10-SECOND RATES AT ₹30 LAKH VS ₹15 LAKH IN 2019

Cricket World Cup spot advertising rates double

VIVEAT SUSAN PINTO
Mumbai, September 25

AS CRICKET FANS wait for the start of the 2023 Men's ODI World Cup next week, advertising on the property is gaining traction. According to media industry insiders, spot advertising rates for India matches and knockout matches on Star Sports have more than doubled since the 2019 Cricket World Cup, reaching ₹30 lakh per 10 seconds. Star Sports is part of the Disney Star network, which is broadcasting the tournament on TV and digital this year.

Disney+ Hotstar is also going for the kill, since the tournament will be broadcast for free on mobile devices. The asking rate on digital for the 2023 Cricket World is ₹230-250 per thousand impressions or cost per mille (CPM), say media industry sources. This again is 64-67% higher than the digital rate during the 2019 Cricket World Cup, which was around ₹140-150 per thousand impressions.

A mail sent to Disney Star elicited no response. But media experts say that the 2023 Cricket World Cup is happening during the Dusshera-Diwali period, which has excited advertisers.

On Monday, the broadcaster said that there was a 34% growth in television ratings for the Asia Cup 2023, compared to 2018. Quoting

ON A STRONG WICKET

■ Disney Star using digital and TV to reach urban and rural consumers during Cricket World Cup

₹2,500 cr riding on Cricket World Cup this year, nearly twice the amount spent in 2019

■ Total viewing time at 73.5 billion minutes, excluding final match; up 75% versus 2018 edition

266 million viewers tuned in to Star Sports live broadcast of Asia Cup, excluding final match

■ Asia Cup, which concluded on Sept 17, saw 34% growth in TV ratings versus 2018 edition

data from the Broadcast Audience Research Council of India (BARC), Disney Star said a record 266 million viewers tuned in to the Star Sports live broadcast of the tournament, excluding the final match held on September 17. India defeated Sri Lanka to win the Asia Cup for the eighth time.

Total viewing time for the tournament increased by 75% compared to the previous edition in 2018, with over 73.5 billion minutes watched, excluding the final match, Disney Star

said. "The cricket season has given a fillip to the festive quarter this year," says Sajal Gupta, CEO at Gurugram-based Kiaos Marketing.

Media industry estimates say almost ₹2,500 crore of advertising money is riding on the ODI Men's World Cup this year, nearly twice the amount spent four years ago. Among the sponsors who've tied up with Disney Star network this year include Mahindra & Mahindra, Hindustan Unilever, Coca-Cola, Nerolac

Paints, Dream11, Amazon and United Breweries, media industry sources said.

Disney Star is in discussions with more companies as advertiser interest continues to remain high. The broadcaster is targeting both rural and urban consumers using a combination of television and digital, it told media agency executives in its presentations to them. The broadcaster has also offered over 75 targeting options for advertisers, based on demographics, geography, language and other factors. This will be rolled out on TV and digital.

"We see a strong synergistic resonance between our SUVs and tractor brands and the vibrant spirit of Indian cricket. Through this sponsorship and our upcoming engagements, we aim to create cherished memories and strong bonds with our customers," Rajesh Jejurikar, executive director & CEO (Auto & Farm Sectors), Mahindra & Mahindra, said.

Coca-Cola has already unveiled its Cricket World Cup campaign for Brand Thums Up this month, featuring Team India players Ravindra Jadeja, Jasprit Bumrah, Mohammed Siraj and Team India captain Rohit Sharma.

The campaign called 'Thums Up Utha, India Macha' focuses on the relentless determination of players, Arnab Roy, vice-president, marketing, Coca-Cola India and South West Asia, said.

ABHISHEK KAPOOR, GROUP CEO, PURAVANKARA

'We have a healthy pipeline of launches this year'

core bracket. We have achieved our pre-Covid level of sales. Also, there is hardly any ready-to-move-in inventory left.

