pertaining to income tax and Sales tax/ Value added tax (VAT)/ Service tax for several assessment years which are at various stages and pending at different forums. The eventual outcome of these legal proceedings is dependent on the outcome of future events and unexpected adverse outcomes could significantly impact the Company's reported profits.</p> <p>The Company faces a number of legal and regulatory cases, of which the most significant is litigation under Drug Price Control Order ("DPCO"). DPCO has issued various orders/ notification for fixing the price of various pharma products. With respect to the sales of the pharmaceutical products covered by the aforementioned DPCO orders, in earlier years as well as the current year, the Company has received demand notices for overcharging price. The Company has challenged these demands form DPCO and the cases are pending at various courts in India.</p>	<p>Our audit procedures included the following:</p> <ul style="list-style-type: none"> - Understanding the processes, and evaluating and testing the design and operating effectiveness of the Company's controls (including review controls) over assessment of contingencies, claims and litigations; - Obtaining and reviewing the outstanding litigations against the Company and discussing updates during the year with the Company's inhouse legal counsel and other key managerial personnel who have knowledge of these matters; - Reading the correspondence between the Company and the various direct tax/indirect tax/legal authorities and the legal opinions of external legal advisors, where applicable, for significant matters and rolled out confirmations to external legal counsel on a test check basis; - Ensuring the completeness of the litigations and claims by examining, on a sample basis, the Company's legal expenses and reading the minutes of the board meetings;

The key audit matter	How the matter was addressed in our audit
<p>The amounts involved are significant and the application of accounting principles of Ind AS 37, to determine whether a recognition of provision or a disclosure of contingent liability is required, is inherently subjective, and needs careful evaluation/judgement by the Company. Key judgments are made by the Company taking into consideration the related legal advice including those relating to interpretation of laws/regulations, in estimating the provisions and/or contingent liabilities related to aforementioned litigations.</p> <p>Considering the degree of judgment, significance of the amounts involved, this matter has been identified as a key audit matter.</p>	<ul style="list-style-type: none"> - Challenging the Company's estimate of the possible outcome of the disputed cases based on applicable direct tax laws, indirect tax laws, legal precedence and legal opinions and by involving our specialists; and - Assessing the adequacy of the Company's disclosures in respect of contingent liabilities and provisions for direct tax, indirect tax and legal matters.

Other Information

The Company's Management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and auditor's report(s) thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors Responsibilities for the Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, profit and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting in preparation of financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matter

The financial statements of the Company for the year ended 31st March 2022 were audited by the predecessor auditor who had expressed an unmodified opinion on 19th May 2022.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms of Section 143(11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

Annexure A to the Independent Auditor’s Report on the Financial Statements of Novartis India Limited for the year ended 31st March 2023

(Referred to in paragraph 1 under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date)

- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment.
- (B) The Company does not have any intangible asset. Accordingly, clause 3(i)(a) (B) of the Order is not applicable to the Company.
- (i) (b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has a regular programme of physical verification of its Property, Plant and Equipment by which all property, plant and equipment are verified in a phased manner over a period of 3 years. In accordance with this programme, certain property, plant and equipment were verified during the year. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its assets. No discrepancies were noticed on such verification.
- (c) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deed of immovable property (other than immovable properties where the Company is the lessee and the leases agreements are duly executed in favour of the lessee) disclosed in the financial statements is not held in the name of the Company:

Description of property	Gross carrying value (₹ in million)	Held in the name of	Whether promoter, director or their relative or employee	Period held- indicate range, where appropriate	Reason for not being held in the name of the Company. Also indicate if in dispute
Buildings	0.4	M/s Hindustan Ciba Geigy Ltd	No	25 March 1989	The title to asset transferred pursuant to the scheme of merger are in process of being transferred in the name of the Company.

- (d) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not revalued its Property, Plant and Equipment (including Right of Use assets) during the year.
- (e) According to the information and explanations given to us and on the basis of our examination of the records of the Company, there are no proceedings initiated or pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.

