It was a busy year for the Company, driven by an ambitious agenda. Our aggressive and proactive pursuit of domestic expansion, executed with incredible pace, has put us on a solid path for accelerating growth.

Pursuing Domestic Expansion

At Mirza International, having established our mark in the most lucrative and fashionable international markets, we are now fast-expanding our presence and portfolio in India. The reasons are not hard to find.

India is one of the world's fastest-growing major economy with an increasing GDP.

India is currently Asia's third-largest retail market and the world's fourth largest after the US, China and Japan.

India is poised to become the third-largest consumer market behind only the US and China, and consumer spending in India is expected to grow from US\$ 1.5 Trillion at present to nearly US\$ 6 Trillion by FY 2030.

India has massive opportunities for consumer markets, owing to its favourable demographics nearly 70% of the country's population falls below the age of 30 years. Steady growth in household earnings is expected to drive consumption growth further.

India's burgeoning middle-income households are likely to drive an increase in discretionary spends and create a shift in consumption patterns towards aspirational and branded products.

India's e-commerce market is on a high growth trajectory powered by high internet penetration that is expected to increase from 30% in 2016 to 59% in 2021.

India's online shoppers are expected to increase from the current 15% of the online population to 50% of the online population by 2026.

India has the world's largest millennial population (age group of 18-35 years) comprising a size of over 440 million. Constituting nearly 34% of the country's total population, the millennials are digitally empowered,

seek quality and stylish products yet have a strong value-for-money orientation, and leverage technology to drive convenience.

It is against this exciting backdrop of a growing economy and rising consumerism that we are matching step with ambitious and aspirational India. Our domestic brands come with the same promise of quality, style and comfort as our exports. Their availability across price points and categories means that we can address the demands of a larger section of the Indian population. We are pursuing an omnichannel strategy, with great emphasis on the online platform, to enhance brand connect and cater to the new-age shoppers. At the same time, we are also investing significantly in growing our physical presence to provide consumers with a personalized shopping experience.

We focused on embracing opportunities to make our brands and products more relevant in global markets. We have achieved outstanding success. The next phase of our growth is centered around the domestic expansion of our brands and business. We are taking big strides and are confident that these strides will set the momentum for accelerated and sustained progress.

Know Us

Mirza International Limited is among India's leading leather footwear manufacturer and exporter. We have carved an established market position led by our integrated manufacturing and distribution operations, our strong brand portfolio and industry-leading experience of nearly four decades. We also manufacture and sell processed leather through our tannery unit.

In the international markets, we are among the few Indian footwear companies to sell under our brand name. We are also the preferred supplier of leather footwear to leading international brands.

In the domestic markets, where we are recent entrants, we are aggressively growing the strength and sales of our multiple footwear brands through a well-thought-out market expansion strategy.

Leveraging our strong brand equity and deep understanding of the retail sector, we have also forayed into clothing and accessories segments in both domestic and global markets.

Know our Brands

We have a diverse portfolio of footwear brands:

For men and women. For mid and premium segments. For formal, casual and sportswear.

REDTAPE is a premium lifestyle brand offering style, quality and comfort at competitive prices. REDTAPE footwear is sold across the global markets and in India. Leveraging the strong brand equity of REDTAPE, the brand offerings have been extended to garments and accessories.

REDTAPE Athleisure offers quality sports shoes for men at attractive prices and is targeted to meet the aspirations of young Indians who are always on-the-go and also those who have embraced sports and fitness as part of their lives.

BOND STREET provides footwear in the polyurethane (PU) segment. The brand seeks to have a mass appeal by providing fashionable footwear at very low price points.

Oaktrak stands for style and comfort and is targeted at the niche consumer base of senior professionals.

MODE by the house of REDTAPE is an exclusive women's wear brand, covering a range of products from footwear to clothing. An eclectic mix of elegance and sophistication, MODE stands for being effortlessly stylish. Its fashion-forward designs are both clean and uncomplicated, marrying feminine allure with modern strength.

Our multiple footwear brands sold at various price points and our brand extensions in apparels and accessories enable us to reach out to a broad section of consumers.

Letter from the CMD & CEO

“It is a great pleasure to reconnect with you at the end of another successful year for your Company and present its Annual Report. Last year, in my letter to you, I had expressed our firm intent towards enhancing our retail and online presence in the domestic market to maximize the potential of our brands. I am delighted to share that we have acted upon our strategy and this, in turn, has enabled us to deliver an impressive domestic performance.”

Global conditions have been challenging, especially with weak consumer sentiments in Europe, our key export destination. Our prudent strategy of increasing our focus on the domestic market has served us well, enabling us to offset the slowdown in revenue from exports. Powered by robust sales in the domestic market, our total revenue stood at ₹ 1,153.79 Crore in FY 2018-19 as against ₹ 972.50 Crore in the previous year, an increase of 18.64%. Our domestic revenue surged to ₹ 651.92 Crore in FY 2018-19 from ₹ 449.09 Crore in the previous year, a growth of 45%, vindicating our focus in developing and expanding the domestic market. However, Profit before Tax (PBT) declined

to ₹ 75.97 Crore in FY 2018-19 from ₹ 117.84 Crore in the previous year. The decline in profitability was primarily attributable to the rise in the cost of material imports due to adverse movement in foreign exchange, higher finance costs, and discounts offered in the domestic market as a conscious strategy to increase our consumer base.

Entering FY 2018-19, confident in the opportunities ahead of us, we proactively changed gears in the domestic market, pursuing robust and rapid expansion of our retail and online presence. During the year, we added 47 Exclusive Brand Outlets (EBOs), growing our total EBO presence by

29.56%. I am particularly pleased to share that the hybrid format of our EBO store, viz. online-offline store – where consumers can order online and collect the delivery at the outlet – has been extremely well-received. Spurred by their popularity, of the 47 EBO stores launched in FY 2018-19, 33 were online-offline stores. In recent years, we have also invested in increasing our digital infrastructure – be it in setting up division in Noida, U.P. to specifically cater to the e-commerce segment, setting up warehouses at strategic locations to ensure smooth and swift product flow, intensifying our focus on digital marketing or strengthening our presence on major online portals. Not surprisingly, in FY 2018-19, e-commerce-related sales registered the excellent growth among the various channels we leveraged in India to reach out to our consumers.

The best way to gauge our performance, we believe, is the success of our brands. REDTAPE has inspired trust and admiration in global markets and is now also on a solid footing in India. Sales from REDTAPE footwear, apparels and accessories continue to grow year-on-year, an endorsement of the confidence, style and comfort the brand exudes. Our younger brands – BOND STREET, REDTAPE Athleisure and MODE have also done exceptionally well. In a short span of time, each of these brands has captured the hearts of the target consumers as reflected in their strong growth in sales. We remain committed to deepening our consumer connect and enhancing the market share for all our brands.

At Mirza International, good performance goes beyond profits. It is about things that are right for our communities and planet. Passionately committed to a better and greener future for all, we embrace sustainable operations. Our tannery is equipped with a state-of-the-art effluent treatment plant, making our tannery operations environment-friendly. We have also successfully implemented various measures aimed at optimizing, recycling, recovering and reusing resources. To empower and enrich the lives of people in the areas where we live and work, we continued to undertake welfare activities in the areas of education, health and rural infrastructure.

In India, moving forward, we plan to amplify our efforts in product innovation, retail presence, distribution network and the digital space. While this will initially result in some additional expense, we have no plans to sit still amid a highly favorable market environment. India's growing economy and rising consumerism provide significant opportunities for the retail sector. To realize higher and sustained sales, we are committed to ensuring that our brands keep abreast with the upcoming trends and innovations to match consumer aspirations. We will also continue to work towards placing our brands at the right place at the right time to ensure demand fulfillment. While domestic markets will occupy center stage in our business strategies, we will also focus on key international growth markets, as we continue to leverage our global footprint. We remain mindful that today's ultracompetitive marketplace requires a highly nimble and agile organization. Consistent with this belief, we will pursue the path that makes our operations more efficient, leaner and faster.

On behalf of the Board, I would like to take this opportunity to thank our shareholders, bankers and government authorities for investing their faith and confidence in Mirza International Limited. I would also like to express my gratitude to our consumers for the patronage they have shown for our products. We aim to earn your continued trust every day. Finally, our sincere appreciation to our employees for the hard work and commitment they have demonstrated throughout another successful year.

As we move ahead in our journey, we shall continue to work diligently to take this Company to greater heights.

Thanking you,

Rashid Ahmed Mirza

Questions and Answers with the CMD & CEO

“While REDTAPE has entrenched its position as a premium lifestyle brand for the youth, our newer brands – BOND STREET, REDTAPE Athleisure and MODE have been able to garner the interests of consumers and are moving from strength to strength.”

Q What have been the most outstanding achievements for Mirza International for FY 2018-19?

Over the past couple of years, we have been intensely focusing on the domestic market to drive revenue growth. Our efforts have been vindicated as our branded domestic sales stood at ₹ 588.86 Crore in FY 2018-19 as compared to ₹ 389.98 Crore in the previous year, grown up 51% on a year-on-year basis. The strong growth demonstrates that our brands are well-accepted in the Indian market and enjoy the admiration of consumers. We also grew the market share for our brands. While REDTAPE has entrenched its position as a premium lifestyle brand for the youth, our newer brands – BOND STREET, REDTAPE Athleisure and MODE have been able to garner the interests of consumers and are moving from strength to strength.

Q What have been the reasons behind this impressive domestic growth?

The strategic initiatives we have undertaken – be it the launch of new brands, expanding our presence, foraying into new brand extensions and increasing our proficiency in the e-commerce space – have rewarded us well. With product launches, we have broadened our operations in different genres of footwear, increasing our addressable market. Responding to the way young India is shopping, we have expanded and

invested in our digital infrastructure. Our dedicated, direct e-commerce division in Noida, U.P. helps to drive e-commerce growth and connections with our consumers. We have also set up two warehouses in the strategic cities of Mumbai and Bengaluru; this helps to drive speed-to-market. Our innovative initiative of the online-offline store, wherein consumers can order online and collect products from any of our large-format stores, has also worked to our advantage. High discounts are offered at these large-format stores, which enables us to expand our consumer base. We continue to aggressively expand our presence across India through setting up of EBOs, which includes both retail and online-offline stores.

Q Will the practice of giving high discounts in online-offline stores impact margins?

Our large-format stores, also known as online-offline stores, are generally set up in the outskirts of the city. These stores are built over a large area, enabling us to stock a higher number of designs and inventory levels. The impressive store size, product display, stock collection and high discounts help us to drive an engaging consumer experience, thereby encouraging higher footfall. Margins can be maintained as the rental costs are lower vis-à-vis that of stores located within the city. In fact, despite high discounts offered at our online-offline stores, the margins do not differ much from that of our physical stores.

