# **Coal India's dwindling** upper crust gains

Larger shares of the state-owned miner's production are sold significantly below global benchmark prices, deterring global investors from participating in divestment plans

9 November

hen global thermal coal prices crossed \$450 a tonne in September, reflecting a surge in demand for the fuel in Europe, Coal India, the world's biggest producer, was charging less than a tenth of international rates for a similar grade of fuel. A portion of the miner's produce is auctioned, which last fiscal fetched an average premium of 88 per cent over the company's notified prices, according to ratings agency CRISIL data. The premium on such auction sales surged last quarter but the quantity of coal sold at market rates declined from last year's levels.

Successive Indian governments have shackled Coal India, preventing the miner from profiteering when coal prices rise. In 2012, two years after the miner went public, the government issued a rare presidential decree ordering the company to supply fuel to private sector generators on longterm contracts at notified prices, leading to protests by minority shareholders that the order will hurt profits. New Delhi still wields a tight control, a disservice not only to the company but to its minority shareholders. Slicing away Coal India's creamy layers also puts off global investors from participating in New Delhi's plans to divest additional stakes in the company.

Most of Coal India's 623 million tonnes (MT) of production in 2021-22 was sold at

artificially low prices to power plants. For instance, this Just 10 MT of coal March, the price of Indonesia's was sold via Kalimantan 4,200 kilocalories auctions in the a kilogram (kcal/kg) averaged July-September \$111 a tonne, excluding delivquarter by Coal ery and insurance, while Coal India, halving from India's state-set price of a simthe previous ilar grade was between \$12 quarter, after stocks and \$14 a tonne. Indonesia is at generators dried India's biggest supplier of imported coal.

"Coal India's mandate is to meet the country's energy security and keep power tariffs low," said Ritabrata Ghosh, vice-president at Mumbai-based ratings agency ICRA, a Moody's affiliate. "If it was a private company they would have made enough money for 20 years at today's prices." Coal prices should remain high in the medium and long term, driven by robust demand, according to the International Energy Agency. The Parisbased energy club of rich nations sees global coal demand growing by around 1 per calendar year, matching its 2013 peak.

#### UNPROFITABLE SEAMS Coal India sales and auctions data

Jan-	March 2022	April-June 2022	July–Sept 2022						
Sales	181	178	155						
Auctions	27.6	20.9	10.3						
Auction realisation	2,434	4,340	6,061						
FSA prices	1,474	1,443	1,414						
Imported coal realisation	NA	NA	13,530						
Output, auctions in MT. Realisations in ₹per tonne; Source: Coal India									

domestic coal," said Ajay Shankar, distinguished fellow at TERI and a former senior bureaucrat in the power ministry. Coal India supplies coal to power plants via longterm agreements at notified rates, which are typically much cheaper than imports.

Indonesia's reference coal price (HBA), based on 6,322 kcal/kg GAR coal with 8 per cent total moisture content and 15 per cent ash, at \$319.22 a tonne for September has more than doubled in a year. Coal India's notified rate for a similar grade was

\$41 a tonne. This is partly because of the high level of impurities such as ash content, and partly because New Delhi wants to supply cheap fuel to generators so that they can keep tariffs low for residential and agricultural users.

India's coal-fired plants still meet more than half of country's power demand. Renewables are

paltry in comparison, according to Central Electricity Authority data. India's coal consumption is estimated to grow at 4 per cent a year to meet rising energy demand, McKinsev said in a recent report.

Auctions were introduced to enable Coal India to improve supplies to customers without term contracts, and increase profits. "E-auctions help discover market-based pricing of coal and allows buyers to meet their short-term/seasonal requirements, and allows traders and such cent this year to about 8 billion tonnes this end users who are not able to procure coal ing regulations, e-auction premiums have through the institutionalised linkage still been healthy, with these premiums "It would be disastrous for the country's route," said Satnam Singh, director, energy, over the FSA coal having jumped to around economy to have import parity prices for CRISIL. "The premiums received in e-auc-

tions help Coal India achieve better profitability, especially given that the miner has not increased its notified prices for the last four years."

