Motherhood marks its entry on the Dow Jones Sustainability Indices

MSSL is proud to be the only Indian automotive component company to achieve qualification to the DJSI Emerging Markets 2021.

02nd December 2021

Motherhood Sumi Systems Limited (MSSL), is proud to announce that it has been included in the 2021 Dow Jones Sustainability Emerging Markets Index, for the first time. This highlights its commitment to sustainable business practices and focus on continually improving performance in all aspects of the environmental, social and governance (ESG) framework of sustainability.

Commenting on this landmark achievement, **Mr. Laksh Vaaman Sehgal, Vice Chairman, Motherhood states "Our inclusion into the Dow Jones Sustainability indices highlights our continuous efforts to improve sustainability across all three ESG pillars. At Motherhood, we work to build a company that operates in a way that builds a sustainable society for all and that can be handed over from generation to generation. Therefore in 2021, we joined the UN Global Compact and published our first annual sustainability report. We know well that there is a lot more work to do, but we are proud that our progress so far is being recognised."**

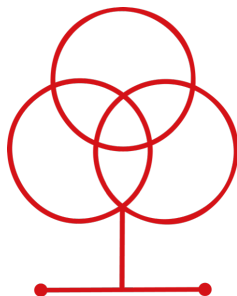

Sustainability is a top priority for Motherhood, our stakeholders and society in general. We are working diligently on our strategy, defining objectives and targets across all aspects of sustainability as we seek to continuously improve our part in the challenge faced by us all.

About Dow Jones Sustainability World Index (DJSI)

The DJSI, including the Dow Jones Sustainability World Index (DJSI World), were launched in 1999 as the pioneering series of global sustainability benchmarks available in the market. The index family is comprised of global, regional, and country benchmarks. The Dow Jones Sustainability™ World Index comprises global sustainability leaders as identified by S&P Global through the Corporate Sustainability Assessment (CSA). It represents the top 10% of the largest 2,500 companies in the S&P Global BMI based on long-term economic, environmental, and social criteria.