Q Aggressive expansion in the domestic market has led to higher inventory levels, impacting working capital cycle. Is the increase in inventory levels and working capital justified?

The pursuit of domestic expansion has led us to invest in our retail presence and distribution, which in turn has led to higher inventory levels. Our receivables have also increased due to the growth of our online and MBO businesses. The working capital requirement will remain high in the near-term as the Company is in the expansion mode. However, we firmly believe that the benefits outweigh the negative, as demonstrated by the significant increase in the sales of our branded products and jump in market share. We have also proactively invested in higher inventory levels. For example, for our garments and Athleisure footwear, which we outsource from global markets, we prefer to keep extra inventory to ensure that we have sufficient product levels to meet a sudden surge in demand rather than not being able to address it and miss out on profits.

Q While domestic sales have been impressive, global sales have witnessed a slowdown. What were the reasons behind this?

Our revenue from global markets has been slightly disappointing this year. Weak consumer demand in the European region, which is our largest export destination, dampened our performance. Notwithstanding this slowdown, we believe that our business fundamentals are robust and will drive increased revenue growth once global sentiments improve. REDTAPE is a much-appreciated brand in the overseas markets; this brand strength will help us to bounce back. Also, over the years, we have built a marquee clientele base of B2B customers. We have been conducting business with these customers over the past 27 years. Our long-standing relations and our strong track record of efficient delivery of excellent products will continue to hold us in good stead.

Q What is the outlook for store expansion and revenues in the domestic market for the current year? What is the expected capex for setting up of these stores, and how will this be funded?

In the current year, our target is to set up 40 retail stores of which 25 would be offline EBOs and 15 would be online-offline EBOs. We also plan to open more online EBOs in South and West of India, to diversify our presence beyond North India.

Q E-commerce and online presence have been pivotal to growing the Company's domestic revenues. What is the outlook for these channels in particular?

The e-commerce sector in India has undergone a sea change in recent years owing to favorable demographics, growing consumer aspirations, rapid urbanization and increased digitization. We are staying on top of this change through our proactive online and distribution efforts. Our e-commerce business has been our one of the fastest-growing channel over the last two years – with nearly 72.13% growth in FY 2018-19. We expect this growth to accelerate in FY 2019-20 as we continue to focus intensely on this channel in the domestic markets. Currently, the online channel accounts for 1/3rd of the total domestic revenues.

Q What is the final message you would like to share with your investors?

The aspirational younger generation, more connected and tech-savvy, prefers branded products. The stabilization of Goods and Services Tax (GST) also benefits the organized sector. We are well-positioned to capitalize on the unfolding opportunities through our leading brands, REDTAPE and BOND STREET. We are also upbeat about our entry into women's footwear through MODE. The steady increase in the number of working women and their growing fashion consciousness will fuel the demand for women footwear. Our experience in building the REDTAPE brand will provide valuable insights for driving the penetration of MODE. Also, as global demand revives, we are confident of driving higher capacity utilization at our tannery, which in turn, will increase our margins. Overall, the long-term fundamentals for our business are robust and led by integrated operations and strong distribution, we are confident of delivering improved shareholder value.

Stepping Up in Domestic Markets

India – the new land of opportunity:

Between FY 2010-30, India will add 241 million people in the working-age population, Brazil will add around 18 million, while China will add 10 million people during the same time. India's favorable demographics provides an excellent thrust to the lifestyle space. Further, growing urbanization and rise in the number of nuclear and double-income households will increase disposable incomes, resulting in higher spends towards fashion and lifestyle. Additionally, it's the era of the rise in Indian aspirations; India's consumers have become world-class consumers trusted and reputed brands are what they seek.

Capturing the Indian opportunity:

Amid the exciting opportunities in lifestyle and fashion retail in India, we are expanding our reach, reinforcing our relevance and deepening our engagement. Our big, bold strides are consistent with our strategy to pursue domestic expansion.

Driving exciting brands and extensions: REDTAPE is well-entrenched as a leading leather footwear brand. Our younger brands BOND STREET and REPTAPE Athleisure have resonated well with the younger male population in India, especially those residing in Tier II and Tier III cities. We have also entered women's footwear through our brand MODE, which is helping us drive incremental sales. Launch of exciting brands and addition in the product offerings to include sports shoes, casual shoes and apparel has facilitated the expansion and diversification of the clientele. Focused investments were made during the year in retail distribution, product portfolio and brand engagement to deepen consumer connect and grow each of our brands.

Pursuing an omnichannel strategy:

With the prolific penetration of technology, especially in retail, consumers' shopping journey is becoming more experiential. Multiple channels are being leveraged by consumers to make their purchases, including:

- selecting and shopping at physical stores
- browsing online and shopping in-store for product's look and feel
- choosing products in-store and making the purchase online for better prices and offers
- ordering products after reading reviews/recommendations on social media
- picking products from store/delivery center after ordering online to avoid last-mile delivery delays

We are responding to these market dynamics by pursuing an omnichannel strategy, which includes a healthy mix of Exclusive Brand Outlets (EBOs), Multi-brand Outlets (MBOs) and E-commerce platforms.

Channel-wise domestic branded sales	Sales in FY 2017-18 (₹ in Crore)	Sales in FY 2018-19 (₹ in Crore)	Growth (%)

Stepping Up in Domestic Markets

Offline EBOs

For our EBOs, we have deployed two formats offline and offline-online. Our offline EBOs are physical stores located at prime shopping destinations such as High Street and malls. Rising purchase power driven by higher economic growth has made India's emerging cities promising yet untapped markets for retail. As per an Ernst & Young Report, ₹ 26.4 Trillion of India's household income is concentrated in Tier II-III cities as compared to ₹ 800 Billion in India's major eight metros. We are thus increasingly shifting our focus to these high potential cities for setting up our offline EBOs. During the year, we added 14 new offline EBOs of which 10 were set up in Tier II-III cities.

Online-Offline EBOs

Our online-offline EBOs are located outside the cities, and the products are priced at par with the e-commerce business sites, i.e. at a discount to the stores located deep inside the city. Consumers can check/book the products online and take the delivery by driving to the stores. We had launched our first such store in October 2017, outside Ambala city in the state of Haryana. These stores are spread over a large area, enabling us to maintain double the stock-keeping units (SKUs) and designs vis-à-vis our offline stores. The encouraging response to this format has led us to considerably expand the number of such stores within a short period.

Multi-Brand Outlets

We continue to leverage MBOs for deeper market penetration, particularly in regions where our EBOs are relatively fewer or absent. The sheer volume of shoppers visiting MBOs makes it an essential channel for strengthening brand visibility. We are present at leading retail chains and large-format stores, such as Shoppers Stop, Metro Shoes, Lifestyle, Reliance Retail, Regal Shoe and Central. At these shop-in-shops, we aim to secure the best possible presentation for our brands. At the end of FY 2018-19, our shop-in-shop presence was in 210+ stores.

E-commerce

The consumer shift to digital commerce continues. As per the Deloitte India and Retailers Association of India (RAI) report, India's e-commerce marketplace was projected to touch US\$ 84 Billion in FY 2021 from US\$ 24 Billion in FY 2017 on account of healthy growth in the organized retail sector. Staying laser-focused on digital opportunities, we operate a direct e-commerce division in Noida, U.P., being the first company in India to set up such a structure. We have also built two warehouses to meet the rising e-commerce demand. Strategically located in the well-connected cities of Mumbai and Bengaluru, these warehouses help to drive product flow, delivery speed and consumer-centricity. Currently, about 37% of our domestic footwear sales come from the online segment, where we sell directly to the consumers through the digital platform. We have tied up with major online portals such as Amazon, Myntra, Flipkart, Jabong, Paytm, Tata Cliq and Snapdeal. Our online infrastructure has helped us to pursue market expansion

Type of EBOs	Average Area (sq. ft.)	As on March 31, 2019
Offline EBOs	600-700	153
Offline-Online EBOs	3,000-4,000	53

in India's hinterlands, where consumers aspire for quality products, but stores are relatively fewer or absent. It also enables us to reach out to tech-savvy urban consumers and those looking for discounts.

Enhancing focus on apparels

Our brand extensions are steadily emerging as a strong growth driver of domestic branded sales. In FY 2018-19, 34.88% of domestic branded sales was attributable to the apparel segment as against 25.54% in the previous year or revenue from sale of apparels stood at ₹ 20.54 million as compared to ₹ 9.96 million in the previous year. Cognizant that brands must create compelling products, we significantly improved the fabric, product design and the pricing for our apparels. We have also introduced women's denim. Our apparels are sold through all the three main channels viz. EBOs, MBOs and E-commerce platforms.

Advertisement and promotions

We are aggressively raising the pitch in advertising and brand promotion to drive top-of-the-mind recall. Our advertising and promotion spend was ₹ 102 million in FY 2018-19 as compare to ₹ 160 million in FY 2017-18. Eminent Bollywood actor Jimmy Shergill is the brand ambassador for BOND STREET. Jimmy Shergill has a huge fan following in North India, a market which accounts for more than 50% of our sales. We have also signed Indian cricketer Karun Nair for the REDTAPE brand. The REDTAPE logo is featured at the back of his bat while playing the sport. Brand visibility and connect has also been enhanced through print and digital advertisements featuring the popular cricketer in REDTAPE footwear and garments. We also offered substantial discounts during the year to expand our consumer base.

Established Position in International Markets

Our continued success of over three decades in the international markets is a testament to our world-class quality and designs. In a fast-changing global retail environment, success is also a function of staying agile and nimble. By staying focused on consumer-centricity and acting with speed and urgency in everything that we do – from developing the right product to managing the supply chain efficiently for timely delivery; from planning ahead to ensure seamless production to having the flexibility to quickly transform consumer insights into new products for the marketplace, we have entrenched our position in the international markets.

We export branded and white-label footwear to the UK, US, France, Germany and Australia and several other leading global markets. These are countries where the world's best brands are available and to be able to hold our own in these prime destinations reiterates the place of pride we occupy globally. Our international business benefits from a broad and diversified customer base. Long-standing associations with some of the most reputed retail chains in these countries, as reflected by the high share of repeat orders, further strengthens our international business model.

REDTAPE in international markets

REDTAPE has achieved commendable market acceptability in the overseas markets. It is positioned as a premium men's footwear brand in the midsegment for the young and fashion-conscious. In the UK and the US, it is among the select few / only Indian footwear brands/brand to be sold under its own name. Most of our overseas revenue for REDTAPE footwear comes from the UK, followed by the US. In FY 2018-19, 7.47% of the total export of footwear was attributable to brand REDTAPE. The brand is also steadily strengthening its presence in other European markets.

