BASML/SEC/237/ NSE & BSE /2020-21 dt: 20.7.2020

We wish to inform you that the Meeting of Board of Directors scheduled to be held on today (Friday, 31<sup>st</sup> July, 2020,) *inter alia* to consider and approve the Audited Financial Results for the year ended 31.3.2020, recommendation of Dividend, if any, for the financial year 2019-2020 and proposals for fund raising by the Company, stands postponed to a future date to be announced later.

The postponement of the Board meeting is due to delay in completion of auditing of the Accounts of the Company and the preparation of Audited Financial Results for the quarter/year ended 31<sup>st</sup> March, 2020.

Dear Sir,

Sub: Submission of financial results [Regulation 33 of SEBI (LODR) Regulation, 2015] for the Quarter/year ended March 2020- Delay- request for condonation

3. Your E-mail dt. 18.8.2020 on the subject matter

-----

With reference to the subject matter of delay in filing Audited Financial Results for the quarter/year ended 31.3.2020, we had addressed a letter to you on 31.7.2020, a copy of which is enclosed as **Annexure A**. Being alive to our responsibility, but for permissible difficulties in the finalisation of the Accounts due to COVID-19 related issues we had addressed on the subject as per Annexure A.

The delay in compliance with SEBI extended date of July 31, 2020 under Regulation 33 of SEBI (Listing Obligations and Disclosure) Requirements, Regulations, 2015 was due to the following reasons:

1. There was a complete lockdown of all the Offices and Organizations in Tamil Nadu from 24.3.2020 to 10.5.2020. Hence, no activities were possible during the period.
2. Subsequently, our office was functioning with reduced staff members, adhering to the Standard Operating Procedures and guidelines issued by the respective Governments. The relevant notification of the Government is enclosed as **Annexure B**.
3. Due to number of positive cases among our office had to remain closed from 9.7.2020 to 22.7.2020. it may be kindly noted that the concerned officers themselves were affected and unable to function. Our notice of closure for the period 9.7.2020 to 22.7.2020 is enclosed as **Annexure C**.

4. The reported cases of COVID-19 positive in our office included our Chief Financial Officer, Sri S Seshadri, he was hospitalised for about 10 days and further quarantine for a fortnight apart from other staffs. This had totally crippled the finalisation of the Audit process. We enclose herewith as **Annexure D**, the records relating to the illness of Sri S Seshadri our Chief Financial Officer.
5. Sri N Krishnaraj, Company Secretary was also on isolation for possible COVID-19 health condition.
6. Our Auditors are M/s Deloitte Haskins & Sells LLP, Sri M N Balaji, Chartered Accountants is the Auditors who was attending to the scrutiny of our records for the purpose of certification, being based in Bangalore, he had no access to the Company Accounts and records maintained at the Registered Office in Coimbatore. This made communication difficult and time consuming to provide necessary clarifications. This made the audit process a tough task.

We respectively submit that the several factors were mentioned above and supported by the enclosure were beyond our control and whereof force majeure nature.

There were no way that it could be avoided or got over. The factors obviously even SEBI had recognized the difficulties and provided extension for compliance with Regulation 33. Such extension happened to be insufficient to our case because of the disability of the Principal Officers and closure of the office itself.

In this circumstances the delay of 11 days cannot be viewed as a serious breach for imposition of fine.

Accordingly, we request that the proposed fine kindly may be waived taking into consideration the facts that we have submitted with evidence.

Thanking you,

Yours faithfully,

1. Testing for SARS-CoV-2 was performed on a commercial ICMR approved RT-PCR kit/US FDA EUA/CE IVD approved kits.
2. Negative results do not preclude SARS-CoV-2 and should not be used as the sole basis for patient management decisions. Kindly repeat test after 48-72hrs if clinically suspected.
3. Viral nucleic acid may persist in vivo independent of virus viability. Detection of the analyte target does not indicate that the viruses are infectious or are the causative agents of symptoms.
4. False negative results may be attributable to improper sample collection, improper transport, treatment, PCR inhibitors, etc..
5. As per ICMR guidelines, the contact and test details of all patients undergoing COVID-19 testing need to be uploaded on the ICMR reporting portal and the same will be accessed by stakeholders including IDSP, MoHFW for timely initiation of contact tracing and appropriate control measures.
6. Limit of detection of RT-PCR Kit=1cp/u) eluate. Kits with low limits of detection (LOD) are more sensitive in picking up very low levels of viral RNA. Results that are LOW POSITIVE could represent either early infection with rising viral load, or a late infection with falling levels. Such results need to follow up by repeating the test with fresh sample a few days later.

