# No time wasted in allocating relief material, govt clarifies

Says high-burden states with higher caseload are a priority

RUCHIKA CHITRAVANSHI & DILASHA SETH  
New Delhi, 4 May

Amid criticism of slow distribution of foreign aid coming into the country to help out with the Covid crisis, the government on Tuesday said it had put in place a streamlined and systematic mechanism for allocation of the support supplies and other relief material received by India for effective distribution.

The medical infrastructure of 38 institutions across 31 states has been strengthened through the supplies received by India, the health ministry said. The ministry also issued a statement to clarify that the government did not waste time in the effective allocation and distribution of the pandemic relief material.

The support equipment includes BiPAP Machines, oxygen concentrators, oxygen cylinders, PSA oxygen plants, pulse oximeters, drugs including Favipiravir and Remdesivir, PPE kits, N-95 masks, and gowns.

There are 24 different categories of items numbering nearly 4 million that have been distributed to 38 institutions in different states and are either in transit or have been received.

A senior government official said the Customs had been working diligently to ensure swift clearance of the relief

**Kuwait releases a shipment of 282 oxygen cylinders, 60 oxygen ventilators, and other medical supplies to help India tackle the rise in Covid cases**

PHOTO: PTI

material. "After clearance, it is up to the ministry of home affairs and ministry of health to carry out the distribution activity. There may be a coordination issue there."

This grant in aid is being prioritised for high-burden states with a higher caseload. The government has said special focus can also be on states considered as medical hubs of the region, which have a patient in-flow from neighbouring areas.

"The allocations are done keeping in mind equitable distribution and the load on tertiary health care facilities. In the first few days, the states were covered via the AIIMS and other central institutions where the critical care patients load is high and where the need is highest," the ministry said.

These goods have been given high priority for clearance by the customs

systems for processing over other goods. Central Board of Indirect Taxes and Customs (CBIC) Chairman M Ajit Kumar, along with board members, on Tuesday held a meeting with chief commissioners, Customs zones and Covid-19 nodal officers to sensitise them about the requirements of IGBT exemption granted to Covid-related relief goods.

The central body has instructed all principal chief commissioners and other field officers that a large number of Covid-19 related consignments are anticipated to arrive in the coming days. The CBIC has assigned 24 such nodal officers across the country to expedite clearances.

"The Customs formation may proactively take action for speedy clearance of such consignments. It is requested that necessary instructions be issued to the assessing offices to clear all such

## FREIGHTERS, EXTRA FLIGHTS BRING MEDICAL AID HOME

Domestic and foreign airlines are uplifting medical equipment from Asia, Europe, and the US as a surge in Covid-19 cases has led to an increased demand for the products. While Air India has carried 190 tonnes of medical equipment, SpiceJet has airlifted more than 6,850 oxygen concentrators from China, Hong Kong, Singapore and the US in the last two weeks. Cathay Pacific also operated 23 cargo only flights with its passenger aircraft to India. "Our shipments include medical supplies and essential items," Cathay Pacific said.

BS REPORTER

Covid-19 relief material expeditiously," said the instructors. It asked field formations to make every possible effort to work in close coordination with the state authorities.

The government has reduced the IGBT for the import of oxygen concentrators for personal use from 28 per cent to 12 per cent.

Senior officers have been told to monitor the pendency of Covid-related imports while ensuring handholding of the trade to comply with the requirements beforehand.

A cell was also created last week in the health ministry to coordinate the receipt and allocation of foreign Covid relief material as grants, aid and donations. It has among its members officials from various ministries including education, civil aviation, external affairs among others.

# Solar manufacturing PLI fails to excite firms

SHREYA JAI  
New Delhi, 4 May

The ₹4,500-crore performance-linked incentive (PLI) for solar manufacturing has not met industry expectations.

This is because domestic manufacturers could end up getting barely 3-5 per cent of the sale value of their solar cells and modules as incentives through this scheme.

With the Centre claiming record clean energy capacity of 450 Gw by 2030, the scheme aims to support end-to-end indigenous solar power capacity in the country.