For instance, in September, Coal India realised a 276 per cent premium for its average coal grade over notified prices on 4.7 MT of sales, according to ICRA data. Premiums averaged more than 300 per cent over notified prices last quarter.

Ironically, Coal India used to sell more coal via e-auctions when it secured lower premiums as global prices trended lower. The miner sold 124 MT in fiscal 2020-21 at modest premiums because high-quality coal globally had hit lows of \$50 a tonne, a fraction of today's levels. Auction volumes declined in 2021-22 to 108 MT when premiums nearly doubled over notified levels after international prices surged to over \$300 a tonne. New Delhi trimmed auction sales to divert scarce fuel to state generators, which carried only a few days of stocks.

Sales at market rates have slumped further this fiscal despite coal trading at nearly \$460 a tonne in September. Just 10 MT of coal was sold via auctions in the July-September quarter by Coal India, halving from the previous quarter, after stocks at generators dried up in summer, according to company data. Around 142 MT was supplied under term agreements. The company supplied only 31 MT via auctions in the first half of this fiscal despite premiums quadrupling, compared to 54 MT in the October 2021-March 2022 period.

Surging peak demand for electricity this summer drained stocks at generators. Imports turned unaffordable. That prompted New Delhi to divert auction volumes to power plants, an industry official said. Sale of coal via auctions gets affected if demand for power surges, Coal India Chairman Pramod Agrawal has

While the realisation on e-auction coal is generally market-linked depending on the alternative, which is the imported coal price, we have observed that the prices even on e-auction coal are much lower than imported coal prices," said Bhanu Patni, associate director, India Ratings. "Having said that, given the fuel supply agreement (FSA) coal is governed by n

# A₹5K-cropportunity: Hinterland is Pine Labs' BNPL money-spinner

Bengaluru, 9 November

Financial technology (fintech) unicorn Pine Labs is scaling up efforts to expand in India's towns and hinterland. The firm is witnessing huge demand for its Buy Now, Pay Later (BNPL) services among the offline merchant community this festival season.

Pine Labs expects to process BNPL transactions worth ₹5,000 crore and more this month as an increasing number of customers in small towns are buying products from physical stores availing of equated monthly instalments (EMIs).

These include products like smartphones, wearables, large appliances, smart televisions, and washing machines. Other categories where it is witnessing huge demand include fashion, apparel, and lifestyle products.

'We are expecting to cross ₹5,000 crore in transaction value for BNPL for October. This is 100 per cent growth, compared to any average month," said Mayur Mulani, business leader, Pay Later, Pine Labs, in an interview, adding, "This is also the first time people are stepping out after two years to shop for the festival season."

Pine Labs, which is valued at \$5.05 billion, competes with players like Razorpay, Paytm, and PayU. It is looking at forging ties with 100,000 stores for BNPL services this month. It has partnerships with brands like in the consumer electronics cat-

**Pine Labs is now** 

across a network

of 15 maior credit

card issuers with

customer base of

over 40 million

a potential

enabling BNPL

Samsung, Sony, Whirlpool, Xiaomi, and Oppo.

Mulani said the firm is enabling BNPL, along with merchants, even to customers buying a ₹10,000-20,000 phone. "That has been a big lever for us and we see significant uptake," said Mulani.

The firm said its merchants are in an advantageous position since it offers a growing network of leading banks and brands on its Pay Later platform. The compa-

tech stack on its Android-powered point-of-sale (PoS) terminals. These ensure paperless Pay Later debit and credit card EMI transactions are validated and processed within seconds.

Pine Labs also recently entered the wearables segment

egory. Shoppers in India can purchase wearable devices of select brands on a BNPL arrangement using Pine Labs' PoS terminals.

"We are going into tier III, IV, and V cities to work with merchant stores and change their

behaviour about how EMI can increase their sales," said Mulani, adding, "The brick-and-mortar stores were struggling a couple of years back, com-

pared to the ease ny has built a robust and secure of transactions performed by online retail players. We really worked hard and got out (BNPL) products that give instant gratification to customers. The ease of transaction is also key to pushing affordability."