# Know more about COVID -19 Test

- 1 Test comes **POSITIVE** after 7 -10 days of Infection
- 2 The Test remains positive for several weeks after Infection
- 3 Positive test Indicates exposure to SARC-CoV-2
- 4 Negative test does not rule out COVID - 19 Infection

Test Results			Clinical Significance
PCR	IgM	IgG	
+	-	-	Patient may be in the window period of infection
+	+	-	Patient may be in the early stage of Infection
+	+	+	Patient is In the active phase of Infection
+	-	+	Patient may be In the late or recurrent stage
-	+	-	Patient may be in the early stage of Infection. PCR result may be false - negative
-	-	+	Patient may have had a past infection, and has recovered
-	+	+	Patient may be in the recovery stage of an Infection, or the PCR result may be false- negative

## Q1 Positive Results mean ?

Results obtained using our technique are usually very specific when the sample is collected as per protocol, on the right day and the tests performed as per the norms. Only when both E gene and RdRp gene are detected in the sample, the patient is declared as positive for COVID - 19

## Q2 Negative Results because of ?

On the contrary, a negative result might not always mean the absence of the COVID - 19 infection for the following reasons :

- a. The dynamics of the viral presence in different samples has not been fully established yet. The nasopharyngeal or oropharyngeal swab is shown to be negative in about 40% of the patients. In such cases, if clinically indicated, the test must be repeated with another fresh sample from the lower respiratory tract. Saliva may also be used as sample but the data is inconclusive and ICMR does not recommend it anymore.
- b. When the sample has been collected too early, say within 1 - 3 days of suspected infection, at a point when the patient has not started shedding sufficient amounts of the virus. In this case, it may be necessary to repeat the test in 3 to 7 days.
- c. When the sample has been collected too late, say at 7 to 10 days of Infection, when the viral load has fallen to undetectable levels.
- d. Poor / failed sample extraction, handling, transportation and / or storage.

## Q3 When does a patient tested POSITIVE at one lab, test NEGATIVE in another lab

- a. When the same sample is tested again, a negative result may be due to poor sensitivity of alternate kit used by the second lab.
- b. When another sample is taken from the same patient on the same day and repeated, a negative result may be due to improper sample collection.
- c. If the second sample is taken after a few days, the viral load could have decreased and the result could turn out negative. The test may be repeated after 24 hours to confirm a true negative report.

## Q4 When does a patient tested NEGATIVE, test POSITIVE with repeat sample

- a. When the patient gets tested too early the first time (say within 2 days of infection), there is a chance of the test turning out false negative. On repeat, he may get positive findings.
- b. If the sample was not stored properly before testing the first time, the virus could have deteriorated and thereby yielding a negative report. If it is suspected that the storage conditions were not ideal, it is advisable to repeat the test with a fresh sample.

## Q5 When is a patient declared VIRUS FREE?

When a patient is tested positive for COVID - 19, he / she is quarantined and treated as per the ICMR and State Government guidelines. After the recommended quarantine period, 2 RT-PCR tests should be done at an interval of at least 24 hours before declaring the subject virus free.

## Q6 Can an ASYMPTOMATIC PERSON test POSITIVE for COVID - 19?

Yes, ICMR reports that 70 to 80 % of the COVID patients may be asymptomatic. But they may cause the infection to be transmitted to other susceptible individuals. If the person infected is immunosuppressed / immunocompromised, or suffers from other comorbidities like Diabetes, Hypertension, Malignancy, Chronic Kidney Disease, Cardiac ailments etc., they can develop symptoms
