Ajax Engineering IPO to open on Monday, February 10, 2025

Ahmedabad, Ajax Engineering Limited (the "Company") proposes to open an initial public offering ("Offer") of its equity share of the face value of Rs. 1 each ("Equity Shares") on Monday, February 10, 2025. The Anchor Investor Bidding Date is one Working Day prior to Bid/ Offer Opening Date, being Friday, February 7, 2025. The Bid/ Offer Closing Date is Wednesday, February 12, 2025. The Price Band of the Offer has been fixed from Rs. 599 per Equity Share to Rs. 629 per Equity Share.

Bids can be made for a minimum of 23 Equity Shares and multiples of 23 Equity Shares thereafter. The initial public offering comprises an offer for sale of up to 20,180,446 Equity Shares ("Offered Shares"), consisting of up to 1,716,102 Equity Shares by Krishnaswamy Vijay, up to 1,716,102 Equity Shares by Kalyani Vijay, up to 2,288,136 Equity Shares by Jacob Jiten John, up to 5,593,221 Equity Shares by Jacob Hansen Family Trust, up to 1,430,085 Equity Shares by Susie John, and up to 7,436,800 Equity Shares by Kedaara Capital Fund I LLP.

The Offer is being made in terms of Rule 19(2)(b) of the SCRR read with Regulation 31 of the

SEBI ICDR Regulations. The Offer is being made through the Book Building Process and is in compliance with Regulation 6(1) of the SEBI ICDR Regulations wherein in terms of Regulation 32(1) of the SEBI ICDR Regulations, not more than 50% of the Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers ("QIBs") and such portion, the "QIB Portion" provided that our

Company in consultation with the BRLMs, may allocate up to 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations ("Anchor Investor Portion"), of which at least one-third shall be available for allocation to domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the Anchor Investor Allocation Price.

Global gold demand hits new high as prices soar in 2024

Mumbai, The World Gold Council's Q4 and Full Year 2024 Gold Demand Trends report reveals that total annual gold demand (including OTC) hit a new, record high of 4,974t, driven by strong, sustained central bank buying and growth in investment demand. The combination of record high gold prices, and volumes resulted in the highest ever total value of demand at \$382bn.

Louise Street, Senior Markets Analyst at the World Gold Council, commented: "Gold once again dominated headlines in 2024, with prices reaching 40 record highs last year. Yet, the demand

trajectory of 2024 was far from linear, with central banks posting strong demand in Q1 before moderating through the middle of the year and finishing with a strong Q4. Likewise, the second half of the year saw a notable resurgence from Western investors which, combined with remarkable growth in Asian flows, brought global gold ETF flows into positive territory in the third and fourth quarters. This was fuelled by the start of rate cutting cycles by many central banks and heightened global uncertainties, including the US presidential election and escalating tensions in the Middle East. Central banks continued to buy gold at pace in 2024, with purchases exceeding 1,000t for the third year in a row. Buying ramped up significantly in Q4, reaching 333t and bringing the annual total for central banks to 1,045t. Global investment demand increased 25% year-on-year to 1,180t -

a four-year high - driven by a revival in gold ETF demand in the second half of 2024. Global gold ETFs added 19t in Q4 2024, marking two consecutive quarters of inflows for the asset class. Bar and coin demand stayed largely in line with 2023 volumes at 1,186t in 2024. Unsurprisingly, high prices dampened demand in the jewellery sector, with annual consumption decreasing by 11% to 1,877t. The decline was driven largely by weakness in China (down 24% year-on-year), though Indian demand remained resilient, dropping just 2% in 2024, in a record high price environment.

Business Brief III

Google makes updated Gemini 2.0 AI available to all

New Delhi, Feb 6 (IANS) As the race to build new and better artificial intelligence (AI) models heats up, Google has announced to make the updated Gemini 2.0 AI generally available to all.

Developers can now build production applications with Gemini 2.0 Flash. The company is also releasing an experimental version of Gemini 2.0 Pro, its best model yet for coding performance and complex prompts. It is available in Google AI Studio and Vertex AI, and in the Gemini app for Gemini Advanced users. "We're releasing a new model, Gemini 2.0 Flash-Lite, our most cost-efficient model yet, in public preview in Google AI Studio and Vertex AI. Finally, 2.0 Flash Thinking Experimental will be available to Gemini app users in the model dropdown on desktop and mobile," informed Koray Kavukcuoglu, CTO, Google DeepMind, on behalf of the Gemini team. Google said that as the Gemini model family becomes more capable, it will continue to invest in robust measures that enable safe and secure use.

