Dear Sir/Madam,

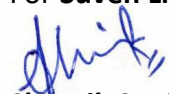

**Sub: News Release**

.....

With reference to above subject, please find enclosed News Release of our company Titled **“Suven Life Sciences announces five poster presentations including Phase-2 proof-of-concept study design for SUVN-G3031 in patients with narcolepsy at the SLEEP 2020 virtual conference.”**

This is for your information and record.

Thanking you,  
Yours faithfully,  
For **Suven Life Sciences Limited**

**Shrenik Soni**  
Company Secretary  
Encl.: As above

## News Release

### **Suven Life Sciences announces five poster presentations including Phase-2 proof-of-concept study design for SUVN-G3031 in patients with narcolepsy at the SLEEP 2020 virtual conference**

**Published: 26-Aug-2020, Hyderabad, India**

Suven Life Sciences announced today that five posters on SUVN-G3031, a histamine-3 receptor inverse agonist will be presented at the upcoming 34<sup>th</sup> Annual Meeting of the Associated Professional Sleep Societies (APSS), known as "SLEEP 2020." The meeting will be held virtually from August 27-30, 2020.

The poster presentations include a Phase-2 proof-of-concept study design that is currently recruiting the patients with narcolepsy with and without cataplexy, pharmacokinetic profile and safety findings from Phase-1 study, preclinical efficacy and differentiating features over current treatments of narcolepsy.

#### **Details of the poster presentations are as below:**

- Phase-2 proof of concept study of SUVN-G3031, a histamine H3 receptor inverse agonist for the potential treatment of narcolepsy (**Poster 0759**)
- SUVN-G3031, a potent and selective histamine H3 receptor inverse agonist: Safety, tolerability and pharmacokinetics following single and multiple ascending doses in healthy adult subjects (**Poster 0760**)
- SUVN-G3031, A histamine H3 receptor inverse agonist produces robust wake promoting and anticataplectic activity in orexin knockout mice (**Poster 0008**)
- Preclinical characterization of SUVN-G3031, A histamine H3 receptor inverse agonist for the treatment of narcolepsy (**Poster 0072**)
- SUVN-G3031, A potent and selective histamine H3 receptor inverse agonist - Differentiating features over current treatments of narcolepsy (**Poster 0155**)

#### **Update on SUVN-G3031 Phase-2 proof-of-concept study:**

- *Patient recruitment for the study is currently ongoing in USA.*
- *Data readout from Phase-2 POC study is estimated in early 2021.*

SUVN-G3031 is being evaluated as monotherapy for the safety, tolerability, pharmacokinetics, and efficacy at doses of 2 mg and 4 mg compared to placebo in patients with narcolepsy with and without cataplexy. The primary objective of this study is to demonstrate superiority of SUVN-G3031 compared to placebo as measured by an improvement in the Maintenance of Wakefulness Test (MWT) score.

**About SUVN-G3031:** SUVN-G3031 is a potent, selective and well differentiated Histamine H3 receptor inverse agonist with excellent oral bioavailability and drug-like properties. It enhances the in-vivo release of several neurotransmitters in the cortex and showed robust wake promoting effects in various animal models. SUVN-G3031 has excellent safety profile in preclinical models with no propensity to induce abuse liability. SUVN-G3031 has successfully completed two phase-1 studies in USA in 72 healthy adult and elderly male/female populations with no serious adverse events.

**About Suven Life Sciences:** Suven Life Sciences is a clinical-stage biopharmaceutical company with the objective of development and commercialization of novel therapeutics for the treatment of central nervous system (CNS) disorders. Suven's clinical candidates Masupirdine (SUVN-502), SUVN-G3031, SUVN-D4010 and SUVN-911 are at various stages of clinical development. Several other developmental compounds including SUVN-I6107 an M1 PAM for treating cognitive deficits, SUVN-M8036 a multimodal compound for treating psychosis/schizophrenia and SUVN-D1044 for treating gastrointestinal disorders are at advanced preclinical stage of development.
