OVERVIEW OF FY 2023-24

National General Industries Limited (‘The Company’) is engaged in the production and selling of Steel. The Company has manufacturing facilities at Ghaziabad, Uttar Pradesh.

GLOBAL ECONOMY

The global economy demonstrated strong resilience, navigating multiple headwinds such as the ongoing Russia-Ukraine war, escalating geopolitical tensions in the Middle East, and the cost-of-living crisis in several economies. The International Monetary Fund (IMF) in its World Economic Outlook (WEO) April 2024 estimated global GDP growth at 3.2% for 2023, which was an upward revision of 0.1% point from its January 2024 update. The services sector demonstrated strength, but manufacturing activity remained subdued.

Although headline inflation has fallen across countries, core and services disinflation has been slow amid the continued tightness in labour markets. A faster-than-expected decline in inflation fuelled expectations of an early reversal in the US monetary policy cycle, leading to a sharp correction in sovereign bond yields in November and December 2023. Following the correction seen in Q3 2023 (July-September), global equity markets posted strong gains in November-December.

After two years of volatility, global steel demand is likely to stabilise but growth is expected to remain weak over the next two years, even as the global economy demonstrates remarkable resilience to several headwinds like Russia’s invasion of Ukraine, escalating geopolitical uncertainties, high inflation and consequent monetary tightening. During the reporting period, higher interest costs, coupled with tighter credit conditions, weighed heavily on manufacturing and housing in most major markets. Steel demand in China, the largest producer and consumer in the world, remained weak as the country’s property sector outlook, along with construction activities, remained bleak. In this scenario, India has emerged as an outlier in the global steel industry, with its young, growing and aspiring population offering its economy the labour and consumer strength to drive growth.

INDIAN ECONOMY

India remained the fastest growing major economy in the world in FY 2023-24, with its real GDP estimated to have grown by 8.2%, according to the data released by the Ministry of Statistics and Programme implementation (MoSPI), compared to 7.0% in FY 2022-23. The economy recorded 8% + growth for three consecutive quarters on the back of the Government’s continued spend on infrastructure and housing, robust private consumption and buoyant manufacturing and services

sectors. Total consumption, which accounts for 56% of the GDP, grew 3%, as private consumption remained somewhat tapered and rural demand continued to recover, driven by strength in domestic demand and growing working age population. Sustained capacity utilisation above 75% should help start the private sector investment cycle, further supported by the increase in profitability of corporates and strong bank balance sheets with double-digit growth in credit.

In its Interim Budget for FY 2024-25, the Union government earmarked a record 11.1 lakh crore of capital expenditure, up 11.1% from the year earlier period, in line with its infrastructure development-led push to drive sustained economic growth. Further, the Government announced plans to build two crore more houses under the PM Awas Yojana (PMAY) to account for the increase in the number of families as it inched closer to its target of building three crore houses under the scheme.

India's overall exports recorded a marginal increase in FY 2023-24, despite global headwinds, according to provisional data released by the Ministry of Commerce, driven by strong services exports. Meanwhile, India's current account deficit improved significantly to 0.7% of GDP in FY 2023-24 down from 2% in FY 2022-23, according to the RBI, which could be attributed to a decrease in merchandise trade deficit. In fact, the country's current account balance turned a surplus of 0.6% of GDP in Q4 FY 2024, as against deficits in earlier quarters. Despite 2024 being an election year, the Union government stayed on the path of fiscal consolidation, with India's fiscal deficit estimates for FY 2023-24 narrowing to 5.8% and further to 5.1% for FY 2024-25.

OUTLOOK

The IMF expects global economic growth to remain at the 2023 level of 3.2% in 2024 and 2025 as well, with global headline inflation moderating further from 6.8% in 2023 to 5.9% in 2024 and 4.5% in 2025. It expects advanced economies to achieve their inflation targets ahead of their emerging and developing counterparts. With many countries going into elections in 2024, the economies could receive short-term fiscal boost, and central banks may cut rates at the latter half of the year, should the last leg of the disinflation process get completed.

In advanced economies, growth is anticipated to marginally increase, primarily driven by a recovery in the Euro area following a period of sluggish growth in 2023. In contrast, emerging market and developing economies are poised for stable growth. The US Federal Reserve is likely to cut its policy rate, alongside similar moves by the Bank of England and the European Central Bank. Japan is expected to gradually increase policy rates, reflecting growing confidence in achieving sustainable inflation targets. In China, domestic demand remains lacklustre and is likely to remain so unless strong measures and reforms address the root cause. With depressed domestic demand, surplus could arise, which will further impact trade tensions in an already tense geopolitical environment.

