Message from the Managing Director

Dear Partners,

It's a strange world where people who put in their hard-earned money on pure belief and trust are called investors and those who associate for profit are called Partners.

Not here.

We strongly believe that all those who have believed in us are our partners. You believed in the potential and we delivered.

Coming a long way in times of unparalleled changes we have not only increased our capabilities but also foraged into different segments to cater various market requirements.

Looking ahead we are investing heavily in developing the latest molecules in various therapeutic classes and innovative formulations that improve efficacy of existing products.

Geographically also we are adding new countries and registering our brands to fuel the growth for the future.

With almost 300+ registrations in various countries coming through in the next two years we are prepared for the growth in revenue.

It is a tough journey however it is a pleasurable one and I genuinely believe we have a long ever-changing destination that requires us to adapt and amplify ourselves for the better.

With my warmest Regards,

Fredun Medhora
Managing Director

Fredun Pharmaceuticals Limited is a WHO approved Pharmaceuticals Company; exporting to nearly 30 countries and totally committed to supplying affordable quality medicines for decades. Your Company has rapidly progressed in the last 5 years and to achieve our goals the Company has added 2 more departments for manufacturing ointments, creams, gels and ready to use pellets and DC Granules. Several automatic machineries have been installed to increase the production of Tablets, Capsules, Dry Syrups, Pellets and Topical formulations. Latest blister packing machines are also installed to take care of the increased production.

Our extensive generic portfolio will play a significant role in the growth strategy in various markets. Continuous efforts are made to adopt latest technology to improve the cost and quality of our products. The outcome will be a better value for our stakeholders at large.

1. Pharmaceuticals Sector Overview:

We are the fastest growing economy in the world and today the sixth largest in the world generating high growth rate with low inflation. The pharmaceuticals industry plays a unique role in improving the lives of the people.

As a country, we need to substantially increase our Healthcare budgets. Our per person average healthcare spend is approximately 85\$ which is amongst the lowest if compared to other countries. Ayushman Bharat is a positive step towards universal healthcare in India but it needs to accommodate tertiary care in its scheme of things.

The government in its Union Budget 2019 has raised the allocation for Ayushman Bharat scheme by a whopping 167 percent to Rs 6,400 crore for 2019-2020. The allocation for Ayushman Bharat scheme stood at Rs 2,400 crore in 2018-2019.

The healthcare sector needs privatization where implementation should be undertaken by private service providers to ensure that uniformity in quality healthcare is maintained. If the government plays a role of a monitoring agency, we will fare much better to deliver value-based healthcare.

Source: Business Monitor International, Economic Survey 2017-18

Government spending money on healthcare stays at around 1% of the GDP. The healthcare sector can only get affordable if the government revises this upwards. Over the last few years, the Indian Healthcare Sector has begun a major overhaul in order to attain the Prime Minister's goal of healthcare for all. Not only our Government Institutions are involved but Corporate and Private Hospitals have also come forward to be a part of this initiative.

Another important dimension of our Government is making pollution free Nation and ensuring the security of the people.

India is a land of opportunities. The pharma Companies are growing both organically and inorganically. The Indian Pharma Industry is likely to be in the top 10 Global Markets by value by the year 2020. High burden of disease, good economic growth leading to higher disposable incomes, improvements in healthcare infrastructure and improved healthcare financing are driving growth in the domestic market.

By allowing 100% FDI for Greenfield projects and 74% FDI for Brownfield projects will initiate quality in the medical technology sector. Another significant improvement is done in the maternal and infant health.

India's pharmaceutical exports grew a robust 10.72% in 2018-19 and raced past the \$19 billion mark for the first time. Exports touched \$19.14 billion in the year 2018-19 as against \$17.28 billion in 2017-18; the previous highest.

The country's pharmaceutical industry is expected to expand at a CAGR of 22.4% over 2015-20 to reach \$55 billion. India is the second largest contributor of global pharmaceutical workforce. The pharmaceutical sector was valued at \$33 billion in 2017. Due to rapid urbanization and increasing consumer spending including spending on medicines due to healthcare awareness in India, the Indian pharma market is expected to grow substantially.

