Adverse price fluctuations in TAN on account of import surges and drop in Russian FGAN prices

Mining Chemicals (TAN) Revenue (Manufactured Sales Rs. Cr)

Mining Chemicals (Manufactured Sales Volumes MT 00)

Q1 FY24 Capacity Utilization

TAN: 87%

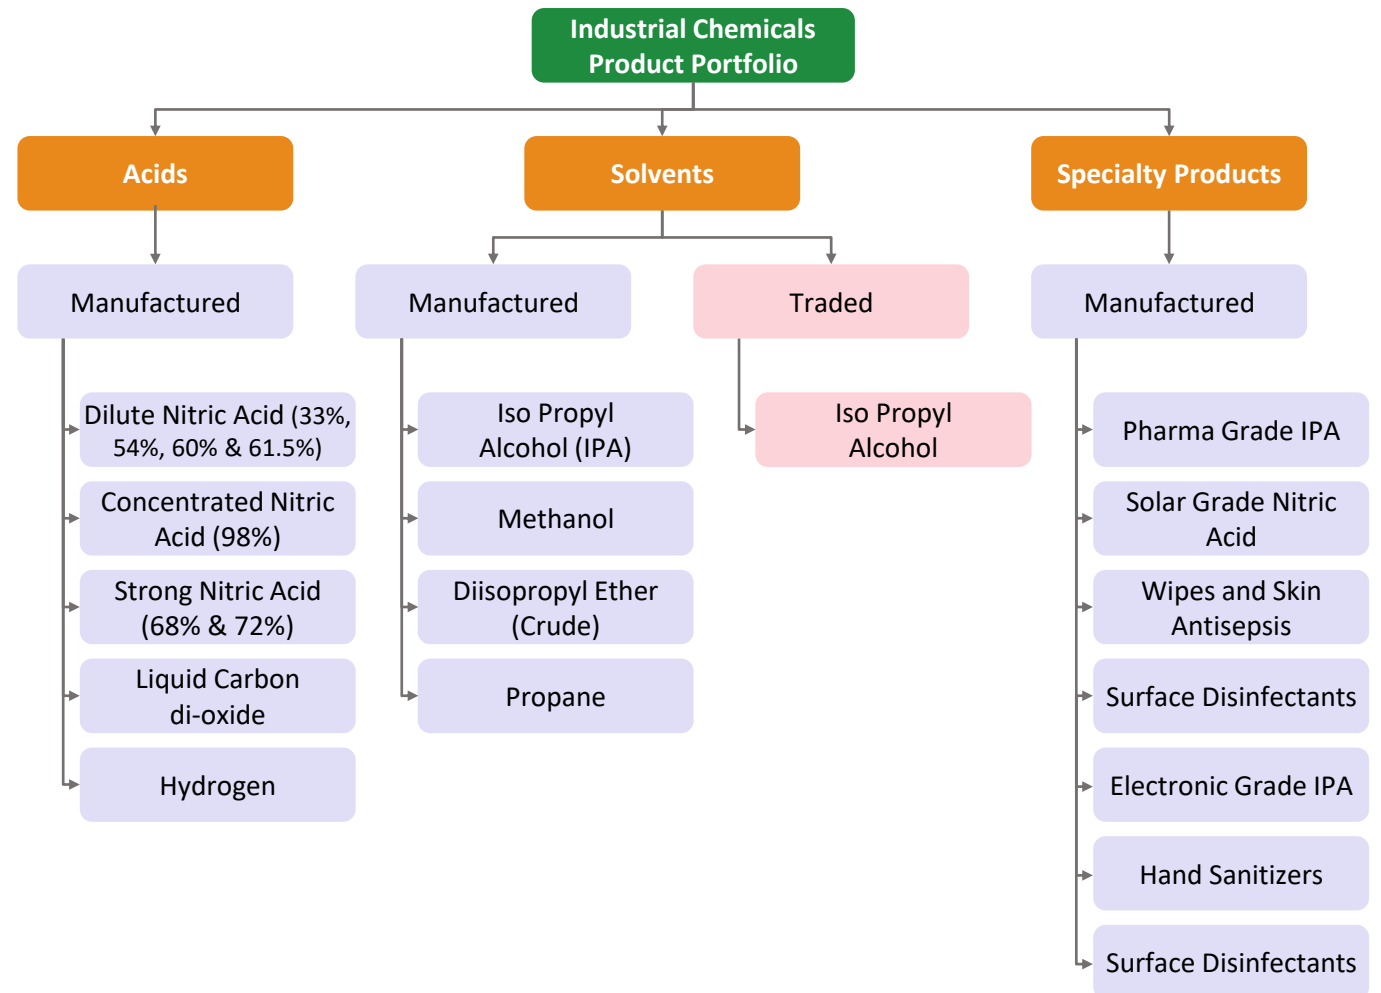

Operational Highlights

- Despite the high-base of Q1 FY23, all key market indicators are showing positive trends. Coal production at an all India level had a remarkable growth of ~10%, while Cement and Steel production, crucial indicators of infrastructure demand, recorded significant expansions at ~11% and ~14%, respectively
- Amidst market challenges, the TAN Business demonstrated its capability to meet domestic demand. Although the overall sales volumes had a marginal decline with a y-o-y de-growth of 15%, the business remained resolute in its customer-centric approach.
- Encountered adverse price fluctuations in TAN due to dumping of cheap Russian FGAN into India, as Russian products found resistance in countries sympathetic to the Ukraine cause
- Leveraging advanced technologies such as drones and AI-based blast modelling, the business significantly enhanced productivity across the entire mineral extraction process

Outlook

- Anticipating a seasonal dip in mining and infrastructure activity during the monsoon, the TAN Business is preparing for a subsequent demand pickup post Q2 across all segments.
- Focus will remain on maintaining competitive pricing while delivering key value propositions

Diversified And Focused Range of High Value Products

Better market conditions and Implementation of SGQR supported IPA Volumes

Pharma / Speciality Chemicals (IPA+NA) (Manufactured Sales Rs. Cr)

Pharma / Speciality Chemicals (Manufactured Sales Volumes MT 00)

Q1 FY24 Capacity Utilization

IPA: 111%

ACIDS: 83%

Operational Highlights

- Q1 FY24 Nitric Acid volumes increased by 7% y-o-y. NA production was impacted due to extended shutdown in WNA plant. The decrease in NSPs resulting on account of lower raw material prices
- Q1 FY24 IPA volumes increased by 87% y-o-y. Implementation of Safeguard Quantitative Restriction (SGQR) and good demand scenario lead to better volumes of IPA in Q1 FY24. SGQR was imposed on IPA dated 31st March 2023 by Directorate General of Foreign Trade, which is indeed favourable for domestic IPA manufacturers