In the UK, REDTAPE is sold through an efficient distribution network comprising top chain stores and MBOs. As on March 31, 2019, REDTAPE was present across 1,200+ MBOs. In the US, REDTAPE is distributed across 500+ MBOs. To compete effectively in today's dynamic retail environment, we have also made our branded offerings available on dedicated websites along with entering into strategic alliances with leading e-commerce retailers.

Performance highlights

In FY 2018-19, revenue from export of footwear and finished leather stood at ₹ 501.87 Crore, contributing to 44% of our total revenue. Our international business has been a consistent revenue generator. With revival in global demand, powered by our expansive global network and the trust we have earned for our products, we expect our sales to gain momentum.

Our Business Differentiators

Innovation & Design Edge

We have two design studios which are centers of innovation and creativity. Our in-house team of highly skilled designers enables us to maintain a faster pace of new product introductions. The designs are influenced by consumer insights and market intelligence of global fashion trends. Every year, 900+ new designs for footwear are released with the help of our proficient teams. By refreshing our portfolio regularly, we aim to keep our consumers engaged and interested in our brands, leading to fresh purchases. Further, with our design center and manufacturing units connected by CAD/CAM, we can optimize resources, and minimize the gap between design and manufacturing to ensure speed to market.

Manufacturing Excellence

Strict adherence to high-quality standards has made us an admired manufacturer and preferred global supplier. Our production is powered by six fully integrated manufacturing facilities equipped with the latest machinery and cutting-edge technology. In-house tannery – among the largest and latest facilities in India – provides a steady supply of best quality leather for our footwear units. The manufacturing facilities are also ably supported by more than 25 dedicated ancillary units. Our robust set-up ensures seamless and uninterrupted operations as well as guarantees timely delivery of finished products. The manufacturing plants can produce 6.4 million pairs of shoes every year. Besides the above manufacturing capacities, we also outsource the production of footwear and garments to other vendors, which exclusively cater to manufacturing for Mirza International.

Environmental Stewardship

Equipped with state-of-the-art effluent treatment plant, our tannery is not only the largest in India but is also environment-friendly. The high-quality tanning drums use ten times less water and one-fourth the energy of conventional drums; the exhaust chrome liquor is processed, the sludge recovered and sold to authorized vendors of chemicals, thus preventing groundwater contamination. **A study by IIT Roorkee has declared that our tannery causes no environmental pollution under the National Framework of Environmental Laws.**

Supply Chain Agility

Fast-evolving consumer demands makes it important to build agility in our operations. Our speed-to-market – in our case, it takes only 25 days - helps us respond to consumer demand for newness and freshness throughout the year. Supply chain agility also helps us to prevent inventory build-up, thereby making our operations leaner and efficient. Optimization of manufacturing and distribution networks also shortens lead time. Our market responsiveness is well-proven by our global success.

Synergic Operations

The design team develops our branded products in close consultation with the global sales team. The global team comprises market experts who stay abreast with upcoming trends and innovation. We also have key specialist teams for specific areas of product development. Besides traditional advertising and appointing brand ambassadors, brand awareness and recall is reinforced through our social networking sites, participation in fashion shows and exhibitions, in-store point-of-purchase displays and sales assistance. Marketing campaigns are designed to increase consumer awareness of, and affinity for, the Company's brands. Our advertisements and promotions

typically emphasize fashion, quality, comfort, durability and other performance and lifestyle attributes of our brands. Talented and skilled team, growing retail footprint, strong online presence and strategically located warehousing facilities further adds strength to our operations.

Pursuing Responsible Growth

Healthcare

Apart from financing the medical needs of the poor and weaker sections of the society on a case-by-basis, the Company contributed ₹ 1.58 Crore in FY 2018-19 to Mirza Charitable Hospital Ltd., a multi-speciality hospital registered under Section 8 of the Companies Act, 2013, located at Unnao District, Uttar Pradesh. The hospital provides Out Patient Department (OPD) and In Patient Department (IPD) services to low income people residing in nearby areas. It is run by independent professional doctors specialized in the fields of orthopaedics, ophthalmology, general medicine, physiotherapy and dental, among others. Apart from that, we also contributed towards building the infrastructure at Indian Medical Association (IMA), Kanpur.

Education

During the year, we continued with our efforts to promote education. This year, we sponsored the education of ten physically challenged students. The initiative was undertaken with Jyoti Badhir Vidyalaya, Bithoor, Kanpur. Apart from the above, we also extended our direct support to students belonging to economically weaker sections of the society.

Training Institute for Women

Women empowerment is also a prime agenda of our corporate social responsibility programs. During the year, the Company distributed 18 sewing machines to women to enable them to become self-reliant and earn their livelihood. The Company also undertook other need-based initiatives in compliance with Schedule VII to the Companies Act, 2013.

Management Discussion and Analysis Report

Economic Overview

Global

Financial Year 2018-19 was challenging for the global economy. Global growth in 2019 has been downgraded to 2.6%, 0.3% point below previous forecasts, reflecting weaker-than expected international trade and investment at the start of the year. Growth is projected to gradually rise to 2.8% by 2021, predicated on continued benign global financing conditions, as well as a modest recovery in emerging market and developing economies (EMDEs) previously affected by financial market pressure. However, EMDE growth remains constrained by subdued investment, which is dampening prospects and impeding progress toward achieving development goals. Risks are also firmly on the downside, in part reflecting the possibility of destabilizing policy developments, including a further escalation of trade tensions between major economies; renewed financial turmoil in EMDEs; and sharper-than-expected slowdowns in major economies. It is therefore urgent for EMDEs to reinforce policy buffers and build resilience to possible negative shocks, and to implement reforms that promote private investment and improve public sector efficiency. Efforts to strengthen access to markets and technology while boosting the quality of infrastructure and governance should be prioritized and be implemented through cost-effective and private-sector-led solutions. Structural reforms aimed at improving the business climate would also boost growth prospects. Well-designed social safety nets and active labor market policies are key to managing risks and protecting vulnerable groups.

India

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.

India's Gross Domestic Product (GDP) is estimated to have increased 7.2% in FY 2017-18 and 7% in FY 2018-19. India has retained its position as the third largest startup base in the world with over 4,750 technology start-ups. India's labour force is expected to touch 160-170 Million by 2020, based on rate of population growth, increased labor force participation, and higher education enrollment, among other factors, according to a study by Associated Chambers of Commerce and Industry of India (ASSOCHAM) and Thought Arbitrage Research Institute. India's foreign exchange reserves were US\$ 405.64 Billion in the week up to March 15, 2019, according to data from the Reserve Bank of India.

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. The Hon'ble Prime Minister of India, Shri Narendra Modi, has launched the 'Make in India' initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25% of the GDP from the current 17%. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and increasing the digital literacy.

India is expected to grow to a US\$ 6 Trillion economy by FY 2026-27 and achieve upper-middle income status on the back of digitization, globalization, favorable demographics, and structural reforms.

India's revenue receipts are estimated to touch ₹ 28-30 Trillion (US\$ 385-412 Billion) by 2019, owing to the Government's measures to strengthen infrastructure and reforms like demonetization and Goods and Services Tax (GST).

India is also focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030. Currently, 30% of the country's total installed capacity comes from renewables. It also has plans to increase its renewable energy capacity to 175 GW by 2022.

India is expected to be the third-largest consumer economy as its consumption may triple to US\$ 4 Trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass the United States (US) to become the second-largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers.

Industry Structure and Developments

Leather is one of the most widely traded commodities globally. The growth in demand for leather is driven by the fashion industry, especially footwear. Apart from this, furniture and interior design industries, as well as the automotive industry also demand leather.

The Indian leather industry has a place of prominence in the Indian economy due to the substantial export earnings

it generates and its strong growth. It accounts for around 12.93% of the world's leather production of hides/skins.

India's Leather Exports

India's leather industry has grown drastically, transforming from a mere raw material supplier to a value-added product exporter. The Council for Leather Exports (CLE) is an autonomous non-profit organization, which is entrusted with export promotion activities and the development of the Indian leather industry. About 3,500 companies manufacturing/exporting leather and leather products are members of the Council.

The US is the largest market for the Indian leather industry. To tap this market further, the Indian leather industry is increasing its capacities with financial assistance from the Government under the Integrated Development of Leather Sector. The unique selling proposition of the Indian leather industry continues to be its huge raw material base, strong products, and availability of huge labor. The CLE has also requested the Government to reduce GST rate to 12% from the existing 18% on footwear priced above ₹ 1,000, to boost manufacturing and exports.

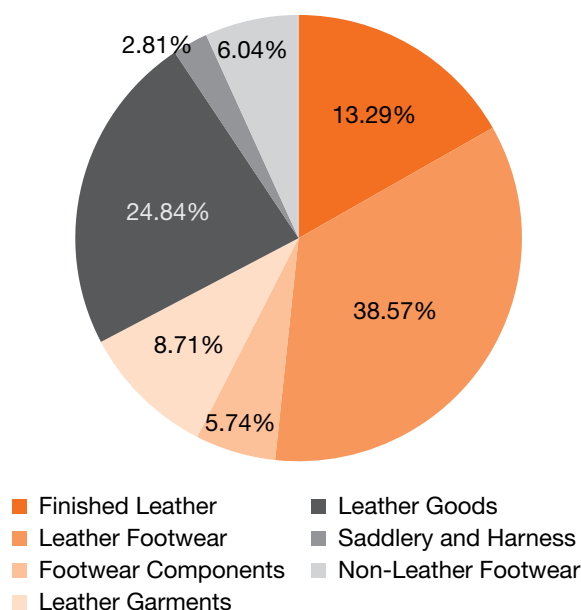

As per officially notified DGCI&S, monthly export data, the export of Leather and Leather products for the period **April-March FY 2018-19 touched US\$ 5,690.99 Million** as against the performance of **US\$ 5,740.98 Million in April-March FY 2017-18**, recording a **marginal decline of 0.87%**. In rupee terms, the export touched **₹ 397,930.43 Million in April-March FY 2018-19** as against **₹ 370,034.14 Million in April-March FY 2017-18**, registering a **positive growth of 7.54%**.

Export of different categories of Footwear (leather & non-leather and components) holds a major share of about 50.34%. This is followed by Leather Goods & Accessories with a share of 24.84%, Finished Leather 13.29%, Leather Garments 8.71% and Saddlery & Harness 2.81%.

Though export of finished leather and leather garments contracted in rupee terms in FY 2018-19, the industry was able to achieve overall positive growth due to good growth levels shown by other segments such as leather footwear (8.98%), leather goods (13.78%), saddlery and harness (10.74%) and footwear components (4.21%).