- (ii) (a) The inventory, except goods-in-transit and stocks lying with third parties, has been physically verified by the management during the year. For stocks lying with third parties at the year-end, written confirmations have been obtained and for goods-in-transit subsequent evidence of receipts has been linked with inventory records. In our opinion, the frequency of such verification is reasonable and procedures and coverage as followed by management were appropriate. No discrepancies were noticed on verification between the physical stocks and the book records that were more than 10% in the aggregate of each class of inventory
- (b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not been sanctioned any working capital limits in excess of five crore rupees in aggregate from banks and financial institutions on the basis of security of current assets at any point of time of the year. Accordingly, clause 3(ii)(b) of the Order is not applicable to the Company.
- (iii) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not made any investments, provided guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, limited liability partnerships or any other parties during the year. Accordingly, provisions of clauses 3(iii)(a) to 3(iii)(f) of the Order are not applicable to the Company.
- (iv) According to the information and explanations given to us and on the basis of our examination of records of the Company, the Company has neither made any investments nor has it given loans or provided guarantee or security and therefore the relevant provisions of Sections 185 and 186 of the Companies Act, 2013 ("the Act") are not applicable to the Company. - (d) The Company is not part of any group (as per the provisions of the Core Investment Companies (Reserve Bank) Directions, 2016 as amended). Accordingly, the requirements of clause 3(xvi)(d) are not applicable.
- (xvii) The Company has not incurred cash losses in the current and in the immediately preceding financial year.
- (xviii) There has been no resignation of the statutory auditors during the year. Accordingly, clause 3(xviii) of the Order is not applicable.
- (xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- (xx) In our opinion and according to the information and explanations given to us, there is no unspent amount under sub-section (5) of Section 135 of the Act pursuant to any project. Accordingly, clauses 3(xx)(a) and 3(xx)(b) of the Order are not applicable.

Annexure B to the Independent Auditor's Report on the financial statements of Novartis India Limited for the year ended 31 March 2023

Report on the internal financial controls with reference to the aforesaid financial statements under Clause (i) of Sub-section 3 of Section 143 of the Act

(Referred to in paragraph 2(A)(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Opinion

We have audited the internal financial controls with reference to financial statements of Novartis India Limited ("the Company") as of 31st March 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31st March 2023, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's and Board of Directors' Responsibilities for Internal Financial Controls

The Company's Management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Corporate Information

Novartis India Limited (“the Company”) is a public limited company listed on the Bombay Stock Exchange, incorporated and domiciled in India and has its registered office at Inspire - BKC, Part of 601 and 701, Bandra Kurla Complex, Bandra East, Mumbai 400051, India. It is primarily engaged in the business of trading of Pharmaceuticals.

These financial statements were authorised for issue by the Board of Directors on 10th May, 2023.

1. Significant Accounting Policies

The principal accounting policies applied in the preparation of these Financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

A. Basis of Preparation

(i) Compliance with Ind AS

These financial statements have been prepared in accordance with Indian Accounting Standards (referred to as “Ind AS”) notified under the Companies (Indian Accounting Standards) Rules, 2015 notified under section 133 of the Companies Act, 2013 (‘Act’).

(ii) Basis of Measurement

The financial statements have been prepared on a historical cost basis, except for certain financial instruments that are measured at fair values and net defined benefit assets/ (liability) at fair value of plan assets less present value of defined benefit obligation at the end of each reporting period as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration in exchange of goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

For financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

(iii) Operating Cycle

Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current / non-current classification of assets and liabilities.

B. Foreign Currency Translation

(i) Functional and Presentation Currency

Items included in the financial statements of the Company are recognised using the currency of the primary economic environment in which the Company operates (‘the functional currency’). The financial statements are presented in ‘Indian Rupees’ (₹), which is Company’s functional and presentation currency.

(ii) Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Profit and Loss.

C. Property, Plant and Equipment

Items of Property, Plant and Equipment are stated in the balance sheet at historical cost less accumulated depreciation and impairment loss, if any. The historical cost of Property, Plant and Equipment comprises of its purchase price and cost directly attributable to bringing the assets to their working condition for their intended use.

Capital Work-in-Progress represents Property, Plant and Equipment that are not ready for their intended use as at the balance sheet date.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Property, Plant and Equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset.

On transition to Ind AS, the Company elected to continue with the carrying value of all of its Property, Plant and Equipment recognised as at 1st April, 2015 ("transition date") measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

Depreciation:

The Company depreciates its Property, Plant and Equipment using Straight Line Method (SLM) over their estimated useful lives as prescribed under Part C of Schedule II to the Companies Act, 2013 (the "Act") and management estimates, as applicable. The estimated useful lives of the assets are as follows:

Description	Management Estimated Useful Lives	Useful life as per schedule II
Buildings	60 years	60 years
Plant and Equipment #	3 years to 12.5 years	8 years – 20 years
Furniture and Fixtures	10 years	10 years
Office Equipment	5 years	5 years

Based on technical evaluation, the management believes that the useful lives as given above best represent the period over which the management expects to use these assets. Hence the useful lives for these assets is different from the useful lives as prescribed under Part C of schedule II of the Act.

Leasehold improvements are depreciated over the primary period of the lease agreement or the useful life, whichever is shorter.