- In the Hospital and Disinfectant range, DFPCL introduced two new world-class products, expanding the portfolio to a total of 10 specialty products. Steel grade Nitric acid for steel pickling application has completed its multi-stage commercial trials successfully and 1st commercial order received

Outlook

- Pure DIPE produced by from its own byproduct supplied to well-known companies in Pharma Industry. Market development activities and manufacturing capability buildup activities are going on.
- Proposed Capex investment for 20TPD SGNA plant is in line with proposed project timeline and aiming at completing the same by Q3 FY24
- The newly developed Electronic Grade IPA is gaining approvals from various institutions, including Government and Private entities.

Enhanced Efficiency Differentiated Fertilizer Offerings

Successful Ramp-up of Smartek – Demonstrated Ability to Develop & Scale up Value Based Solution

- Smartek is a unique product in Energy Efficiency Fertilisers category with the proprietary Nutrient Unlock Technology (NUT) which helps the farmers through –
 - Reduces fixation (lock up) & increases bio availability of Phosphorus
 - Retains nutrient & moisture within top soil, reduces soil binding (clay/sodic)
 - Organic matter acts as a feed to micro-organisms for improved nutrient uptake
 - Helps in developing profuse root system
- 50,000+ demos of Smartek have been undertaken across geographies for establishing proof of concept
- ~ 6 million farmers have used Smartek which has helped them increase in yield along with ensuring highest quality of produce and improved yield

Pioneering Crop-specific Nutrition in India through CROPTEK

- Launched 'Mahadhan Cromptek', a Crop Specific Nutrient which provide balanced and complete crop-specific nutrient to crops. This is the first crop-specific nutrient product in India
- Key features of the product includes - (1) Powered with NUT technology for better efficiency and lower environmental impact, (2) Enriched with essential secondary nutrients and micronutrients required for better crop growth and improved yield
- Successfully launched five Crop Nutrient Solution – Cromptek Cotton, Onion, Sugarcane, Groundnut and Maize