For FY 2019-20, the CLE is aiming to achieve 9% to 10% growth in exports of leather and leather products, for which it has planned a comprehensive and extensive marketing campaign involving more than 20 events.

Product-wise Share

As per Indian leather export data, the country is exporting these products from its 15 different states. These are also the largest leather producing states in India. Tamil Nadu and Uttar Pradesh are the largest states from where India exports leather and recorded share value of 50% and 40% respectively. It is followed by West Bengal (4%), Maharashtra (3%) and Himachal Pradesh (1%).

Further, the leather export of India is done through 21 different Indian ports including air, land and sea. Chennai air is the biggest port departing maximum leather shipments and records around 40% of shipments from the total exports.

Footwear Industry

The footwear sector is a very significant segment of the leather industry in India; rather it is the engine of growth for the entire Indian leather industry.

India is the second-largest global producer of footwear after China, accounting for 13% of global footwear production of 16 Billion pairs. India produces 2,065 Million pairs of different categories of footwear (leather footwear - 909 Million pairs, leather shoe uppers - 100 Million pairs and non-leather footwear - 1,056 Million pairs). India exports about 115 Million pairs.

The footwear sector is now de-licensed and de-reserved, paving the way for expansion of capacities on modern lines with state-of-the-art machinery. To further assist this process, the Government has permitted 100% Foreign Direct Investment through the automatic route for the footwear sector.

Growth Drivers

Favorable Global Opportunities: The Global Footwear Market is expected to garner US\$ 371.8 Billion by 2020, registering a CAGR of 5.5% during the forecast period FY 2015 – 2020. The rising demand for fancy, trendy yet comfortable footwear among all age groups is a key factor driving the global footwear industry. The global footwear market is segmented by type of footwear, end users of footwear, various platforms for sale of footwear, material used, and their sales across various geographies. Asian countries, such as China and India are major exporters of leather footwear across developed countries (UK and US).

Leather footwear are premium products occupying a significant market share in the global market for footwear. Additionally, rising health concerns are influencing individuals to perform indoor and outdoor physical activities. This trend has generated a high demand for athletic shoes, in turn increasing the demand for footwear. Over the past decade, the global market for footwear has witnessed a steady growth and is anticipated to continue at the same pace in the years to come. The estimation of global market is based on revenue generated by the sale of footwear across different geographic regions.

High Government Focus: The Government of India had identified the leather sector as a focus sector in the Indian Foreign Trade Policy in view of its immense potential for export growth prospects and employment generation. Accordingly, the Government is also implementing various Special Focus Initiatives under the Foreign Trade Policy for the growth of leather sector. With the implementation of various industrial developmental programmes as well as export promotional activities, and the industry's inherent strengths of skilled manpower, innovative technology, increasing industry compliance to international environmental standards, and dedicated support of the allied industries, the Indian leather industry aims to augment the production, thereby enhancing export, and resultantly create additional employment opportunities.

Robust Domestic Demand: The Indian footwear industry has a robust growth outlook, led by higher demand for fashionable and comfortable footwear. Currently, the Indian footwear market is relatively underpenetrated with an average per capita consumption of only 1.7 pairs per annum vis-à-vis the global and developed countries average of 3 and 5 pairs respectively. Rapid urbanization, favorable demographics, growing size of the middle-class segment, rising disposable income and changing lifestyles are likely to generate a higher demand for branded offerings. The stabilization of GST also augurs well for the growth of

the organized sector. In the women's footwear segment, demand will be driven by growing fashion consciousness and steady increase in the number of working women. The market dynamics are also fueled by the strong growth of the e-commerce platform with young India increasingly shopping online for convenience and better experience.

Opportunities

1. The Company brands are well-positioned to address the opportunities in the footwear segments across various categories. Additionally, brand extensions in apparels and accessories increase the opportunity matrix. To leverage the success of its brands, the Company is continually expanding its distribution network to connect better with its consumers and increase market share.
2. The Company has introduced independent sub-brands catering to middle-class consumers without brand dilution. The country's burgeoning middle-class segment and rise in disposable incomes with higher economic growth hold significant promise for growing consumerism.
3. India's youth are aspirational, fashion-conscious and well aware of global trends and styles. This offers branded players strong opportunity to grow their market share.

Threats

1. Foreign brands bring in more competition and hence can affect business growth.
2. Local brands with good designs and higher profit margins for retailers may result in lesser shelf space for the Company's brand offerings, which in turn can adversely impact sales.
3. Cheap imitations/fake products cause threat to the market share of the Company's brands.

Segment-Wise Performance

The Company's business segments are primarily Shoe Division and Tannery Division. During the year under review, revenue from the Shoe Division increased to ₹ 871.57 Crore as against ₹ 803.51 Crore in the previous year. Revenue from the Tannery Division was ₹ 179.11 Crore for the year as against ₹ 186.79 Crore in the previous year.

Overseas Revenue

Weak global market sentiments impacted the Company's overseas operations. As a conscious and pragmatic decision, the business strategy was also more inclined towards leveraging domestic opportunities. Revenue from overseas sales during the year under review stood at ₹ 501.87 Crore as against ₹ 523.41 Crore in the previous year. While revenue from UK operations decreased from ₹ 376.18 Crore to ₹ 317.20 Crore in FY 2018-2019,

revenue from the US operations increased to ₹ 88.48 Crore from ₹ 77.78 Crore in the previous year.

Domestic Sales

During the year under review, the Company focused primarily on developing and expanding the domestic market. Domestic sales stood at ₹ 651.92 Crore as against ₹ 449.09 Crore in the previous year, thus registering an increase of 45.16% year-on-year. The robust growth demonstrates that the Company's performance is up to the mark in the domestic market, the success of its domestic expansion strategy, and the high consumer admiration and confidence enjoyed by its brands.

Details of significant changes in key financial ratios alongwith explanation

In compliance with the requirement of the Listing Regulations, the key financial ratios of the Company alongwith explanation for significant changes (i.e., for change of 25% or more as compared to the immediately previous financial year will be termed as 'significant changes'), has been provided hereunder:

Sl. No.	Particulars#	FY 2018-19	FY 2017-18
(i)	Debtors Turnover	6.15	8.37
(ii)	Inventory Turnover	2.66	2.54
(iii)	Interest Coverage Ratio	3.21	5.72

(vi)	Operating Profit Margin (%)	10	15
(vii)	Net Profit Margin (%)	4	8
(viii)	Return on Net worth (%)	8	14

The Government of India has implemented Goods and Services Tax (GST) from July 2017 subsuming excise duty, service tax and various other indirect taxes. Accordingly, the Revenue for the financial year ended March 31, 2019 as reported in the Statement of Profit and Loss are not comparable with the previous financial year. Therefore, the Ratio relating to Turnover are not comparable with the previous financial year.

- The significant changes in Operating Profit Margin (%), Net Profit Margin (%) and the Net worth Ratio (%) is due to cost efficiencies/productivity improvement and premiumisation of our product range leading to increased sales.
- The significant changes in Debtor Turnover Ratio has been recorded on account of increase in turnover.
- The significant changes in Interest Coverage Ratio has been recorded due to significant decrease in Earnings Before Interest and Taxes (EBIT).

Key Brands

REDTAPE: Known for its unparalleled comfort, international styles and finesse, REDTAPE has entrenched its position in the niche segment of high-fashion and lifestyle brands. Its unmatched quality, skilled craftsmanship and trendy products have

enabled it to capture opportunities in both international and domestic markets. The brand's leading overseas markets include the UK, US, France, Germany, West Asia and South Africa, where it is sold through the Company's extensive distribution channel. The brand has been endorsed in the past by the leading actor and style icon Salman Khan.

REDTAPE footwear has emerged as a leader in the high-end fashion footwear segment. The footwear range is designed in the Company's in-house design studios located in UK and Italy. Product manufacturing is also undertaken internally at the Company's integrated facilities while ensuring strict adherence to international standard of quality and materials.

REDTAPE forayed into the apparel sector in 2006 and unveiled men's clothing and a line-up of accessories. This range offers an eclectic mix of casual and semi-formal wear including shirts, t-shirts, trousers, denims, sweaters, jackets and accessories such as belts, socks, handkerchiefs and wallets.

MODE: The Company has launched this brand to address the demand for women's footwear in both casual and sportswear segments. The offerings are stylish, comfortable and available at attractive prices.

Outlook

The Company has an established leadership position in the industry and is one of the trusted names in branded footwear and accessories. With change in customer preferences, footwear has become a style statement, especially among the teenagers, youth and the affluent working class. The domestic demand for footwear is projected to grow at a fast pace. The inclination towards purchase of products manufactured by established brands is also increasing. For retail companies, the e-commerce platform, through pursuing brand presence in social media, blogs and online advertising, is fast catching up with the brick and mortar sales model. The Company is proactively engaged in taking appropriate steps to tap these opportunities in order to improve its market share and retain its leadership position in the organized footwear and accessories sector of the industry.

Risks and Concerns

The Company believes that risks that are well managed can create opportunities, whereas risks that are incorrectly managed could lead to financial and reputation loss. The Company monitors its major risks and concerns at regular intervals. Appropriate steps are taken by the Board to mitigate such risks.

Internal Control Systems and their Adequacy

The Company's internal control systems are commensurate with the nature of its business and the size and complexities of its operations. These systems are designed to ensure that all assets of the Company are safeguarded and protected against any loss and that all transactions are properly authorized, recorded and reported.

Material Developments in Human Resources/ Industrial Relations Front, Including Number of People Employed

Human Resources

It is the Company's firm belief that its people constitute the primary source of its sustainable competitive advantage and must always be at the heart of its corporate purpose. For success in the footwear market,

particularly, skills and workmanship are important to create superior products with excellent finish. Recognizing the invaluable contribution of its people in creating footwear that is well-accepted in international and domestic markets, the Company gives significant importance to its human capital. It remains dedicated for continuous enhancement of their skills and knowledge by way of training and supervision. The Company's focused endeavors towards promoting trust, transparency and teamwork improved employee productivity at all levels. Independent Auditor's Report

To
The Members of Mirza International Limited
**Report on the Audit of the Standalone
Financial Statements**

Opinion

We have audited the accompanying standalone financial statements of Mirza International Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2019, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, and a summary of the significant accounting policies and other explanatory information. Unit 8 and Unit 9 at Plot No 18 & 19, Nandnagar Industrial Estate, Kashipur have been audited by branch auditors of the company which are included in the financial statement for the year ended on that date, (hereinafter referred to as "the standalone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2019, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

S. No.	Key Audit Matter
1.	Inventory is carried in the Financial Statements at the lower of cost and net realisable value. There is substantial increase in case of Inventory is carried in the Financial Statements at the lower of cost and net realisable value. Since the company is dealing in footwear, apparel and accessories, sales in the fashion industry can be extremely volatile with consumer demand changing significantly based on current trend. As a result, the carrying value of inventory may exceed in net realisable value.
Auditor's Response	
We have designed the procedure to challenge the adequacy and effectiveness of the Company's provisions against inventory, our procedures included: <ul style="list-style-type: none"> • Testing classification : Testing on a sample basis that items on the stock ageing listing were classified in the appropriate ageing bracket by reference to season; • Historical trends of the company & market: evaluated the current year provision by assessing historical trends. We examined the Company's historical trading patterns of inventory sold at full price and inventory sold below full price due to discount and season offers through alternative clearance routes, together with the related margins achieved for each channel. We used the information on trading patterns to assess whether the provisions held have historically been set at an appropriate level; and • Our understanding on the Company Business: based on our knowledge of the Company and the market, the appropriateness of the provision percentages applied by challenging the assumptions made by the Directors on the extent to which older season inventory can be sold through various channels. 	