"Industry calculations indicate that in terms of capital expenditure, PLI would be in the range of 15-25 per cent. The incentive on capex will come after five years. The incentive on sales is variable as no one knows how much they will sell. For foreign investors, the incentive is further reduced due to Customs duty," said a senior executive of a leading solar company.

The Union Cabinet, last month, approved the proposal of the ministry of new and renewable energy (MNRE) for ramping up domestic manufacturing of solar photovoltaic (PV) panels under the PLI scheme.

The proposed scheme is likely to create an additional 10,000 Mw capacity of integrated solar PV manufacturing plants in the country.

According to the guidelines issued by the MNRE, manufacturers will be selected through a transparent competitive bidding process. PLI will be disbursed for five years, post the commissioning of manufacturing plants, on sales of high efficiency solar PV modules.

DAM Capital, in a recent note, estimated that the capital required for 1 Gw of cell and module is expected to be

## GREEN ENERGY

PLI as percentage of module cost and as percentage of capex

Type of manufacturing	PLI as % of module cost	Estimated capital cost per GW (₹ cr)	PLI as % of capex
Cell + Module	Around 3.5	850	Around 24.5
Wafer + cell + module	Around 4.6	1,400	Around 20.0
Polysilicon + wafer + cell + module	Around 5.75	2,200	Around 16.0

Note: Base PLI Rate = ₹ 3.00/Watt (at Module Efficiency of more than 21.5% and upto 23%, and Temperature coefficient of -0.4 to -0.3). Price of a Module has been taken as ₹20/Watt-peak. Source: MNRE guidelines for PLI scheme, industry calculations

₹1,500 crore. The scheme could see 8-10 Gw of solar cell and module manufacturing capacity addition in the country.

"Prima facie, based on guidelines, we believe the scheme is highly beneficial to large players with experience. Adani Enterprises and Tata Power, for instance, have 1.1 Gw and 0.4 Gw of solar cell and module manufacturing capacity. We also expect Coal India and BHEL to participate in the auction among listed entities," said the note. It added that domestic manufacturers would get additional support from basic Customs duty (BCD) on solar imports.

The Centre will impose 40 per cent BCD on imported solar cells and modules from April 2022 in order to support domestic solar manufacturing. Close to 85 per cent of India's solar capacity is built on imported cells and modules, majority of which come from China.

"BCD offers much better incentive to a foreign player to come and manufacture in India, rather than PLI. Under the PLI, the incentive is very less compared to their capex. For large scale manufacturers, neither the PLI scheme nor BCD is beneficial. Established solar component makers are based in special economic zones (SEZs) and the Centre has not offered any BCD exemption to them," said a senior industry executive.

Leading players such as Adani Solar, Vikram Solar, and Waaree Energy are situated in SEZs, and thereby, come under the duty regime. Manufacturing units in SEZs are considered on a par with foreign companies. Hence, Customs duty is imposed on them too. According to industry data, of the 3,100 Mw of cell manufacturing capacity in India, 2,000 Mw is situated in SEZs. In module manufacturing, 3,800 Mw of the 9,000 Mw is inside SEZs.

# RBL Bank net falls 34% in Q4

Private sector lender RBL Bank has reported a 34 per cent drop in net profit in the March quarter of FY21 due to higher provisions and a drop in net interest income (NII). Its profit after tax for the reporting quarter stood at ₹75 crore against ₹114 crore in the year-ago

period. The operating profit of the bank, however, was up 17 per cent year-on-year (YoY) to ₹877 crore.

The bank's NII was down 11 per cent YoY in Q4FY21 to ₹906 crore but other income was up 38 per cent to ₹688 crore. The net interest margin of the lender

stood at 4.19 per cent, down to 2 basis points (bps), sequentially. NIM was impacted due to an interest reversal of approximately 50 bps as well as because of the excess liquidity that the bank has been carrying on its balance sheet.

The bank made provisions to the tune of ₹766 crore in Q4FY21, up 27.45 per cent YoY and 25.6 per cent sequentially. In Q3FY21, the bank had set aside

₹601 crore as provisions.

