Refined lead production was 47,000 tonnes for Q3 FY22, down 10% as compared to Q3 FY21 on account of Pyro plant (CLZS) operations on zinc-lead mode compared to lead mode only.

Integrated saleable silver production was at 173 MT, down 5% as compared to Q3 FY21 in line with lead production & up 14% as compared to Q2 FY22 due to depletion of WIP.

Mined metal production for Q3 FY22 was at 252,000 tonnes, up 3% as compared to Q3 FY21 on account of higher ore production at Sindesar Khurd & Zawar mines and higher feed grade at Rampura Agucha, supported by improvement in recovery, partly offset by lower ore metal grade.

Nine months ended FY 2022 vs. Nine months ended FY 2021

Ever highest mined metal production at 722,000 tonnes for the nine months ended FY22, up 6% YoY in line with higher ore production at Rampura Agucha, Sindesar Khurd & Zawar mines and increased recovery, partly offset by lower ore metal grade.

Nine months ended FY22 refined metal production was at 707,000, up 5% as compared to nine months ended FY21 in line with better plant and mined metal availability. Silver production was 4% lower YoY at 485 MT in line with lower lead metal production & depletion of silver WIP.

Wind power generation is largely dependent on wind velocity and hence the variations.