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Corporate Governance and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon. These reports are expected to be made available to us after the date of this audit report.

Our opinion on the standalone financial statements does not cover the other information and we will not express any form of assurance conclusion thereon. In connection with our audit of the standalone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to communicate the matter to those charged with governance.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures,

and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matters

We did not audit the financial statements / information of Unit 8 and Unit 9 situated at Plot No 18 &19, Nandnagar Industrial Estate, Kashipur included in the standalone Ind AS financial statements of the Company whose financial statements reflect total assets of ₹ 2,904.39 lakh as at 31st March, 2019 and total revenues of ₹ 1,287.42 lakh for the year ended on that date, as considered in the financial statements / information of these units have been audited by the branch auditors whose reports have been furnished to us, and our opinion in so far as it relates to the amounts and disclosures included in respect of branches, is based solely on the report of such branch auditors.

Our opinion is not modified in respect of these matters.

Annexure ‘B’ to the Independent Auditor’s Report

(Referred to in paragraph 2(g) under ‘Report on Other Legal and Regulatory Requirements’ section of our report to the Members of Mirza International Limited of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of MIRZA INTERNATIONAL LIMITED (“the Company”) as of March 31, 2019 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial

controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls,

material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively

as at March 31, 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The key assumptions used in the calculations are as follows :

1. Financial Assumptions

(₹ in Lakh)		
	2018-19	2017-18
Discount Rate	7.60% p.a.	7.70% p.a.
Rate of increase in salaries	7.00% p.a.	7.00% p.a.

Notes

2. Demographic Assumptions

	(₹ in Lakh)	
	2018-19	2017-18
Mortality Rate (% of IALM 06-08)	100%	100%
Normal Retirement Age	60 Years	60 Years
Attrition Rates, based on age (% p.a.) For all Ages	2	2

- The discount rate indicated above reflects the estimated timing and currency of benefit payments. It is based on the yields / rates available on applicable bonds as on the current valuation date.
- The salary growth rate indicated above is the Company's best estimate of an increase in salary of the employees in future years, determined considering the general trend in inflation, seniority, promotions, past experience and other relevant factors such as demand and supply in employment market, etc.
- Attrition rate indicated above represents the Company's best estimate of employee turnover in future (other than on account of retirement, death or disablement) determined considering various factors such as nature of business, retention policy, industry factors, past experience, etc.

Note 33 Ind AS 116, Leases

Ind AS 116, Leases: On 31st March 2019 the Ministry of Corporate Affairs has notified Ind AS 116, Leases. Ind AS 116 will replace the existing leases standard, Ind AS 17, Leases, and related interpretations. The standard sets out the principles for the recognition, measurement, presentation and disclosures of leases for both parties to a contract i.e., the lessee and lessor. Ind AS 116 introduces a single lessee accounting model and requires the lessee to recognize assets and liabilities for all leases with a term of more than twelve months, unless the underlying assets is of low value. Currently, operating lease expenses are charged to the statements of profit and loss. The standard also contains enhanced disclosure requirements for lessees. Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17. The effective date for the adoption of Ind AS 116 is annual periods beginning on or after April 2019. The standard permits two possible methods of transition:

Notes

- Full retrospective - Retrospectively to each prior period presented applying Ind AS 8, Accounting policies, changes in Accounting Estimates and errors.
- Modified retrospective - Retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application.

Under modified retrospective approach, the lessee records the lease liability as the present value of the remaining lease payments, discounted at the incremental borrowing rate and the right of use assets either as:

- Its carrying amount as if the standard had been applied since the commencement date, but discounted at the lessee's incremental borrowing rate at the date of initial application, or
- An amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments related to that lease recognized under Ind AS 17 immediately before the date of initial application.

Certain practical expedients are available under both the methods.

on completion of evaluation of the effect of adoption of Ind AS 116, the company is proposing to use the

“Modified retrospective Approach” for transition to Ind AS 116, and take the cumulative adjustments to retained earnings, on the date of initial application (April 1, 2019). Accordingly, comparatives for the year ended March 31, 2019 will not be retrospectively adjusted

Note 34 Ind AS 107, Financial risk management objective and policies

The Company's principal financial instruments are as follows:

Financial assets: Investments, Cash and bank balance, Loans, Trade and other receivables,

Financial liabilities: Borrowings, Trade and other payables.

The Company's financial risk management is an integral part of how to plan and execute its business strategies. The risk management policy is approved by the Board of Directors.

The Company is an Export House and is exposed primarily to fluctuations in foreign currency exchange rates, credit, liquidity and interest rate risks, which may adversely impact the fair value of its financial instruments.

The Company is exposed to various financial risks such as credit, liquidity and market risk. An experienced and qualified team ensures that all financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives.

(i) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Such changes in the values of financial instruments may result from changes in the foreign currency exchange rates, interest rates, credit, liquidity and other market changes. The Company's exposure to market risk is primarily on account of foreign currency exchange rate risk.

Foreign currency exchange rate risk Company uses forward exchange contracts to hedge our foreign exchange risk of anticipated sales or purchase transactions in the normal course of business, which occur within the next twelve months, for which we have a firm commitment from a customer or to a supplier.

The terms of these contracts are consistent with the timing of the transactions being hedged. The hedges related to forecasted transactions are designated and documented at the inception of the hedge as cash flow hedges.

Notes

The following table sets forth information relating to foreign currency exposure as at March 31, 2019:

	(₹ in lakh)			
	USD	EUR	GBP	Others
Net financial assets Net financial liabilities	114	9	118	-

Interest rate risk

The Company's policy is to minimize interest rate cash flow risk exposures on long-term financing. Further Company's has no major investments in any interest bearing instrument. Hence, the Company is not significantly exposed to interest rate risk.

Credit risk

Credit risk is the risk of financial loss arising from counter party failure to repay or service debt according to the contractual terms or obligations. Credit risk encompasses of both, the direct risk of default and the risk of deterioration of credit worthiness as well as concentration of risks. Credit risk is controlled by analyzing credit limits and credit worthiness of customers on a continuous basis to whom the credit has been granted after obtaining necessary approvals for credit.

Financial instruments that are subject to concentrations of credit risk principally consist of trade receivables, unbilled receivables, investments, derivative financial instruments, cash and cash equivalents, bank deposits and other financial assets. None of the financial instruments of the Company result immaterial concentration of credit risk.

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk was ₹ 24,875 lakh and ₹ 26,277 lakh as at March 31, 2019 and March 31, 2018, respectively, being the total of the carrying amount of balances with banks, bank deposits, investments, trade receivables, and other financial assets.

The Company's exposure to customers is diversified and no single customer contributes to more than 15% of outstanding trade receivables as at March 31, 2019 and March 31, 2018.

Geographic concentration of credit risk

Geographic concentration of trade receivables (gross and net of allowances) is as follows:

	As at March 31, 2019		As at March 31, 2018	
	Gross%	Net%	Gross%	Net%
United States of America India	6%	6%	3%	3%
United Kingdom	73%	73%	81%	81%
Other Geographical concentration of trade receivables is allocated based on the location of the customers.	19%	19%	14%	14%
	2%	2%	2%	2%

Other financial assets

Loans and receivable from related parties are periodically reviewed by the management in conjunction with the re-measured fair values of the Company's investments in those parties. Where the carrying amount of any receivable exceeds the re-measured fair value of investment, an impairment loss, to that extent, is provided for in the financial statements.

Cash and bank balances are managed by the Company's treasury department. Concentration risk is constantly monitored to mitigate financial loss.

The Company's maximum exposure to credit risk for the components of the financial assets as at March 31, 2018, March 31, 2019 and April 01, 2018 is to the extent of their respective carrying amounts as disclosed in respective notes.

Notes

Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to maintain optimum levels of liquidity to meet its cash and collateral requirements, both immediate and long-term. The finance needs are monitored and managed by the Company's treasury department, in consultation with the project teams and management. The Company takes support from its secured lenders to finance and support the Company's operations.

Note 35 Company Overview and Significant Accounting Policies

A) Company Overview:

Mirza International Limited ('The Company') is a public limited company incorporated in India and listed on Bombay Stock Exchange and National Stock Exchange and having its registered office located at 14/6, Civil Lines, Kanpur-208001, Uttar Pradesh, India. The Company is a leading manufacturer & exporter of finished leather, Footwear and trader of footwear and apparels and allied products.

B) Statement of Compliance:

These standalone financial statements have been prepared & comply in all material aspects with Indian Accounting Standards ("Ind AS") notified under section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, as amended thereof & other relevant provisions of the Act. The financial statements upto the year ended March 31, 2017 were prepared in accordance with accounting standards notified under the Companies (Accounting Standards) Rules, 2016 (as amended) and other relevant provisions of the Act.

C) Basis of Preparation of Financial Statements

These standalone financial statements are prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting

Standards) Rule 2015 and relevant amendments rules issued thereafter.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an ordinary transactions between market participants at the measurement date.

Fair value measurement under Ind AS are categorized as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date;

Level 2 inputs are inputs, other than quoted prices included in level 1, that are observable for the assets or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the valuation of assets/liabilities.

D) Use Of Estimates and Judgement:

The preparation of the financial statements requires the Management to make certain estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and

Notes

liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Accounting estimates could change from period to period. Actual results may differ from these estimates.

