Sub:-Submission of Newspaper advertisement of public notice of 93rd Annual General Meeting to be held through video conferencing/ Other Audio Visual Means only.

Dear Sir/Madam,

In terms of Regulation 47 of the SEBI (LODR) Regulations, 2015 and in compliance with Ministry of Corporate Affairs (MCA) circulars, the Company has published the public notice of 93rd Annual General Meeting to be held through video conferencing/ Other Audio Visual Means only. The advertisement published on today, August, 29, 2023 in Financial Express (English) and Arthik Lipi (Bengali).

Further, in pursuance of Regulation 30 read with Schedule III (A) (12) please find enclosed the copy of Newspaper articles as published in above mentioned newspapers.

This is for your information and records.

Thanking you,

Yours faithfully,
For Shree Hanuman Sugar & Industries Limited

Datta Ram Gill
Director

STOCKS OF RICE FIRMS TAKE A HIT
Industry seeks no extension of limits on basmati exports

Procurement for next season likely to be hit if extended

SANDIP DAS
New Delhi, August 28

AFTER TEMPORARILY HALTING basmati rice exports below \$1,200/tonne, the government should refrain from continuing with a minimum export price (MEP) beyond October 15, as it would hit procurement of the next season's crop, exporters said.

Several exporters FE spoke to said basmati exports prices usually go up during August-September, considered as the end of the season and the harvesting of the crop for the next season (2023-24) commences from October 1.

"The government needs to reduce MEP to a realistic level of \$850/tonne so that farmers prices realisation are not hit because of decline in exports," Vijay Setia, ex-chairman, All India Rice Exporters Association (AIREA) and Karnal-based basmati rice exporter told FE.

Basmati rice is grown mostly in Punjab, Haryana, western Uttar Pradesh, Rajasthan, Jammu and Kashmir and Uttarakhand. The aromatic and long grain rice commands a premium in the global market. Out of the annual estimated production of 9 million tonne (MT) of basmati rice, half of the volume is exported.

In the previous fiscal, the country exported 4.56 million tonne (MT) of basmati rice valued at \$4.78 billion with an average price of \$1,050/tonne. According to an official with AIREA, the average export price of basmati rice in the last five years has been \$975/tonne.

"MEP fixed for the basmati rice is valid for a few premium margins to improve as the impact of Covid on project estimates begins to fade with several projects bagged before and during the pandemic are nearing completion. It is running around seven EPC projects of Coal India, Nalco and SAIL.

Table with 6 columns: Returns (%), Chamanlal, KRBL, LT Foods, Kohnoor Foods, GRM Overseas. Rows for August 28, 1-week, 1-month, 1-year.

rice varieties, it has to be corrected so that shipment of aromatic long grain rice is not hit," Ashwini Kumar Arora, MD & CEO, LT Foods, a major exporter of basmati rice said.

Officials said putting in place an MEP for basmati rice and imposing an export duty on parboiled rice till mid-October would give the government time to get an estimate of the kharif rice output for the current financial year.

Meanwhile, shares of companies engaged in rice exports - Chaman Lal Setia Exports, LT Foods, KRBL, and GRM Overseas dropped up to 6% in Monday's intra-day trade.

Pointing out that the average export price of basmati rice in August has been above \$1,200/tonne, a commerce ministry official said, "There has been large variation in the contract price of basmati being exported with lowest contract price being \$359/tonne in backdrop of average export price of \$1,214/tonne during

Green energy ambitions may exceed 500 GW: ISA chief
Vigilance in focus at FSDC-SC

GAURAV SAINI
New Delhi, August 28

INDIA IS POISED not only to achieve its ambitious target of 500 gigawatts renewable energy capacity by 2030 but also surpass it, driven by an anticipated decline in battery prices by 2025, according to Ajay Mathur, director general of the International Solar Alliance (ISA).

