MANAGEMENT DISCUSSION AND ANALYSIS REPORT

We submit herewith the “Management Discussion and Analysis Report” on the business of the Company as applicable to the extent relevant.

THE COVID-19 PANDEMIC AND LOCKDOWN

We are amidst unprecedented times. The COVID-19 pandemic has spread across the world — leading to well above 17.14 crores confirmed infections, over 3,576,887 deaths, enormous human suffering and a full stop on virtually all commercial and economic activities. Even India, apparently relatively fortunate up to now, has had 28,306,883 confirmed cases and 335,114 deaths as per COVID-19 Situation Report–120 of World Health Organisation (WHO) dated 1 June 2021. With lockdowns spreading across countries accounting for over 50% of the world’s gross domestic product (GDP), COVID-19 has caused disruptions on an unimaginable scale. Nobody really knows how long the pandemic will last and what will be its final toll on lives and livelihood. With the impact of this pandemic still to play out, the scenario of eerily empty high streets, shut factories and stores, and literally millions being rendered unemployed together point to a single outcome — extreme stress for the global economy of the kind not seen since the Great Depression.

In response, Governments across the world have unleashed massive fiscal measures to protect economic activity and dramatically strengthen health services and testing. Central banks, too, have initiated multiple monetary and regulatory measures. India, too, has initiated relief measures. The Government of India announced a slew of wide-ranging reforms across varied sectors amidst a comprehensive package aggregating Rs.20 lakh crore — or approximately 10% of nominal GDP — which covered among others (i) direct cash transfers and food security for vulnerable sections of society, (ii) collateral free loans and concessional credit to farmers and street vendors, (iii) enhancement of systemic liquidity by the Reserve Bank of India (RBI), (iv) special liquidity and partial credit guarantee scheme to provide liquidity to NBFCs, HFCs, MFIs and mutual funds, (v) 100% credit guarantee scheme for aggregate Rs. 3 lakh crore of emergency credit lines by banks and NBFCs to their MSME borrowers and (vi) subordinated debt and equity support to MSMEs. The Government has also initiated compliance relief measures across various regulatory requirements. The RBI has also initiated several measures like reduction in policy rates, monetary transmission, credit flows to the economy and providing relief on debt servicing.

ECONOMIC AND INDUSTRY OVERVIEW

INDIAN ECONOMY

India continues to be one of the fastest growing emerging economies in the world. A slowdown in the manufacturing sector has lately affected GDP growth – slightly below 5% in the current fiscal. An impending revival in demand, positive consumption pattern and rising disposable income, makes India the most sought after investment destinations. Already the fifth largest economy in the world, India is supposed to take its place among the world’s top three economic powers in the next 10-15 years.

The pandemic has undoubtedly affected India, but with the right economic stimulus and the gradual opening up of the lockdown the situation can be expected to improve. Interstate movement of goods is gradually picking up and retail financial transactions are showing a healthy trend.

TEXTILE INDUSTRY IN INDIA- STRUCTURE AND DEVELOPMENT

India’s textile sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India’s exports. The textile industry is also labor intensive and is one of the largest employer. The textile industry has two broad segments. First, the unorganized sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organized sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

India accounts for good percentage of the world’s production of textile fibres & yarns. Fabric production in the country rose to millions. The industry is the second largest employer after agriculture, providing employment to

over millions of people directly and indirectly. The Indian Textile Industry contributes a good percentage to India's Gross Domestic Product (GDP), and overall Index of Industrial Production (IIP).

The Indian Textiles Industry has an overwhelming presence in the economic life of the country. Apart from providing one of the basic necessities of life, the textiles industry also plays a vital role through its contribution to industrial output, employment generation, and the export earnings of the Country.

IMPACT OF COVID-19 PANDEMIC ON TEXTILE & APPAREL INDUSTRY:

The Indian textile and apparel industry has been adversely impacted in the short to mid-term due to lockdown and lower consumer spends. The sector is reeling under liquidity and cost pressure as well due to the unprecedented damage caused by COVID-19. Taking into account India's position as a preferred destination for sourcing textile and apparel products by leading brands worldwide, Indian garmenting sector is getting impacted with deferment and cancellation of orders.

The fag end of FY 2020-21 saw an unprecedented scenario unfold through the COVID-19 pandemic, which brought in its wake a nationwide lockdown imposed during last fortnight of March thereby affecting performance of our business. The Company has taken steps to ensure the health and safety of its employees and customers.

OPPORTUNITIES

The most significant change in the Indian textile industry has been the advent of man-made fibres (MMF). India has successfully placed its innovative range of MMF textiles in almost all the countries across the globe. The future outlook for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade.

Opportunities available to the Company in the present scenario, which can be seized for the benefit of the Company and ultimately to the stakeholders, can be summarized as under:

1. The Government of India announced a slew of wide-ranging reforms across varied sectors amidst a comprehensive package aggregating Rs. 20 lakh crore — or approximately 10% of nominal (vi) subordinated debt and equity support to MSMEs.
2. In the Union budget, a good amount has been allocated to the Ministry of Textiles in order to support various schemes covering the textile industry.
3. Capacity built over years has led to low cost of production per unit in India's textile industry; this has lent a strong competitive advantage to the country's textile exporters relative to key global peers.
4. India's growing population has been a key driver of textile consumption growth in the country.
5. Urbanization is expected to support higher growth due to change in fashion & trends.

THREATS

Based on review of the textile market situation and level of rivalry present in the domestic market, following threats might be present in the market, which can hinder growth of the revenue of the Company:

1. Global recession due to COVID-19 pandemic.
2. Working Capital and Liquidity Stress in the market.
3. Low demand in the market.
4. Significant presence of small suppliers has reduced the bargaining power.
5. Major clothing brands have better bargaining power over textile manufacturers, as the product differentiation is low and number of players is high and fragmented.