Luxury and plotted developments seem to have caught fancy of buyers and realtors alike. How do you view it?

Luxury is doing extremely well. But the term luxury varies from market to market. Bigger-sized homes are gaining traction across cities. We have couple of projects in the category in select cities.

Puravankara, a Bengaluru-based developer, has lined up launches of 12 residential projects this year. Abhishek Kapoor, group CEO, tells Bindu D Menon that the company has a healthy cash flow on the back of strong demand for residential projects. Excerpts:

How do you see the real estate market today?

The real estate sector is seeing a consolidation so most developers are expected to do well. The second half of the year is always better owing to the festive season demand. Our business is showing improved performance. Sales were up 119% on a year-on-year basis at ₹1,126 crore in the April-June quarter and average realisation per sq ft stood at ₹8,277.

What is the inventory position?

For established developers, inventory is low. For instance, Bengaluru has less than nine-month of inventory. Our new launches have seen a phenomenal response.

We have already sold approximately 630 out of the 780 residential apartments in the ₹65-1

Serentica secures ₹5,600-cr funding from REC and PFC

SERENTICA RENEWABLES ON Monday said it has raised ₹5,600 crore funding from state-owned firms REC and PFC. It has raised ₹3,000 crore debt funding from REC and ₹2,600 crore debt funding from PFC, the company said in

a statement. "This transaction is in line with REC's expanding role in funding green projects and position itself as the focal agency for energy transition," Vivek Kumar Dewangan, Chairman & Managing Director, REC said. — PTI

Proxy advisory firms differ on Finolex AGM proposals

GEETA NAIR & RAJESH KURUP
Pune/Mumbai, September 25

PROXY ADVISORY FIRM InGovern Research Services has recommended shareholders of Finolex Cables to "defer" two resolutions, including reappointment of Deepak Chhabria as executive chairman for a five-year term. The firm also sought to defer payment of commission to non-executive directors.

On its part, Finolex Cables termed the suggestions "biased". However, another proxy advisory firm, Institutional Investor Advisory Services (IIAS), green-lighted all of the company's six resolutions, which included adoption of financial statements, declaring of final dividend of ₹7 per share and reappointment of directors. The advisories were issued ahead of the Pune-based company's AGM on Friday (September 29).

According to InGovern, there is no cap on the overall compensation being paid to Chhabria, and the perquisites and other retirement compensation have not been quantified. While the bulk of the compensation would be the commission component, the performance criteria to arrive at the commission have not been clearly outlined.

Further, there is no mention of any exercise undertaken to

AHEAD OF AGM

■ InGovern Research Services has recommended shareholders to 'defer' two resolutions

■ Institutional Investor Advisory Services green-lighted all of the six resolutions ahead of Finolex AGM on Sept 29

benchmark the compensation being paid to Chhabria to industry peers, it said. The advisory firm has sought shareholders to defer the proposal and represent it with a proper 21 days' notice period. The board of Finolex Cables had proposed to reappoint Deepak Chhabria as executive chairman for a five-year period from July 1, 2023-June 30, 2028. Chhabria was appointed full-time director in 1986 and later took over as the executive chairman on July 1, 2013. InGovern also recommended shareholders to defer payment of commission to non-executive directors. InGovern also cited inadequate notice time to shareholders and the changes in resolutions through a corrigendum, as reasons.

Finolex Cables had

published its first notice on September 4, and a corrigendum on September 16, which was only 13 days before the AGM instead of the stipulated 21 days' prior notice. Detailed disclosures were also not made, the proxy firm said.

In its corrigendum issued on September 16, the firm did not add any additional items, but only made a few insertions in the existing resolutions.

This was done to provide shareholders better clarity and transparency and as a good corporate governance practice, it said in an email reply to FE.