2. Current Pharma Sector Scenario:

Though the economic situation in most of the emerging markets is challenging, the overall outlook for Global Pharma market is expected to increase. According to the World Industry

Report, global generic drug sales will be 29.2% of the total Pharmaceuticals sales by the year 2022, on increase of 1.2% from the year 2017, Generic drugs accounts for more than 80% by volume of all the drugs dispensed across the world,

R&D Investments and innovation can drive the growth of the Pharma market. At present smaller Companies are also focussing on developing bio-similars and registering just out of patent drugs in developing markets by cheaper and quicker In-House manufacturing process. By adopting such technologies, the small Companies can have greater competitive advantage for themselves as innovating a new drug is an expensive proposition. Your Company is also in the process of developing such molecules and has spent and continues to spend a substantial amount on R & D. The Company as on March 31, 2019 had in total 193 Drugs registered whereas 450 Drugs applications under registration in different countries. The Company will also continue to out-license some formulations to augment the growth. Our objective will be to increase our generic exports in ROW with our new product range of ointments, creams and pellets of different APIs.

Moreover, after the structural changes like implementation of GST in India in the year 2017, the outlook of the industry remains broadly positive. Your Company has also a positive outlook due to some good drivers shown below:

1. National Health Policy, 2015 which focusses on increasing public expenditure on healthcare segment and increasing of health insurance;
2. Reduction in approval time for new facilities;
3. Plans to setup new Pharmaceuticals education and research institutes;
4. Due to growing number of stress related diseases and increasing fatal diseases; demand for cost effective medicines will increase;
5. India has become a manufacturing hub for generics; hence availability of skilled manpower will ease out and accessibility of drugs will greatly improve.

The Management is thus quite positive on its current expectations and projections for the future of your Company but some known and unknown risks like change in local and global conditions, sudden changes in government policies, unexpected manufacturing problems due to unavailability of APIs or change in market dynamics may impact the expectations and results of the Company.

3. Business Outlook:

For the past 2-3 years the Company has been systematically investing in its productive infrastructure by installing additional granulation departments and high speed tableting and blister packing machines. This has yielded results in increased production, sales and the turnover of your Company. Your Company had also planned for two more departments to manufacture ointments, creams, gels and also pellets manufacturing department of different APIs. The licence of both the above-mentioned departments are already obtained and validation of the commercial batches are completed. Hence, your Company expects to manufacture ointments, creams, gels and capsules of different API pellets. This will substantially help the growth of the Company as the machines installed are automated and in today's highly regulated pharma industry, regulation and compliance has a major consideration which allows the Pharma Companies to use electronic records and signatures. There are obvious benefits of advanced automated machines though the cost of upgrading is huge. Your Company has heavily invested in the upgradation and expansion of the manufacturing unit at Palghar. The Company is hopeful of procuring enhanced credit limits from the Bankers.

4. Key Growth Factors:

The other key growth factors for the demand of Pharma Industry are shown below:

<p>Growth & ageing global population</p>	<p>Growing Sick Population</p>	<p>Rising incidence of non-communicable & infectious diseases</p>
<ul style="list-style-type: none"> • In 2010, there were an estimated 6.9 billion people in the world. • By 2020 the world population will be more than 7.6 billion. By 2020, more than 13% of the population in the world will be aged 60 or older. 	<ul style="list-style-type: none"> • Sedentary lifestyle and age are causing many illness. By 2025 - 73.5 million & by 2040 - 642 million number of people will be affected by diabetes. 	<ul style="list-style-type: none"> • WHO predicts that, by 2020, non-communicable diseases will account for 44 million deaths a year - 15% more than in 2010.
<p>Improved access to healthcare</p>	<p>Higher affordability</p>	
<ul style="list-style-type: none"> • More people have access to healthcare than ever before. • Emerging economies are working hard to improve access to healthcare. 	<ul style="list-style-type: none"> • The growing middle-class population with higher disposable income is able to afford quality healthcare. • By 2020, more than 40% of all households in China, India & Indonesia will be "middle class"- defined as those with annual incomes of 5,000 and 15,000 USD. 	

As shown above, your Company will try to focus on local market also to overcome the challenges of exporting generic formulations with declining profits and try to focus on improving the well being and health of our poor people by supplying the cost - effective quality medicines.

5. Challenges:

The Indian Pharma Industry has been facing several regulatory challenges like Foreign Direct Investment (FDI) Policy, Pricing Policy, Patent Protection, Regulatory approvals and Compulsory Licensing, which require careful consideration by the Companies in their pursuit of growth.

The Indian Pharma Industry till now is concentrating on generic market as India enjoys global dominance and generics will still remain the revenue generator for Indian exports. But plunging profitability in regulated markets with increased registration charges leads to global challenges. Hence, your Company has decided to concentrate on other growth avenues, like increasing the products portfolio towards chronic therapies for diseases such as anti-diabetics, cardiovascular and anti-depressants. Your Company is already registered with Central Bureau of Narcotics, India and plans to expand its anti-depressants product range.