In an interview with PTI, Mathur said global climate finance distribution remains skewed and that reforming multilateral development banks and facilitating renewable energy investments have been priority areas of India's G20 presidency.

Mathur said a fall in battery prices by 2025 could drive the widespread adoption of solar plus battery solutions, leading to the realisation of India's ambitious target of installing 500 GW of renewable energy capacity by 2030 - one of the five commitments Prime Minister Narendra Modi made during the 2021 Glasgow climate talks.

"If you are putting 500 gigawatts during the day, you also are setting up very expensive storage to ensure that you also use it at night. Now, expensive storage implies that you and I pay

There is no doubt that every country in the world needs to change to the circumstances, manage the change and also at the same time make sure that we do not cross the 'Lakshman Rekha' of irreversible change

On factors driving the reduction in battery prices, Mathur attributed the decline to competition among manufacturers and the evolution of technologies. "Earlier, we had lithium phosphate batteries, before that, we had lead acid batteries. We are also looking at vanadium redox flow batteries. Therefore, the development of not the same kind of batteries is key in the move away from expensive batteries to batteries that are more likely to fit the need," the energy sector expert said.

Mecon sees 20% growth in FY24 revenue

MANISH GUPTA
New Delhi, August 28

STATE-OWNED ENGINEERING CONSULTANCY firm Mecon, which forayed into operation and maintenance (O&M) of steel plants this month with the commissioning of NMDC Steel's factory in Chhattisgarh, sees more than 20% growth in its FY24 revenue.

"We did the DEC (design, engineering and consultancy) and PMC (project management consultancy) for the 3 million tonne steel plant in Nagarnar. Now we are doing its O&M," Mecon chief general manager (marketing) Sundeeep Sinha said.

Mecon, which has been primarily consulting public steel

plants, is now also a steel maker. It has drawn a strategy to engage the equipment suppliers to operate and look after the equipment they supplied under the supervision of its officers.

"This has opened up a huge opportunity in O&M business. As many steel plants are offloading various activities to different agencies to reduce manpower, they may wish to have an established agency like us to look after these," he said.

The Ranchi-based consultancy, under the ministry of steel, with 70 project and site offices across the country posted a revenue of ₹850 crore

cross the 1.5-degree Celsius mark, compared to the pre-industrial (1850-1900) levels.

"There is no doubt that every country in the world needs to change to the circumstances, manage the change and also at the same time make sure that we do not cross the 'Lakshman Rekha' of irreversible change," he said.

Mathur addressed the question of increasing pressure on developing countries to transition away from coal, emphasising the importance of affordable energy storage solutions. He noted that solar energy plus storage is already cost-competitive with fossil fuels in certain contexts, and said the continued decline in battery costs will enable greater adoption of renewable energy sources.

"As they (costs of batteries) keep declining, we will see more and more of electricity cost effectively coming from these sources rather than from fossil fuel-based sources. In my view, it is the development of new (energy storage) technologies which is far more important than the phasing out or phasing down issues that seem to have caught our attention," the ISA director general said.

Encouraging guidance

Mecon also expects its profit margins to improve as the impact of Covid on project estimates begins to fade from this fiscal

steel factory has India's second largest blast furnace. Mecon also expects its profit

margins to improve as the impact of Covid on project estimates begins to fade with several projects bagged before and during the pandemic are nearing completion. It is running around seven EPC projects of Coal India, Nalco and SAIL.

Shree Hanuman Sugar & Industries Ltd. TENDER NOTICE OF 93RD ANNUAL GENERAL MEETING. Includes details about the AGM, agenda items, and registration information.

Solar capacity addition falls 58% in Apr-Jun

SOLAR CAPACITY ADDITION in the country declined 58% year-on-year to 1.7 gigawatt in the April-June period, mainly due to land and transmission-related issues, Mercom India said on Monday. The country added 4 GW of solar capacity in the year-to-date quarter, the research firm said in 'Q2 2023 India Solar Market Update'.