This note provides an overview of the areas that involved a higher degree of judgment or complexity and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgments is included in the relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

E) Property Plant and Equipment:

1. Freehold Land is carried at historical cost. All other items of Property, Plant and Equipment of the Company are valued at cost of acquisition or construction net of recoverable taxes, trade discounts and rebates less accumulated depreciation and impairment loss, if any. The cost of fixed assets includes purchase price, borrowing cost, allocated / apportioned direct and indirect expenses incurred in relation to bringing the fixed assets to its working condition for its intended life. The said cost is not reduced by specific Grants/subsidy received against the assets.
2. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as separate asset is derecognized when replaced. All other repairs and maintenance are charged to Profit or Loss during the reporting period in which they are incurred.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within other gains/(losses).

The useful lives, residual values and method of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively.

3. Capital Work in Progress – All costs attributable to the assets or incurred in relation to the assets under completion are aggregated under Capital work in progress to be allocated to individual assets on completion.
4. Lease hold land is capitalized with the lease premium paid, direct expenses/interest allocable to it till it is put to use

F) Depreciation & Amortization

- 1) Depreciation on Building, Plant and machinery, Furniture & fixtures, Vehicles and Computers is provided as per the Straight Line Method (SLM), over the estimated useful lives of assets.
- 2) Lease hold land are amortized over the useful life remaining from the date, it put to use. The useful life of leasehold land is lease term remaining unexpired.
- 3) The Company depreciates its property, plant and equipment (PPE) over the useful life in the manner prescribed in Schedule II to the Act. Management believes that useful life of assets are same as those prescribed in Schedule II to the Act.
- 4) The residual values are not more than 5% of the original cost of the asset. The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.
- 5) Depreciation on additions / deletions is calculated pro-rata from the month of such addition / deletion, as the case maybe.
- 6) Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the Statement of Profit and Loss.

G) Borrowing and Borrowing Cost:

Borrowings are initially recognised at fair value, net of transaction cost incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction cost) and the redemption amount is recognised in profit or loss over the period of the borrowings, using the effective interest method. Fees paid on the established loan facilities are recognised as transaction cost of the loan, to the extent that it is probable that some or all the facility will be drawn down.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after

Notes

the reporting period. Costs that are attributable to the acquisition, construction or production of qualifying assets are capitalized as part of cost of such assets, all other Borrowing cost are charged to the Statement of Profit & Loss. Borrowing costs comprise of interest and other costs incurred in connection with borrowing of funds.

H) Leases:

1. **Finance Leases:** Assets acquired under finance leases, which effectively transfer to the Company substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the lower of the fair value and present value of the minimum lease payment at the inception of the leased term and disclosed as leased assets. Lease payments are apportioned between the finance charges and the reduction of the leased liability so as to achieve a constant rate of interest on the remaining balance of the liability.
2. **Operating Leases:** Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee, are classified as operating lease. Payments made under operating leases are charged to profit or loss on a straight-line basis over the period of the lease.

I) Investments in Subsidiaries, Joint Ventures and Associates

Investments in subsidiaries, joint ventures and associates are recognised at cost as per Ind AS 27. Except where investments accounted for at cost shall be accounted for in accordance with Ind AS 105, Non-current Assets Held for Sale and Discontinued Operations, when they are classified as held for sale.

J) Investments and Other Financial Assets

(i) Classification

The Company classifies its financial assets in the following measurement categories:

- (1) those to be measured subsequently at fair value (either through other comprehensive income, or through the Statement of Profit and Loss), and
- (2) those measured at amortised cost.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

(ii) Measurement

At initial recognition, the Company measures a financial asset at its fair value. Transaction costs of financial assets carried at fair value through the Profit and Loss are expensed in the Statement of Profit and Loss.

Debt instruments:

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. The Company classifies its debt instruments into following categories:

- (1) **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in other income using the effective interest rate method.
- (2) **Fair value through profit and loss:** Assets that do not meet the criteria for amortised cost are measured at fair value through statement of Profit and Loss. Interest income from these financial assets is included in other income.

Equity instruments:

The Company measures its equity investment other than in subsidiaries, joint ventures and associates at fair value through profit and loss. However where the Company's management makes an irrevocable choice on initial recognition to present fair value gains and losses on specific equity investments in other comprehensive income (Currently no such choice made), there is no subsequent reclassification, on sale or otherwise, of fair value gains and losses to the Statement of Profit and Loss.

(iii) Impairment of financial assets

The Company measures the expected credit loss associated with its assets based on historical trend, industry practices and the business environment in which the entity operates or any other appropriate basis. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

Notes

(iv) Income recognition Interest income

Interest income from debt instruments is recognised using the effective interest rate method.

Dividends

Dividends are recognised in the Statement of Profit and Loss only when the right to receive payment is established.

Interest Income

Interest income is recognized on time proportion basis taking in to account the amount outstanding and rate applicable.

K) Inventories:

Inventories are valued at the lower of Historic Cost or the Net Realisable Value. Costs are determined as under:

1. **Bought Out Items:** On First in First Out (FIFO) method except raw hides (which is valued at six months average purchase price in case of Indigenous hides and full period weighted average price in case of imported hides). In respect of bought out items where Input Tax Credit is permitted all recoverable taxes are excluded from purchase price for determining the cost.
2. **Goods in Process:** At cost plus estimated value addition/cost of conversion at each major stage of production.
3. **Finished Goods:** At direct cost plus allocation of overheads (including interest on working capital) other than Marketing, Selling & Distribution Expenses and Interest on Term Loan.

L) Foreign Currency Transactions

(i) Functional and presentation currency

The financial statements are presented in Indian rupee (INR), which is Company's functional and presentation currency.

ii) Financial Instruments

Derivative financial instruments such as forward contracts, option contracts and cross currency swaps, to hedge its foreign currency risks are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value with changes in fair value recognized in the Statement of Profit and Loss in the period when they arise

(iii) Transactions and balances

Transactions in foreign currencies are recognised at the prevailing exchange rates on the transaction dates. Realised gains and losses on settlement of foreign currency transactions are recognised in the Statement of Profit and Loss.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

M) Segment Reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

N) Derivative Instruments and Hedge Accounting

Cash flow hedges

The effective portion of changes in fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss.

Amounts previously recognised in other comprehensive income and accumulated in equity relating to effective portion as described above are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non- financial asset or a non-financial liability, such gains or losses are transferred from equity (but not as a reclassification adjustment) and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

Notes

O) Revenue Recognition:

The company derives revenues primarily from sale of manufactured goods, traded goods and related services.

Sale of Goods and Export Incentives- Revenue is recognized upon transfer of control of promised products or services to customers only when it can be reliably measured and it is reasonable to expect ultimate collection. Revenue in respect of contracts for services is recognized when the services are rendered and related costs are incurred.

Effective 01 April 2018, the Company has adopted Indian Accounting Standard 115 (Ind AS 115) –‘Revenue from contracts with customers’ using the cumulative catch-up transition method, applied to contracts that were not completed as on the transition date i.e. 01 April 2018. Accordingly, the comparative amounts of revenue and the corresponding contract assets liabilities have not been retrospectively adjusted. The effect on adoption of Ind-AS 115 was insignificant

The Company operates a loyalty programme for the customers for the sale of goods. The customers accumulate points for purchases made which entitles them to discount on future purchases. A contract liability for the award points is recognized at the time of the sale. Revenue is recognized when the points are redeemed or on expiry. The expenditure of loyalty programme is netted-off to revenue.

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

Other operating revenue - Export incentives

Export Incentives under various schemes are accounted in the year of export.

P) Receivables:

Receivables are disclosed in Indian currency equivalent of actually invoiced values Receivables covered by bills of exchange purchased by the Company’s bankers are neither shown as assets nor liabilities. Contingent liability in the event of non payment of the same is reflected in the Notes to the Accounts.

Q) Employee Benefits:

(i) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees’ services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

(ii) Leave Encashment

The liabilities for earned leave and sick leave are settled as when accrued within the financial year .

(iii) Post-employment obligations

The Company operates the following post-employment schemes:

- (a) defined benefit plans such as gratuity and pension; and
- (b) defined contribution plans such as provident fund etc.

Pension and gratuity obligations

The liability or asset recognised in the balance sheet in respect of defined benefit pension and gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the Statement of Profit and Loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings

Notes

in the statement of changes in equity and in the balance sheet.

Defined Contribution Plans

Defined Contribution Plans such as Provident Fund etc., are charged to the Statement of Profit and Loss as incurred. Further for certain employees, the monthly contribution for Provident Fund is made to a Trust administered by the Company. The interest payable by the Trust is notified by the Government. The Company has an obligation to make good the shortfall, if any.

Termination benefits

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits at the earlier of the following dates: (a) when the Company can no longer withdraw the offer of those benefits; and (b) when the Company recognises costs for a restructuring that is within the scope of Ind AS 37 and involves the payment of terminations benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

R) Taxes on Income:

Income tax expense is recognised in net profit in the Statement of Profit and Loss except to the extent that it relates to items recognised directly in equity, in which case it is recognised in other comprehensive income

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when

the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are off set where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively

Minimum Alternate Tax credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period

S) Earnings Per Share:

Basic earnings per equity share are computed by dividing the net profit attributable after tax to the equity holders of the Company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share are computed by dividing the net profit after tax attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

Notes

T) Provisions, Contingent Liabilities and Contingent Assets:

Provision:

Provision is recognised in the accounts when there is a present obligation as a result of past event(s) and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made.

Contingent Liabilities:

Wherever there is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity or a present obligation that arises from past events but is not recognised because

- (a) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
- (b) the amount of the obligation cannot be measured with sufficient reliability. Show cause notices are not considered as Contingent Liabilities unless converted into demand.

Contingent Asset:

Contingent asset are neither recognised nor disclosed in the financial statements

U) Events after the Reporting Period:

It is the Company's Policy to take in to the account the impact of any significant event that occurs after the reporting date but before the finalization of accounts

V) Government Grants:

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.

Government grants receivable as compensation for expenses or financial support are recognized in profit or loss of the period in which it becomes available.

Government grants relating to the purchase of property, plant and equipment are accounted for as deferred Income by crediting the same to a specific reserve and are credited to profit or loss on a straight-line basis over the expected lives of the related assets and presented within other income.

The reserve to these Grants is diminished every year by a prorate portion of the depreciation of the assets,

to amortize the grant over due life of the assets. Where the Grants carry conditions of specific performance, the contingent aspect is disclosed in due notes to the accounts.

W) Impairment of Tangible & Intangible Assets:

(i) Financial assets (other than at fair value)

The Company assesses at each date of balance sheet whether a financial asset or a Company of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. In determining the allowances for doubtful trade receivables, the Company has used a practical expedient by computing the expected credit loss allowance for trade receivables based on a provision matrix. The provision matrix takes into account historical credit loss experience and is adjusted for forward looking information. The expected credit loss allowance is based on the ageing of the receivables that are due and allowance rates used in the provision matrix. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

(ii) Non-financial assets

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

X) Operating Cycle for current and Non-Current Classification

Operating cycle for the business activities of the company covers the duration of the specific product line/ service including the defect liability period wherever applicable and extends up to the realization

Notes

of receivables within the agreed credit period normally applicable to the respective lines of business.