Adani Green Restricted Group 1's outlook revised to 'positive' from 'stable': Crisis

New Delhi, Feb 6 (IANS) Reflecting strong revenue visibility, Crisis Ratings has revised its outlook for long-term bank facilities and non-convertible debentures of Adani Green Restricted Group 1 (RG) to "positive" and reaffirmed the rating at 'Crisis AA+'. "AGEL RG1" comprises three special purpose vehicles (SPVs) - namely Adani Green Energy UP Ltd, Prayatna Developers Private Limited and Parampiya Solar Energy Private Limited - henceforth known as 'AGEL RG1'.

The outlook revision on the group reflects the actual generation being continuously better than the P90 levels and timely refinancing of \$500 million bonds, Crisis said in a note. "Adani Green Restricted Group 1 had better than P90 plant load factor in fiscal 2024 and calendar year 2024 leading to expectations of continued better performance and debt servicing cushions going forward," it said. The rating reflects strong revenue visibility in the form of long-term power purchase agreements at a healthy tariff. "These strengths are partially offset by exposure to risks inherent in operating solar-energy assets and adverse movement in foreign exchange," according to the note.

The financial risk profile is expected to be healthy, indicated by a strong debt service coverage ratio through the 18-year tenure of the US senior secured notes, the rating agency said. The liquidity is also supported by a debt service reserve account of six months of debt obligation without any recourse to project assets.

RBI's actions beyond a 25bps rate cut will be more watched: Report

New Delhi, Feb 6 (IANS) While a 25bps rate cut in the upcoming RBI MPC policy is less of a market debate, the actions around "what beyond a cut" will be more watched, a report said on Thursday. Easing by stealth via unconventional policy tools like liquidity and regulatory measures will continue. The RBI may also want to address the stress in the non-sovereign money market, according to a report by Emkay Global Financial Services. "We expect another round of Rs 300 billion Open Market Operations (OMOs), implying Rs 900 billion+ in total in FY25E. A CRR cut is a close call, but a temporary cut may not address the underlying banking stress," the report mentioned.

Easing in ensuing tighter Liquidity Coverage Ratio (LCR) norms (April 2025 onwards) and lending standards might be a preferred policy tool. We will also watch for additional capital account easing actions via the FCNR route. According to the report, "noisy food inflation" drove a large part of the headline inflation in FY25, while demand slack continued to keep core subdued. However, near-term food pressures look to be abating with broad-based easing across food categories, and January inflation tracking sub-4.5 per cent (December 5.2 per cent). "Q4FY25E headline inflation is likely to ease to 4.4 per cent vs 5.6 per cent in Q3FY25, supported by strong Kharif output," the report noted. For FY26 as well, inflation on an average will ease to 4.5 per cent vs 4.8 per cent-4.9 per cent in FY25.

Indian corporate healthcare sector likely to deliver 15 pc growth in FY26: Report

Mumbai, Feb 6 (IANS) The Indian corporate healthcare sector is likely to deliver around 15 per cent growth (year-on-year) in sales over FY25-FY26, primarily led by growth in average revenue per occupied bed (ARPOB) and new bed additions, according to a report on Thursday. India Ratings and Research (Ind-Ra) maintained a neutral outlook for the corporate healthcare sector for FY26, supported by continued robust demand, sustained improvement in profitability, and calibrated enhancement in capacity expansions, which together would lead to a comfortable liquidity position and help sustain the improvement in the credit profile. Ind-Ra expects its coverage companies to deliver around 15 per cent YoY growth in sales over FY25-FY26, on account of 5-6 per cent growth in ARPOB, a 100-200bp improvement in occupancy, and 6-8 per cent increase in new bed additions. Indian hospitals have significant growth potential in the near to medium term, driven by an improvement in healthcare infrastructure to meet global standards, the report mentioned. According to Vivek Jain, Director, Corporate Ratings at India Ratings and Research, acquisitions of small hospitals not only boost larger players' financial position and improve economies of scale but also provide growth opportunities for larger chains
