French aerospace major Safran upbeat on India

Executes a huge pipeline of orders; plans to expand facilities, set up a €150-m MRO unit

V RISHI KUMAR

Hyderabad, January 21
French aerospace and defence major Safran is upbeat on India as it executes a huge pipeline of orders across civilian, defence and space and plans to expand facilities and set up a new maintenance, repair and overhaul (MRO) unit.

The €21 billion revenue company, which supplies its engines for Rafale fighter jets and LEAP family of engines for civil aviation, expects to step up sourcing to €200 million as it expands its supplier base across SMEs.

Alexandre Ziegler, Senior Executive Vice President, In-

ternational and Public Affairs, Safran Group, said, "I see India and France as strong partners and Safran, with its wide range of customers, is upbeat on the business prospects both for supply of engines in civilian aircraft and also for defence, including fighter jets and helicopters."

High expectations

"We have over 600 commercial planes flying in India with our engines and have an order book of over 500 engines, which we expect to deliver over next few years. Though the aviation sector has been hit by the pandemic, we be-

Alexandre Ziegler, Senior Executive VP International and Public Affairs, Safran Group

lieve that it will bounce back by 2022-23. Towards this, we have set up a manufacturing facility in Hyderabad and are considering setting up of a MRO facility in India," he told BusinessLine. The MRO facility could entail an investment outlay of about €150 million. Ziegler said, "Safran has a presence in India of over 60

years in the core markets of aerospace and defense. It has a workforce of over 600 employees in the country. While expanding Safran's footprint in India, it is committed to the "Make in India" programme fostering the development of partnerships with a wide array of customers." In February 2019, Safran had announced plans to set up a new plant in India near Hyderabad for the LEAP engines. During a visit to the Aero India Show, Philippe Petitcolin, Chief Executive Officer of Safran, had outlined plans to make parts for the LEAP turbofan engine from CFM International.

Production rate
When in its cruise mode by 2023, the plant is expected to

deliver 15,000 parts per year to support the LEAP's sustained production rate. The new-generation LEAP entered service in 2016 and powers Airbus A320neo and Boeing 737 MAX commercial airliners.

The India plant is aimed at developing a global supply chain to support the fast-paced ramp-up in LEAP production.

Safran had already announced in 2018 the construction of a Safran Electrical & Power factory to produce LEAP engines harnesses and Rafale fighter electrical wiring interconnections systems. It is the largest provider in India for turbo-shaft engines for helicopters and powers 100 per cent of heli-

copters manufactured by Hindustan Aeronautics Limited.

India is also the largest installed base worldwide for Safran with more than 1,200 INS (Sigma family) in use and being the reference of Indian armed forces.

Indian airforce

The company is supporting the Indian airforce with the M53 engine which is integrated in the Mirage 2000 and now the M88 with is the engine of the Rafale fighter aircraft.

"India is also a development hub for Safran. Currently has 600 employees and plan to expand the employee base with the new cluster in Hyderabad," he said.

SBI Card net down 52% in Q3

Total income for the quarter under review fell to ₹2,540 crore

OUR BUREAU

New Delhi, January 21

SBI Card, the country's largest pure-play credit card issuer, on Thursday reported a 52 per cent decline in net profit for the third quarter ended December 31, 2020, at ₹210 crore (₹435 crore in the same quarter last fiscal).

Total income for the quarter under review declined 1 per cent to ₹2,540 crore (₹2,563 crore). It maybe recalled that SBI Card had, in the previous quarter ended September 30, 2020, recorded a net profit of ₹206 crore.

For the nine months period

ended December 31, 2020, the company has now reported a 30 per cent decline in net profit at ₹809 crore (₹1,161 crore). Total income remained flat at ₹7,245 crore (₹7,242 crore).

A statement issued by the company said that SBI Card business has reached pre-Covid levels.