Differentiating Approach – Crop Specific and Stage Specific Grade (Solutek)

- Launched for Tomato, Grapes and Pomegranate, Solutek is a highly optimized Water-Soluble Fertiliser designed in-house after examining crop-specific requirements across different stages
 - Crop specific products are designed for specific crops with complete nutrition which leads to improvement in quality (uniformity & color of fruits)
 - Stage specific products consider stage specific requirement to give better quality output (uniformity & color of fruits)
 - Helps the farmers due to ease of application (with reduced number of products to be applied over farmer practice)

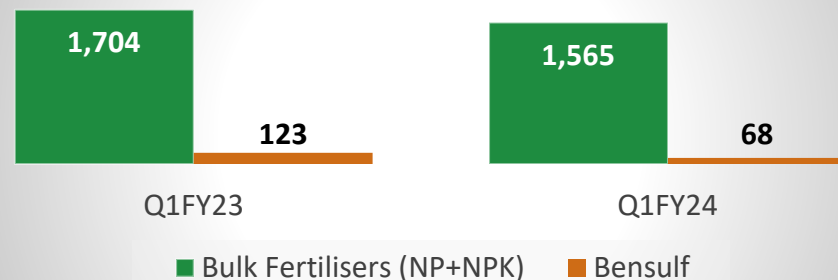

Consumption in Q2 is expected to increase on account of good advancing monsoon and increasing sowing

Fertilisers Revenue (Manufactured Sales Rs. Cr) (NP + NPK + Bensulf)

Fertilisers (Manufactured Sales Volumes MT 00)

Q1 FY24 Capacity Utilization

NP/NPK: 76%

Bensulf: 51%

Operational Highlights

- Govt. notification on subsidy was announced in May'23, which reduced the NBS from Jan-March, 2023 and further reduced the NBS w.e.f. April 1, 2023 until Sept. 30, 2023. Reduced NBS subsidy of Rs.161 Cr on channel inventory significantly impacted consolidated profitability in Q1 FY24
- The Fertiliser sector results reflect a one-time simultaneous hit of combined two quarters of the fixed subsidies reductions impacting the market pipeline inventories having the earlier RM prices. Notwithstanding this impact, the continued margin improvements at the product levels strongly indicate the preference and value of the Crop-specific innovative nutrient strategy. The delayed monsoon has also shifted the typical Q1 Kharif fertilizer movements into Q2
- Despite delayed monsoon in core markets, leading to 40-50% below-normal rainfall in key districts and lower sowing for cash crops.
- 'Croptek' fertiliser has gained significant popularity, successfully reaching 1 million farmers. Croptek achieved sales of 23,390 MT in Q1, primarily focused on Cotton, Maize, Groundnut, and Sugarcane crops
- Farmer connect programs have been instrumental in engaging 6 lakh growers, effectively enhancing crop productivity through the application of Enhanced Efficiency Fertilisers

Outlook

- Consumption in Q2 is expected to increase on account of good advancing monsoon and increasing sowing.
- Our strategic focus on enhancing efficiency with a crop-specific fertilizer portfolio imparts confidence in better crop sowing and fertiliser consumption. Further softening in raw material prices should benefit our profitability going forward

Key Milestones

A Compendium

Corporate Restructuring

Nitric Acid Brownfield Expansion

Commercial Production of
Ammonia Greenfield Plant

Long-term supply agreement
with Aarti Industries

Debottlenecking of TAN Capacity

Launched Croptek Cotton and Maize;
Solar Grade Nitric Acid

Announced Demerger of TAN & Fertiliser Businesses

Existing Corporate Structure

Resultant Corporate Structure

- Announced Demerger plan of its Mining Chemicals & Fertiliser Businesses in Dec 2022; Composite scheme of arrangement has been admitted by NCLT on January 25, 2023. Name of Smartchem Technologies has been changed to Mahadhan AgriTech Limited ('MAL') w.e.f. 20th April, 2023
- Restructuring In-Line With Strategic Shift From Commodity To Specialty; To Provide Focused Leadership, Simple Structure & Growth Potential

Key Highlights:

