Kindly take the above on record.

Thanking you.

Yours faithfully,

For Sterlite Technologies Limited

Amit Deshpande

Corporate General Counsel & Company Secretary (ACS 17551)

Enclosure: As above.

PRESS RELEASE

STL partners with the American India Foundation (AIF) to launch Digital Equalizer and Improved Learning (DEIL) Program for 300,000 beneficiaries

Mumbai, India, 15 March 2022: <u>STL</u> [NSE: STLTECH], an industry-leading integrator of digital networks, has launched the Digital Equalizer and Improved Learning (DEIL) Program in association the American India Foundation (AIF). This is a first of its kind partnership where a not-for-profit organization and a corporate come together to create impactful life for millions through a unique model that can continue despite social and ecological disruptions. Through this program, STL will create access to quality education for over 300,000 beneficiaries across 300 schools in Silvassa, Aurangabad and Nandurbar. The program is in line with SDG 4 standards and commits to quality education and capacity building for teachers and community enablers over the next 3 years.

During the pandemic, children from underprivileged communities were devoid of even basic education as they did not have access to digital platforms. The Project aims at democratizing education by ensuring that each child gets equal access to quality learning opportunities. AIF has committed to improving the lives of India's underprivileged, with a special focus on women, children, and youth. Moreover, as STL continues to transform billions of lives through digital networks, giving access to quality education to underserved communities is at the core of its social initiatives. Keeping this in view, STL partnered with AIF to launch the DEIL program by leveraging BYJU's school learning app.

Commenting on this initiative, Mansi Kasliwal, VP-Social Initiatives, BYJU'S, said, "We are delighted to collaborate with STL and the AIF that have been working relentlessly in the field of social development. We are committed to leveraging technology to bring about positive systemic changes in making quality education accessible. With our 'Education for All' initiative, we are empowering children from the remotest areas in the country with good quality education for free.

Speaking on this partnership, Mathew Joseph, Country Director, AIF, said: "The last two years have exposed the wide chasm between the connected and the unconnected, revealing hordes that are far behind on the digital uptake. Millions of students from underserved communities do not have the access to high quality education, or the right resources, curriculum and guidance to continue and scale their learning. AIF's partnership with STL and BYJU'S aims to address such inequalities in digital readiness ensuring that-we do not leave those who are less digitally equipped even further behind in a post-pandemic world".

Commenting on STL's initiative, Akanksha Sharma, Global ESG Head, ESG-CSR and Sustainability, STL, said: "Through this program, we are bridging the digital divide by providing quality digital content in vernacular mediums led by

www.stl.tech

community participation. This unique model will guarantee last mile access to education and new-age learning techniques in remote rural areas across Aurangabad, Silvassa and Nandurbar. We are confident that with this program a 2X improvement in learning outcomes of students and teachers' instruction delivery will be visible over the next few years. This particular initiative in the Aspiration Districts flagged by Niti Ayog is a significant endeavour to accelerate India's progress on SDG 4."

About AIF

AIF is committed to improving the lives of India's underprivileged, with a special focus on women, children, and youth. Through high-impact interventions in education, health, and livelihoods, AIF has impacted 8.4 million lives across 26 states of India over the last 20 years. Learn more at https://aif.org/
