CRISIL REPORT

Stressed assets of NBFC-MFIs fall to 14% in March

FE BUREAU
Mumbai, May 30

STRESSED ASSETS OF non-banking financial companies-microfinance institutions (NBFC-MFIs) has declined to around 14% as of March 2022 on account of improved economy and increased collections, Crisil Ratings said in a report.

The current stressed assets of NBFC-MFI, which include loans that were unpaid for more than 30 days, declined by 800 basis points in March from 2.2% in September 2021. However, the stressed assets are significantly higher than the pre-pandemic levels of 3%.

"The reduction in stressed assets, along with improved collection efficiencies mark a recovery in the asset quality of NBFC-MFIs, supported by economic revival, limited impact of the omicron variant, and acclimatisation to the post-pandemic 'new normal', the report said.

"The microfinance sector restructured 10% of its loan book...in the wake of the second Covid-19 wave, compared with a mere 1-2% in the first. The extent of this varied between entities from 2% to 17% and had a strong correlation with regional impact of second wave, which had affected the informal economy and rural India more drastically," Krishnan Sitaraman, senior director and deputy chief ratings officer, CRISIL Ratings, said in the report.

StrideOne raises ₹250 cr

SALMAN SH
Bengaluru, May 30

STRIDEONE, A FINANCIAL services platform for start-ups launched by the founders of venture debt fund Stride Ventures, has raised ₹250 crore via a mix of equity, led by Elevar Equity, and debt from top Indian banks.

The financial services firm focuses on providing customised financial and credit solutions to MSMEs and supply chain partners of various start-ups. StrideOne has built a novel credit distribution model that provides access to carefully customised growth capital for MSMEs and entrepreneurs, especially focusing on markets with low credit penetration.

Using the embedded finance model, StrideOne will offer a direct line of credit to vendors, suppliers and other

businesses that work directly with high-growth tech start-ups. The company uses its own NBFC licence for modelling these loan services.

With its new credit distribution model for start-ups, StrideOne also enables its lending partners to access previously untapped markets and vendors with minimal credit history. Loans are typically underwritten using past history of transactions with vendors, suppliers and partners of start-ups, allowing lenders to better calculate credit repayment quality or creditworthiness. Doing so has enhanced StrideOne's risk efficiency, keeping the customer acquisition cost at zero.

StrideOne said that it has witnessed a healthy growth momentum, becoming profitable within just six months of operations and accumulating an AUM of ₹200 crore.