The number of Indians with diabetes is projected to reach US\$73.5 million in 2025. The direct and indirect costs of treating such patients are currently about US\$420 per person per year. If these costs remain the same as they are now, India's total bill for diabetes would be about US\$30 billion by 2025. (Source: PWC Report)

As the standards of healthcare improve, the treatment cost may also rise. This would benefit the Company as anti-diabetic drugs are the major source of revenue for the Company.

6. Human Resource Management at Fredun Pharmaceuticals Ltd.:

In lines with the above stated provision(s) the above-mentioned Regulation(s) are not applicable to the Company. Annexure II to Auditors Report

Report on the Internal Financial Controls under Clause (l) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have Audited the internal financial controls over financial reporting of FREDUN PHARMACEUTICALS LTD. ("the Company") as of March 31, 2019. In conjunction with our audit of the Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing

the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial

reporting were operating effectively as at 31 March, 2019; based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Financial risk management

The company has exposure to the following risks arising from financial instruments

- 1 Credit risk
- 2 Liquidity risk and
- 3 Market risk

i Credit risk

Credit risk is the risk of financial loss to the company if a customer or counter party to a financial instrument fails to meet its contractual obligations, and arises principally from the company's receivables from customers. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the company grants credit terms in normal course of business. The company establishes an allowance for doubtful debts and impairment that represents its estimate of incurred losses in respect of trade and other receivables and investments

Trade and other receivable

The company's exposure to credit risk is influenced mainly by the individual characteristic of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the company grants credit terms in the normal course of business.

Summary of the Company's exposure to credit risk by age of the outstanding from various customers is as follows (before allowance for the doubtful debts):-

Particulars	As at 31 March, 2019	As at 31 March, 2018
Neither past due nor impaired		
Past due but not impaired		
Past due 1 - 90 days	5,82,35,151.57	10,12,35,809.22
Past due 91 - 180 days	6,70,45,255.63	56,50,000.99
Past due 181 - 270 days	4,58,154.40	1,45,88,481.93
Past due 271 - 360 days	2,90,24,342.58	98,508.57
Past due more than 360 days	2,30,58,043.31	3,10,19,637.51
	17,78,20,947.49	15,25,92,438.22

Expected credit loss assessment

Exposure to customers outstanding at the end of each reporting period are reviewed by the company to determine and expected credit losses. Historical trends of impairment of trade receivables do not reflect any significant credit losses. Given that the macro economic indicators affecting customers of the company have not undergone any substantial change, the company expects the historical trend of minimal credit losses to continue. Further, management believes that the unimpaired amounts that are past due by more than 30 days are still collectible in full, based on historical payment behaviour and extension analysis of customer credit risk. The impairment loss at 31 March, 2019 related to several customers that have defaulted on their payments to the company and are not expected to be able to pay their outstanding balances, mainly due to economic circumstances.

Cash and cash equivalents

The Company held cash and cash equivalents and other bank balances with credit worthy banks and financial institutions of Rs. 1,46,67,264.81/- (31 March, 2018 Rs. 1,45,32,880.88/-). The credit worthiness of such banks and financial institutions is evaluated by the management on an ongoing basis and is considered to be good.

ii Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its financial obligations as they become due. The company manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Company's reputation.

As on 31 March, 2019 the Company has working capital of Rs. 34,34,32,345.57/- (As on 31 March, 2018 Rs. 8,33,82,986.22/-) including cash and cash equivalents and other bank balances of Rs. 1,46,67,264.81/- (31 March, 2018 Rs. 1,45,32,880.88/-). Working capital is calculated as current assets less current liabilities.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Interest rate sensitivity - fixed rate instruments

The Company does not account for any fixed - rate financial assets or financial liabilities at fair value through profit and loss, and the Company does not have any designated derivatives. Therefore, a change in interest rates at the reporting date would not affect profit and loss for any of these fixed interest bearing financial instruments.

Note - 37

In March 2018, the Ministry of Corporate Affairs Issued the Companies (Indian Accounting Standards) Amendment Rules, 2018, notifying Ind AS 115 'Revenue from Contracts with Customers' (New Revenue Standard) w.e.f. accounting periods commencing on or after April 01, 2018, which replaces Ind AS 11 'Construction Contracts' and Ind AS 18 'Revenue'.