Y) Recent Accounting Pronouncements Ind as 116 :

On 30th March 2019, the Ministry of Corporate Affairs (MCA) has notified Ind AS 116 Leases, under Companies (Indian Accounting Standards) Amendment Rules, 2019 which is applicable with effect from 1st April, 2019.

Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e., the lessee and the lessor. Ind AS 116 introduces a single lease accounting model for lessee and requires the lessee to recognize right of use assets and lease liabilities for all leases with a term of more than twelve months, unless the underlying asset is low value in nature.

Currently, operating lease expenses are charged to the statement of profit and loss. Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17.

As per Ind AS 116, the lessee needs to recognise depreciation on rights of use assets and finance costs on lease liabilities in the statement of profit and loss. The lease payments made by the lessee under the lease arrangement will be adjusted against the lease liabilities.

The Company is currently evaluating the impact on account of implementation of Ind AS 116 which might have significant impact on key profit & loss and balance sheet ratio i.e. Earnings before interest, tax, depreciation and amortisation (EBITDA), Asset coverage, debt equity, interest coverage, etc.

Independent Auditor's Report

To,
The Members of
Mirza International Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of Mirza International Limited (hereinafter referred to as the 'Holding Company') and its subsidiaries Mirza (HK) Limited & Mirza Bangla Limited (Holding Company and its subsidiaries together referred to as "the Group"), which comprise the Consolidated Balance Sheet as at March 31, 2019, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flows for the year ended on that date, and notes to the consolidated financial statements, including summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the Consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Consolidated financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of their consolidated state of affairs of the Company as at March 31, 2019, the

consolidated profit, consolidated changes in equity and its consolidated cash flows for the year ended on that date.

Basis for opinion

We conducted our audit of the Consolidated financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the Consolidated financial statements under the provisions of the Act and the Rules made there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

S. No. Key Audit Matter

1. Inventory is carried in the Financial Statements at the lower of cost and net realisable value. There is substantial increase in case of Inventory is carried in the Financial Statements at the lower of cost and net realisable value. Since the company is dealing in footwear, apparel and accessories, sales in the fashion industry can be extremely volatile with consumer demand changing significantly based on current trend. As a result, the carrying value of inventory may exceed in net realisable value.

Auditor's Response

We have designed the procedure to challenge the adequacy and effectiveness of the Company's provisions against inventory, our procedures included:

- **Testing classification:** Testing on a sample basis that items on the stock ageing listing were classified in the appropriate ageing bracket by reference to season;
 - **Historical trends of the company & market:** evaluated the current year provision by assessing historical trends. We examined the Company's historical trading patterns of inventory sold at full price and inventory sold below full price due to discount and season offers through alternative clearance routes, together with the related margins achieved for each channel. We used the information on trading patterns to assess whether the provisions held have historically been set at an appropriate level; and
 - **Our understanding on the Company Business:** based on our knowledge of the Company and the market, the appropriateness of the provision percentages applied by challenging the assumptions made by the Directors on the extent to which older season inventory can be sold through various channels.
-

Information Other than the Consolidated Financial Statements and Auditor's Report Thereon

The Holding Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in term of the requirements of the Companies Act, 2013 that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group including its Associates and Jointly controlled entities in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under section 133 of the Act.

The respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included

in the Group and of its associates and jointly controlled entities are responsible for assessing the ability of the Group and of its associates and jointly controlled entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities are responsible for overseeing the financial reporting process of the Group and of its associates and jointly controlled entities.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management
- Conclude on the appropriateness of management's use of the going concern basis of accounting and,

based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the Consolidated financial statements, including the disclosures, and whether the Consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements

Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated

in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matters

We did not audit the financial statements / financial information of 2 subsidiaries Mirza (HK) Limited & Mirza Bangla Limited included in the consolidated financial results, whose financial statements / financial information for the year ended on that date reflect the following:

Description	Mirza Bangla Ltd. (In Tk)	Mirza (HK) Ltd (In HK\$)
Total Assets	1,98,600	87,939
Total Revenue	Nil	389,722
Net Profit / (Loss) after Tax	(25,000)	15,959
Comprehensive Income / (Loss)	Nil	Nil

These financial statements / financial information have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries and our report in terms of sub-sections (3) and (11) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries, jointly controlled entities and associates, is based solely on the reports of the other auditors.

Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors and the financial statements / financial information certified by the Management.

Report on Other Legal and Regulatory Requirements

- (e) On the basis of the written representations received from the directors of the Holding Company as on 31st March, 2019 taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors of its subsidiary companies incorporated in India, none of the directors of the Group companies, its associate companies and jointly controlled companies incorporated in India is disqualified as on 31st March, 2019 from being appointed as a director in terms of Section 164 (2) of the Act.
- (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.
- (g) With respect to other matter to be included in the auditor's report in accordance with the requirements of the section 197 (16) of the Act, as amended; In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the

Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

- (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditor's) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
- i. The Company has disclosed the impact of pending litigations on its financial position in its consolidated financial statements. Refer Note No.-27.
 - ii. The Company did not have any long term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. There is no any delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

Annexure ‘A’ to the Independent Auditor’s Report

(Referred to in paragraph 1(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report to the Members of Mirza International Limited of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

In conjunction with our audit of the consolidated financial statements of the Company and its subsidiary companies as of and for the year ended March 31, 2019, we have audited the internal financial controls over financial reporting of MIRZA INTERNATIONAL LIMITED (hereinafter referred to as “Company”) and its subsidiary companies as of that date.

Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Company and its subsidiary companies are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (“the ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company and its subsidiary companies, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the

internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Company and its subsidiary companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2019,

based on the internal control over financial reporting criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1. Financial Assumptions

	(₹ in Lakh)	
	2018-19	2017-18
Discount Rate	7.60% p.a.	7.70% p.a.
Rate of increase in salaries	7.00% p.a.	7.00% p.a.

2. Demographic Assumptions

	(₹ in Lakh)	
	2018-19	2017-18
Mortality Rate (% of IALM 06-08)	100%	100%
Normal Retirement Age	60 Years	60 Years
Attrition Rates, based on age (% p.a.) For all Ages	2	2

Notes

- The discount rate indicated above reflects the estimated timing and currency of benefit payments. It is based on the yields / rates available on applicable bonds as on the current valuation date.
- The salary growth rate indicated above is the Company's best estimate of an increase in salary of the employees in future years, determined considering the general trend in inflation, seniority, promotions, past experience and other relevant factors such as demand and supply in employment market, etc.
- Attrition rate indicated above represents the Company's best estimate of employee turnover in future (other than on account of retirement, death or disablement) determined considering various factors such as nature of business, retention policy, industry factors, past experience, etc.

Sensitivity Analysis

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analysis below have determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant. The result of sensitivity analysis is given below:

GROUP OVERVIEW AND SIGNIFICANT ACCOUNTING POLICIES

A) General Information

Mirza International Limited ('The Holding Company') and its subsidiaries, (together referred as 'The Group') are engaged in manufacturing, export and trade of Finished Leather, Footwear and Trader of Footwear and Apparels.

The Holding Company is a public limited company incorporated in India and listed on Bombay Stock Exchange and National Stock Exchange and having its registered office located at 14/6, Civil Lines, Kanpur-208001, Uttar Pradesh, India. The Holding Company is a leading manufacturer & exporter of finished leather, Footwear and trader of footwear and apparels and allied products.

The consolidated financial statements for the year ended on March 31, 2019 were approved for issue by Company's Board of Directors on May 30, 2019.

B) Statement of Compliance

These consolidated financial statements have been prepared & comply in all material aspects with Indian Accounting Standards ("Ind AS") notified under section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, as amended thereof & other relevant provisions of the Act. The financial statements upto the year ended March 31, 2017 were prepared in accordance with accounting standards notified under the Companies (Accounting Standards) Rules, 2016 (as amended) and other relevant provisions of the Act.

C) Basis of Preparation of Financial Statements

These consolidated financial statements are prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rule 2015 and relevant amendments rules issued thereafter.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an ordinary

transactions between market participants at the measurement date.

Fair value measurement under Ind AS are categorized as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date;

Level 2 inputs are inputs, other than quoted prices included in level 1, that are observable for the assets or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the valuation of assets/liabilities.

Principles of consolidation and equity accounting

(i) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group. The Group combines the financial statements of the Holding Company and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit and loss, consolidated statement of changes in equity and consolidated balance sheet respectively.

Notes

(ii) Associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost.

(iii) Joint ventures

Investments in joint ventures are accounted for using the equity method, after initially being recognised at cost in the consolidated balance sheet.

(iv) Equity Method

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in statement of profit and loss, and the Group's share of other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment. When the Group's share of losses in an equity accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity. Such further losses are disclosed as part of Current Liabilities. Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group. The carrying amount of equity accounted investments are tested for impairment in accordance with the policy described in Note I(iii) below.

D) Use of Estimates and Judgement

The preparation of the consolidated financial statements requires the Management to make certain estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the period.

The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Accounting estimates could change from period to period. Actual results may differ from these estimates.

This note provides an overview of the areas that involved a higher degree of judgment or complexity and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgments is included in the relevant notes together with information about the basis of calculation for each affected line item in the consolidated financial statements.

E) Property Plant and Equipment

- Freehold Land is carried at historical cost. All other items of Property, Plant and Equipment of the Group are valued at cost of acquisition or construction net of recoverable taxes, trade discounts and rebates less accumulated depreciation and impairment loss, if any. The cost of fixed assets includes purchase price, borrowing cost, allocated / apportioned direct and indirect expenses incurred in relation to bringing the fixed assets to its working condition for its intended life. The said cost is not reduced by specific Grants/ subsidy received against the assets.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as separate asset is derecognized when replaced. All other repairs and maintenance are charged to Profit or Loss during the reporting period in which they are incurred.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within other gains/(losses).

The useful lives, residual values and method of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively.

Notes

2. Capital Work in Progress – All costs attributable to the assets or incurred in relation to the assets under completion are aggregated under Capital work in progress to be allocated to individual assets on completion.
3. Lease hold land is capitalized with the lease premium paid, direct expenses/interest allocable to it till it is put to use

F) Depreciation & Amortization

1. Depreciation on Building, Plant and machinery, Furniture & fixtures, Vehicles and Computers is provided as per the Straight Line Method (SLM), over the estimated useful lives of assets.
2. Lease hold land are amortized over the useful life remaining from the date, it put to use. The useful life of leasehold land is lease term remaining unexpired.
3. The Group depreciates its property, plant and equipment (PPE) over the useful life in the manner prescribed in Schedule II to the Act. Management believes that useful life of assets are same as those prescribed in Schedule II to the Act.
4. The residual values are not more than 5% of the original cost of the asset. The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.
5. Depreciation on additions / deletions is calculated pro-rata from the month of such addition / deletion, as the case maybe.
6. Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the Statement of Profit and Loss.