In the US, growth is holding up well with resilient labour markets and consumption. The disinflationary process remains on track. Meanwhile, China demonstrated strong growth in the first quarter of 2024, with positive trend in manufacturing and auto. On the fiscal policy front, the IMF expects governments in advanced economies to tighten fiscal policies in 2024 and beyond. Emerging markets and developing economies are likely to maintain a broadly neutral policy stance in 2024, with slight tightening anticipated in 2025.

The Indian economy remains on a transformative growth path, demonstrating its inherent strength and resilience. Building on the strong foundations, India appears to be well on track to become the third largest economy over the next three years. Although challenges remain, both external and internal, the robust growth momentum continues to be led by the industrial sector and capital formation. Further, strong outlook for public housing, healthy growth in automobiles, elevated

consumer confidence and moderation in inflation will support consumption growth. Expectations of above normal monsoon could boost rural recovery. Further, healthy forex reserves and positive outlook on capitals position India well to sustain its growth momentum. However, a significant slowdown in global growth could impact India through trade and financial channels, while ongoing global supply disruptions may lead to increased volatility in commodity prices.

OPPORTUNITIES, THREATS AND RISKS

Markets reacted positively to the prospects of central banks exiting tight monetary policy. Financial conditions eased, equity valuations soared, and capital inflows to emerging market economies were buoyant. Further, with the economic impact of the pandemic unlikely to be as high as previously estimated, it bodes well for the overall sentiment. Resilient growth, inflation easing, favourable supply developments, fading energy price shocks, rebound in labour markets, decisive monetary policy actions, and improved monetary frameworks have helped anchor inflation. These are positive developments.

However, challenges remain - core inflation has yet to come down, service inflation remains high, and there is divergence in economic growth across countries. In addition, China needs to be watched closely as domestic demand remains lacklustre. Real interest rates are high, medium-term growth prospects are weak due to lower productivity growth, and huge investments are needed for a green and climate resilient future.

In this scenario, India has emerged as an outlier in the global steel industry, with its young, growing and aspiring population offering its economy the labour and consumer strength to drive growth. Further, large untapped opportunities for growth and development across social, industrial, infrastructure, and defence, coupled with continued policy support and structural reforms, bode well for economic growth. Thus, steel demand could outpace economic growth for a sustained period, as the country is in a “nation building” phase.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- (1) Pertains to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorization of management and directors of the company; and

- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Financial Statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

(n) **Financial Instruments**

i) Financial Assets

A. Initial recognition and measurement

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognised using trade date accounting.

B. Subsequent measurement

a) Financial assets carried at amortised cost (AC)

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c) Financial assets at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

C. Other Equity Investments

All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in Other Comprehensive Income’.

D. Impairment of financial assets

In accordance with Ind AS 109, the Company uses ‘Expected Credit Loss’ (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument)

For trade receivables Company applies ‘simplified approach’ which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward looking estimates are analysed.

For other assets, the Company uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

ii) Financial liabilities

A. Initial recognition and measurement

All financial liabilities are recognized at fair value and in case of loans, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

B. Subsequent measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

a) Exemptions from retrospective application

(i) Business combination exemption

The Company has applied the exemption as provided in Ind AS 101 on non-application of Ind AS 103, “Business Combinations” to business combinations consummated prior to April 1, 2015 (the “Transition Date”), pursuant to which Goodwill / capital reserve arising from a business combination has been stated at the carrying amount prior to the date of transition under Indian GAAP. The Company has also applied the exemption for past business combinations to acquisitions of investments in subsidiaries / associates / joint ventures consummated prior to the Transition Date.

(ii) Share-based payment transactions

Ind AS 101 encourages, but does not require, first time adopters to apply Ind AS 102 Share based Payment to equity instruments that were vested before the date of transition to Ind AS. The Company has elected not to apply Ind AS 102 to options that vested prior to April 1, 2015.

(iii) Fair value as deemed cost exemption

The Company has elected to measure items of property, plant and equipment and intangible assets at its carrying value at the transition date except for certain class of assets which are measured at fair value as deemed cost.

(iv) Decommissioning liabilities

The Company has elected to apply the transitional provision with respect to recognition of Decommissioning, Restoration and Similar Liabilities.
