Subject: Disclosure under Regulation 30 LODR (Listing Obligations & Disclosure Requirements) Regulation, 2015. Establishment of a Green Energy Hybrid Power Plant Project worth Rs. 5.72 Billion.

Dear Sir/Madam,

Gujarat Toolroom Limited (**BSE: GUJTLRM**) is delighted to inform shareholders and stakeholders of a significant development in its renewable energy portfolio. The company has successfully acquired **65 acres** of land on long-term lease in Gujarat for the establishment of a cutting-edge Hybrid Power Plant.

Key Highlights:

- 1. Land Acquisition:** GTL has procured a strategically located parcel of land spanning 65 acres in Gujarat, earmarked for the construction of a Hybrid Power Plant.
- 2. Solar Panel Installation:** Approximately 60 acres of the acquired land will be dedicated to the installation of solar panels. Each acre is projected to generate 1 Megawatt of energy per hour.
- 3. Infrastructure Allocation:** The remaining 5 acres will be designated for essential power management infrastructure, including transformer stations and high-voltage line terminals.

CIN: L45208GJ1983PLC006056

GST: 24AAACG5585F120

4. Wind Turbine Configuration: The land layout plan includes provisions for the placement of 15 on-shore wind turbines, strategically positioned across every 4 acres of land. Each turbine is expected to produce 2.5 Megawatts of power per hour.

5. Total Power Output: Upon completion, the Hybrid Power Plant aims to contribute 97.5 Megawatts of clean and sustainable electricity to the grid.

Impact and Benefits:

- **Sustainable Energy Generation:** The Hybrid Power Plant signifies GTL's commitment to harnessing renewable energy sources for sustainable electricity generation.

- **Community Empowerment:** With the potential to power approximately 70,000 to 73,000 households simultaneously, the project is poised to positively impact local communities by providing access to reliable electricity.

- **Environmental Responsibility:** By reducing reliance on fossil fuels and minimizing carbon emissions, the project aligns with GTL's environmental sustainability objectives and contributes to mitigating climate change.

With an estimated project cost ranging from INR 5.72 to 6.5 Billion and a projected timeline of 3-5 years for completion before commercialization, GTL is poised to embark on a transformative journey towards a greener future. Further insights and detailed information will be shared in a dedicated project report cum investor presentation, underscoring GTL's transparency and commitment to stakeholder engagement.
