## HCL's RMI Solution for manufacturing now even stronger with PTC and HPE joining forces

Collective legacy of the three companies to enhance the solution that can help manufacturers to effectively work remotely in times of COVID-19

**Noida, India, September 09, 2020:** HCL Technologies (HCL), a leading global technology company, today announced collaboration with PTC, an industry leader in augmented reality & IoT, and HPE, a global edge-to-cloud Platform-as-a-Service company, to take its Real-Time Manufacturing Insights (RMI) solution to the next level. With this partnership, HCL can now deliver a streamlined, pre-bundled, ready-to-deploy configuration for the most challenging manufacturing environments.

Designed on PTC ThingWorx® platform, the solution now gets another boost with HPE's Edgeline series. This will make the solution more suitable for addressing the need of real-time visibility from shop floor to top floor, across manufacturing enterprises.

In the wake of the COVID-19 pandemic, where remote working is the new normal, the entire RMI solution can be deployed close to the factory set-up for faster results. The solution provides outcome-based values and can also help supervisors and plant managers to remotely visualize factory operations, and accordingly predict and take cognitive actions of their operations.

"The current market situation has pushed organizations to quit operating in silos and form strong and strategic collaborations, focused on shared integrity and values. Our collaboration with PTC and HPE goes beyond the signed dotted lines," **said Sukamal Banerjee, Corporate Vice President, and Head, IoT WoRKS™, HCL Technologies.** It's a commitment to work together towards scaling this superior solution in the market, thereby mutually benefiting our manufacturing customers and the overall industry in these challenging times."

"HPE is honored to be a key partner of the HCL IoT WORKS solution," **said Gerald Kleyn, VP and GM, Moonshot, Edge & IoT Systems, HPE.** "HPE Edgeline Converged Edge Systems enables our customers to drive efficiency and innovation within their organizations and deliver the highest levels of enterprise performance at the manufacturing edge. . Our solution allows the customers to gain rapid insights from their operational data using accelerated artificial intelligence techniques and further deliver a superior experience to end users with technologies such as augmented reality. HPE is proud of its long-standing relationship with HCL driving innovations that provide our customers better outcomes."

"HCL, one of PTC's top Global System Integrator Partners, has taken ThingWorx platform, with its accelerated application and solution enablement, and combined it with their deep manufacturing and engineering domain expertise to create a world-class solution," **said, Kevin Wrenn, EVP, Products at PTC.** "This award-winning RMI solution is a direct result of the successful collaboration between our two companies, built on HCL's deep domain understanding of digital transformation across the enterprise and PTC's leading technology. This solution offering will help us enable rapid and significant business outcomes for our mutual customers."

ThingWorx® is a registered trademark of PTC Inc. in the United States and other countries.

### About HCL Technologies

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL's Mode 1-2-3 strategy through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses transform into next-gen enterprises.

HCL offers its services and products through three business units - IT and Business Services (ITBS), Engineering and R&D Services (ERS) and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations and next generational digital transformation solutions. ERS offers

engineering services and solutions in all aspects of product development and platform engineering while under P&P, HCL provides modernized software products to global clients for their technology and industry specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences & Healthcare and Public Services.

As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability and education initiatives. As of 12 months ended June 30, 2020, HCL has a consolidated revenue of US \$ 9.93 billion and its 150,287 ideapreneurs operate out of 49 countries.