Having recognised and adequately provided for the stress emanating from the identified pool of corporate accounts in FY20, our slippages during FY21 were primarily, almost 80 per cent in the retail segment, owing to the impact of Covid pandemic, said Vishwvair Ahuja, MD & CEO, RBL Bank.

## 5G trials...

5G technology is expected to deliver improved user experience in terms of data download rates (expected to be 10 times that of 4G), up to three times greater spectrum efficiency, and low latency to enable Industry 4.0.

Applications are across a wide range of sectors such as agriculture, education, health, transport, traffic management, smart cities, smart homes, and multiple applications of the Internet of Things. The DoT has said the trials will be isolated and not connected with the existing networks of telecom companies. Trials will not be commercial and the data generated will be stored in India.

## HC notice...

"There is a Supreme Court order and now we are also saying that you will have to supply 700 MT oxygen daily to Delhi right away by whatever means. We would not hear anything except compliance," the bench orally observed. The Bench, which heard for nearly five hours the matter relating to the oxygen crisis and other Covid-related issues that Delhi is grappling with, said, "We see grim reality everyday of people not able to secure oxygen or ICU beds in hospitals", which have reduced beds due to the gas shortage.

We, therefore, direct the central government to show cause why contempt be not

initiated for not only non-compliance of our order of May as also of order of the Supreme Court dated April 30. To answer the said notice, we direct the presence of Piyush Goyal and Sumita Dawra (senior central government officers) tomorrow," it said.

The Bench also said just because the Delhi government earlier demanded less oxygen, therefore the people of this city should suffer and the Centre would ignore the revised requirement and will let people die. On the submission of ASG Chetan Sharma that the compliance affidavit of April 30 order would be filed in the Supreme Court by Wednesday morning, the Bench said, "We fail to understand what good a compliance affidavit will be do when as a matter of fact 700 MT of oxygen is not delivered to Delhi. Even the earlier allocated 490 MT and revised 590 MT is not delivered even for a single day."

Sharma submitted that the apex court had not directed supply of 700 MT of oxygen per day to Delhi. The court disagreed with him and said a plain reading of the top court's order showed that it had directed the central government to supply 700 MT of liquid medical oxygen by making good the deficit. The Bench noted that the apex court's order recorded Delhi government counsel's submission that as against the demand of 700 MT of oxygen per day, manufacturers had been able to supply only 440 MT.

## Tata Sons...

This has raised expectations of

a sharp turnaround in its earnings in FY22, leading a rally in its share price. Tata Motors closed Tuesday with market capitalisation of around ₹96,000 crore, up from around ₹23,500 crore at the end of FY20.

Tata Sons' 44 per cent stake in Tata Motors is now worth ₹42,000 crore, up from ₹9,300 crore at the end of March last year. The analysis is based on the book value or investment cost of Tata Sons' stake in the group's listed companies as reported by the company in its annual report and captured by the Capitaline database. The latest value is based on the company's market capitalisation as on May 4 this year.

This has raised hopes that the group holding may start making reasonable financial returns on its equity investment in Tata Steel and Tata Motors over the year. Together, these two companies account for nearly 60 per cent of all Tata Sons' equity investment in the group's listed companies. Tata Sons has invested nearly ₹58,600 crore as equity in the listed companies.

Tata Motors is the single-biggest investment by the group holding company followed by Tata Steel and Tata Power. Tata Sons has so far invested ₹22,184 crore in Tata Motors, accounting for nearly 38 per cent of its all equity stakes in the group's listed companies. Tata Sons' equity investment in Tata Steel is around ₹13,567 crore.

## IPL...

Sajal Gupta, vice-president, media buying, digital at Zenith, a national media agency, said that digital brands would be the big losers since a platform such as the IPL would not be available to advertise at least for now. "Brands such as Cred were using the IPL this year really well to build saliency. Their campaigns were also much-talked about on social media. The suspension will certainly hit digital brands, who've grown during the pandemic," he said.

