Dear Sir/Madam,

Subject: Company Update

Pursuant to Regulation 30(2) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, please find enclosed a press release issued by ICRA Ratings on November 20, 2023.

ICRA Limited has assigned [ICRA]AAA (Stable) to ICICI Bank's infrastructure bonds; ratings reaffirmed.

This is for your reference and records.

Yours sincerely,
ICICI Bank Limited

Vivek Ranjan
Assistant General Manager

Rationale

ICICI Bank Limited's (IBL) ratings continue to be supported by its strong market position as one of the three systemically important banks in India, reflected by its sizeable and steadily growing market share in banking sector advances. IBL's market position is further reinforced by its presence across different verticals in the financial services sector, which has driven the growth of its granular assets and liabilities. The ratings continue to factor in the bank's strong capitalisation profile, its demonstrated ability to raise sizeable capital as well as the materially large value of its stake in subsidiaries in relation to its core capital. The ratings also factor in the improvement in the operating profitability, led by the strong growth in advances and the expansion in the spread. This, along with lower credit costs, resulted in an improvement in internal capital generation. Moderation in fresh non-performing advances (NPA) generation, along with the meaningfully high recoveries and upgrades seen during FY2023-H1 FY2024, drove an improvement in the headline asset quality metrics.

Going forward, the restructured book (0.3% of standard advances as on September 30, 2023) and a portion of the BB and below rated corporate book could remain a source of incremental stress amid weakening macro-economic factors that could potentially impact the debt-servicing abilities of the more vulnerable borrowers. This remains a monitorable. However, the bank's strong capital position, its robust operating profitability and sizeable contingent provisions, equivalent to 1.18% of standard advances as on September 30, 2023, are expected to provide a cushion against any future asset quality stress.

The ratings continue to consider IBL's robust resource profile driven by its retail franchise and well supported by its widespread branch presence and digital platforms, leading to one of the lowest cost of funds in the private sector. The Stable outlook on the ratings factors in the expectation that the bank will continue to derive strength from its retail franchise as well as maintain solvency (net NPA/core equity), return on assets (RoA) and capital cushions better than the negative triggers.

ICRA has withdrawn the rating assigned to the Rs. 4,000-crore infrastructure long-term bonds as these bonds have been fully redeemed and no amount is outstanding against the same. The rating was withdrawn in accordance with ICRA's policy on withdrawal ([click here for the policy](#)).

Key rating drivers and their description

Credit strengths

Strong market position across financial services verticals supports granular growth of assets and liabilities – IBL is one of the three systemically important banks in India with a market share of 7.6% of advances in the banking sector as on June 30, 2023 (7.6% as on June 30, 2022) and a 20.0% share (20.0% as on June 30, 2022) in private sector advances as on June 30, 2023. Along with its subsidiaries, IBL has a wide presence across various financial services verticals like life insurance, general insurance, securities broking, merchant banking, asset management, primary dealership, etc, with a leadership position in many of these businesses. This allows it to provide a diverse range of financial services to customers, thereby enhancing its customer engagement and retention strategy, particularly in the retail segments.

The strong growth in the retail book supported the 18.3% YoY growth in overall net advances to Rs. 11.11 lakh crore as on September 30, 2023. As a result, the share of the retail segment (including rural and business banking) in net advances inched up to 69.9% as on September 30, 2023 from 68.8% as on September 30, 2022. The bank's strong retail franchise is expected to continue supporting the growth in its granular retail assets as the operating environment improves.

Strong liability franchise supports competitive cost structure – Supported by its extensive branch presence and the deepening of the digital ecosystem, the bank's deposit base grew at a healthy pace to Rs. 12.95 lakh crore as on September 30, 2023 (18.8% YoY growth), despite offering one of the lowest interest rate propositions. IBL's current account and savings account (CASA) ratio moderated to 40.8% as on September 30, 2023 (46.6% as on September 30, 2022), which remained similar to the private sector average. Further, the granularity of the deposit profile is reflected in the low share of the top 20 depositors in total deposits, which stood at 3.88% as on September 30, 2023 (5.26% as on March 31, 2022). Compared to peer banks, IBL's depositor concentration levels are one of the lowest. It has been able to maintain granularity despite the relatively high growth in its deposit base.