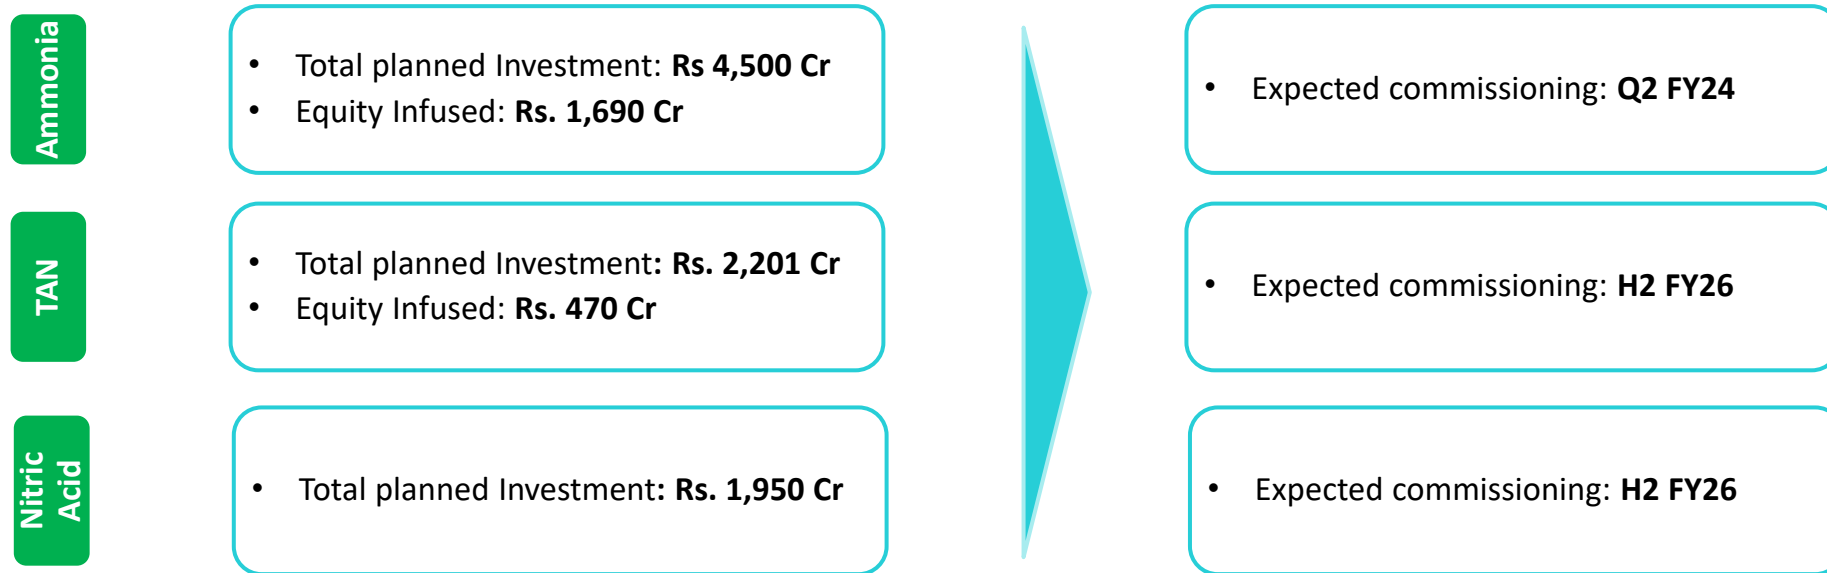

- Strategic Expansion of WNA (300 KTPA) and CNA (150 KTPA) at a project cost of Rs. 1,950 Cr
- Leveraging 40 years of credible experience in Nitric Acid, DFPCL will become 'Asia's Largest Manufacturer' of Nitric Acid post expansion
- State-of-the-art technology from leading global technology provider, combined with low emission green technologies for the first time in India
- Approximately 65% of additional CNA capacity is already tied-up under a 20-year contract

Ammonia Greenfield Plant: Commenced Commercial Production

- Commenced commercial production of the world scale 5,00,000 MTPA Ammonia Greenfield Plant
- Ultra Mega Project, supporting GOI's Aatmanirbhar Bharat Abhiyaan
- Mitigating risks for all business segments
- World-class Energy-efficient KBR KRES technology
- Forex savings through import substitution, besides beautifully aligning with the India growth story
