TCS Helps VIAVI Build O-RAN Test Solutions to Accelerate Launch of Innovative New 5G Products

Tata Consultancy Services Expands its 25-Year Partnership with VIAVI to Transform its Test Framework and Build a Platform Agnostic Solution to Test Interoperability with Large OEMs

CHANDLER | MUMBAI, October 26, 2023: [Tata Consultancy Services \(TCS\)](#) (BSE: 532540, NSE: TCS) has helped VIAVI Solutions, a global network test, monitoring, and assurance solutions provider, transform its 5G O-RAN (Open Radio Access Network) test solutions that enable device manufacturers and others to launch 5G innovations faster.

VIAVI partnered with TCS to co-create an end-to-end test framework solution for interoperability testing of O-RAN devices for successful integration with key equipment manufacturers globally. As a part of this co-innovation, TCS built an intuitive platform-agnostic solution, simplifying testing operations and reimagining the user experience for system testers, field engineers, and technology partners. TCS is also helping VIAVI demonstrate and operate customized test suites as per the end customer's requirements.

The future-ready scalable test solution helped VIAVI reimagine service delivery, enabling its customers to launch innovative new products more quickly with enhanced regulatory compliance. The solution's configurability and rich functionality helped VIAVI tap a broad market segment with diverse clients ranging from network equipment manufacturers and tier-2 OEMs to integration and conformance labs and network operators.

Through their 25-year partnership, TCS and VIAVI co-innovated across every new generation of technology from 2G onwards, shaping the technology ecosystem. TCS has played a key role in VIAVI's growth and transformation, collaborating across new product development, managing existing product portfolios, integrating new products from acquisitions, and reimagining critical business functions. More recently, TCS helped VIAVI develop a first-of-its-kind 5G Open RAN portfolio of test verification and assurance solutions such as TM500 O-RU Tester, TeraVM O-DU Tester, and an end-to-end Open RAN test product suite.

"Twenty-five years ago, VIAVI and TCS embarked on a journey to collaborate and co-innovate, steering the technological evolution from 2G to 5G and beyond. We are excited to move into the next phase of the journey and expand our partnership," said **Ian Langley, Senior Vice President, Wireless Business Unit, VIAVI**. *"Networks are growing more complex, and with VIAVI's unwavering focus on testing simplicity combined with TCS' expertise in platforms, we will enable customers to accelerate technology development which reduce TCO and time to market."*

"TCS is pleased to expand its collaboration with VIAVI to co-create a platform-agnostic interoperability device testing solution. Our extensive experience in delivering transformation projects and technology expertise helped VIAVI with a transformed user experience, boosting its market reach," said **V Rajanna, Business Group Head, Technology, Software and Services, TCS**. *"TCS shall continue co-innovating with VIAVI to shape next-gen communication technologies, creating unique test solutions for 5G Advance and 6G, helping drive its business growth."*

About VIAVI

VIAVI (NASDAQ: VIAV) is a global provider of network test, monitoring and assurance solutions for telecommunications, cloud, enterprises, first responders, military, aerospace and railway. VIAVI is also a leader in light management technologies for 3D sensing, anti-counterfeiting, consumer electronics, industrial, automotive, government and aerospace applications. In 2023, we celebrate over 100 years of Network Transformation and Optical Innovation. Learn