Strong capital cushions; unrealised value in subsidiaries sizeable in relation to capital – IBL's capitalisation ratios remain strong with the CET I, Tier I and the capital-to-risk weighted assets ratio {CRAR; as a percentage of risk-weighted assets (RWAs)} at 15.26%, 15.35% and 16.07%, respectively, as on September 30, 2023 (15.61%, 16.17%, and 16.93%, respectively, as on September 30, 2022). The bank's capital position was supported by the improving capital accretion seen during FY2023-H1 FY2024, driven by the strong operating profitability and lower credit costs.

Many of IBL's subsidiaries are large and provide significant financial flexibility as its profitability was cushioned by stake dilution in these entities during periods of elevated asset quality challenges and remains a source of comfort. As per ICRA's estimates, the bank's current capital position is sufficient to support its growth requirements over the medium term and absorb any unexpected asset quality shocks.

Comfortable return metrics; sizeable prudent provisions offer cushion against incremental asset quality impact – The strong growth in net advances, expansion in spreads and steady non-interest income levels have led to a sustained improvement in the operating profitability. Furthermore, credit costs were lower driven by meaningful recoveries and upgrades. As a result, the RoA witnessed a sustained improvement to 2.0-2.4% during FY2023-H1 FY2024 from 0.8% in FY2020. Additionally, the relatively high provision coverage ratio on legacy stressed assets as well as the sizeable contingency provisions of Rs. 13,100 crore (7.12% of core capital and 1.18% of advances), as on September 30, 2023, are expected to support profitability going forward.

Credit challenges

NPA generation remains a monitorable – IBL's gross annualised fresh NPA generation¹ moderated to 1.97% in H1 FY2024 (2.37% in FY2023 and 2.90% in FY2022), supported by lower slippages in the wholesale segment. Excluding wholesale, the gross annualised fresh NPA generation in the retail segment stood high at 2.1% in H1 FY2024 (2.6% in FY2023 and 3.5% in FY2022). The retail segment accounted for ~94% (83% in FY2023 and 90% in FY2022) of the total slippages during this period.

¹ Fresh NPA generation ratio = Fresh slippages/opening standard assets

However, recoveries, upgrades and write-offs remained meaningful, resulting in an improvement in the headline asset quality metrics despite high slippages, with the gross and net NPA at 2.63% and 0.45%, respectively, as on September 30, 2023 (against 3.38% and 0.65%, respectively, as on September 30, 2022).

Nevertheless, any weakening of macro-economic factors including the sharp rise in inflation, the depreciation of the Indian rupee and the spike in interest rates could impact certain borrowers. IBL's ability to contain slippages in these segments and maintain high recovery rates will remain key for ensuring a sustained improvement in the asset quality in the near to medium term.

Environmental and social risks

While banks like IBL do not face material physical climate risks, they are exposed to environmental risks indirectly through their portfolio of assets. If the entities or businesses, to which banks and financial institutions have an exposure, face business disruptions because of physical climate adversities or if they face climate transition risks because of technological, regulatory or customer behaviour changes, the same could translate into credit risks for banks. However, such a risk is not material for IBL as it benefits from adequate portfolio diversification. Further, the lending is typically short-to-medium term, allowing it to adapt and take incremental exposure to businesses that face relatively lesser downside environmental risks.

With regard to social risks, data security and customer privacy are among the key sources of vulnerability for banks as material lapses could be detrimental to their reputation and invite regulatory censure. IBL has not faced such lapses over the years, which highlights its sensitivity to such risks. It is seen to be operating responsibly in terms of its selling practices with no instances of fines being imposed by the regulatory authorities because of misconduct. Customer preferences are increasingly shifting towards digital banking, which provides an opportunity to reduce the operating costs. IBL has been at the forefront of making the requisite investments to enhance its digital interface with its customers. While it contributes to promoting financial inclusion by lending to the under-served segments, its lending practices remain prudent, as reflected in the healthy asset quality numbers in this segment compared with its peers.

Liquidity position: Superior

The bank's consolidated daily average liquidity coverage ratio was 120% for the quarter ending September 30, 2023 (127% in Q2 FY2023, 122% in Q1 FY2024) and its net stable funding ratio stood at 122% as on September 30, 2023 against the regulatory requirement of 100%. Further, strong deposit accretion supported the growth in advances and resulted in positive gaps in the structural liquidity statement. Additionally, IBL can avail liquidity support from the Reserve Bank of India (RBI; through repo against excess statutory liquidity ratio (SLR) investments and the marginal standing facility mechanism) in case of urgent liquidity requirement.

