Let's simplify the Tech behind Digital Networks

STLeScope
TechTalk

Friday, September 04, 2020
16:30 to 17:30 IST

We firmly believe that the future digital networks will be fundamentally very different from the past. Future Digital Network will bring together four specialised technological confluences – (i) Wired and Wireless Convergence (ii) Software and Hardware Disaggregation (iii) Connectivity and Compute, and (iv) Open Source - all at the Edge of the Network. This network will bring the scale and quality to bring affordable Internet to the world.

STLeScope Tech Talk is our effort to simplify the upcoming technologies that drive value to the digital networks of the future. We will cover topics including optical networks, converged wireline-wireless networks, and edge compute to the future of the Internet and demystify complex technology topics for you.

In the Introductory series, on Sep 4th, 2020, we will unravel the technologies that will disrupt wireless networks. Come join us for an engaging discussion on wireless technologies with our industry experts.

Shantanu Kulkarni

Head, Network Software
Areas of Expertise
OSS/BSS

Rajesh Gangadhar

Head, Access Solutions
Areas of Expertise
Radio Access Technology

Following this technology learning session, we will keep the floor open for Q&A to address your queries. We look forward to seeing you at the event.