AI, ML adoption can boost profitability for IT firms: Study

AYANTI BERA
Bengaluru, September 26

At least 57% of respondents say AI, ML are key for near-term goals

MORE THAN HALF of tech professionals across the world, mostly the senior leadership, believe that adopting technologies like artificial intelligence (AI) and machine learning (ML) will be important in achieving business goals over the next three years. A study by KPMG showed that 57% of their 2,100 respondents, which primarily include C-suite executives, board members, department heads and directors, believe AI and ML are important for their near-term objectives.

Indian tech companies have been doubling down on AI research and integration of machine learning into their platforms. Wipro, for instance,

committed \$1 billion in investment earlier this year to advance AI development.

The study added that AI and ML are bigger priorities for businesses, where investment in technology is driving profitability faster than the peers. More than two-thirds of these companies said AI and ML will be crucial for their short-term business goals. However, there are concerns around ethics and regulations in AI use. The study showed that only 15% of the respondents were proactive with their AI deployment compared to the 40% last year.

Nurturing Progress. Setting Milestones

8th Annual General Meeting of NMDC Steel Limited

Dear Shareholders,

With great pride, I welcome you to the 8th Annual General Meeting of your Company, the first AGM post the demerger; after the listing of equity shares on BSE, NSE and CSE; and since the Company entered the glorious league of Indian Steelmakers by operationalizing the Steel Plant. The global economy is slowing, and growth trajectories are diverging across regions amidst moderating but above target inflation, tight financial conditions, simmering geopolitical conflicts, and geo-economic fragmentation. While the global growth is projected to fall from 3.5 percent in 2022 to 3 percent in both CY2023 and CY2024 on an annual average basis, the domestic economic activity is maintaining resilience. It is expected that India will grow at 6.1-6.5% in FY24.

Global Steel production stood at 1885 MT in CY 2022 where China accounted for ~54% of global crude steel production, followed by India, Japan, US, and Russia collectively producing ~19%. Though the global steel production observed 4% decline compared to CPLY (CY21 global production - 1962 MT), India's production increased by 5.5% during the same period (from ~118 MT in CY21 to ~125 MT in CY22). India's per capita consumption of steel is growing at the highest rate, after China, amongst other countries across the globe. India has exhibited an appreciable growth with a CAGR of 3.5% from 70.7 Kg in 2018 to 81.1 Kg in 2022 against a global decline of 0.2% which majority got affected due to the impact of Covid-19. With increased push on infrastructure, housing, multi-modal connectivity projects amongst others, and increasing urbanization driving the consumption, the domestic steel industry's future remains healthy. The Government of India charted a roadmap to augment India's Steel production capacity to 300 MTPA by 2030.

To fulfill this vision, green field steel plants were being promoted in mineral rich states of Chhattisgarh, Jharkhand, Karnataka and Odisha. In honour of NMDC's long standing relationship with Chhattisgarh and its people, we began our journey to set up a 3 MTPA capacity greenfield Integrated Steel Plant at Nagarnar, Chhattisgarh.

With the intent to bring more value to the stakeholders, the Cabinet Committee on Economic Affairs, in October 2020, accorded in-principle approval for demerger of NISP into a separate company.

Duly following procedure as per statutory provisions, Ministry of Corporate Affairs (MCA) vide Order dated 6th October, 2022 granted approval to the Scheme of Arrangement for demerger of NMDC Iron & Steel Plant business undertaking from NMDC Limited ("Demerged Company") to NMDC Steel Limited ("Resulting Company"). The appointed date for the demerger was 1st April, 2021 and the Scheme was operative with effect from 13th October, 2022.

The Demerged Company, NMDC then issued equity shares in the ratio 1:1 to its shareholders, unlocking their inherent wealth. These equity shares were listed on NSE, BSE and CSE and admitted to dealings with effect from 20th February, 2023. Accordingly, your Company, erstwhile a Subsidiary of NMDC, transformed itself into a listed entity with equity base of Rs. 2,930 crore.