IPL chairman Brijesh Patel told *Business Standard* that the league would seek an alternate window to hold the tournament this year. "This is a temporary suspension. We will see when the next best window is available to hold the tour-

nament. It will definitely not be held this month," Patel said. India reported over 350,000 new coronavirus cases on Tuesday with fatalities at nearly 3,500. The IPL has been in turmoil after cricketers R Ashwin, Adam Zampa, Kane Richardson, Andrew Tye and Liam Livingstone decided to exit the tournament last week.

This week, Monday's match between Kolkata Knight Riders (KKR) and Royal Challengers Bangalore had to be postponed after two KKR players tested positive. Wednesday's header between Chennai Super Kings (CSK) and Rajasthan Royals was also rescheduled after CSK's bowling coach tested positive for Covid-19. Organising the IPL in the second half of the year may not be easy as India stares at a third wave of the pandemic, said media industry experts. Also, foreign players, who are a big draw at the IPL, may not want to return to India just yet. Anyway, the second half of the year looks busy for cricketers with important tournaments such as the World Test Championship final and the T20 World Cup lined up.

## India, UK...

"Confirm our intent to finalise the pre-negotiation scoping phase for a comprehensive free trade agreement by the end of 2021. This will resolve market access issues, boost exports and strengthen our trade partnership across a comprehensive range of areas. Both sides will undertake respective scoping, consultations and domestic processes, with consideration of the opportunity arising from an interim agreement, to achieve the early gains of the ETP," the MEA said.

Both countries set an ambitious target of more than doubling the bilateral trade by 2030. As the UK tries to build a post-Brexit trade relationship with the world, India till date is the largest market the UK has committed to negotiate a trade deal with.

"Our countries are already close partners and friends, and today's announcement of a 10-year roadmap working towards an FTA will take the bilateral relationship to the next level. In the immediate term, the focus will rightly be on removing market access barriers.

**Transfer of Equity Shares of the Company to Investor Education Protection Fund**

Members of the Company are hereby informed that pursuant to the provisions of Investor Education Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 ("the Rules") the final dividend declared during FY 2013-14 which has remained unpaid/unclaimed shall be credited to the Investor Education and Protection Fund (IEPF). The corresponding shares on which the dividend is unpaid/unclaimed for seven (7) consecutive years from FY 2013-14 upto FY 2020-21 shall also be transferred to the IEPF Suspend Account as per the procedure set out in the Rules.

In compliance with the Rules, the Company has communicated individually by way of Registered Post to the concerned shareholders about the details of the shares liable to be transferred to IEPF. The concerned shareholders may also visit our website <https://www.coforgetech.com/investors/statutory-disclosures#IEPF> to verify the details of the unclaimed/unpaid dividend and the shares liable to be transferred to IEPF.

The members may note that Subsequent to the transfer of shares to IEPF Suspend Account, the original share certificate(s) registered in the name of the members will be deemed cancelled and non-negotiable. In case the shares are held by members in Physical Form then the Company shall issue duplicate share certificate(s) for the purpose of transfer of Shares to IEPF Suspend Account as per the Rules. Once these equity shares are transferred to IEPF Suspend Account by the Company, such shares may be claimed by the concerned Shareholders only from the IEPF Authority by following the procedure prescribed under the aforementioned IEPF Rules 2016.

In view of the above, the members are requested to claim the final dividend for FY 2013-14 before the same is transferred to the IEPF. The members are further advised to approach the Investor Service Department of the Company on or before July 20, 2021 to enable us to process the claim request before the due date of transfer.

The members may further note that the details made available by the Company on its website shall be deemed as adequate notice in respect of issue of duplicate share certificate(s) by the Company for transfer of shares to IEPF. Please note that no claim shall lie against the Company in respect of unclaimed dividend amount and shares transferred to IEPF Authority pursuant to the said Rules.

For any queries on the above matter, the members are requested to contact the Investors Service Department of the Company at 8, Balaji Estate, Third Floor, Guru Davi Das Marg, Kalkaji, New Delhi - 110019, Tel. no.: 011-41029297; Email: [investors@coforgetech.com](mailto:investors@coforgetech.com)
