Vaibhav Taneja named Tesla CFO as Kirkhorn exits after 13 years

Tesla Inc. said chief financial officer Zachary Kirkhorn stepped down after 13 years at the company, a surprise shakeup for the electric-vehicle giant. Chief accounting officer Vaibhav Taneja took on the CFO role in addition to his current duties as of 4 August, Tesla said Monday in a regulatory filing. Kirkhorn, who has been the finance chief for the past four years, will continue to serve the company through the end of the year "to support a seamless transition".

BLOOMBERG

Boeing targets space flight by March next

The target hinges on the success of drop tests of its parachute upgrades

Bloomberg
feedback@livemint.com

Boeing Co. aims to have its Starliner capsule ready for its first flight to the International Space Station (ISS) with astronauts on board around next March, with a long-delayed launch following Nasa approval.

Boeing's target hinges on a successful high-altitude drop test of parachute upgrades, currently slated for around November, a company spokesperson told *Bloomberg News*, as well as satisfying other crucial technical and safety concerns both internally and at Nasa.

Starliner's future has been uncertain, with Nasa and Boeing officials in June delaying its launch indefinitely. Repeated delays have heaped pressure on Boeing, with a fresh \$257 million accounting charge unveiled on 26 July bringing its total cost overruns to more than \$1.4 billion.

Boeing and Nasa were scheduled to provide an update on Starliner's crewed flight test at 2 pm ET on Monday.

The delays have also raised concerns about Nasa's goal of having multiple life-lines to the International Space Station. SpaceX's Crew Dragon spacecraft successfully flew its first astronauts under the Commercial Crew Program to the ISS in 2020, and has sent crews to the space station several times since. SpaceX's next mission to ISS is slated for 25 August.

A successful crewed test-flight would ultimately clear the way for Starliner to ferry cargo and astronauts to the ISS, but flight readiness does not necessarily mean a launch date will be available.

Boeing aims to be ready to launch late in the first quarter of next year, and will be working with Nasa to identify a target date, the spokesperson said. A Nasa representative declined to comment ahead of Monday's news conference.

During its June press conference, Nasa and Boeing said they had discovered two

NASA

new concerns with Starliner, including issues with the vehicle's parachutes and flammable tape used to wrap around wiring harnesses.

The high-altitude drop of the capsule in November will test parachute upgrades engineers believe resolve potential safety risks flagged earlier, Boeing said. Upgrades include a modified fabric joint with an improved safety margin and higher-strength fibres, the company said.

Boeing is trying to resolve the flammability issue by eliminating the acrylic tape in some areas of Starliner, or covering it up elsewhere. That could mitigate fire risks as the tape's glue, which is flammable, needs oxygen to ignite.

For Starliner's launch to happen, Boeing's work would have to be completed and approved in parallel with the many

other standard but elaborate preparations emblematic of space travel, any of which could throw off the timeline, aerospace experts say.

The Starliner upgrades come as Boeing's defence and space division struggles with worker turnover, parts shortages and inflation, particularly on fixed-price contracts that it won last decade with bids that were near break-even.

Starliner's repeated delays and cost overruns have raised questions over whether Boeing might scrap the program all-together—a prospect executives have repeatedly rejected.

"We prioritize safety, and we're taking whatever time is required," Boeing chief executive officer Dave Calhoun told analysts on a 26 July earnings call. "We're confident in that team and committed to getting it right."

Reuters

Russia will launch its first lunar landing spacecraft in 47 years on Friday in a race with India to the south pole of the Moon, a potential source of water to support a future human presence there.

The launch from the Vostochny cosmodrome, 3,450 miles (5,550 km) east of Moscow, will take place four weeks after India sent up its Chandrayaan-3 lunar lander, due to touch down at the pole on 23 August.

Rough terrain makes a landing there difficult, but the south pole is a prized destination because scientists believe it may hold significant quantities of ice that could be used to extract fuel and oxygen, as well as for drinking water.

Russian space agency Roscosmos said in reply to questions from *Reuters* that its Luna-25 spacecraft would take five days to fly to the Moon and then spend five to seven days in lunar orbit before descending on one of three possible landing sites near the pole—a timetable that implies it could match or narrowly beat its

Indian rival to the Moon's surface. Roscosmos said the two missions would not get in each other's way because they have different landing areas planned. "There is no danger that they interfere with each other or collide. There is enough space for everyone on the moon," it said.

Chandrayaan-3 is due to run experiments for two weeks, while Luna-25 will work on

Scientists work on the Luna-25 lunar craft at Vostochny Cosmodrome.

REUTERS

the moon for a year.

With a mass of 1.8 tonnes and carrying 31 kg (68 pounds) of scientific equipment, Luna-25 will use a scoop to take rock samples from a depth of up to 15 cm (6 inches) to test for the presence of frozen water that could support human life.

"The Moon is the seventh continent of the Earth so we are simply 'condemned', as it were, to tame it," said Lev Zelenny, a space researcher at the Russian Academy of Sciences.

The launch, originally planned for October 2021, has been delayed for nearly two years. The European Space Agency had planned to test its Pilot-D navigation camera by attaching it to Luna-25, but broke off its ties to the project after Russia invaded Ukraine in February last year.

Residents of a village in Russia's far east will be evacuated from their homes at 7.30 am on Friday because of a "one in a million chance" that one of the rocket stages that launches Luna-25 could fall to earth there, a local official said.

Roscosmos said Luna-25 mission won't clash with Chandrayaan-3 as they have different landing areas planned

UBS plans to cut two-thirds of Credit Suisse bankers in Asia

UBS Group AG is weighing a plan to cut about two-thirds of Credit Suisse Group's investment bankers in Asia-Pacific as part of the first major job reductions in the region following the merger of the two Swiss lenders, people familiar with the matter said. That would cost about 200 jobs at its global banking division in Asia over the next couple of months, the people said, asking not to be identified because the matter is confidential.

Pak PM set to dissolve parliament this week as Imran Khan is jailed

Pakistan prime minister Shehbaz Sharif is set to dissolve parliament days before his term expires at the end of the week, a development that comes shortly after popular former leader Imran Khan was imprisoned in a graft case. "I will dissolve my government and the National Assembly on August 9," Sharif told a rally in Punjab province on Sunday. "The rest is in the hands of Allah the almighty. After that an interim government will take over and elections will be held."

China foreign investment gauge at 25-year low amid high tensions

One measure of new foreign investment in China fell to the lowest in 25 years in Q2, fuelling concerns about how much geopolitical tensions and the economy's slowing recovery can hurt business confidence. Direct investment liabilities—a gauge of FDI in China—slumped to just \$4.9 billion April-June, as per State Administration of Foreign Exchange figures released on Friday. That was down 87% year-on-year.

TRADE FOR A GREENER FUTURE

NTPC is looking for experienced professional in the area of CARBON TRADING

NTPC Limited is India's largest integrated energy company with installed capacity of 73,024 MW. Commensurate with our country's growth challenges, NTPC has embarked upon an ambitious plan to attain a total installed capacity of 130 GW by 2032.

Interested eligible candidates should log on to our website careers.ntpc.co.in or visit careers section at www.ntpc.co.in for viewing detailed eligibility criteria, required qualification, required experience, remunerations, tenure of engagement, other terms & conditions and for applying. Only online mode of application will be accepted. The online application portal will remain open from 09.08.2023 to 23.08.2023. Any further addendum/corrigendum/updates will only be published on our website.