The Company had not commenced its commercial production as on 31st March 2023, hence no profit/loss was declared for the financial year 2022-23. However, with the steady resolve of the Management, employees and workmen and with constant support from the Administrative Ministry and NMDC Management, the Steel Plant achieved the following milestones - NSL commissioned its Coke Oven Battery 1 on 28th October 2022 and Coke Oven Battery 2 on 24th April 2023. The two coke oven batteries, 7 meter tall and with 67 ovens each, can produce gross coke in the order of 1.76 million tonnes annually. Our 460 square meter Sinter Plant was put on hot trails on 19th April 2023. This Sinter Machine has a production capacity of 4.74 MTPA with a waste heat recovery circular cooler and silt burner in the furnace to minimize heat consumption in the sintering process. NSL started producing industrial gases from its Oxygen Plant on 21st April 2023 and the Hot Strip Mill was up and running on 30th June 2023.

Our Steel Plant is home to India's second largest blast furnace in volume, 4500 cubic meters with Paul Wurth top charging facility. Named after the native deity, the *Maa Danteshwari* Blast Furnace was lit up on 12th August 2023 and Hot Metal production from NMDC Steel Limited started on 15th August 2023. The torch towards Steel, blowing-in of one of the largest blast furnaces in the country, set the ball rolling for final commissioning.

Soon thereafter, the Steel Melting Shop was operationalized on 21st August 2023. This Steel Melting Shop consists of two Convertors with combined blowing facility to reduce oxygen consumption; two Hot Metal Desulphurisation Stations to reduce blowing time and flux consumption; two Ladle Refining Furnaces to raise temperature and adjust the chemical composition of molten metal; and one RH Degasser to enable production of high-grade Steel.

The Steel Plant's Thin Slab Castor started on 24th August 2023 with a 100% hot charging facility of thin slab through a tunnel furnace to the Hot Strip Mill to minimize energy consumption. This Plant is designed to be one of the country's most energy efficient and environmentally conscious Steel Plants, in tandem with the Government of India's vision of producing Sustainable Steel.

On 24th August 2023, NMDC Steel Limited produced its final product - the HR Coil, only 9 days after the production of Hot Metal. Coming as it does from a mining major with no prior experience of steel making, this achievement was historic.

The Plant, once completely operational, will be producing an impressive array of products viz. HR Plates, API - 5L, Quality Plates, HR Sheets, HR Coils, High Carbon Steel, Silicon Steel and Automotive Steel.

The integrity and quality of Steel from NSL will speak of the diligence of every person on this Project.

On behalf of the Board, I extend our deep gratitude to the administrative Ministry i.e. Ministry of Steel, Government of India, Chhattisgarh State Government, NMDC Management, MECO, and our technology providers - BHEL, TATA Projects, Primetals, Danieli Corus, Thermo, BEC, and Linde for their unfinching support to the Company, which has enabled NSL to grow from strength to strength. This achievement would not have been possible without the support of the Steelmakers of India - SAIL, JSW, and JSPL, who stood with us through the commissioning of the Steel Plant.

I am also grateful to the Ministry of Corporate Affairs, SEBI, BSE, NSE and CSE, shareholders, bankers, lenders, creditors for their constant support in this journey. The Board would also like to

acknowledge the dedication of the Company's workforce and appreciate the resilience and commitment shown by them in commencing the Plant operations.

I am happy to inform you that Gross Coke, Hot Metal, Pig Iron, Liquid Steel, and HR Coil is being produced at NSL as per schedule and the ramp up plan is also in order.

The NMDC Steel Plant is a modern sophisticated 3 MTPA capacity Integrated Steel Plant, with a compact layout utilizing only 1800 acres of land, at a sanctioned cost of INR 23,840 crores. With the momentum we have and the support of all our stakeholders, we are geared up to put the Steel Plant in full swing, so as to create value for all our stakeholders and produce Sustainable Steel for India.
