Rain Brings Down Delhi's Pollution Levels, But Air Quality Remains Poor

The Air Quality Index (AQI) today in Anand Vihar, RK Puram, Punjabi Bagh, and ITO was recorded at 282, 220, 236, and 263, respectively.

New Delhi: Air quality across Delhi remains in the 'poor' category, according to the Central Pollution Control Board (CPCB), a day after rain in the national capital and surrounding areas washed away the toxic haze, bringing some relief to residents and improving air quality marginally. The Air Quality Index (AQI) today in Anand Vihar, RK Puram, Punjabi Bagh, and ITO was recorded at 282, 220, 236, and 263, respectively. Delhi was gasping for air after a week of suffocating pollution, with levels of harmful particles up to 100 times the World Health Organization's safe limit. The city was the world's most polluted last Thursday.

To reduce pollution in Delhi and ensure adherence to anti-pollution measures, the Delhi Police inspected trucks carrying non-essential goods at the Ghazipur and Tikri borders on Friday night, as part of the GRAP 4 regulations. Delhi's air pollution control plan (GRAP Stage IV) only allows CNG, electric, and BS VI-compliant vehicles from other states to enter the city, except for essential services.

Delhi Police inspected trucks entering the city at the Ghazipur border on Friday night,

enforcing GRAP 4 regulations that permit only CNG and electric trucks to enter. Another team of Delhi Police at the Tikri border checked the trucks entering the national capital. The weather department forecasts partly cloudy skies with mist or shallow fog in the mornings on Sunday and Monday, followed by mainly clear skies with shallow fog in the mornings on Tuesday and Wednesday. Light to moderate rainfall across Punjab has provided significant relief from raging farm fires, with only six active

cases of stubble burning reported on Friday. Punjab has reported 23,626 stubble burning cases so far this paddy harvesting season. After a crackdown on farmers indulging in stubble burning, the state recorded a 68% decline in farm fire incidents, with 639 cases reported on Thursday. An IMD official said following the passage of the western disturbance, wind speeds are expected to increase from the current 5-6 kmph to around 15 kmph on November 11. This anticipated increase in wind speed could help disperse pollutants and improve air quality ahead of Diwali. The weather department has predicted "mainly clear skies with shallow fog" for today.

Delhi-NCR's air quality plummeted over the past week due to falling temperatures, stagnant winds that stifled pollution dispersion, and a surge in post-harvest paddy stubble burning in Punjab and Haryana. Delhi's air quality is one of the worst among capital cities globally, with a University of Chicago report finding that air pollution reduces life expectancy by almost 12 years.

Many passengers including driver injured in head-on collision between truck and bus in UP

Barabanki : Many passengers including the driver were injured in a head-on collision between a speeding truck and a transport corporation bus on Sanjay Setu of Banda-Bahraich National Highway in the Barabanki police station area.