Mobile Handsets and Mobile Devices are fully depreciated in the year of purchase.

Estimated useful lives, residual values and depreciation methods are reviewed periodically, including at each financial year end, taking into account commercial and technological obsolescence as well as normal wear and tear and adjusted prospectively, if appropriate.

Gains or losses arising from disposal of Property, Plant and Equipment are determined as the difference between the sale proceeds and the carrying amount of the asset and is recognised in the statement of profit or loss.

D. Impairment of Non-Financial Assets

Assets that are subject to depreciation or amortisation are tested at each balance sheet date for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's or cash generating unit's (CGU) carrying amount exceeds its recoverable amount and is recognised in the Statement of Profit and Loss. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risk specific to the asset for which the estimates of the future cash flows have not been adjusted.

When an impairment loss subsequently reverses, the carrying amount of the asset or the CGU is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset or CGU in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

E. Inventories

Inventories are stated at lower of cost and net realisable value. Cost is determined on moving weighted average basis. Cost of inventory comprises cost of purchase and other cost incurred in bringing the goods to their present condition and location. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale. Net realisable value comparison is made on item by item basis.

F. Non-Current/Current Assets Held for Sale

Non-current/current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use, the asset is available for immediate sale in its present condition and a sale is considered highly probable.

Non-current/current assets are not depreciated or amortised while they are classified as held for sale and are measured at lower of their carrying amount and fair value less cost to sell.

Non-current/current assets and liabilities classified as held for sale are presented separately from the other assets and liabilities in the balance sheet.

G. Trade Receivables

Trade receivables are amounts due from customers for sale of goods or services performed in the ordinary course of business. Trade receivables without a significant financing component are initially measured at the transaction price and subsequently measured at amortised cost less provision for impairment by applying the expected credit loss method.

H. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cheques on hand, demand deposits with banks and other short-term, highly liquid investments with original maturities of three months or less, that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

I. Financial Instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets (unless it is a trade receivable without a significant financing component) and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial Assets

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows. Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

Amortised Cost:

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount adjusted for any Loss allowance. A gain or loss on a financial asset that is subsequently measured at amortised cost is recognised in the Statement of Profit and Loss when the asset

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2023

is derecognised or impaired. Interest income from these financial assets is included in other income using the effective interest rate method. The Company does not have financial assets that are subsequently measured either at fair value through other comprehensive income or at fair value through profit or loss.

Impairment of Financial Assets:

The Company applies the expected credit loss model for recognising impairment loss on its financial assets.

The Company measures the loss allowance for financial instruments at an amount equal to the lifetime expected credit losses if the credit risk on that financial instruments has increased significantly since initial recognition. If credit risk on financial instruments has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12 months expected credit losses.

For trade receivables, the Company always measures the loss allowance at an amount equal to life time expected credit losses. Further for the purpose of measuring life time expected credit loss allowance for trade receivables the Company has used practical expedient as permitted under Ind AS 109. The expected credit loss allowance is computed based on provision matrix which takes into the account historical credit loss experience and adjusted for forward looking information.

Derecognition of Financial Assets:

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received / receivable is recognised in profit or loss.

Financial Liabilities

All financial liabilities are subsequently measured at amortised cost using effective interest method. The interest expense is included in finance cost line item. The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

J. Revenue Recognition

Sale of Traded goods

Revenue from contract with customers is recognised when the Company satisfies performance obligation which is to deliver products to customers based on purchase orders received. Revenue from sales of products is recognized at a point in time when control of the products is transferred to the customer, generally upon delivery, which the Company has determined is when physical possession, legal title and risks and rewards of ownership of the products transfer to the customer and the Company is entitled to payment. Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold and services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract.

Provision is made for the non-sellable returns of goods from the customers estimated on the basis of historical data of sales return trends with respect to the shelf life of various products. Such provision for non-sellable sales returns is reduced from sale of products for the year.

Sale of Services

Service revenue is measured based on the consideration specified in a contract with a customer. Service revenue is recognised at a point in time when the Company satisfies performance

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2023

obligations by transferring the promised services to its customers. Service income is accounted net of goods and services tax.

Commission Income

Commission income from customer is recognised in line with the contractual terms with the customer.

Interest income is recognised using the effective interest method.

K. Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

L. Income Tax

Income tax expense comprises current tax expense and the net change in the deferred tax asset and liability during the year. Current and deferred taxes are recognised in Statement of Profit and Loss, except to the extent that it relates to items that are recognised in other comprehensive income or directly in equity, in which case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Current Tax

The current tax charge for the year is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period as adjusted for taxes in respect of previous years. Management periodically evaluates positions taken in tax returns, including assessment orders received during the year, with respect to situations in which applicable tax regulation is subject to interpretation. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities. Current tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Deferred Tax

Deferred tax is recognised, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Temporary differences in relation to a right-of-use asset and a lease liability for a specific lease are regarded as a net package (the lease) for the purpose of recognising deferred tax. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax assets in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax asset is reviewed at the end of each reporting period and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

The Government of India, on September 20, 2019, vide the Taxation Laws (Amendment) Ordinance 2019, inserted a new Section 115BAA in the Income Tax Act, 1961, which provides an option to the Company for paying Income Tax at reduced rates as per the provisions/conditions defined in the said section. The Company has decided to take benefit of the reduced tax rate as permitted in the said section.

M. Employee Benefits

(i) Short-Term Employee Benefits

Liabilities for wages and salaries that are expected to be settled wholly within 12 months after the end of the annual reporting period in which the employees render the related service are recognised and measured at the undiscounted amount expected to be paid in exchange for the related service.

(ii) Other Long-term Employee Benefit Obligations

The employees of the Company are entitled to other long-term benefits in the form of Long Service Awards as per the policy of the Company and Leave encashment. Liability for such benefits is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial valuation method used by the independent actuary for measuring the liabilities is the projected unit credit method.

(iii) Post-Employment Obligations

The Company has the following post-employment schemes:

- a) Defined benefit plans such as Provident Fund, Gratuity, Non-Contractual Pension Plan and Post Retirement Medical Benefits.
- b) Defined contribution plans such as Superannuation Fund and Employees' Pension Scheme.

Defined Benefit Plans

The Company has Defined Benefit Plans for post employment benefits in the form of Provident Fund, Gratuity, Non-Contractual Pension Plan and Post Retirement Medical Benefits.

Provident Fund and Gratuity fund are recognised by the Income-tax authorities and administered through trustees and/or Life Insurance Corporation of India (LIC).

The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using discount rate (interest rates of government bond) that have terms to maturity approximating to the terms of the related Provident Fund, Gratuity, Non-contractual Pension Plan and Post Retirement Medical Benefits liabilities.

Remeasurement gains and losses arising from experience adjustments, changes in actuarial assumptions and the return on plan assets (excluding net interest) are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

Defined Contribution Plan

The Company has Defined Contribution Plans for post-employment benefits in the form of Superannuation Fund and Employees' Pension Scheme which are recognised by the Income-tax authorities and administered through trustees and/or LIC. Superannuation Fund which constitutes an insured benefit and Employees' Pension Scheme are classified as Defined Contribution Plans as the Company has no further obligation beyond making the contributions. The Company's contributions to Defined Contribution Plans are charged to the Statement of Profit and Loss as incurred.

(iv) Termination Benefits

Termination benefits are expensed at the earlier of when the Company can no longer withdraw the offer of those benefits and when the Company recognises costs for a restructuring.

(v) Share-Based Payments

The Company offers its employees, share based payments in the form of a "Select" plan. The Equity Plan "Select" is a global equity incentive plan for eligible employees. This plan allows its participants to choose the form of their equity compensation in "Restricted Shares" or "Tradable Shares" of the ultimate holding Company, Novartis AG, Basel.

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2023

Unvested restricted shares are conditional on the provision of services by the plan participant during the vesting period. They are valued using their fair value (market price of traded stocks of Novartis AG) on the grant date. The fair value of these grants are expensed on a straight-line basis over the respective vesting period.

The total expense (adjusted for estimated forfeitures) is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At each reporting date, the Company revises its estimates of the number of shares that are expected to vest based on the non-market vesting conditions. It recognizes the impact of the revision to original estimates, if any, in the Statement of Profit and Loss with a corresponding adjustment to equity/prepayments.

Group Company recharges to the Company for the share based payments made/to be made by them to the Company's employees and the payment is adjusted against the Share Options Outstanding Account classified under other equity/prepayments by the Company.

(vi) Bonus Plans

Short-term employee benefits are measured on an undiscounted basis and expensed as the related service is provided. A liability is recognised for the amount expected to be paid under short-term cash bonus, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

N. Provisions, Contingent Liabilities and Contingent Assets

(i) Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

(ii) Contingent Liabilities

Contingent liabilities are disclosed, unless the possibility of outflow of resources is remote, when there is:

- A possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or
- A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or reliable estimate of the amount cannot be made.

(iii) Contingent Assets

A contingent asset is disclosed, where an inflow of economic benefits is probable. However, when the realisation of income is virtually certain, then the related asset is not a contingent asset and is recognized.