Asset quality

The gross non-performing assets were at 1.61 per cent of gross advances as on December 31, 2020, against 2.47 per cent as on December 31, 2019. Net non-performing assets were at 0.56 per cent against 0.83 per cent as on December 31, 2019. Pro forma Gross NPA as on December 31, 2020, stood at 4.51 per cent, and Net NPA at 1.58 per cent.

Covid-19: IATA develops app for air travel

'IATA Travel Pass' will create a 'digital passport' to verify passengers' pre-travel test details

TE RAJASIMHAN

Bengaluru, January 21
While passengers are still scared to travel by air due to the fear of getting infected by Coronavirus, a mobile app - IATA Travel Pass - developed by the International Air Transport Association will help them easily and securely manage their travel in line with government requirements for Covid-19 tests or vaccines. IATA is a trade association of the world's airlines.

The app will enable airlines to create a 'digital passport' to verify passengers' pre-travel test or vaccination information; share the test and vaccination certificates with authorities and airlines and manage all travel documentation di-

gitally and seamlessly throughout the travel experience.

Establishing confidence

The Travel Pass is built in modules as an industry solution based on open-source standards. It can be used in combination with other providers or as an end-to-end solution. The most important thing is that it is responsive to industry needs while enabling a competitive market, said IATA.

New partners
Two Gulf-based airlines - Emirates and Etihad - are the first to partner with IATA globally on the use of Travel pass, which has been developed as four independent modules that can

Aeroplanes parked at the Chennai airport during the lockdown PTI

interact with each other.

These modules cover registries for regulatory entry requirements and labs/test centers, verified certificate issuance, digital identity and the possibility for passengers to share their test results along their journey via their mobile device.

These modules can work together as one complete end-to-end solution. They can be used separately to comple-

ment systems that others are building.

IATA has developed these modules to ensure they are interoperable with other industry solutions, says a statement.

'Re-open borders'

Nick Careen, IATA Senior Vice President for Airport, Passenger, Cargo and Security said, "Our aim is to give all governments the confidence to re-

open borders to travellers based on verified vaccine and testing data. As borders re-open, Travel Pass will be further enhanced with more capabilities to meet all governments testing or vaccination verification requirements."

Emirates will implement the first phase in Dubai in April for the validation of Covid-19 PCR tests before departure.

It's customers travelling from Dubai will be able to share their Covid-19 test status directly with the airline even before reaching the airport through the app.

Etihad said that the Travel Pass will initially be offered to its guests on selected flights from Abu Dhabi in the first quarter of 2021.

If successful, the pass will be extended to other destinations on the Etihad network.

Fireside Ventures' second fund raises ₹863 crore

OUR BUREAU

Bengaluru, January 21

Multi-stage venture fund Fireside Ventures, which has invested in start-ups like BoAt and Bombay Shaving Company, has announced the close of its second fund (Fireside Fund II) at ₹863 crore (\$118 million).

The Fireside Fund II has marketed investors such as Fund of Funds for Startups (FFS) operated by SIDBI under the aegis of the Government of India's initiative Start-up India Action Plan.

Investment Corporation of Dubai, Nippon India Digital Innovation AIF, Bajaj Holdings and Investment LTD, ITC L'OREAL, Pidilite group, Premji Invest and a large US university endowment, a statement from the venture fund said.

The market-cap of the venture fund has crossed \$1 billion.

"We are now eager to go all out

and partner with young Indian entrepreneurs who are creating exciting new digital-first brands across the consumption spectrum and are consciously building brands that focus on good for consumers and good for the world," Kanwaljit Singh, Founder & Managing Partner, Fireside Ventures, said. Fireside Fund II is marketing its second fund to 15-20 consumer brand start-ups while continuing to keep its focus on digital-first brands.

Fireside Fund II received interest from over 1,500 companies so far and deeply evaluated over 300 of them before making the four investments. The Fund II portfolio companies to date are - Fable Street, SARVA Gyaan, Gynoveda, and Slurpp Farm. Fireside achieved the final closing of its first fund in February 2018 with a corpus of ₹340 crore.
