Tata Communications partners with Google Cloud to drive cloud adoption in India

Offers Tata Communications' IZO Managed Cloud Services for Google Cloud

India, February 16th, 2021- [Tata Communications](#), a global digital ecosystem enabler, today announced its partnership with Google Cloud to drive cloud adoption and transform Indian businesses. With this partnership, Tata Communications has further expanded their managed public cloud services portfolio to include capabilities for Google Cloud.

The partnership between Tata Communications and Google Cloud India will enable organisations to deploy and access Google Cloud services through Tata Communications' IZO™ Managed Cloud while providing them ease-of-use coupled with end-to-end services, including cloud architecture planning, workload migration and ongoing operational support.

As a Google Cloud India Partner, Tata Communications will support organisations with services across infrastructure modernisation, data centre transformation, application modernisation, smart analytics, multi-cloud deployments and more.

Tata Communications IZO™ Managed Cloud provides the right expertise, infrastructure, and support services to drive business growth and improve performance. Tata Communications' IZO™ Cloud Command portal offers a single-pane-of-glass orchestration tool which integrates different enterprise IT environments into a single dashboard and simplifies the management and orchestration of the IT estate, offering a unified cloud experience. It provides a comprehensive view of IT resource utilisation (across on-premise, private, Google Cloud), thus enabling greater control for the customer, resulting in cost efficiencies and improved productivity.

With the current global scenario, there is wider recognition for business resilience and agility that cloud enables; most businesses are now beginning to explore a cloud-first model. DevOps, a set of practices that combine software development and IT operations, has become an important requirement for enterprises. To make applications future ready, businesses are modernising them by leveraging Containers and Kubernetes (an open-source platform for container orchestration), as they offer businesses the scalability and portability they need to be agile and build a competitive edge, enabling self-service provisioning and capacity on-demand with ease.

Tata Communications' services to managed Kubernetes can enable application modernisation seamlessly, which is an essential need as enterprises graduate in the hybrid multi-cloud environments. According to an [IDC survey](#)¹, more than 60 per cent of Indian organisations plan to leverage cloud platforms for digital innovation, as they re-strategise their IT spending plans. Tata Communications and Google Cloud India together have market leading capabilities across a spectrum of services for customers looking to reframe their business blueprint.

“The current demands on enterprises to manage and optimise their cloud solutions has never been more important, especially in the wake of COVID-19 and our increasing reliance on cloud infrastructure,” says Rajesh Awasthi, Global Head of Cloud and Managed Hosting Services at Tata Communications. “As

organisations migrate to Google Cloud, they need a partner that will support them across their entire IT ecosystem and deliver a unified cloud management platform that offers greater transparency, control and security of their data and applications.”

“The true test of 2021 will be how organizations adopt a cloud first approach. Through our partnership with Tata Communications, we will be able to provide our customers with a unified, end-to-end experience that will remove the complexity in cloud management and help them transform at speed and scale”, said **Amitabh Jacob, Head of Partners and Alliances at Google Cloud India**

Tata Communications’ cloud capabilities are underpinned by 14 cloud nodes along with its tier-1 network, which carries around 30% of the world’s Internet routes. Tata Communications is also awarded the best Managed Multi-cloud service provider of the year by [Frost & Sullivan 3 times in a row](#). The company has partnerships with leading ISPs and major cloud providers.

Forward-looking and cautionary statements

Certain words and statements in this release concerning Tata Communications and its prospects, and other statements, including those relating to Tata Communications’ expected financial position, business strategy, the future development of Tata Communications’ operations, and the general economy in India, are forward-looking statements. Such statements involve known and unknown risks, uncertainties, and other factors, including financial, regulatory and environmental, as well as those relating to industry growth and trend projections, which may cause actual results, performance or achievements of Tata Communications, or industry results, to differ materially from those expressed or implied by such forward-looking statements. The important factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements include, among others, failure to increase the volume of traffic on Tata Communications’ network; failure to develop new products and services that meet customer demands and generate acceptable margins; failure to successfully complete commercial testing of new technology and information systems to support new products and services, including voice transmission services; failure to stabilize or reduce the rate of price compression on certain of the company’s communications services; failure to integrate strategic acquisitions and changes in government policies or regulations of India and, in particular, changes relating to the administration of Tata Communications’ industry; and, in general, the economic, business and credit conditions in India. Additional factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements, many of which are not in Tata Communications’ control, include, but are not limited to, those risk factors discussed in Tata Communications Limited’s Annual Reports. The Annual Reports of Tata Communications Limited are available at www.tatacommunications.com. Tata Communications is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements.