O. Segment Reporting

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company's other components, and for which discrete financial information is available. All operating segments' operating results are reviewed regularly by the chief operating decision maker to make decisions about resources to be allocated to the segments and assess their performance. (Refer Note 29).

P. Earnings Per Share

Basic earnings per share are computed by dividing the profit or loss for the year attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the year.

The weighted average number of equity shares outstanding during the year and for all years presented is adjusted for events, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the profit or loss for the year attributable to equity shareholders of the Company and the weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.

Q. Leases

As a lessee:

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Company recognises a right-of-use asset and a lease liability at the lease commencement date except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the lease payments associated with these leases are recognised as an expense on a straight-line basis over the lease term. Lease term is a non-cancellable period together with periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option.

The right-of-use asset is initially measured at cost at the commencement date. At the commencement date, the lease liability is measured at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease. The Company uses its incremental borrowing rate as the discount rate.

After the commencement date, the right-of-use asset is measured at cost less any accumulated depreciation and any accumulated impairment losses, and the lease liability is measured by (i) increasing the carrying amount to reflect interest on the lease liability; (ii) reducing the carrying amount to reflect the lease payments made; and (iii) remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect revised in-substance fixed lease payments. Right-of-use assets are depreciated over the shorter period of lease term and useful life of the right-of-use asset.

Interest on the lease liability in each period during the lease term is the amount that produces a constant periodic rate of interest on the remaining balance of the lease liability. Interest expense on the lease liability is a component of finance costs. Gain / Loss relating to modification of lease not accounted as separate lease are recognised in the statement of profit and loss.

Also refer Note 32.

R. Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period.

S. Contributed equity

Equity shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, from the proceeds.

T. Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest million with one decimal thereof as per the requirement of Schedule III, unless otherwise stated.

U. Exceptional items

When items of income or expense are of such nature, size or incidence that their disclosure is necessary to explain the performance of the Company for the year, the company makes a disclosure of the nature and amount of such items separately under the head "Exceptional items". Exceptional items are of non-recurring in nature.

V. Critical Accounting Estimates and Judgements

Preparing the financial statements under Ind AS requires management to take decisions and make estimates and assumptions that may impact the value of revenues, costs, assets and liabilities and the related disclosures concerning the items involved as well as contingent assets and liabilities at the balance sheet date. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2023

The estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods.

The following are the areas involving critical estimates as at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year:

Estimation of Defined Benefit Obligation : key actuarial assumptions [Refer Note 15(a)]

Estimation of Provision and Contingent Liabilities : key assumptions about the likelihood and magnitude of an outflow of resources; [Refer Note 25(A) and 26]

Estimation of Lease : discount rate used for determination of lease liability and Right-of-use asset [Refer Note 32]

Revenue Recognition : assumptions of estimation of sale return and discounts.[Refer Note 30]

Provision for Deferred tax assets: availability of future taxable profit against which deductible temporary differences and tax losses carried forward can be utilised; [Refer Note 4]

Standard Issued but not yet effective

Ministry of Corporate Affairs (“MCA”) notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 31, 2023, MCA amended the Companies (Indian Accounting Standards) Rules, 2015 by issuing the Companies (Indian Accounting Standards) Amendment Rules, 2023, applicable from April 1, 2023, as below

Ind AS 1 – Presentation of Financial Statements

The amendments require companies to disclose their material accounting policies rather than their significant accounting policies. Accounting policy information, together with other information, is material when it can reasonably be expected to influence decisions of primary users of general purpose financial statements. The Company does not expect this amendment to have any significant impact in its financial statements.

Ind AS 12 – Income Taxes

The amendments clarify how companies account for deferred tax on transactions such as leases and decommissioning obligations. The amendments narrowed the scope of the recognition exemption in paragraphs 15 and 24 of Ind AS 12 (recognition exemption) so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. The Company is evaluating the impact, if any, in its financial statements

Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors

The amendments will help entities to distinguish between accounting policies and accounting estimates. The definition of a change in accounting estimates has been replaced with a definition of accounting estimates. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”. Entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty. The Company does not expect this amendment to have any significant impact in its financial statements.

15(a). Employee Benefit Obligations

(i) **Defined Contribution Plans:**

The Company's contribution to Superannuation Fund and Employees' Pension Scheme aggregating ₹ 2.6 million (Previous year : ₹ 14.4 million) has been recognised as expense in the Statement of profit and loss for the year under the head Employee Benefits Expense [Refer Note 21].