Pine Labs is now enabling BNPL across a network of 15 lending products," said the Bain major credit card issuers with a & Company report.

potential customer base of over 40 million. The company also introduced a first-of-its-kind EMI on debit cards and from non-banking financial companies (NBFCs) with a combined

eligible base of 60 million. India's BNPL market is expected to grow to \$45-50 billion by 2026, up from \$3-3.5 billion as on date, according to experts. They said the number of BNPL users in the country might increase to 80-100 million by then, up from the pres-

ent-day 10-15 million. The pandemic led to a rise in digital lending by NBFCs and the proliferation of innovative credit products. About \$25-30 billion credit was disbursed to 15 million BNPL users in 2020-21 as it emerged as the preferred credit of choice in the wake of Covid-19, according to a report by consulting firm Bain

& Company. It said short-term, small-ticket consumer loan products, which offer convenience and better customer experience, grew rapidly as the favoured mode of consumption financing.

Additionally, EMI-based credit card propositions are gaining traction in the smallticket-sized segments.

"From a fintech perspective, we saw the emergence and scale-up of convenience BNPL, such as Simpl and LazyPay, affordability BNPL (ZestMoney), and card-based

### Notes:

The above is an extract of the detailed format of Quarterly Financial Results filed with the Stock Exchange under Regulation 33 of the SEBI (Listing and Other Disclosuer Requirements) Regulations, 2015. The full format of the Quarterly Financial Results available on the Stock Exchanges website: www.bseindia.com and www.nseindia.com and also on the Company's website: www.laxmi.com

The financial results have been reviewed by the Audit Committee and approved by the Board of Directors of the Company at their meeting held on November 8, 2022. They have been subjected to limited review by the statutory auditors

The financial results have been prepared in accordance with the Indian Accounting Standards ('IndAS') prescribed under section 133 of the Companies Act, 2013 read with relevant rules thereunder

The Statutory Auditors have carried out limited review of the aforesaid Unaudited Standalone Financial Results and have issued their Unmodified Limited Review Report thereon.

The Company deals in 'chemicals business' and has only one reportable segment. This is consistent with the internal reporting provided to

the Chief Operating Decision Maker. The Chief Operating Decision Maker who is responsible for allocating resources and operational performance has been identified as the Managing Director. The scheme of merger of wholly owned subsidiary namely, Acetyls Holding Private Limited ('AHPL') and its step-down subsidiary namely, Yellowstone Chemicals Private Limited ('YCPL'), with the Company with the appointed date as of October 2, 2021 was approved by NCLT by passing a Final Order dated August 28, 2022 ('Final Order'). As specified in the Final Order the Company has filed Form INC-28 on

September 30, 2022 and made the Final Order effective. Consequently, the Company has merged the financials of AHPL and YCPL in these Unaudited Standalone Financial Result. The impact of the merger has been given as per the scheme in the quarter ended September 30, 2022. Since the appointed date was

October 2, 2021, the prior period comparatives of quarter ended June 30, 2022 and the year ended March 31, 2022 have been restated in these Unaudited Standalone Financial Results for the purposes of comparability. The Board of Directors, in its meeting held on May 04, 2022, had recommended a dividend of 35% (Rs.0.70 per equity share) on the face value of Rs.2 per share of the Company for the financial year ended March 31, 2022. The said dividend was approved by the shareholders

in the Annual General Meetings of the Company held on July 29, 2022 and has since been paid out. During the quarter under review, the Company has allotted 65,895 equity shares equity shares of the face value of Rs.2/- each to the option grantees on September 1, 2022. Accordingly, the issued, subscribed and paid-up capital of the Company has increased from Rs. 530.19 million consisting of 26,50,95,078 Equity shares of Rs.2 each to Rs. 530.32 million consisting of 26,51,60,973 Equity shares of Rs.2 each

The basic and diluted EPS for quarter ended September 30, 2022 has been calculated in accordance with Ind As 33. Figures for the previous period have been regrouped/reclassified as required to conform to the figures of the current period.