Rating sensitivities

Positive factors – Not applicable as the ratings for all the instruments are at the highest possible level

Negative factors – ICRA could assign a Negative outlook or downgrade the ratings if there is a deterioration in the asset quality or capital position, leading to the weakening of the solvency profile with net NPA/core equity exceeding 15% on a sustained basis. Further, a sustained RoA of less than 1.0% and/or a decline in the capital cushions over the regulatory levels to less than 4% at the CET I level on a sustained basis will remain negative triggers. A material weakening in the bank's liability franchise, thereby impacting its resource profile, will also remain a negative trigger. Additionally, the weakening of the distributable reserves eligible for the coupon payment on the Additional Tier-I (AT-I) bonds will be a negative trigger for the rating for these bonds.

Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	ICRA's Rating Methodology for Banks and Financial Institutions ICRA's Policy on Withdrawal of Credit Ratings ICRA's Rating Methodology on Consolidation
Parent/Group support	Not Applicable
Consolidation/Standalone	For arriving at the ratings, ICRA has considered the standalone financials of IBL. However, in line with ICRA's consolidation approach, the capital/funding requirement of the Group's various subsidiaries/joint ventures, going forward, has been factored in.

About the company

ICICI Bank Limited (IBL) is a systemically important private sector bank in India with a 7.6% market share in banking sector advances as on June 30, 2023. With a presence in banking, insurance, asset management, investment banking and private equity, the ICICI Group is a large player in the Indian financial system. As of September 30, 2023, the bank had 6,248 branches and 16,927 ATMs. IBL was promoted in 1994 by ICICI Limited, an Indian financial institution, and was its wholly-owned subsidiary. In 1998, ICICI Limited's shareholding in IBL reduced to 46% following a public offering of shares. Further, ICICI Limited and IBL were merged in 2002, following which the ICICI Group's financing and banking operations, both wholesale and retail, were integrated into a single entity.

Long-term Bonds	Very Simple
Fixed Deposit	Very Simple
Certificates of Deposit	Very Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)

Key features of rated debt instruments

The servicing of the Basel II Lower Tier II Bonds and infrastructure bonds is not subject to any capital ratios and profitability. However, the Basel III Tier II Bonds are expected to absorb losses once the point of non-viability (PONV) trigger is breached in the RBI's opinion. The rated Basel III Tier I (AT-I) and Basel III Tier II instruments are hybrid subordinated debt instruments with equity-like loss-absorption features. Such features may translate into higher loss severity vis-à-vis conventional debt instruments.

The rating for the AT-I Bonds is one notch lower than the rating for the Basel III Tier II Bonds as these instruments have the following loss-absorption features that make them riskier.

- The coupon payments are non-cumulative and discretionary, and the bank has full discretion at all times to cancel the same. The cancellation of discretionary payments shall not be an event of default.
- Coupons can be paid out of the current year's profits. However, if the current year's profit is not sufficient or if the payment of the coupon is likely to result in a loss, the coupon payment can be made through the reserves and surpluses created through the appropriation of profits (including statutory reserves). However, the coupon payment is subject to the bank meeting the minimum regulatory requirements for the CET I, Tier I and total capital ratios (including capital conservation buffer, CCB) at all times, as prescribed by the RBI under Basel III regulations.

These Tier I bonds are expected to absorb losses through the write-down mechanism at the objective prespecified trigger point fixed at the bank's (CET I) ratio as prescribed by the RBI, i.e. 6.125% of the total RWAs of the bank or when the PONV trigger is breached in the RBI's opinion.

The distributable reserves² that can be used for servicing the coupon in a situation of inadequate profits or a loss during the year, stood at a comfortable 12.1% of RWAs as on March 31, 2023. The rating on the Tier I bonds continues to be supported by the bank's sound capitalisation profile and expectations of healthy profitability going forward.

² As defined in [RBI circular](#)

Annexure II: List of entities considered for consolidated analysis

Company Name	Ownership*	Consolidation Approach
ICICI Prudential Life Insurance Company Limited	51.27%	Full Consolidation
ICICI Lombard General Insurance Company Limited	48.02%	Full Consolidation

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated.