G) Borrowing and Borrowing Cost

Borrowings are initially recognised at fair value, net of transaction cost incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction cost) and the redemption amount is recognised in profit or loss over the period of the borrowings, using the effective interest method. Fees paid on the established loan facilities are recognised as transaction cost of the loan, to the extent that it is probable that some or all the facility will be drawn down.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement

of the liability for at least 12 months after the reporting period. Costs that are attributable to the acquisition, construction or production of qualifying assets are capitalized as part of cost of such assets, all other Borrowing cost are charged to the Statement of Profit & Loss. Borrowing costs comprise of interest and other costs incurred in connection with borrowing of funds.

H) Leases

1. **Finance Leases:** Assets acquired under finance leases, which effectively transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the lower of the fair value and present value of the minimum lease payment at the inception of the leased term and disclosed as leased assets. Lease payments are apportioned between the finance charges and the reduction of the leased liability so as to achieve a constant rate of interest on the remaining balance of the liability.
2. **Operating Leases:** Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Group as lessee, are classified as operating lease. Payments made under operating leases are charged to profit or loss on a straight-line basis over the period of the lease.

I) Investments and Other Financial Assets

(i) Classification

The Group classifies its financial assets in the following measurement categories:

1. those to be measured subsequently at fair value (either through other comprehensive income, or through the Statement of Profit and Loss), and
2. those measured at amortised cost.

The classification depends on the Group business model for managing the financial assets and the contractual terms of the cash flows.

(ii) Measurement

At initial recognition, the Group measures a financial asset at its fair value. Transaction costs of financial assets carried at fair value through the Profit and Loss are expensed in the Statement of Profit and Loss.

Notes

Debt instruments:

Subsequent measurement of debt instruments depends on the Group business model for managing the asset and the cash flow characteristics of the asset. The Group classifies its debt instruments into following categories:

1. **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in other income using the effective interest rate method.
2. **Fair value through profit and loss:** Assets that do not meet the criteria for amortised cost are measured at fair value through statement of Profit and Loss. Interest income from these financial assets is included in other income.

Equity instruments:

The Group measures its equity investment other than in subsidiaries, joint ventures and associates at fair value through profit and loss. However where the Group management makes an irrevocable choice on initial recognition to present fair value gains and losses on specific equity investments in other comprehensive income (Currently no such choice made), there is no subsequent reclassification, on sale or otherwise, of fair value gains and losses to the Statement of Profit and Loss.

(iii) Impairment of financial assets

The Group measures the expected credit loss associated with its assets based on historical trend, industry practices and the business environment in which the entity operates or any other appropriate basis. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

(iv) Income recognition Interest income

Interest income from debt instruments is recognised using the effective interest rate method.

Dividends

Dividends are recognised in the Statement of Profit and Loss only when the right to receive payment is established.

Interest Income

Interest income is recognized on time proportion basis taking in to account the amount outstanding and rate applicable.

J) Inventories

Inventories are valued at the lower of Historic Cost or the Net Realisable Value. Costs are determined as under:

1. **Bought Out Items:** On First in First Out (FIFO) method except raw hides (which is valued at six months average purchase price in case of Indigenous hides and full period weighted average price in case of imported hides). In respect of bought out items where Input Tax Credit is permitted all recoverable taxes are excluded from purchase price for determining the cost.
2. **Goods in Process:** At cost plus estimated value addition/cost of conversion at each major stage of production.
3. **Finished Goods:** At direct cost plus allocation of overheads (including interest on working capital) other than Marketing, Selling & Distribution Expenses and Interest on Term Loan.

K) Foreign Currency Transactions

(i) Functional and presentation currency

The financial statements are presented in Indian rupee (INR), which is Group functional and presentation currency.

(ii) Financial Instruments

Derivative financial instruments such as forward contracts, option contracts and cross currency swaps, to hedge its foreign currency risks are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value with changes in fair value recognized in the Statement of Profit and Loss in the period when they arise

(iii) Transactions and balances

Transactions in foreign currencies are recognised at the prevailing exchange rates on the transaction dates. Realised gains and losses on settlement of foreign currency transactions are recognised in the Statement of Profit and Loss.

Notes

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

L) Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

M) Derivative Instruments and Hedge Accounting

Cash flow hedges

The effective portion of changes in fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss.

Amounts previously recognised in other comprehensive income and accumulated in equity relating to effective portion as described above are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, such gains or losses are transferred from equity (but not as a reclassification adjustment) and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

N) Revenue Recognition

The Group derives revenues primarily from sale of manufactured goods, traded goods and related services.

Sale of Goods and Export Incentives- Revenue is recognized upon transfer of control of promised products or services to customers only when it can

be reliably measured and it is reasonable to expect ultimate collection. Revenue in respect of contracts for services is recognized when the services are rendered and related costs are incurred.

Effective 01 April 2018, the Group has adopted Indian Accounting Standard 115 (Ind AS 115) –'Revenue from contracts with customers' using the cumulative catch-up transition method, applied to contracts that were not completed as on the transition date i.e. 01 April 2018. Accordingly, the comparative amounts of revenue and the corresponding contract assets liabilities have not been retrospectively adjusted. The effect on adoption of Ind-AS 115 was insignificant

The Group operates a loyalty programme for the customers for the sale of goods. The customers accumulate points for purchases made which entitles them to discount on future purchases. A contract liability for the award points is recognized at the time of the sale. Revenue is recognized when the points are redeemed or on expiry. The expenditure of loyalty programme is netted-off to revenue.

The Group does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

Other operating revenue - Export incentives

Export Incentives under various schemes are accounted in the year of export.

O) Receivables

Receivables are disclosed in Indian currency equivalent of actually invoiced values Receivables covered by bills of exchange purchased by the Group's bankers are neither shown as assets nor liabilities. Contingent liability in the event of non payment of the same is reflected in the Notes to the Accounts.

P) Employee Benefits

(i) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

Notes

(ii) Leave Encashment

The liabilities for earned leave and sick leave are settled as when accrued within the financial year.

(iii) Post-employment obligations

The Group operates the following post-employment schemes:

- (a) defined benefit plans such as gratuity and pension; and
- (b) defined contribution plans such as provident fund etc.

Pension and gratuity obligations

The liability or asset recognised in the balance sheet in respect of defined benefit pension and gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the Statement of Profit and Loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Defined Contribution Plans

Defined Contribution Plans such as Provident Fund etc., are charged to the Statement of Profit and Loss as incurred. Further for certain employees, the monthly contribution for Provident Fund is made to a Trust administered by the Group. The interest payable by the Trust is notified by the Government. The Group has an obligation to make good the shortfall, if any.

Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement

date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits at the earlier of the following dates: (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the Group recognises costs for a restructuring that is within the scope of Ind AS 37 and involves the payment of terminations benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

Q) Taxes on Income

Income tax expense is recognised in net profit in the Statement of Profit and Loss except to the extent that it relates to items recognised directly in equity, in which case it is recognised in other comprehensive income

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are excepted to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are off set where the Group has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognised in the Statement of Profit and Loss, except to the extent that

Notes

it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively

Minimum Alternate Tax credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Group will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period

R) Earnings per share

Basic earnings per equity share are computed by dividing the net profit attributable after tax to the equity holders of the Group by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share are computed by dividing the net profit after tax attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

S) Provisions, Contingent Liabilities and Contingent Assets

Provision:

Provision is recognised in the accounts when there is a present obligation as a result of past event(s) and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made.

Contingent Liabilities:

Wherever there is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity or a present obligation that arises from past events but is not recognised because

- (a) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or

- (b) the amount of the obligation cannot be measured with sufficient reliability. Show cause notices are not considered as Contingent Liabilities unless converted into demand.

Contingent Asset:

Contingent asset are neither recognised nor disclosed in the financial statements

T) Events after the Reporting Period

It is the Group's Policy to take in to the account the impact of any significant event that occurs after the reporting date but before the finalization of accounts

U) Government Grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants receivable as compensation for expenses or financial support are recognized in profit or loss of the period in which it becomes available.

Government grants relating to the purchase of property, plant and equipment are accounted for as deferred Income by crediting the same to a specific reserve and are credited to profit or loss on a straight-line basis over the expected lives of the related assets and presented within other income.

The reserve to these Grants is diminished every year by a prorate portion of the depreciation of the assets, to amortize the grant over due life of the assets. Where the Grants carry conditions of specific performance, the contingent aspect is disclosed in due notes to the accounts.

V) Impairment of Tangible & Intangible Assets

(i) Financial assets (other than at fair value)

The Group assesses at each date of balance sheet whether a financial asset or a Group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. In determining the allowances for doubtful trade receivables, the Group has used a practical expedient by computing the expected credit loss allowance for trade receivables based on a provision matrix. The provision matrix takes into account historical credit loss experience and is adjusted for forward looking information. The expected

Notes

credit loss allowance is based on the ageing of the receivables that are due and allowance rates used in the provision matrix. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

(ii) Non-financial assets

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

W) Operating Cycle for current and Non-Current Classification

Operating cycle for the business activities of the Group covers the duration of the specific product line/ service including the defect liability period wherever applicable

and extends up to the realization of receivables within the agreed credit period normally applicable to the respective lines of business.

X) Recent Accounting Pronouncements Ind As 116

On March 30, 2019, the Ministry of Corporate Affairs (MCA) has notified Ind AS 116 Leases, under Companies (Indian Accounting Standards) Amendment Rules, 2019 which is applicable with effect from April 01, 2019.

Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e., the lessee and the lessor. Ind AS 116 introduces a single lease accounting model for lessee and requires the lessee to recognize right of use assets and lease liabilities for all leases with a term of more than twelve months, unless the underlying asset is low value in nature. Currently, operating lease expenses are charged to the statement of profit and loss. Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17.

As per Ind AS 116, the lessee needs to recognise depreciation on rights of use assets and finance costs on lease liabilities in the statement of profit and loss. The lease payments made by the lessee under the lease arrangement will be adjusted against the lease liabilities.

The Group is currently evaluating the impact on account of implementation of Ind AS 116 which might have significant impact on key profit & loss and balance sheet ratio i.e. Earnings before interest, tax, depreciation and amortisation (EBITDA), Asset coverage, debt equity, interest coverage, etc.