(ii) **Defined Benefit Plans:**

General Description of Defined Benefit Plans:

(a) **Gratuity**

The Company provides for gratuity for employees as per the Payment of Gratuity Act, 1972. Employees who are in continuous service of 5 years are eligible for gratuity. The benefit payable is the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employees. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. The gratuity plan is a funded plan and it is recognised by the Income-tax authorities and administered through trustees and/or LIC. Liability for Gratuity is provided on the basis of valuations, as at Balance Sheet date, carried out by an independent actuary.

(b) **Provident Fund**

Provident fund is Defined Benefit Plan that provides for lump sum amount to be paid to employees at the time of separation from the Company. Both employee and employer (at a determined rate) contribute monthly to a Trust set up by the Company to manage the investments and distribute the amounts entitled to employees. The benefits are accumulated value of contributions made by the employee and the Company at the minimum interest rate as declared by the Employee Provident Fund Organisation for respective years. Valuation for interest rate guarantee is provided on the basis of valuations, as at Balance Sheet date, carried out by an independent actuary.

(c) **Non-Contractual Pension Plan**

The Pension Scheme is a Defined Benefit Plan with a minimum pension guarantee that provides for an annuity in the form of pension amount at retirement to a select category of employees. The fund is administered by LIC of India. Liability for Non-Contractual Pension Plan is provided on the basis of valuations, as at Balance Sheet date, carried out by an independent actuary.

(d) **Post Retirement Medical Benefits (PRMB)**

The PRMB scheme is a fixed monetary amount Defined Benefit Plan that provides for a payment made after retirement when a retiree claims medical benefits. The benefits are defined on the basis of amount claimed under medical expenses upto a maximum limit after retirement. This is an unfunded defined benefit plan. Liability for Post Retirement Medical Benefits is provided on the basis of valuations, as at Balance Sheet date, carried out by an independent actuary.

* Amount is below the rounding off norm adopted by the Company.

The above sensitivity analyses is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

Expected aggregate contributions to post employment benefit plans for the year ending 31 March, 2023 are ₹ 35.5 million (March 31, 2022 ₹ 132.7 million).

As at March 31, 2023, the weighted average duration of the defined benefit obligation for gratuity scheme is 7 years (March 31, 2022 7 years) and Provident fund is 5.2 years (March 31, 2022 5.2 years)

Risk exposure

Through its defined benefit obligation the Company is exposed to a number of risks, the most significant of which are detailed below-

Interest rate risk – The defined benefit obligation calculated uses a discount rate based on Government bonds. If bond yields fall, the defined benefit obligation will tend to increase.

Salary inflation risk – Higher than expected increase in salary will increase the defined benefit obligation.

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2023

15(a). Employee Benefit Obligations (contd.)

Demographic risk – This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligations is not straight forward and depends upon the combination of salary increase, discount rate and vesting criteria. It is important not to overstate withdrawals because in financial analysis the retirement benefit of the short career employee typically costs less per year as compared to a long service employee.

Medical inflation risk – Higher than expected increase in premium will lead to increase in defined benefit obligations. The risk is mitigated by capping the benefit paid by insurance Company (limiting the premium amount for the Company).

Investment return risk – Lower the expected investment return, higher will be the defined benefit obligation.

34. Disclosures for Employee Share Based Payments

The Company offers its employees, share based payments in the form of a “Select” plan. The Equity Plan “Select” is a global equity incentive plan for eligible employees. This plan allows its participants to choose the form of their equity compensation in ‘Restricted Shares’ or ‘Tradable Options’ of the ultimate holding company, Novartis AG, Basel. The “Select” plan of the ultimate holding company is being managed and administered by the group company, Novartis Holding AG and the Company is compensating Novartis Holding AG for the Restricted Shares or Tradable Options acquired towards the grants made to the employees and accordingly these costs are being reflected in the financial statements.

There are two schemes under which employees are granted stock options:

- (A) Tradable Stock Options, as per which the employee can sell the options to market maker once it is vested. Tradable Options have a contractual life of 10 years from the date of grant.

There were no tradable stock options outstanding as at 31st March, 2023 and 31st March, 2022 and no tradable stock options were granted during both these financial years.

- (B) Restricted Shares are the shares of its ultimate holding company. These do not have voting rights until vested to employees. There is no time limit to sell the Restricted Shares once these are vested.

35. (a) The Company has filed a Writ Petition on 8th May, 2014 before the Hon'ble Delhi High Court challenging the move of the National Pharmaceuticals Pricing Authority ("NPPA") to include Voveran 50 GE Tablets, marketed by the Company, under price control in terms of the Drug Price Control Order 2013 ("DPCO 2013").

During the pendency of the Writ Petition, the NPPA issued a Show Cause Notice dated 24th September, 2014 to the Company alleging over charge on sales of Voveran 50 GE Tablets by the Company. The Company responded to the show cause notice vide its letters dated 13th October, 2014 and 27th October, 2014. The NPPA issued a Demand Notice dated 31st October, 2014 directing the Company to pay ₹ 281.8 million (including interest) by 15th November, 2014. This demand has been challenged by the Company before the Hon'ble Delhi High Court by way of miscellaneous applications followed by an amended writ petition. The Hon'ble Delhi High Court passed order restraining the NPPA from taking coercive steps in respect of the aforesaid demand. Due to COVID-19 the Hon'ble Delhi High Court is taking up the cases filed during the pandemic, therefore there has been delay in taking up case. The Next tentative next date of hearing is 14th September, 2023.

In the opinion of the Company, Voveran 50 GE Tablet is not covered under the category of essential medicines under the National List of Essential Medicines and, hence, is a non-scheduled drug under DPCO, 2013. Therefore, Voveran 50 GE Tablet cannot be brought under the regime of price control under Paragraph 14 of the DPCO, 2013. Accordingly, no provision is considered necessary at this stage.

- (b) The NPPA had issued a demand notice dated 20th/25th June, 2018 of ₹ 134.4 million (including interest) on the Company alleging over charge on sales of Tegrital CR 200 by the Company. This demand has been challenged by the Company before the Hon'ble Delhi High Court by filing a Writ Petition on 27th July, 2018 challenging the move of the NPPA to include Tegrital CR 200, marketed by the Company, under price control in terms of the DPCO 2013. The Hon'ble Delhi High Court had on 6th August, 2018 passed an order directing the NPPA not to give effect to the aforesaid impugned demand notice. Due to COVID-19 the Hon'ble Delhi High Court is taking up the cases filed during the pandemic, therefore there has been delay in taking up case. This writ petition was listed on 30th March, 2022, however due to paucity of time hearing has been adjourned to 2nd August, 2023.

In the opinion of the Company, the Price Revision Notification dated 28th April, 2014 would not apply to Tegrital CR 200 as it was not covered by the ambit of price notification in as much Tegrital CR 200 drug was not a "scheduled formulation" under DPCO 2013. When Tegrital CR became a scheduled formulation w.e.f. 10th March, 2016, NPPA issued a separate Ceiling Price Notification on 29th March, 2016 for the said formulation, which amounts to admission on the part of NPPA that this formulation could be covered only by the subsequent Notification of 2016 and not by the prior Notification of 2014, on the basis whereof the impugned Demand has been raised by NPPA. Accordingly, no provision is considered necessary at this stage.

36. Financial Instruments

Financial Instruments - Fair values and Risk Management

Fair value of Financial assets and liabilities at amortised cost

Particulars	31 st March, 2023 (₹ in million)	31 st March, 2022 (₹ in million)
Financial assets at amortised cost (level 2)		
Non-current loans	—	5.8
Other non-current financial assets	25.4	35.9
Financial liabilities at amortised cost (level 2)		
Other non-current financial liabilities	77.9	13.3

Note

Fair values of financial instruments such as trade receivables, short term loans, cash and cash equivalents, bank balances other than cash and cash equivalents and trade payables have not been disclosed because their carrying amounts are a reasonable approximation of fair value.

Fair value hierarchy

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following tables show the valuation techniques used in measuring Level 2 fair values for financial instruments.

Type	Valuation technique
Non-current loans	Discounted cash flows: The valuation model considers the present value of expected payments, discounted using a risk-adjusted discount rate. The own non-performance risk in case of financial liabilities was assessed to be insignificant.
Other non-current financial assets	
Other non-current financial liabilities	

37. Exceptional items

The Company has entered into an exclusive sales and distribution agreement of its Established Medicine brands with Dr. Reddy's Laboratories Limited. This arrangement, amongst other things aimed to further broaden access of these medicines beyond the current geographies to benefit many more patients, more efficiently, will significantly extend the reach of healthcare professionals, enhancing access of these medicines to more patients. This strategic business decision had led to the below exceptional items.

- (a) In this regard, the Company has made a provision of ₹ 750.7 million in the previous year towards its erstwhile associates under Employee Separation Scheme. Part of the provision has been settled during the year.
- (b) The statement of profit and loss for the previous year includes an expense of ₹ 496.4 million (net of re-evaluation of retirement obligations) under Employee Separation Scheme.

38. Financial risk management

The Company's activities expose it to credit risk, liquidity risk and market risk.

The Company's financial risk management is an integral part of how to plan and execute its business strategies. Market risk is the loss of future earnings, fair values or future cash flows that may result from the change of a price of a financial instrument. The value of a financial instrument may change as a result of changes in the foreign currency exchange rates and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including foreign currency receivables and payables.

(A) Credit Risk

The Company is exposed to credit risk, which is the risk that counterparty will default on its contractual obligation resulting in a financial loss to the Company. Credit risk arises from cash and cash equivalents, deposits with banks, as well as credit exposures to customers including outstanding receivables.

Credit risk is the risk of financial loss to the Company if a customer or counter-party fails to meet its contractual obligations, and arises principally from the Company's receivables from customers.

(i) Trade and other receivables

Credit risk arises from the possibility that customers may not be able to settle their obligations as agreed. The Company manages credit risk through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business.

At 31st March, 2023, the Company had 5 customers (At 31st March, 2022 : 2 customer) that owed the Company more than ₹ 10 million each and accounted for approximately 60% (At 31st March, 2022 : 52%) of all the trade receivables, excluding related parties. The Company performs regular monitoring of credit limits and key performance indicators as agreed as well as manages the collection of receivables in order to minimize the credit risk exposure.

In furtherance to above, the Company has assessed the impact of the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognized in respect of trade receivables.

As per simplified approach, the Company makes provision of expected credit losses on trade receivables using a provision matrix to compute the expected credit loss amount for trade receivables. The provision matrix takes into account historical data of collections. Receivables are classified into different buckets based on the overdue period ranging from 6 months – one year to more than two years. There are different provisioning rates for each bucket.

Historical trends of impairment of trade receivables do not reflect any significant credit losses. The Company has further considered internal and external sources of information, specifically having regard to the current macro economic conditions and the global health pandemic to assess the impact on credit losses. Basis the information available as at the date of approval of these financial statements, the Company expects the historical trend of minimal credit losses to continue.

For credit risk exposure, refer note 8 Trade Receivables.

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2023

(ii) Movement in expected credit loss allowance

Particulars	(₹ in million)
As at 1st April, 2021	42.8
Movement in expected credit loss allowance on trade receivables calculated at lifetime expected credit losses	(16.3)
As at 31st March, 2022	26.5
Movement in expected credit loss allowance on trade receivables calculated at lifetime expected credit losses	(3.2)
As at 31st March, 2023	23.3

(iii) Cash and cash equivalents and deposits with banks

Credit risk on Cash and Cash Equivalents is limited as the Company generally invests in deposits with banks with high credit ratings assigned by international and domestic credit rating agencies.

(B) Liquidity Risk

(i) Liquidity risk management

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding to meet obligations when due. Company's treasury maintains flexibility in funding by maintaining sufficient cash and bank balances available to meet the working capital requirements. Bank balances are maintained with reputed banks. Management monitors rolling forecasts of the company's liquidity position (comprising the unused cash and bank balances along with temporary investments in fixed deposits) on the basis of expected cash flows. This is generally carried out at Company level in accordance with practice and limits set by the Company. These limits vary to take into account the liquidity of the market in which the Company operates.

(ii) Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity based on their remaining contractual maturities for all non-derivative financial liabilities.

The amounts disclosed in the table are the contractual cash flows. Balances approximate their carrying balances as the impact of discounting is not significant.

Contractual maturities of financial liabilities	(₹ in million)

(iii) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

The amounts disclosed in the table are the contractual undiscounted cash flows.

(C) Market Risk – Foreign Exchange

The Company is exposed to foreign exchange risk arising from foreign currency transactions, primarily with respect to the USD. These transactions are mainly with the related parties only. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the company's functional currency (₹). The risk is measured through a forecast of highly probable foreign currency cash flows. The objective of the Company is to minimize the volatility of the ₹ cash flows of highly probable forecast transactions.

The Company actively monitors and seeks to reduce, where it deems it appropriate to do so, fluctuations in these exposures.

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2023

(i) Foreign Currency Risk Exposure:

39. Capital management

The Company's objectives when managing capital are to safeguard the company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure. For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders of the Company. The capital structure of the Company is based on management's judgement of the appropriate balance of key elements in order to meet its strategic and day-to-day needs. The Company consider the amount of capital in proportion to risk and manage the capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders. The Company's policy is to maintain a stable and strong capital structure with a focus on total equity so as to maintain investor, creditors and market confidence and to sustain future development and growth of its business. The Company will take appropriate steps in order to maintain, or if necessary adjust, its capital structure. The Company does not have any borrowings as at 31st March, 2023 and 31st March, 2022, and no borrowings were availed during the year and in previous year.

No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2023 and March 31, 2022.
